

STATEMENT OF WORK

1. Objective/Requirements

PitchBook data feed subscription is required to perform congressionally mandated due diligence functions to protect national security as described during the February 26, 2025 House Committee on Small Business hearing titled “Fostering American Innovation: Insights into SBIR/STTR Program”. The objective of this procurement is to gain access to vital data contained within PitchBook’s corpus for three NASA users via user interface through the companies online portal. Specifically, this data is used to find potential connections between submitting firms and countries of concern as defined by the Department of State. This data is used to identify any potential connections and the risks they pose to the nefarious transfer of U.S. funded technological innovations to countries of concern.

2. Characteristics, Scope, and Specs

The information accessible to NASA users for each firm researched must include last known details related to:

- Firm titles and doing business as (DBAs)
- PitchBook Unique Identifier
- Company ID
- Company Names
- Company Name
- Company Former Name
- Company Also Known As
- Ownership Status
- Company Financing Status
- # Employees
- Employee History
