## **Statement of Work**

03/27/2026

### **STATEMENT OF WORK**

#### **1.0 Scope**

This Statement of Work (SOW) sets forth the requirements of non-personal professional support services in the areas of: security program support and compliance for the protection of personnel, information, and assets in addition to providing customer service consisting of project management, continuous improvement, and Security Education Training Awareness (SETA) activities in support of Naval Surface Warfare Center, Crane Division (NSWC Crane).

In addition support shall include the performance of the following tasking: Security Functional & Compliance Support, Information Security (Infosec) Support, Personnel Security (Persec) Support, Security Education, Training, And Awareness (Seta) Support, Industrial Security (Indusec) Support, Insider Threat Support, Physical Security (Physec) Support, Emergency Management Support, Communications Security (Comsec) Support, Special Security Office (Sso) Support, Sensitive Activity & Intelligence-Related Contracting Support, Operations Security (Opsec) Support, Visitor And Access Control Support, Security Coordinator, and Security Respose Team Support Service. This Task Order (TO) supports organizations and projects base-wide and is pertinent to the Corporate Operations Security Division, and their customers at NSWC Crane.

The Contractor may be required to perform work at the Top Secret (TS)/Sensitive Compartmented Information (SCI) level. The Contract shall have the ability to receive clearance for unescorted access to Government Owned Controlled Spaces. Access to TS/SCI will be for the purpose of site survey, installation, maintenance, and repairs of security and infrastructure protection equipment in support of the mission critically systems at Government facilities.

#### **1.1 Background**

NSWC Crane is a world class Naval Installation providing technical solutions to the Department of Defense. The secured installation is located in southwest Indiana and covers approximately 100 square miles. NSWC Crane provides comprehensive leadership and support for complex military systems spanning development, deployment and sustainment in three mission areas: Electronic Warfare/Information Operations, Strategic Missions, and Special Missions. NSWC Crane leverages its unique technical capabilities and those of industry partners to provide rapid response technical solutions to meet the mission of the warfighter.

NSWC Crane Security Division provides security policy and program management to all focus areas within NSWC Crane.

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

In rendering support to the identified tasks, support shall take the form of recommendations, alternatives, analysis, assessments, evaluations, information, opinions, or recommendations to complement the Government's technical expertise in accomplishing its mission. The nature of the work will require the contractor support personnel to be capable of quick response in order to meet stringent deadlines.

### 2.0 Applicable Documents

The following documents of the revision or issue in effect at the date of award, form a part of this SOW for reference. In the event of conflict between the documents reference herein and the contents of this SOW, the contents of this SOW shall prevail. Nothing in this document supersedes applicable Federal, State, or Local laws and regulations unless a specific exemption has been obtained. NOTE: The Government will need to provide any non-publicly available documents.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

The Contractor shall provide qualified personnel that will support NSWC Crane in the execution of their overall organizational functions and the specific missions of the individual activities as listed herein of this SOW.

The Contractor shall execute the scope of work in a manner that provides for high quality, timely, and well-integrated support services while incorporating the proper mix and the most effective use of personnel. Contractor and its employees shall not represent the Government nor appear to represent the Government in performance of these contract services. All analyses, reports, data, and deliverable produced under this contract shall be property of the United States (U.S.) Government.

The Contractor shall provide support for a variety of Security programs. Services may be provided on site at NSWC Crane or at the Contractor's facility. This SOW has been organized by Task Areas which supports the scope of work under 1.0 and the Corporate Operations Security Division.

Estimated on-site/off-site labor hours are delineated in the Level-Of-Effort attached hereto. Distance support and place of performance is described in paragraph 6.1 of this SOW.

### **3.1 Functional Performance Requirements**

#### **3.1.1 Security Division Functional & Compliance Support (TASK AREA 1)**

- 3.1.1.1 The Contractor shall provide management and operational support including office management, meeting and event coordination, preparation of documents and presentations, distribution of information, metrics management, and logistics support. The Contractor shall perform scheduling and organizing of meetings, events and conferences including conference rooms and other spaces required to implement the activity. The Contractor shall support the visitor request process to ensure authorized and appropriate personnel are allowed access to buildings and spaces. The Contractor shall provide support for personnel moves by completing required paperwork and monitoring progress. The Contractor shall maintain the inventory and track the office supplies and shall initiate replenishment efforts with the appropriate Government entity.
- 3.1.1.2 The Contractor shall support the planning for and organization of events, ceremonies, trade shows and meetings, which will typically include coordination with and support to the Security Division as the lead for event management at NSWC Crane.
- 3.1.1.3 The Contractor shall develop, deliver, and maintain records of correspondence including memos, letters, announcements, and other types of communiques. The Contractor shall prepare and analyze various types of documents including property passes, visit

# **Crane Security Support Services (CRSS)**

requests, naval messages, passports, Crane internal memos, and off station letters. The Contractor shall assign sequential numbers for various documents and correspondence using an established number tracking system. The Contractor shall perform document and form preparation, review, submission, and tracking. The Contractor shall develop, disseminate, and manage presentations and briefing material. The Contractor shall perform distribution of information across organizations via paper documents, email, digital postings, and other means required. The Contractor shall perform communications using a variety methods including verbal, telephonic, textual, documentation, and digital. The Contractor shall perform document scanning and storage management of documents and other forms of data and information.

3.1.1.4 The Contractor shall operate and maintain data repositories containing documents and data. This data consists of items such as business records, management type information; and engineering drawings, manuals, and other technical documents for which hard copy or magnetic media masters are to be retained. The Contractor shall receive documents, maintain an automated logging system, copy each document on the media available for protection on a sequential number system, remove and release documents as requested, maintain a record or master of copy holders, provide reproduction and distribution, and perform other librarian type tasks. Distribution tasks require packaging, labeling, and mailing or otherwise shipping single or multiple documents to single or multiple locations within or outside the Government.

