

STATEMENT OF WORK

SCOPE

Contractor shall furnish all materials, parts, equipment, and tools for the below listed Eppendorf Centrifuges at the Michael E DeBakey VA Medical Center, 2002 Holcombe Blvd, Houston, Texas 77030. All equipment shall be brand new, and all work shall be done in a first-class manner. The contract price (GSA # GS-07F-5934R) shall be firm-fixed, all-inclusive not limited to specified products/equipment, installation, and setup/configuration.

MANUFACTURER INFORMATION

Base on the information for Buy America Act these Eppendorf Centrifuges are manufactured in Leipzig, Germany. Please refer to the background information below. The Eppendorf Centrifuges are the standard centrifuge for the Pathology and Laboratory Medicine Service Line (PLMS) at the MEDVAMC.

BACKGROUND

The Eppendorf Centrifuges must be reliable, safe, capable of preventing fatigue with repeated use and operate at low noise levels. The Eppendorf Centrifuges will be used to spin down blood specimens for the Laboratory. The Eppendorf Centrifuges is the standard Centrifuge for the Laboratory at the MEDVAMC, and this will be utilized in Hematology and General Chemistry. The MEDVAMC is standardized equipment to improve efficiency and patient safety. Brand names are requested in order to standardize them with existing laboratory equipment. The use of identical equipment in all PLMS departments decreases the possibility of human error, thereby increasing patient safety.
