

Statement of work

Coulter LS 13 320 XR laser diffraction particle size analyzer.

Annual preventive maintenance visits, including cleaning, checks, and replacement of wear parts as specified in Beckman's maintenance procedures. In addition to the optical bench, the coverage includes the ULM sample module.

Performance verification/qualification (e.g., IQ/OQ or routine verification with control standards) to document that sizing accuracy and repeatability meet specifications.

100% coverage for parts, labor, and travel.

Priority technical support (phone/email/remote), including help with ADAPT software, methods, and basic troubleshooting.

Access to recommended software updates and certain firmware updates that affect instrument performance or data integrity.

Documentation to support GMP/21 CFR Part 11 environments such as service reports, calibration certificates, and audit-ready records of maintenance and qualifications.