3.1.1.5 The Contractor shall support the records management programs performing as the formal and appointed Records Liaison or alternate as requested. The Contractor shall perform document and records management support by maintaining document lists and inventories, evaluating document format and content, updating and editing documents and information, and developing new documents as requested. The Contractor shall develop and execute policies, practices, and processes to assist in managing the full data lifecycle of data, records, and information. The Contractor shall support the formatting, controlling, and tracking of records in the formal records management template, format, and tools including the Corporate Document Management System. The Contractor shall perform accounting of documents and assessing the status and retention and disposition requirements and take actions to accomplish goals and actions.

3.1.1.6 The Contractor shall, as requested, provide facility and safety support to include entering, tracking, and identifying, and reporting information. The Contractor shall perform as the point of contact for Public Works and the Naval Facilities Command (NAVFAC) including identifying and reporting facility issues and needs in the Government approved system.

3.1.1.7 The Contractor shall, as requested, provide quality management program support including assisting with the quality management office duties and functions, reviewing

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

and updating documentation, supporting internal evaluations, metrics assistance, support for management system tools and processes, development of course material and conducting training. The Contractor shall support continuous improvement oversight, training, and facilitation; and shall assist with quality disciplines and tools such as 6S, lean, and others.

- 3.1.1.8 The Contractor shall provide support to Command for the Quality Focal Point (QFP) and Crane Management System efforts by supporting adherence to the ISO 9001 quality standard. The Contractor shall provide support in the development and management of documents related to quality programs including controlled documents, process documents, formal ISO documentation, and other related forms, templates, and tools. The Contractor shall support the identification of continuous improvement initiatives and support these as a facilitator or participant. The Contractor shall assist in reporting, tracking, and updating quality actions in the Crane Action Management System including audit and assessment findings, self and internal assessments, management review outputs, and improvement initiatives.
- 3.1.1.9 The Contractor shall perform continuous improvement for division level support by assisting in identifying improvement candidates, developing analysis, determining strategies and approaches, and generating plans and related documentation. The Contractor shall, as requested, perform as a facilitator or a participant in activities, meetings, and initiatives to develop improvements to efforts, processes and procedures. The Contractor shall support the development, implementation and operations of improvements using the plan, do, check, act process; and other methods and tools.
- 3.1.1.10 The Contractor shall support the development and documentation of quality metrics including identifying, assessing, establishing measurement processes, capturing data, performing analysis, and reporting. The Contractor shall provide support in the planning and establishment of management tools and management systems that measure the effectiveness and efficiency of internal operations, workload performance, and other business operating functions.
- 3.1.1.11 The Contractor shall coordinate, compile, and enter required performance related data into various reports, analyze the data and make recommendations on implementation improvement areas, techniques and processes. (A006) The Contractor shall utilize a variety of systems, information, and tools to perform data collection, analysis, and reporting to assist in the management of efforts and initiatives. The Contractor shall use statistical techniques for process analysis and data analysis to derive cost reductions and potential savings through implementation of recommended changes.
- 3.1.1.12 The Contractor shall provide Security Program support by providing analytical, planning, advisory, operational, or evaluative work that has as its principal purpose the development and implementation of policies, procedures, standards, training, and

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

methods for identifying and protecting information, personnel, property, facilities, operations, or material from unauthorized disclosure, misuse, theft, assault, vandalism, espionage, sabotage, or loss. The Contractor shall perform duties involving the management, administration, or performance of work in: (1) developing, evaluating, maintaining, and operating systems, policies, devices, procedures and methods used for safeguarding information, property, personnel, operations, and materials; and (2) assist in developing and implementing procedures for analyzing and evaluating the character, background, and history of employees, candidates for employment, and other persons having or proposed to be granted access to classified or sensitive information, material or work sites.

- 3.1.1.13 The Contractor shall provide Security Administration support and provide customer service by answering, responding to, and taking customer inquiries and support requests for action, to include external agencies. The Contractor shall provide customers with accurate and complete information on security processes, procedures, and documentation requirements. The Contractor shall provide security support at meetings on and off NSWC Crane locations, participate in security team meetings, and command-level events. The Contractor shall obtain and maintain security clearance eligibility for access of SECRET (unless otherwise indicated as a program specific requirement).
- 3.1.1.14 The Contractor shall assist in the preparation, tracking, and filing of records, documentation and Objective Quality Evidence (OQE) to support program requirements, external audits, spot-checks and inspections.
- 3.1.1.15 The Contractor shall generate survey, audit, inspection and metrics reports (A006), records, and other documentation to meet security program reporting and continuous process improvement requirements and objectives.
- 3.1.1.16 The Contractor shall evaluate the effectiveness of existing security practices; recommend the type of control requirements, procedures, and facilities as needed; and recommend appropriate action to correct deficiencies.
- 3.1.1.17 The Contractor shall assist in the development, maintenance, and implementation of security program related documentation, forms, and artifacts related to the protection of personnel, assets, and information. The Contractor shall prepare access lists, letters of appointments, memoranda, certifications, and other documents as necessary to support security program requirements. The Contractor shall ensure forms, records, and correspondence are correct, complete, and accurate.
- 3.1.1.18 The Contractor shall report suspected deficiencies, infractions and violations to the Activity Security Manager (via Security Program Managers).

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

- 3.1.1.19 The Contractor shall operate security containers and secure spaces per Command Security policy.
- 3.1.1.20 The Contractor shall protect critical information associated with this contract to prevent unauthorized disclosure and observe Operation Security (OPSEC) requirements.
- 3.1.1.21 The Contractor shall perform operational and analytical functions in support of the NSWC Crane Privacy Program. The Contractor shall assist the Privacy Program Coordinator in administrative functions. The Contractor shall conduct internal privacy compliance assessments and audits against established controls.

