

Transform the Organic Industrial Base (OIB)

End State

A modernized, agile, and resilient OIB that delivers ready combat forces, supports Army Transformation Initiatives, prioritizes core capability, and fosters strategic industry partnerships to ensure lethality, readiness, and adaptability for future Army requirements.

HQDA OIB Integrations Cell: Central hub responsible for synchronizing the effort ISO Army's strategic objectives

HOW WE
GET THERE

Re-Imagine
the OIB

OIB Transformation

Strategic Alignment & Stakeholder Engagement: Sync stakeholders across DoW, Congress, and industry to ensure unified priorities and identify partnership opportunities.

Acquisition & Capability Planning: Consolidate & prioritize requirements, confirm make/buy decisions, & codify required capabilities.

Centralized Programming: Total visibility of all potential workload to enable strategic balancing across the OIB.

Resource Integration & Funding: Inform PPBE, optimize funding, and integrate Army-level OIB initiatives for streamlined resourcing.

Modernization & Workload Optimization: Centralize workload distribution, modernization plans, and align with long term OIB goals.

Performance & Process Improvement: Track performance metrics and drive process improvements to boost efficiency & readiness.

Delivering Ready Combat Formations

DEPOTS

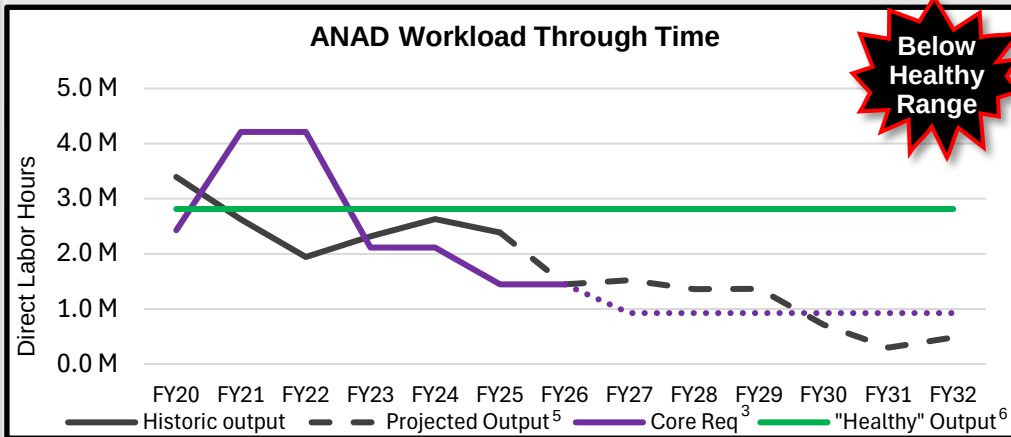

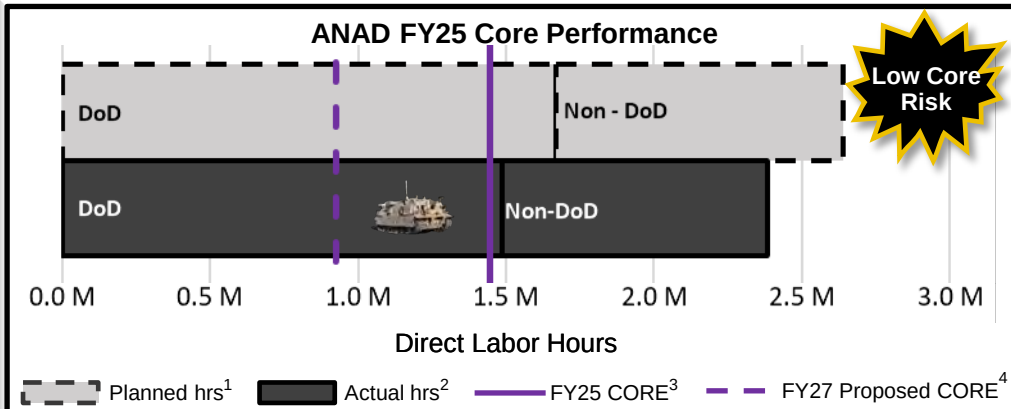

Anniston Army Depot Snapshot

Mission: Provide industrial and technical support for overhaul of combat vehicles, artillery systems small arms and secondary items
