

SOW for Broach Bronze Sleeve – 35234FD-9 Rev E

RIA-JMTC would like to have item #4 from the attached drawing manufacture. This is not required to be in 16" and be divided into 8" lengths if the straightness isn't able to be achieved. Ideally, one would finish the ID and then turn the OD to meet the ID. JMTC would like to request these to come in match sets and marked as such.

Vendor will ship the parts to RIA-JMTC in appropriate container to ensure the parts will not be damaged.