### **3.1.2 Information Security (INFOSEC) Support (Task Area 2)**

- 3.1.2.1 The Contractor shall store, transmit, and destroy Controlled Unclassified Information (CUI) per relevant security policies, practices, and procedures. The contractor will be in continuous contact with CUI (to include, but not limited to Personally Identifiable Information (PII), Protected Health Information (PHI), and Controlled Technical Information (CTI) as part of regular duties and responsibilities across all security programs related to contract performance.
- 3.1.2.2 The Contractor shall protect National security classified and controlled unclassified information and material by applying knowledge of policies, procedures, and requirements established under appropriate authorities to protect information that, if subjected to unauthorized disclosure, could reasonably be expected to cause damage to national security.
- 3.1.2.3 The Contractor shall assist in providing guidance and oversight for safeguarding, transmitting, and disclosing classified and controlled unclassified information.
- 3.1.2.4 The Contractor shall assist in applying the requirements for classifying, marking, redacting, handling, transporting, and safeguarding of protected and classified information and implement derivative classification standards.
- 3.1.2.5 The Contractor shall conduct reviews and inspections to determine compliance with and adherence to security related requirements. The Contractor shall document findings and recommendations of suspected security violations.
- 3.1.2.6 The Contractor shall administer classified mail operations and access control for classified meetings, conferences, and events.
- 3.1.2.7 The Contractor shall process letter request forms and courier authorization letters for transport of classified material.
- 3.1.2.8 The Contractor shall process shredder authorization letters and validate hardware requests against the National Security Agency's (NSA) approved product list.

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

- 3.1.2.9 The Contractor shall process Portable Electronic Device (PED) and Photography Authorization letters.
- 3.1.2.10 The Contractor shall administer Security Container Information forms (SF-700) for collateral (non-sensitive compartmented information (non-SCI)) security containers.
- 3.1.2.11 The Contractor shall assist Departments in identifying meeting spaces and the security requirements before, during, and after both sensitive and classified meetings.
- 3.1.2.12 The Contractor shall conduct audits, inspections, and spot-checks of collateral (non-SCI) security containers.
- 3.1.2.13 The Contractor shall prepare forms, reports (A006), and other documentation to support findings and determinations resulting from surveys, assessments, audits, or any other type of observable process.
- 3.1.2.14 The Contractor shall support Media Center operations in ensuring proper custody, care, safekeeping, and disposition of all classified material in storage, awaiting issue, or turn-in through execution, management and administration of security controls that require and enforce tracking of classified material from cradle to grave, where knowing the current state of the material at any given moment is essential.
- 3.1.2.15 The Contractor shall support the Classified Material Induction Control Point Support which is the single point of entry to account and control Secret and Confidential material in the Base Inventory Tracking System (BITS) database (or other system as provided). The Contractor shall utilize the BITS (or other system as provided) for receipt, issue, and disposition of Classified material. The Contractor shall verify authorized users have the appropriate level of Security Clearance for the material requested. The Contractor shall assist in the destruction and transmittal services to authorized users.
- 3.1.2.16 The Contractor shall conduct an annual classified inventory of induction control point material.
- 3.1.2.17 The Contractor shall assist with the annual base-wide inventory and control of the SF700s maintained by Security.
- 3.1.2.18 The Contractor shall inspect all incoming material for compliance with applicable regulations and instructions.
- 3.1.2.19 The Contractor shall perform controlled inventory services for both Classified and Controlled materials up to Secret for administrative material entering and leaving NSWC Crane control.

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

- 3.1.2.20 The Contractor shall support Media Centers which are secondary control points for certain material containing CUI and collateral material classified as Confidential or Secret.
- 3.1.2.21 The Contractor shall be responsible for cataloging, safeguarding, and issuing Classified material in the custody of each Department or Division.
- 3.1.2.22 The Contractor shall support Media Centers required to account for and control SECRET and CONFIDENTIAL material in the BITS (or other system as provided).
- 3.1.2.23 The Contractor shall provide the following services to each Media Center during business hours: Receipt of material from classified material induction point and custodians, Review of transmittals and review of derivative classification markings, Shelving and inventory of material received by the Media Center.
- 3.1.2.24 The Contractor shall perform controlled inventory services of collateral material, Classified up to Secret, for administrative material entering and leaving code spaces and control points.
- 3.1.2.25 The Contractor shall use the BITS for receipt, issuance, and disposal of Classified material. The Contractor shall process incoming and outgoing Classified mail and packages. The Contractor shall induct incoming Classified mail into BITS. The Contractor shall send notification of received Classified mail to the addressee. The Contractor shall issue Classified mail into the addressee, or the addressee's designated representative. The Contractor shall store Classified mail until it is collected by the addressee. The Contractor shall verify outgoing Classified mail is approved through the appropriate BITS workflow prior to releasing the mail to USPS or Code 107 mail handlers.
- 3.1.2.26 The Contractor shall verify authorized users have the appropriate level of Security Clearance and the need-to-know for the material requested, utilizing an access list which will be provided by either the Security Department or the applicable Work Center.
- 3.1.2.27 The Contractor shall assist in destruction and transmittal services to the customer and assist in an annual Classified inventory of media center materials, which will be overseen and certified by the Government.
- 3.1.2.28 The Contractor shall assist with annual base-wide inventory of all collateral Classified material issued to security containers, open storage areas, and vaults.
- 3.1.2.29 The Contractor shall assist in updating, managing, reviewing, and maintaining SOPs.
- 3.1.2.30 The Contractor shall provide comprehensive Classified destruction in support of NSWC Crane Code 105, including the management and operation of the Division's destruction facility, execution of destruction on the NSWC Crane and accounting for the destruction performed.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

