

COMMERCIAL SOLUTIONS PROPOSAL (CSP) TEMPLATE

CONTENTS: COVER SHEET, TECHNICAL PROPOSAL, PRICE PROPOSAL, STATEMENT OF WORK, AND ADDITIONAL DOCUMENTATION

1. Cover Sheet: The following information shall be contained in a stand-alone cover sheet:

- a. Commercial Solutions Opening (CSO) number and Spiral number and title
- b. Full company name and address
- c. CAGE code
- d. Unique Entity ID number
- e. Business Size Classification and socioeconomic status
- f. Point of contact, name, title, phone number, and email address

2. Technical Proposal:

- a. The Technical Proposal shall describe the background and objectives of the proposed work, the approach, deliverables, the resources needed to execute, and data rights assertions. Include the nature and extent of the capability and how it addresses the Spiral Area of Interest (AOI), the innovative aspect of the solution, the intended results, and address possible integration or testing needs. Include ancillary and operational considerations such as certifications, algorithms, and any engineering/software development methodologies to be used. Provide a graphic display of major program milestones. Measurable milestones shall capture key activity points and shall clearly articulate milestone completion dates relative to the start of the effort.
- b. Offerors seeking an Other Transactions for Prototype (OTP) shall refer to Section 11 of the AFRL Enterprise CSO for additional criteria for 10 USC 4022 OTP and address the elements therein.
- c. Government Support Required: Identify the type of support, if any, the Offeror requests of the Government, such as facilities, equipment, data, and information or materials.
- d. The issuing Technical Directorate reserves the right to ask for additional technical information. Refer to the Spiral, or Step-Two Request for CSP, instructions for deviations from this template.
- e. Due to the varying AOIs and potential solutions, Technical Proposal page limitations and formatting requirements will be identified in Spiral or Request for CSP.

3. Statement of Work (SOW):

- a. The SOW shall be a separate and distinct document suitable for incorporation into the contract or OTP. Pages shall be numbered, and the initial page shall identify the document date beneath the title. DO NOT INCLUDE PROPRIETARY INFORMATION IN THE SOW.
- b. The proposed SOW shall accurately describe the work to be performed. The SOW shall contain a summary description of the technical methodology as well as the task descriptions, but not in so much detail as to make the SOW inflexible. The SOW shall include the following sections:
 1. *OBJECTIVE*: This section is intended to provide a brief overview of the project, rationale for why the work is being pursued and identify the overall objective(s) the offeror intends to accomplish.
 2. *SCOPE*: This section describes the AOI to be investigated, goals, and milestones for the effort. Include a graphic display of major program milestones.
 3. *BACKGROUND*: This section includes any information, explanations, or constraints to provide context for the project tasks and requirements. This section shall describe the relationship with previous and/or ongoing efforts, as applicable.
 4. *TASKS AND TECHNICAL REQUIREMENTS*: This section provides a detailed description of the tasks necessary to perform the proposed work. These tasks will represent the work to be performed on any potential contract or OTP award and thus shall be considered contractually binding. This section shall be developed in an orderly progression, presented in sufficient detail to establish the feasibility of accomplishing the overall program goals. Note: The Government reserves the right to modify and negotiate the language in the SOW prior to any potential contract or OTP award.
 - 4.1. Task descriptions shall be definite, realistic, and clearly stated. Use the phrase “the contractor/performer shall” whenever the work statement expresses a provision that is binding. Use “should” or “may” whenever it is necessary to express a declaration of purpose. Use “will” in cases where no offeror requirement is involved (e.g., power will be supplied by the Government).

4.2. Do not use acronyms or abbreviations without first defining them.

- c. Due to the varying AOIs and potential solutions, the Spiral, or Request for CSP, instructions will specify SOW page limitations.

4. Price Proposal: The following describes the Price Proposal requirements:

- a. The Price proposal shall include pricing information sufficiently detailed for meaningful evaluation of the proposal. **The Price Proposal does not have a page limit restriction.**
- b. Proposed solutions are considered commercial items, technologies, or services; therefore, the requirements of the Truthful Cost or Pricing Data Act are not applicable. However, other than certified cost or pricing data may be requested if the Contracting/Agreements Officer determines additional information is necessary to support a determination of a fair and reasonable price.
- c. The responsibility for providing adequate supporting data and attachments lies solely with the offeror. Further, the offeror shall also bear the burden of proof in establishing reasonableness of proposed prices; therefore, it is in the offeror's best interest to submit a fully supportable and well-prepared price proposal.
- d. The Offeror shall provide an electronic version of the pricing model in a Microsoft (MS) Excel editable format. The electronic pricing model shall include active formulas demonstrating the mathematical calculation of the proposed price.

5. Additional Proposal Submission Content: Provide the following stand-alone documents files, as applicable. These documents do not affect, or add to, the page limits of the Technical Proposal, SOW, or Price Proposal.

- a. Small Business Subcontracting Plan: Large business offerors shall submit either an individual subcontracting plan and/or master subcontracting plan (as applicable) in accordance with FAR 52.219-9, Small Business Subcontracting Plan, DFARS 252.219-7996, Small Business Subcontracting Plan (DoD Contracts) – Basic (DEVIATION 2026-O0037), and DFARS 252.219-7997, Small Business Subcontracting Plan (Test Program) (DEVIATION 2026-O0037), with their proposal. If the Small Business Subcontracting Plan is not initially acceptable, the Contracting Officer may request additional information regarding the Small Business Subcontracting Plan.

- 117 b. Science and Technology Protection (S&TP). Refer to Section 11 of the AFRL
118 Enterprise CSO. The offeror shall complete and submit S&TP Appendices 2-4 as part
119 of its proposal.
120
- 121 c. Organizational Conflict of Interest: The offeror shall perform an Organizational
122 Conflict of Interest (OCI) analysis and submit the results of that analysis as part of
123 its proposal. Specifically, the offeror shall analyze the planned acquisition for
124 actual or potential OCI situations associated with the performance of the offeror, its
125 proposed teammate(s), or subcontractor(s) under any contract or OTP that the
126 offeror/teammate(s)/subcontractor(s) has been, or may be, awarded by any other
127 federal agency. The offeror shall describe the methodology used to identify actual
128 or potential OCI issues. If the offeror identifies any actual or potential OCIs, it shall
129 also provide an OCI Mitigation Plan which will be incorporated as an attachment to
130 any resulting contract or OTP. Any proposed avoidance or mitigation techniques
131 shall be consistent with FAR 9.5 and the most recent decisions of the Government
132 Accountability Office (GAO) and the U.S. Court of Federal Claims.
133
- 134 d. Responsibility: The offeror shall provide information that presents a brief verifiable
135 self-assessment of the areas of responsibility described in FAR 9.104 and as
136 supplemented by the DFARS and DAFFARS.
137
- 138 e. Data Rights: Identify any assertions related to restriction, use, release, or disclosure
139 of data and/or computer software and computer software documentation that will
140 be delivered to the Government in the course of contract or OTP performance.
141 Utilize the format at DFARS 252.227-7992 (DEVIATION 2026-O0036). Rules
142 governing these assertions are prescribed in DFARS clauses 252.227-7989, -7990,
143 and -7992 and may be accessed at www.acquisition.gov and
144 https://www.acq.osd.mil/dpap/dars/dfars_far_overhaul_class_deviations.html.
