

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
NASA SHARED SERVICES CENTER

RECOMMENDATION AND DETERMINATION TO SOLICIT FROM ONE SOURCE
OR BRAND NAME

PICK ONE

Sole Source:

☒ I recommend that NASA, NASA Shared Services Center negotiate with Electrical Equipment Company (EECO) only for FY26 LARC Rockwell Renewal. The total estimated cost of this effort is [REDACTED] and the estimated period of performance or lead-time for delivery is 03/01/2026 - 02/28/2027.

OR

Brand Name Justification:

☐ I recommend that NASA, NASA Shared Services Center negotiate only with vendors who can provide the subject brand name from Manufacture Name for Product being purchased. The total estimated cost of this effort is \$Dollar Amount and the estimated period of performance or lead-time for delivery is Date.

This recommendation is for the acquisition of supplies or services determined to be reasonably available from only one source/only one manufacture. Competition is impractical for the following reasons (please answer the questions below):

1. **What are the reasons for soliciting only the suggested source/suggested brand name?** Please provide the unique characteristics of the items or services along with the supporting rationale and the market research performed to substantiate your reason for the suggested source/brand name.

Electrical Equipment Company [EECO] is the only vendor qualified to support the Rockwell Automation systems and to provide continued support to already in use systems deployed in the testing environments across NASA Langley Research Center (LaRC). NASA LaRC has 60-70 automation control systems utilizing Allen-Bradley hardware and Rockwell Automation software which the Center has chosen as their standard product line for these systems. Most if not all of these systems are considered safety critical and must remain functional to maintain safe operations. In addition, the Civil Servant personnel require access to Remote Support Services that are only provided by Rockwell Automation. The service agreement being procured will provide unlimited direct-access phone support 8am to 5pm Monday through Friday and 24/7 on-line access to the knowledge base and downloadable software updates.

2. **What is the impact to the government if another vendor/brand is used?** Include any dollar, schedule, or compatibility impacts if possible.

Deviating away from Allen-Bradley/Rockwell Automation would require extensive research, time, effort and money to replace LaRC's current automation control systems. It would also result in a work stoppage so that the implementation of the new software and hardware can be done which would drive a higher overall cost of this purchase and loss in production time a stated before. To pursue the evaluation or procurement of an alternate service would be both operationally cost and time prohibitive.
