

Industry Day Agenda

Day 1

Time	Duration	Activity	Location / POC	Description & Purpose
0600 - 0730	90 min	Check-in & Security Badging	Visitor Control Center	If getting a pass without form 5512/1 being processed, please arrive early around 0550 in order to be the first in line to go through the process of getting a pass with your base sponsor. This will likely take 1hr. If background check work was already done via 5512/1, the pickup process should not take long, and you can theoretically arrive closer to 0700.
0800 - 0900	60 min	Plan/Ground Rules & Program Welcome & Strategic Overview	Briefing Room	Welcome, Industry Day Agenda Review, and the strategic overview of the AZ Memorial Ferry Mission's key objectives: Reliability, Energy Efficiency, Lifecycle Value, and Solemnity/Visitor Experience.
0900 - 1100	120 min	Current Fleet & Operations Deep Dive & Q&A Session	Briefing Room	Lead Operator & Maint. Chief: A consolidated, detailed briefing covering the operational tempo, maintenance drivers, reliability data, and operator feedback, followed by joint Q&A.
1100 - 1115	15 min	Travel to maintenance/storage building	N/A	Group transits from the briefing room to the location where the boats are stored.
1115 - 1315	120 min	Vessel(s) and Building Inspections	Maintenance Pier (Bldg 44)	A 3-hour, in-depth, hands-on inspection of a few ferry boats that are representative of the fleet of ferries. This is the critical session for bidders and government parties to assess hull condition, machinery conditions, and the feasibility of SLEP/conversion COAs. This is also a time to ask maintainers about the condition of these boats. Additionally, during this time, personnel will briefly run down the existing electrical infrastructure to assess the "overnight trickle charge only" scenario. Note that detailed notes are allowed here, but not photos or videos.

1315 - 1445	90 min	Lunch Break	On Your Own	Attendees can leave the vessel inspection when they are finished for lunch. Personnel that are interested in understanding the pier side infrastructure walkthrough will reconvene at the site at 1445.
1445 - 1530	45 min	GOVERNMENT AND INTERESTED PARTIES: Dock Infrastructure Deep Dive	Visitor Center Docks	NAVFAC Hawaii POC: A focused, walkthrough of the two berths and shore-side piers to discuss in detail the challenges and estimated costs for a potential infrastructure upgrade (from standard shore power to DC Fast Charging).
1545 - 1630	45 min	Mission Immersion: The Ferry Ride	On Water	All attendees take a round-trip ride to experience the 30-minute operational cycle and current vessel conditions firsthand. This will be the industry day attendees only (no tourists) so that there can be greater communication between operators and personnel.
1630 - 1700	30 min	Final Joint Q&A & Industry Wrap-Up	Briefing Room or Pier side	Final open, group forum for industry questions. Reiterate expected next steps in the process and provide closing remarks for all industry partners.

Day 2

Time	Duration	Activity	Location / POC	Description & Purpose
0800 - EOD	Perhaps 45 minute to 1-hour blocks of time as needed	One on Ones with Industry (schedule will be finalized with attendee list)	Briefing Room	One-on-ones with attendees the second day to gain their initial feedback, as well as any follow-up questions/actions/discussions/open items that we couldn't resolve in day one.