- 3.1.2.31 The Contractor shall utilize BITS (or other system as provided) for final disposition of Classified material.
- 3.1.2.32 The Contractor shall operate the destruction devices maintained at the centralized destruction facility.
- 3.1.2.33 The Contractor shall ensure approval for destruction is received by the proper authority, i.e., the information owner, prior to execution on all material accounted for in the BITS (or other system as provided).
- 3.1.2.34 The Contractor shall ensure the material custodian removed all labels and stickers prior to destruction. If labels and stickers are not removed, the Contractor shall not accept the material and shall return it to the custodian for corrections.
- 3.1.2.35 The Contractor shall perform destruction services of material containing controlled unclassified information and collateral information Classified up to Secret.
- 3.1.2.36 The Contractor shall coordinate with NSWC Crane Cybersecurity for destruction of all magnetic and collateral classified media.
- 3.1.2.37 The Contractor shall maintain and utilize reports from the Container Access Recall Database (CARD) or successor system for all SF-700s maintained by Security.
- 3.1.2.38 The Contractor shall provide Security training for New Employee Orientation, Custodian Training, and Preliminary Inquiry (PI) Remediation training and maintain appropriate training records.

### **3.1.3 Personnel Security (PERSEC) Support (Task Area 3)**

- 3.1.3.1 The Contractor shall support the Personnel Security (PERSEC) program which manages eligibility and clearance requirements for access to National Security information in compliance with applicable regulations, directives and policies by applying personnel security principles and methods to process initial clearances, periodic re-investigations, clearance upgrades and downgrades, continuous evaluation process, and facilitates the adjudication and appeals processes.
- 3.1.3.2 The Contractor shall evaluate, analyze, and collect information pertaining to completed background investigations conducted by the appropriate authorities.
- 3.1.3.3 The Contractor shall assist the Government in assessing the suitability and security eligibility of individuals for entry and retention in sensitive and non-sensitive positions.
- 3.1.3.4 The Contractor shall evaluate internal and external security clearance requests and ensures applicants' actions are consistent with regulatory requirements.
- 3.1.3.5 The Contractor shall coordinate development of and document access authorization rational for positions requiring access.

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

- 3.1.3.6 The Contractor shall analyze and report on clearance and appeals findings to senior security officials and make appropriate notifications.
- 3.1.3.7 The Contractor shall administer personnel security investigative questionnaire submissions in the Electronic Questionnaires for Investigations Processing (e-QIP) system of record and communicate questionnaire requirements to employees.
- 3.1.3.8 The Contractor shall administer security clearance information in Defense Information System for Security (DISS) or successor systems of record.
- 3.1.3.9 The Contractor shall gather and transmit information and documentation requested by external agencies to support investigations, adjudications, and maintenance of security clearance eligibility.
- 3.1.3.10 The Contractor shall administer and process security-related information and requests contained in locally developed workflow processes.
- 3.1.3.11 The Contractor shall conduct information collection activities and provide briefings in support of new employee indoctrinations.
- 3.1.3.12 The Contractor shall debrief separating employees and process electronic fingerprints in the Secure Web Fingerprint Transfer (SWFT) system of record and via third party vendor.
- 3.1.3.13 The Contractor shall communicate status changes in security clearance access and eligibility to subject employees.
- 3.1.3.14 The Contractor shall audit personnel security records for adequacy and sufficiency.
- 3.1.3.15 The Contractor shall process visit requests in DISS or successor systems of record for command travelers.

### **3.1.4 Security Education, Training, and Awareness (SETA) Support (Task Area 4)**

- 3.1.4.1 The Contractor shall support the Security Education, Training, and Awareness program and assist in the development, maintenance and implementation of security-related Standard Operating Procedures (SOPs), plans, guides, reference or training materials, smart books, and any other artifacts related to security programs and facilitate SETA activities and continuous process improvement, to include new employee and contractor indoctrinations.

### **3.1.5 Industrial Security (INDUSEC) Support (Task Area 5)**

- 3.1.5.1 The Contractor shall provide administrative and analytical support to the Industrial Security (INDUSEC) program in accordance with the National Industrial Security Program Operating Manual (NISPOM), 32 CFR Part 117, and applicable Department of Defense (DOD) and Department of the Navy (DON) security policies.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

### **3.1.6 Insider Threat Support (Task Area 6)**

- 3.1.6.1 The Contractor shall support the Insider Threat program to perform operational and analytical functions.

