U.S. ARMY REQUEST FOR INFORMATION

Inviting U.S. industry and private capital to shape U.S. Army modernization

DATE ISSUED: February 27, 2026

DEADLINE FOR RESPONSES: To be considered, your response must be received by 5:00 PM EST on April 02, 2026.

DEADLINE FOR QUESTIONS: Questions about this request will not be considered after 5:00 PM EST on March 26, 2026.

Executive Summary: Strategic Partnerships to Mobilize Private Capital for Army Priorities

The U.S. Army cannot rely solely on annual congressional appropriations to solve its critical modernization requirements. We must unlock the overwhelming advantage resident in American industry and capital markets by deploying private-sector financing and expertise against the Army's longstanding challenges and projects critical to Army priorities, including: (1) Energy Resilience and Dominance; (2) Organic Industrial Base; (3) Strengthening Logistics and Supply Chains; (4) Real Assets and Facilities Utilization; (5) Advanced Manufacturing & Technology Adoption; and (6) Critical Minerals and Resource Development. Therefore, the Army invites leaders from the finance, technology, and industrial sectors to co-create a new public-private partnership frontier centered around capital markets to unlock the full potential of the Army's vast enterprise. We expect that the most compelling responses will present a clear path to a diversified customer base across commercial and government markets and in which the Army could potentially act as a stable, long-term partner or anchor customer to de-risk the initial investment and help to scale the enterprise. Responses should be commercially viable and self-sustaining and not reliant on the Army (i.e., appropriated funds) as the sole source of return on investment.

This Request for Information (RFI) is a call for strategic and actionable input. We are soliciting specific insights and options centered around financial structures and partnership models that are commercially sustainable and able to accelerate the Army's modernization and transformation.

Specifically, we want to better understand:

- **Operating models** amenable to co-investment by the Army and the private market actors.
- **Public-private partnership responses** to create structures and solutions for long-term self-viability and success.
- **Contracts, agreements, and lease structures** optimized for dual-use assets and infrastructure.

1.2. Strategic Investment Pillars

We are looking for complete ideas for how to finance, partner, and structure business deals to solve our modernization challenges across the entire enterprise. As an example, these partnerships may involve the Army serving as a business partner. In others, it may involve the Army serving as an anchor customer that will catalyze the development of scalable, technology-enabled commercial solutions. Examples of areas we are interested in include:

- **P.1 – Energy Resilience and Dominance:** Developing reliable energy, both through building independent power grids and energy storage as well as deploying commercially scalable, software-defined, and resilient energy systems.
- **P.2 – Organic Industrial Base:** Expanding existing facilities and incentivizing investments in automation, robotics, advanced materials, and other critical technologies the Army requires for its core mission and that will enable the OIB to act as a supplier of critical components to the commercial sector and broader Defense Industrial Base.

- **P.3 – Strengthening Logistics and Supply Chains:** Developing streamlined logistics capabilities and scaling cutting-edge dual-use technological solutions like autonomous logistics.
- **P.4 – Real Assets and Facilities Utilization:** Maximizing utility from Non-Excess Underutilized Army land through long-term Enhanced Use Leases for projects like data centers, warehousing, and industrial parks to create rapid prototyping, testing, and manufacturing hubs for private companies supporting the Army's mission.
- **P.5 – Advanced and Flexible Manufacturing & Technology Adoption:** Manufacturing advanced electronics, specialized materials, and other military- or dual-use items in the U.S. through joint projects to build advanced industrial facilities. These efforts will embrace flexible manufacturing for adaptable and resilient production across a range of critical sectors and accelerate domestic industries through durable demand signals. To clarify the scope of opportunities, the Army is interested in a broad range of flexible and dual-use manufacturing capabilities. The goal is to establish production lines that can pivot between military and commercial needs, ensuring industrial base resilience.
- **P.6 – Critical Minerals and Resource Development:** Developing partnerships to integrate dual-use mining, processing, and extraction technologies for critical natural resources, including minerals, on Army lands.

