

Performance Work Statement (PWS) for
FIXED LINE TELECOMMUNICATIONS SERVICES
At NAVSTA Rota / COMNAVACTS SPAIN.
Provided by NCTAMS LANT DET ROTA SPAIN

1.0 INTRODUCTION

1.1 NCTAMS LANT DET Rota Mission

Provide secure and reliable, classified and unclassified, voice, messaging, video and data telecommunications to surface, subsurface, air and ground forces in support of Command, Control, Computer, Communications and Intelligence (C4I) for real-world operations and exercises to U.S. Naval, Joint and Coalition operating forces worldwide.

1.2 Overview

This Performance Work Statement (PWS) specifies the requirement to provide reliable and responsive around-the-clock commercial telecommunications services at NAVSTA Rota for official users and some unofficial users in accordance with common practices and standards provided to other commercial/defense entities in Spain of similar size and scope.

1.3 Place of performance

NAVSTA Rota, Spain

1.4 Period of Performance

The ordering period will be from 25 June 2026 to 24 June 2031.

2. SCOPE

NCTAMS LANT DET ROTA is the Activity Providing Telephone Service (APTS) to all US Navy activities within the COMNAVACTS SPAIN area of concern. Primary customers include NAVSTA Rota, [REDACTED], [REDACTED] US Naval Support Elements on the Iberian Peninsula (Madrid, Lisbon, and Valencia), as well as [REDACTED], and other tenant commands on base.

3.0 TECHNICAL REQUIREMENTS

3.1 General

This PWS defines the contractor efforts required to provide standard commercial telecommunications services to official and some unofficial users including phone services, Public Switched Telephone Network (PSTN) trunks consisting of Integrated Digital Services Network Primary Rate Interface (ISDN PRI) service with number and long distance access, PSTN Number assignments, PSTN lines, cable pair use and maintenance, fiber optic cable installation and maintenance, provision of telephone instruments and maintenance, ISDN Basic Rate Interface (BRI) service for Video Teleconferencing (VTC), and Point-to-Point (PTP) and switched data circuits at NAVSTA Rota and other US Navy activities within COMNAVACTS SPAIN AOC.

3.2 Specific Requirements

Quantities for types of service are provided in the attached spreadsheet that lists services by category and customer.

3.2.1

The contractor shall provide E-1 PSTN (ISDN PRI) trunks on the NCTAMS LANT DET Rota telephone switch to allow local and long distance calling.

3.2.2

The contractor shall provide PSTN number assignments. Number ranges will have additional contiguous numbers available to support official requirements.

3.2.3

The contractor shall provide outside cable pairs for the Navy's lease and use, maintain those pairs in good working order. The contractor shall perform the necessary cross-connections into the outside plant when cable pairs are solicited.

3.2.4

The contractor shall provide analog and digital handsets and maintain them in good working order.

3.2.5

The contractor shall provide GPON service where requested, and related maintenance. Provision shall permit Internet access to authorized customers, to include installation and configuration of GPON routers at the user location.

3.2.6

The contractor shall provide analog PSTN lines with long distance access.

3.2.7

The contractor shall provide Digital Network (ISDN) Basic Rate Interface (BRI) for VTC terminals and in-out-dial trunking to and from the Public Switched Telephone Network (PSTN) where solicited. ISDN BRI shall include appropriate numbering plan and long distance access.

3.2.8

The contractor shall provide Point-To-Point (PTP) circuits; specifically, 2-wire and 4-wire, using standard analog and digital technologies.

3.2.8.1

The contractor shall provide switched Ethernet service between designated points, at the contracted connection speed.

3.2.9

The contractor shall provide moves and changes to wall plate locations, cross connects, replace damaged instruments, install instruments, install and test inside plant wiring, to include installation of voice and data (Ethernet) drops.

3.2.10

The contractor shall provide adapters and similar hardware when required to interface US telecommunications equipment to the local telecommunications network.

3.2.11

The contractor shall provide depot level maintenance support for the base telephone system switching equipment and peripheral sub-systems, specifically for the replacement of failed printed circuit cards and similar hardware forming part of the voice switching network and associated power supply.

3.3 The contractor shall adhere to the response times for provision of service as noted in the table of response times, appendix A.

4.0 MATERIAL AND EQUIPMENT

4.1 Contractor Furnished Material (CFM)

The contractor shall provide all material required to accomplish the requirements defined in the PWS.

4.2 Government Furnished Equipment (GFE)

None.