### **3.1.7 Physical Security (PHYSEC) Support (Task Area 7)**

- 3.1.7.1 The Contractor shall assist in overseeing Physical Security (PHYSEC) programs and implementation of protective measures that enhance the security of assets, information, and personnel in compliance with regulations, directives, and policies by applying requirements for designing, constructing, accrediting, equipping (technically and otherwise), and securing Government and contracted facilities to guard against unauthorized access.
- 3.1.7.2 The Contractor shall assist in reviewing Military Construction (MILCON), Special Projects, and renovations to ensure Unified Facilities Criteria (UFC) compliance.
- 3.1.7.3 The Contractor shall assist in implementing and managing Risk Assessment processes.
- 3.1.7.4 The Contractor shall inspect, analyze, and evaluate security systems.
- 3.1.7.5 The Contractor shall assist in developing and implementing plans to mitigate vulnerabilities.
- 3.1.7.6 The Contractor shall assist in conducting assessments of vulnerabilities on buildings and facilities and determine the level of risk to develop and recommend appropriate mitigation countermeasures in operational and non-operational situations.
- 3.1.7.7 The Contractor shall administer the Foreign Travel Requirements Programs.
- 3.1.7.8 The Contractor shall conduct Physical Security, Antiterrorism and Force Protection surveys and assessments of Command facilities (on & off installation).
- 3.1.7.9 The Contractor shall conduct surveys and assessments of restricted areas and storage containers to certify them to classified operation.
- 3.1.7.10 The Contractor shall review building plans and design concepts to identify security requirements based on UFC guidelines.
- 3.1.7.11 The Contractor shall administer foreign travel requirements for Command personnel.
- 3.1.7.12 The Contractor shall assist in management of the Command key control program.
- 3.1.7.13 The Contractor shall provide Antiterrorism and Force Protection support by assisting Command travelers in the completion, submission, and review of Isolated Preparation Reports (ISOPREP) using Personnel Recovery Mission Software (PRMS) and Individual Antiterrorism Plans (IATP) in accordance with DoD Foreign Clearance Guide (FCG) requirements.

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

- 3.1.7.14 The Contractor shall administer Security Container Information forms (SF-700) for Arms, Ammunition, and Explosives (AA&E) containers.
- 3.1.7.15 The Contractor shall assist with implementation of Random Antiterrorism Measures (RAMs) and reporting to include the scheduling and execution of administrative checks, preparing quarterly RAM schedules, conducting monthly RAMs, and providing findings to the Antiterrorism Officer (ATO).
- 3.1.7.16 The Contractor shall prepare forms, reports (A006), and any other documentation to support findings and determinations resulting from surveys, assessments, audits, or any other type of observable process.
- 3.1.7.17 The Contractor shall support the Alarm Monitor Personnel (AMP) and the PHYSEC program in preventing and identifying potential or actual acts of theft and sabotage of property, assets, and information that is vital to the installation's mission.
- 3.1.7.18 The Contractor shall monitor Intrusion Detection System (IDS), alarms, and Closed Circuit Television (CCTV) and record system alerts in accordance with established procedures.
- 3.1.7.19 The Contractor shall maintain record of alarms and emergency dispatch of fire and security personnel per CR-105PHY-SOP-0004.
- 3.1.7.20 The Contractor shall transmit mass notifications (base wide or tenant specific) via At Hoc electronic messaging and Federal Signal Giant Voice System.
- 3.1.7.21 The Contractor shall monitor the Lightning Prediction and Warning System.
- 3.1.7.22 The Contractor shall maintain operation and visual surveillance of electronic gates for local tenant commands. (Note: Requires remote observation and securing of various gates that control access to both temporary and permanent explosives storage areas and facilities).
- 3.1.7.23 The Contractor shall provide Entry Control Point/Gate personnel with the information required to ensure proper placement/location of explosive laden vehicles.
- 3.1.7.24 The Contractor shall execute emergency and non-emergency recall notifications to various personnel.
- 3.1.7.25 The Contractor shall track secure hold parking lot status of Net Explosive Weight (NEW), Standard Carrier Alpha Code (SCAC), Hazard Class, and Trailer Numbers for Army Tenant.
- 3.1.7.26 The Contractor shall conduct daily status briefings (via emails or telephone) with the Army Operations Center concerning the status of incoming and outgoing Explosive Laden vehicles.

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

- 3.1.7.27 The Contractor shall serve as a key point of contact between public safety personnel and other local tenant commands.
- 3.1.7.28 The Contractor shall maintain and monitor radio communications associated with base-wide physical security operations.
- 3.1.7.29 The Contractor shall operate computerized alarm monitoring systems to include monitoring and controlling in IDS, Alarm Monitoring Software Programs, CCTV, and Radio communications.
- 3.1.7.30 The Contractor shall operate communications equipment to include: radio consoles, portable radios, secure telephone equipment (must be capable of sending electronic messages and alerts).
- 3.1.7.31 The Contractor shall relay information to the Regional Dispatcher Center (RDC) for appropriate response (e.g. Fire, Security, and Emergency medical, tenant and building recall) as the situation dictates.
- 3.1.7.32 The Contractor shall track and notify RDC of additional information concerning all Security Alarm System Databases, regarding building specifications and changes in restricted access area designation.
- 3.1.7.33 The Contractor shall conduct operational checks of digital telephone and communications equipment and note discrepancies per established procedures.
- 3.1.7.34 The Contractor shall identify equipment malfunctions and implement established procedures to troubleshoot and correct minor problems.
- 3.1.7.35 The Contractor shall monitor the following systems; access control system, force protection radio systems, lightning notification systems, mass notification systems, fire notification systems, and automated phone alarm systems.
- 3.1.7.36 The Contractor shall assist in updating, managing, reviewing, and maintaining SOPs.
- 3.1.7.37 The Contractor shall screen incoming communications and prioritize both emergency and non-emergency calls and situations per CR-105PHY-SOP-0004.
- 3.1.7.38 The Contractor shall make, in accordance with CR-105PHY-SOP-0004, immediately identify and report emergency situations to the appropriate Government authority. The Contractor shall then execute initial response protocols as documented by the SOP while assisting the Government field supervisors in coordinating a comprehensive response.
- 3.1.7.39 The Contractor shall maintain communications with on-duty public safety personnel per established procedures, and inform them of duty changes, irregularities, and other information.