2. How to Respond

2.1. Submission Instructions

Email your response to usarmy.pentagon.mbx.strategic-capital-initiative@army.mil with the subject line: "RFI Response: Private Capital and Market Participant Investments". Responses must be received by 5:00 PM EST on April 02, 2026.

2.2. What to Include in Your Response

- **Point of Contact:** Provide the name, title, and contact information for a single point of contact.
- **Your Experience:** Describe your organization's experience with similar large-scale investment, partnership, and infrastructure projects, including examples of past success.
- **Your Response (White Paper):** Detail your idea for a financial or partnership model, addressing an "Area of Interest" from section 1.2. Your response should cover:
 - **Financing and Capital Structure:** Describe the optimal capital structure for the project / solution (e.g., equity, debt, grants, purchase commitments)? What are key considerations for risk allocation and sharing between the public and private sectors? What is the proposed model of government involvement (e.g., off-take, anchor customer, lessee, etc.)?
 - **Governance and Operating Models:** Please propose an appropriate legal and operational framework for the public-private arrangement. How would the various entities be incentivized to ensure alignment and long-term success?
 - **Contracting Ideas:** For informational purposes, what types of contractual or other agreement vehicles (e.g., Other Transaction Authority, Enhanced Use Lease, co-production, etc.) would be best suited for this model? How might current federal acquisition regulations impact your response?

- **Investment Attractiveness:** What could the government do, specifically, to make projects more attractive and less risky for private investors?
- **Partnerships for Dual-Use Products:** Where applicable, how can we create partnerships for products with both military and commercial uses?
- **Procurement as a Commercial Catalyst:** What procurement reforms and contracting mechanisms would most increase investment in Army-relevant technologies?
- **Speed to Market:** Explain when the concept will be Initially Operational Capable (IOC) and Fully Operational Capable (FOC). Identify historical challenges that have inhibited similar projects in the past and specific USG support that would accelerate FOC status. What contracting mechanisms and reductions in regulatory burdens would incentivize the development? Where possible, suggest a small, manageable trial project to prove your idea works, including goals, timeline, and success metrics.
- **Economic Policies:** Propose new or existing tax and economic policies that could be leveraged to incentivize private investment on Army installations.
- **Anticipated Diligence:** List known information requirements to support due diligence or further feasibility determinations in connection with the proposal contemplated by your response.

3. Special Conditions

- **This is a Request for Information Only:** This is for market research and is not a formal contract offer. Your response cannot be accepted to form a binding contract. The DA is not at this time seeking proposals. By participating in the RFI process, all responders agree to hold the United States of America, its officers, employees, and advisors harmless from all claims, liabilities, and costs related to all aspects of this RFI. Under no circumstances shall the United States of America be liable for any costs, real estate brokerage commissions, finder's fees, or other forms of compensation related in any way to activities undertaken by any person as a result of or in response to the RFI; all costs incurred in responding to this RFI will be solely and exclusively at the interested party's expense. Not responding to this RFI does not preclude participation in any future Request for Proposal (RFP), if one is issued.
- **Discussions:** We may contact some or all responders to ask clarifying questions. Submission of a response does not guarantee the opportunity to participate in discussions.
- **Responses Considered Public Documents:** Responses will not be made public by the DA except in accordance with law. However, responses may be disclosed by the DA to any person, upon request, to the extent required or authorized by the Freedom of Information Act (5 U.S.C. § 552). Information submitted may be afforded protection from public disclosure if the respondent identifies the same as "proprietary" with supporting justification and requests such protection at the time of submission. Each page that is considered proprietary must be clearly marked as such. The U.S. Army is committed to protecting commercial proprietary information and will work with submitting entities to prevent its improper disclosure.

4. Limitations

We believe the information in this document is accurate but do not guarantee it. Companies responding to this request should verify all information themselves.

5. Waiver

The DA reserves the right to waive informalities and irregularities in responses received if it is determined that it is in the best interest of the Government to do so.

6. Point of Contact

All questions and communications about this RFI must be submitted by email to usarmy.pentagon.mbx.strategic-capital-initiative@army.mil before 5:00 PM EST on March 26, 2026.
