Statement of Work

Overview

The Vendor role will be to provide opto-mechanical design and delivery of fabricated and assembled parts for the Laser Instrument for the Landolt mission, vendor must have past experience with the Landolt mission system, including element wheel, bus interfaces, laser tray architecture, FEA and thermal analysis capabilities, and radiation simulations.

Technical Evaluation

Vendor will conduct evaluation in conjunction with the customer prior to fabrication of parts.

Risk and Management

The labor and NRE are sufficient to accomplish the upgrades.

The schedule risk is minimal.

Vendor will provide overall management of the tasks with project coordination supported by a POC. Regular meetings will be held with the DPI.

Reporting

Status reports will be provided by request, and not less than monthly.

Facilities & Equipment

Vendor offices will provide the base for the proposed work.