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

- 3.1.7.40 The Contractor shall monitor a variety of emergency telephones and serve as a backup answering point.
- 3.1.7.41 The Contractor shall, in the event communication between NWS Crane and the RDC is interrupted, provide Emergency Dispatch Operations until communication with the RDC can be re-established.
- 3.1.7.42 The Contractor shall assist officers in the field with a variety of information available from computerized databases for the purpose of locating persons, owners of vehicles, occupants of housing units, etc.
- 3.1.7.43 The Contractor shall provide proper radio communications that are necessary to ensure accurate dispatch and coordination of emergency response units.
- 3.1.7.44 The Contractor shall provide support for NWS Crane, on-site and off-site locations, and tenants to include: technical support, modifications, yearly maintenance, inspections, troubleshooting, firmware updates, installation and repair of the on-site intrusion detection systems, access control systems, CCTV, and various security related sensors and devices in all buildings located at NSWC Crane that are part of the approved intrusion detection security systems.
- 3.1.7.45 The Contractor shall support research, testing, and evaluation of all sensor platforms capable of integration into approved Electronics Security System(s) (ESS).
- 3.1.7.46 The Contractor shall provide technical and engineering support to a variety of Code 105 programs, projects, and operations for the development of new and existing Naval capabilities and systems, development of significant alterations to existing systems, support integration and interface of existing equipment or software into different applications or platforms to support the warfighter, and support non-developmental systems, equipment, and technologies.
- 3.1.7.47 The Contractor shall review and prepare technical specifications for various security system components to interface, be repaired or be replaced on existing ESS installed at NSWC Crane or CAAA buildings.
- 3.1.7.48 Inspection reports (A006) shall be provided for reviewing and assisting with scheduling repairs and performing routine and preventative maintenance efforts.
- 3.1.7.49 The Contractor shall perform security inspections, repairs/maintenance, surveys, integration and installations in secure locations designated as AA&E.
- 3.1.7.50 The Contractor shall assist in developing ESS maintenance actions, inspections methods, installation plans and schedules in support of NSWC Crane and CAAA AA&E facilities.
- 3.1.7.51 The Contractor shall prepare installation estimates, surveys and plans for ESS and CCTV in NWS Crane, on-site and off-site locations, and tenant facilities.

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

- 3.1.7.52 The Contractor shall install approved ESS.
- 3.1.7.53 The Contractor shall, after installation, schedule with the Government an inspection of the installed system to ensure operations verification test of the devices and systems installed and security requirements are met.
- 3.1.7.54 The Contractor shall, after system is tested and finalized, provide to the Government red-lined drawings that include location of all installed devices and systems, as well as any infrastructure installed to support systems such as conduit and fiber optics catalog.
- 3.1.7.55 The Contractor shall coordinate maintenance actions with the Government security engineer assigned to the workload and repairs and repair method(s) shall be communicated to the Government engineer.
- 3.1.7.56 The Contractor shall prepare and ensure that detailed technical data documentation necessary to support system development reflects the latest design, configuration, integration, and installation concepts. Technical documentation may be in the form of paper, electronic (digital), or interactive computer systems.
- 3.1.7.57 The Contractor shall analyze security system standards and documents pertaining to security system repair standards such as mean time between failures and acceptable number of failures during a defined timeframe.
- 3.1.7.58 The Contractor shall prepare and modify engineering drawings and associated lists to meet the requirements for systems, subsystems, equipment, components, and facilities. The Government will provide requirements and GFI change descriptions and drawing originals and sketches or draft revisions of the drawings.
- 3.1.7.59 The Contractor shall inspect each new or modified drawing prior to delivering completed drawing packages to ensure compliance with requirements.
- 3.1.7.60 The Contractor shall provide Information Assurance (IA) and Information Technology (IT) support for various ESS.
- 3.1.7.61 The Contractor shall assist with defining requirements, modifying setups, installing patches and software updates, and testing for the security systems.
- 3.1.7.62 The Contractor shall provide assistance with setting up and configuring computer network and hardware components prior to deployment in the field.
- 3.1.7.63 The Contractor shall configure the various systems to meet customers' IT/IA requirements for networks and computer systems.
- 3.1.7.64 The Contractor shall provide security system inspectors and security system repair technicians to perform security systems testing, evaluation, inspections, and technical repair support for approximately sixty (60) buildings per month. Sixty (60) buildings is

## **Crane Security Support Services (CRSS)**

### **Statement of Work**

03/27/2026

only an estimate and support could be required for more or less than sixty (60). Type of repair work will vary from month to month depending on failure rates and analysis. Work could include troubleshooting, repairing or replacing security door sensors and motion detectors.

- 3.1.7.65 The Contractor shall prepare test reports (A006) that shall feature security system details and sensor details that are in need of repair or require routine maintenance to maintain reliability of the security systems.
- 3.1.7.66 The Contractor shall assist with developing, review, track, and update budgets, schedules, POA&Ms, databases, program and project plans. The Contractor shall assist in the technical and administrative development of these plans and in their implementation.
- 3.1.7.67 The Contractor shall provide support for routine repair, replacement, and retrofit of approved locking systems (including GSA approved locking devices) in support of NWS Crane, on-site and off-site locations, to include all tenant facilities. Locking systems include both high and low security lock and equipment applications in support of AA&E security structures. The Contractor shall perform installation of systems, troubleshooting and repair, and locking systems upgrades for ~3,000 buildings at NWS Crane.
- 3.1.7.68 The Contractor shall prepare, ship, and track locking systems and keys (~9,000+) throughout the life cycle of the material, from initial request through final delivery.
- 3.1.7.69 The Contractor shall work as a liaison with fleet representatives on lock and key issues and orders and provide technical assistance to the fleet on problematic issues.
- 3.1.7.70 The Contractor shall perform key de-coding, stamp key serial numbers (either by hand or by using a pneumatic key stamping machine), perform routine maintenance of locks, and cut high security keys.
- 3.1.7.71 The Contractor shall evaluate Fleet-returned material to determine the repairs needed.
- 3.1.7.72 The Contractor shall decode keys and cores and check against official records to verify that the customer returning the material is identified as the owner of the material being returned.
- 3.1.7.73 The Contractor shall establish and maintain a database for tracking documentation.
- 3.1.7.74 The Contractor shall review, conduct analyses, develop procedures and provide recommendations on pending program documentation to ensure compliance with Department of War (DoW) acquisition reform and streamlining policies and initiatives.
- 3.1.7.75 The Contractor shall prepare presentations and presentation materials consisting of viewgraphs, storyboards, and slide presentations.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

3.1.7.76 The Contractor shall process Memorandums of Understanding/Agreements with key partners, and Policies and Procedures Documents.

