Remaining Legacy System Subsumptions

IPPS-A will subsume or off-ramp from several legacy systems as new capabilities are developed and deployed. Table 1 outlines the remaining legacy systems planned for subsumption in accordance with the following terminology:

- **Full Subsumption** – IPPS-A will fully replace the capability and/or data to enable the U.S. Army to decommission or sunset the systems once the needs are met by IPPS-A.
- **Partial Subsumption** – IPPS-A will replace one or more modules, not full capability. The legacy system may or may not be sunset once IPPS-A completes the partial subsumption.
- **Off-ramp System** – IPPS-A will replace capabilities to enable U.S. Army Soldiers to be processed using capabilities in IPPS-A. IPPS-A users will discontinue use of the legacy system and the legacy system will remain operating the capabilities for non-IPPS-A users.

The planned subsumptions remain subject to change. IPPS-A has prioritized the subsumption of My Unit Pay (MUP) and three Orders Writing Systems for completion by the end of FY27 to include AORS, RLAS, and MOBCOP-U[DAMPS module]. All future subsumptions will be reviewed and prioritized annually.
