1 INTRODUCTION AND PURPOSE

1.1 Introduction

The Army has developed and implemented the Integrated Personnel and Pay System – Army (IPPS-A), a Web-based tool, available 24 hours a day, accessible to Soldiers, Human Resources (HR) professionals, Combatant Commanders, personnel and pay managers, and other authorized users throughout the Army.

Team CACI has been selected as the System Integrator (SI) to ensure successful maintenance of IPPS-A.

1.2 Document Purpose

The purpose of this document is to provide an overview of the inbound interface from Medical Operational Data System (MODS) to IPPS-A.

1.3 System Description

The MODS is an MHSS objective system that provides the Army Medical Department (AMEDD) with an integrated automation system that supports all phases of Human Resource Lifecycle Management in both peacetime and mobilization. This online system provides commanders, staffs and functional managers of AMEDD organizations with a real time source of information on the qualifications, training, special pay and readiness of AMEDD personnel.

MODS currently maintains sixty system interfaces which are updated on a daily, weekly, monthly, or semi-annual basis. These interfaces bring in over 75% of the data used in the system. The AMEDD community has a powerful tool with which decision makers and managers can affect their work requirements quickly. As a desktop resource for the personnel manager, MODS places critical assignment, training, and qualification information easily accessible. Time spent acquiring data can now be used in analyzing the information.

1.4 Related Documents

Table 1-1 lists key related documents for this design document.

Table 1-1 Related Documentation

Document Title	Relationship

MODS_IPPS_A R3 SIA_20230203	System Interface Agreement (SIA)

1.5 DIIF Information

Maintained by the PMO.

2 DATA ACQUISITION ASSUMPTIONS

2.1 Scope

MODS inbound provides medical profile data to support the IPPS-A requirements and processes as outlined in the MODS SIA.

3 SOURCE DATA MODEL

The source data model is outlined in the MODS SIA.

4 IPPS-A Source/Target Overview

MODS inbound data is loaded into the IPPS-A medical and person profile application areas.

4.1 Functional Conceptual/Detailed Designs

No changes or not applicable to this resubmission.

4.2 Data Flow Diagram

No changes or not applicable to this resubmission.

5 INTERFACE ASSUMPTIONS

No changes or not applicable to this resubmission. The MODS inbound interface exists in IPPS-A since Release 2.

5.1 External System Dependencies

No changes or not applicable to this resubmission. Dependent on domain values to be loaded/updated first.

5.2 Data Profiling

No changes or not applicable to this resubmission.

5.2.1 Unit Test Case Scenarios

No changes or not applicable to this resubmission.

5.3 Interactions with IPPS-A Data

No changes or not applicable to this resubmission. Data Quality procedure will determine if the service member exists in IPPS-A and the inbound data can be inserted into IPPS-A. As a general pattern, the inbound medical data is loaded into an _IB staging tables. An application engine program IP_INT_HOS loads the data into the target application tables. Medical data is used in reporting, topics, Point-to-Point outbounds, Restrictions and other processes within IPPS-A.

6 MAPPING INFORMATION

6.1 Mapping

CDRL_07-001_IDD_N017_R3_v2.2_20250326_

The MODS inbound mapping document contains the following sections:

1. The Overview tab: Overall high-level mapping information, including the IPPS-A leads and source system owners.
2. About workbook tab: Overview of the elements in the mappings with section by section descriptions.
3. MODS Processing Logic: Overall rules and consideration for data handling and processing.
4. The Data Quality tab: Data checks which should be reviewed and logged if items should not pass based on rules provided. Note that some data quality checks may need to allow other data to pass, even if a particular data element should fail, unless it is a key element in the target table.
5. The source to target mapping that shows the source tables/fields to target tables/fields, the target data structure (key fields, fields with edit/prompt tables or translate values, field sizes and types and transformation logic where required).
6. Domain Crosswalk tab: this section is not usually filled in. If a crosswalk is used, it is identified in the mapping. This section could be used if a new crosswalk is needed.

6.2 Data Delta Detection

Only new data and updates in the data occur as per the mapping.

6.3 Unloads

No changes or not applicable to this resubmission.

6.3.1 Filter Elements/Rules

No changes or not applicable to this resubmission.

6.4 Data Quality

No changes or not applicable to this resubmission. Described in the mapping.

6.4.1 Reject

No changes or not applicable to this resubmission. Described in the mapping including:

1. SSNs that do not contain an EMPLID match in IPPS-A. Soldier records must exist.

2. Invalid dates
3. Invalid domain codes

6.4.2 Defaults

No changes or not applicable to this resubmission. Described in the mapping.

6.4.3 Monitoring

No changes or not applicable to this resubmission.

6.4.4 Reporting to Source/Target System

No changes or not applicable to this resubmission.

6.4.5 Operational Reports for Sustainment

No changes or not applicable to this resubmission.

7 INTERFACE FRAMEWORK/METHODS

7.1 Error Logs

No changes or not applicable to this resubmission.

7.2 Exception Handling

No changes or not applicable to this resubmission.

7.3 Resends / Resubmits

No changes or not applicable to this resubmission.

7.4 Plan / Plan parameters and Overrides Needed

No changes or not applicable to this resubmission.

7.5 DB Objects and Supporting Architecture

No changes or not applicable to this resubmission.

8 INTERFACE CONFIGURATION REQUIREMENTS AND DEPENDENCIES

8.1 Crosswalks

No changes or not applicable to this resubmission.

8.2 Configuration

No changes or not applicable to this resubmission.

8.3 Validation

No changes or not applicable to this resubmission.

9 SCHEDULING CONSIDERATIONS

No changes or not applicable to this resubmission.

9.1 Dependency listing

No changes or not applicable to this resubmission.

10 AUDIT / REPORTING FRAMEWORK

No changes or not applicable to this resubmission.

10.1 OBIEE considerations

No changes or not applicable to this resubmission.

10.2 PS Reports/Views

No changes or not applicable to this resubmission.