3.1.7.77 The Contractor shall respond to emergencies and work outside of normal operating hours to support work to address emergency conditions.

### **3.1.8 Emergency Management Support (Task Area 8)**

3.1.8.1 The Contractor shall assist the Emergency Management program in executing complex work in the areas of crisis and emergency management planning and complex training exercises that incorporate all levels of the Command structure by implementing approved emergency preparedness and response plans, CONOPs, action plans, and readiness programs.

3.1.8.2 The Contractor shall perform emergency and routine recall notifications to various key personnel, dependent on nature of the emergency or concern.

### **3.1.9 Communications Security (COMSEC) Support (Task Area 9)**

3.1.9.1 The Contractor shall assist in enforcing NWS and Naval Communications Material System (NCMS) directives to protect transmissions, communications, and the processing of classified or sensitive unclassified information related to national security from unauthorized personnel and that material used to ensure the authenticity of such communications.

3.1.9.2 The Contractor shall assist in protecting sensitive information by employing measures and controls to deny unauthorized persons information derived from telecommunications and ensure the authenticity of such telecommunications via encryption techniques.

3.1.9.3 The Contractor shall validate compliance with NSA and NCMS requirements by conducting reviews, audits, and inspections to ensure compliance with and adherence to security-related requirements.

3.1.9.4 The Contractor shall account for all COMSEC materials by conducting inventories, audits, and spot-checks.

3.1.9.5 The Contractor shall support Local Element and Fleet customers via transmission, receipt, and storage of COMSEC material.

3.1.9.6 The Contractor shall prepare documentation for issuance of COMSEC equipment and aids, monthly and annual audits, quarterly and semi-annual inventories & inspections, inspectable items and accounts, keying material destruction, execute routine

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

administrative duties and assist COMSEC Account Managers (CAM) with general file maintenance, assist with page checks and entering amendments and corrections in COMSEC-related publications and assist in the placement of status markings on COMSEC material.

- 3.1.9.7 The Contractor shall verify security clearances and completion of required training update access lists and draft appointment letters for Local Elements (primary and alternate).
- 3.1.9.8 The Contractor shall ensure Two Person Integrity (TPI) for Top Secret keying material upon removal from an authorized security container and when delivering, receiving, and processing COMSEC material.
- 3.1.9.9 The Contractor shall assist with delivering, receiving, and processing COMSEC material to and from the COMSEC office; and witness receipt, inventory, and destructions reports and escort visitors.
- 3.1.9.10 The Contractor will have access to SIPRnet and the Defense Courier Service (DCS).
- 3.1.9.11 The Contractor shall prepare documentation for issuance of COMSEC equipment, monthly and annual audits, quarterly and semi-annual inventories & inspections, inspectable items and accounts, and keying material destruction.
- 3.1.9.12 The Contractor shall package Controlled Cryptographic Items (CCI) for shipment and verify shipment information for COMSEC equipment.
- 3.1.9.13 The Contractor shall ensure TPI for Top Secret keying material upon removal from an unauthorized security container and when delivering, receiving, and processing COMSEC material.
- 3.1.9.14 The Contractor shall witness receipt, inventory, and destruction reports and escort visitors.
- 3.1.9.15 The Contractor will also have access to SIPRnet and the Defense Courier Service (DCS).
- 3.1.9.16 The Contractor shall obtain and maintain security clearance eligibility for access of TOP SECRET for the performance of tasking on this contract.

### **3.1.10 Special Security Office (SSO) Support (Task Area 10)**

- 3.1.10.1 The Contractor shall provide direct support to the Special Security Office (SSO) by performing administrative, operational, and analytical functions in accordance with government-approved procedures.

### **3.1.11 Sensitive Activity & Intelligence-Related Contracting Support (Task Area 11)**

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

- 3.1.11.1 The Contractor shall provide direct support the Sensitive Activity and Intelligence-Related Contracting (SAIRC) office by performing administrative, operational, and analytical functions in accordance with government-approved procedures.

### **3.1.12 Operations Security (OPSEC) Support (Task Area 12)**

- 3.1.12.1 The Contractor shall provide support to the Operations Security (OPSEC) Program Manager.
- 3.1.12.2 The Contractor shall assist the program manager in all duties referred in NSWCCRANEINST 3070.1-series, to include but not limited to the below.
- 3.1.12.3 The Contractor shall assist in promoting the OPSEC program throughout the Command
- 3.1.12.4 The Contractor shall serve as a Subject Matter Expert (SME) for all OPSEC-related matters.
- 3.1.12.5 The Contractor shall conduct annual program reviews.
- 3.1.12.6 The Contractor shall assist in implementing OPSEC training and awareness to Command.
- 3.1.12.7 The Contractor shall coordinate with the designated Command security policy SMEs and Program Managers for integrations of OPSEC with PERSEC, INFOSEC, PHYSEC, INDUSEC, SETA, COMSEC, and Antiterrorism.
- 3.1.12.8 The Contractor shall maintain applicable documentation and metrics in support of the OPSEC program.
- 3.1.12.9 The Contractor shall conduct OPSEC reviews and open-source research for classified and unclassified contracts.
- 3.1.12.10 The Contractor shall conduct OPSEC reviews for public release requests.
- 3.1.12.11 The Contractor shall conduct walk-through assessments of NSWC Crane facilities.
- 3.1.12.12 The Contractor shall document findings, corrective actions, and OPSEC violations.
- 3.1.12.13 The Contractor shall maintain the OPSEC violations log.
- 3.1.12.14 The Contractor shall conduct quarterly social media reviews for NSWC Crane content.
- 3.1.12.15 The Contractor shall coordinate with NCIS for counterintelligence and threat support to mitigate potential OPSEC vulnerabilities and develop effective countermeasures.
- 3.1.12.16 The Contractor shall review and respond to photography requests via the Crane Electronic Photography Permit System (CEPPS).
- 3.1.12.17 The Contractor shall review and respond to Portable Electronic Device (PED) requests via the PED portal; and verifying devices are approved for collateral classified spaces.

