

Appendix C: OIB Site Fact Sheet Summary

1. Introduction

This document provides a summary of key operational and logistical data for 25 sites within the U.S. Army's Organic Industrial Base (OIB). The following profiles consolidate critical information regarding each installation's location, infrastructure, logistical access, and modernization status. The data has been standardized to facilitate a clear and direct comparison of site capabilities.

2. Key to Terminology

To ensure clarity, the following definitions are provided for terms used in the subsequent site summaries.

- Infrastructure Condition - "Adequate": A qualitative assessment indicating that a facility's current infrastructure is sufficient to meet all operational requirements.
- Infrastructure Condition - Installation Status Report (ISR): A standardized U.S. Army rating system.
 - F1 (Facility Condition): A numerical score representing the physical condition of facilities. Scores above 90 are considered excellent.
 - Q1 (Quality Rating): A measure of the overall quality of installation infrastructure and services. Scores above 90 are considered high quality.
 - RM (Resource Management): A rating of real property and resource management effectiveness. Scores above 85 are considered good.

3.0 Installation Summaries

The following is a site-by-site overview of key installations.

Major Depots & Munitions Centers

- Anniston Army Depot (ANAD), AL: A large-scale 15,300-acre depot with 6.8 million sq. ft. of storage and 3.5 million sq. ft. of maintenance buildings. It has a significant economic impact (\$900M) and a workforce of 3,500. Logistically, it is well-supported by highway, rail, and airport access. Infrastructure is rated "Adequate," with 2.3 million sq. ft. of storage available for Public-Private Partnerships (P3s).
- Red River Army Depot (RRAD), TX: A major 15,375-acre depot with 10,000 buildable acres and a \$1.7B economic impact. It features 8 million sq. ft. of storage and

robust multi-modal logistics, including an on-site airfield. Modernization is "Ongoing and proceeding as planned."

- Letterkenny Army Depot (LEAD), PA: A 19,000-acre facility with 2,400 buildable acres and a large workforce (1,947). It offers 2.3 million sq. ft. of storage, with 1 million sq. ft. currently available for P3s. The site has direct highway and rail access.
- Tooele Army Depot (TEAD), UT: A vast 43,000-acre depot with over 3,100 buildings and igloos, totaling 2.8 million sq. ft. of storage capacity. It is served by extensive on-site rail and is in close proximity to Salt Lake City International Airport.
- Hawthorne Army Depot (HWAD), NV: The largest installation by land area at 147,000 acres. It boasts 7.6 million sq. ft. of inside storage space across 414 buildings. Logistical access is primarily via highway.

Key Ammunition and Manufacturing Plants

- Pine Bluff Arsenal (PBA), AR: A 13,500-acre site with significant developable land (5,000 acres) and utility systems at less than 50% capacity. It has 1.1 million sq. ft. of available storage and direct access to the Arkansas River, linking to the Port of New Orleans.
- Crane Army Ammunition Activity (CAAA), IN: A 51,000-acre site with a total ammunition storage capacity of 650,000 tons. It is supported by its own water source (Lake Crane) and has excellent highway and airport access.
- Blue Grass Army Depot (BGAD), KY: A 15,000-acre installation with an excellent infrastructure rating (ISR F1=93.95). It has 2.2 million sq. ft. of storage, with near-term plans to free up an additional 180,000 sq. ft.
- Watervliet Arsenal (WVA), NY: A dense, 143-acre manufacturing center with strategic access to the Hudson River, connecting the inland Port of Albany-Rensselaer to the Port of New York/New Jersey.
- Joint Systems Manufacturing Center (JSMC), OH: A 370-acre site focused on manufacturing, with 1.6 million sq. ft. of dedicated manufacturing space and strong transportation links.

Specialized & Support Sites

- Tobyhanna Army Depot (TYAD), PA: A site with a significant workforce (2,879) and the largest economic impact listed at \$2.9 billion, indicating a high-value mission set. It has strong highway and airport access.

- Corpus Christi Army Depot (CCAD), TX: A 150-acre depot located on the coast with direct seaport access to the Port of Corpus Christi, making it strategic for maritime logistics.
- Sierra Army Depot (SIAD), CA: A 36,000-acre depot with a large workforce (1,368) and robust energy independence via the NV Energy grid and backup generators.
- Scranton Army Ammunition Plant (SCAAP), PA: A compact, 15-acre urban site dedicated to manufacturing with 495,000 sq. ft. of production space and excellent multi-modal logistics, including proximity to the Port of Philadelphia.