5.0 DELIVERABLES

5.1 General documentation

Except where noted below, all deliverables must be presented in formats readable with Microsoft Office applications.

5.2 Post installation documentation

The contractor shall provide as-built drawings in AutoCAD LT format within 30 days completion of any infrastructure installation work, using labeling and symbols as indicated in standards provided by the Base Communications Office. This documentation is not-separately-priced.

5.3 Traffic analysis quarterly report

The contractor shall generate and provide traffic analysis (loading figures) for each ISDN Primary Rate Interface provided under this contract. Traffic analysis figures shall be reported for at least three working days each quarter and must include high traffic hours on each date. Reports must reflect percentage of full capacity in numerical and/or graphical format.

5.4 Invoices

The contractor shall provide invoices in sufficient detail to permit billing verification. Invoices for toll traffic (i.e., any metered services) shall include as a minimum, the following data:

CALLING NUMBER

TIME OF CALL INITIATION

NUMBER CALLED

CALL DURATION

CONNECTION CHARGE (if applicable) --- (NOTE: normally only for cellphone traffic)

COST PER UNIT/TIME

TOTAL COST OF THE CALL

The telephone bills and invoices shall include detailed information regarding the telephone services usage, in accordance with the standard commercial practices. The invoice shall be structured as to easily allow the Government to compare charges are in accordance with the ELIN prices.

With regard toll charges under ELIN X006 & X007, the contractor agrees to provide the discounts in Exhibit F, as compared to the commercial catalog prices offered to the public. In order to validate that the agreed discount is being applied, the contractor shall furnish the US Government a copy of the commercial price catalog upon contract award and with every update thereafter. Invoices for toll traffic shall be structured as to allow the Government to easily compare the invoiced rates against the public commercial catalog.

With regard to all other ELINs, in the event that commercial catalog rates offered to the public decrease below the prices listed in Exhibits A-E, the contractor agrees to honor such lower prices in lieu of those listed in Exhibit A-E. In the event that commercial catalog rates offered to the public increase above the prices in Exhibits A-E, the contractor agrees to honor the prices listed in Exhibits A-E.

Please address all payments inquiries to the following POC listed below. The vendor must send another copy of the invoice (via fax or email) to CBPO for action.

[REDACTED]

6.0 SECURITY/BASE FACILITY ACCESS

Subject to military security requirements, the U.S. government shall permit contractor personnel access at all times to perform system troubleshooting, repair and testing, as required. The contractor shall submit at least 30 days in advance to the Director, Base Communications Office a list of personnel requiring access at each site during the performance of work. The list must be accompanied with documentation required by base security for entry to the base to include:

- Copy of ID card/Drive License
- Current Address
- Court House Penal Certificate two years validity
- Copy of company vehicle registration
- Vehicle year make and model
- Vehicle license Plate number
- Vehicle insurance company name and policy number
- Vehicle insurance expiration date

Base or facility passes and personal vehicle will be issued for a temporary basis. No permanent base passes will be issued. The work performed will be UNCLASSIFIED. The areas where the equipment is located may be classified in that case the contract personnel will be escorted to perform their duties.

Contractor's employees shall comply with all applicable Government regulations, policies and procedures including but not limited to fire, safety, sanitation, environmental protection, security, flag officer courtesy, "off limits" areas, wearing of parts of military uniforms, and possession of firearms when visiting or working at Government facilities.

APPENDIX A – RESPONSE TIMES

SERVICE REQUIRED	DELIVERY / RESPONSE TIME	SOW PARA. REFERENCE
Provide and maintain ISDN PRI Trunk Lines	20 Working Days	3.2.1
Provide and maintain PSTN number block	5 Working Days	3.2.2
Provide and maintain OSP copper cable	20 Working Days	3.2.3
Install/Repair/replace analog or digital voice instrument	1 Working day	3.2.4
Provide and maintain ADSL service (per line)	5 Working Days	3.2.5
Provide PSTN analog lines	1 Working Day	3.2.6
Provide ISDN BRI service for VTC and similar applications (per line)	2 Working Days	3.2.7
Provide point-to-point and switched circuits	3 Working days	3.2.8
Provide Moves, Changes at cross-connect	3 Working Days	3.2.9
Provide and install/configure adapters	5 Working Days	3.2.10
Provide Switch Maintenance (card repair)	24 hours/365 days	3.2.11
Provide Switch Diagnostic Assistance – On-site	Per-incident when requested	3.2.11
Provide Data Item Documentation	As required	5