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

- 3.1.12.18 The Contractor shall complete OPSEC Fundamentals (OPSE-1301) training and the Naval Operations Security Training (NOST) NOS-J-2G-0966 course. The Contractor shall be designated in writing as a Subject Matter Expert (SME) to review and advise the Government's Public Release Authority on Public Release requests.

### **3.1.13 Visitor and Access Control Support, Security Coordinator, and Security Response Team Support Services (Task Area 13)**

- 3.1.13.1 The Contractor shall assist in supporting physical and administrative controls primarily concerned with the protection of both sensitive and classified information, personnel, facilities, or other sensitive materials, resources, or processes against criminal, terrorist, insider threat, or hostile intelligence activities with the goal of ensuring access to facilities and information is restricted based on need-to-know, authorization, and per Command security policy.
- 3.1.13.2 The Contractor shall greet visitors at security desk, verify clearances, and notify local sponsor or Point of Contact (POC) of arrival.
- 3.1.13.3 The Contractor shall issue appropriate badges to all visitors entering controlled access facilities.
- 3.1.13.4 The Contractor shall verify clearance levels of visitors using DISS or successor systems.
- 3.1.13.5 The Contractor shall maintain daily logs to record and reflect all visitor activity for each location.
- 3.1.13.6 The Contractor shall register visitor Common Access Cards (CAC) in the intrusion detection system, provision with approval level of accesses per approved access request forms and process initial CAC pin and/or pin resets.
- 3.1.13.7 The Contractor shall identify requirements and coordinate resources for classified meetings conducted outside of secure spaces in assigned facilities.
- 3.1.13.8 The Contractor shall assist meeting coordinators by processing lists of visitors submitted in advance, verifying clearances, and preparing badges to issue upon arrival.
- 3.1.13.9 The Contractor shall monitor intrusion detection system consoles, CCTV, and other security systems to monitor and manage access to facilities (authorized or unauthorized).
- 3.1.13.10 The Contractor shall ensure building tenants and visitors adhere to the PED and Command security policies .
- 3.1.13.11 The Contractor shall maintain and administer access lists, recall rosters, open and close rosters, SOPs, and any other documentation required to manage physical access.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

- 3.1.13.12 The Contractor shall conduct daily inventories to verify badges are accounted for; report lost badges to the NSWC Crane Emergency Management Branch.
- 3.1.13.13 The Contractor shall conduct end-of-day security checks per the Activity Security Checklist (SF701) and site-specific SOPs.
- 3.1.13.14 The Contractor shall open, secure, and alarm zones per site-specific SOPs and maintain Security Container Check Sheets (SF702).
- 3.1.13.15 The Contractor shall staff security desks from 0600-1800 or per SOPs and specific facility requirements.
- 3.1.13.16 The Contractor shall respond to emergencies and work outside of normal operating hours to support work to address emergency conditions.
- 3.1.13.17 The Contractor shall staff the security desk in the event of a security systems failure (during normal shift or after-hours) until the system failure is corrected and facilities can be properly secured.
- 3.1.13.18 The Contractor shall assist in updating, managing, reviewing, and maintaining SOPs.
- 3.1.13.19 The Contractor shall process visit requests in DISS or successor system for Command travelers.

## **3.2 Cyber Security Workforce**

### **3.2.1 Cyber Security Workforce (CSWF) Qualifications and Reporting**

Each Task Area (TA) / Technical Instruction (TI) will be reviewed by the Naval Surface Warfare Center Crane Division CSWF Program Manager and a determination made regarding applicability of CSWF requirements to the tasking identified. If it is determined the tasking identified in the TA/TI requires personnel to Cyber IT/Cybersecurity functions the requirements of DFARS 252.239-7001, Information Assurance Contracting Training and Certification shall apply.

#### **3.2.1.1 Cyber Security Workforce Qualifications**

In accordance with DFARS 252.239-7001, Information Assurance Contracting Training and Certification herein and SECNAV M-5239.2\* dated June 2016, all personnel performing Cyber IT/Cybersecurity functions must be training and qualified. In addition, personnel shall maintain the appropriate security clearance per SECNAV M-5510.30 to perform the tasks associated with their assigned positions.

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

All positions with Cyber IT/Cybersecurity functions whether primary or additional/embedded duties have a Specialty Area and Proficiency Level identified within the Special Skills section of each TA/TI.

The Contractor is required to:

1. Earn and maintain appropriate credentials from the Cyber IT/CSWF Qualification Matrix (described in SECNAV M-5239.2\*) associated with the specialty area and proficiency level commensurate with the scope of major assigned duties for the position and tasking being performed.
2. Participate in continuous learning program as described in SECNAV M-5239.2. All Contractor support personnel supporting CSWF tasking shall at a minimum complete 20 hours of Cyber IT/CSWF related continuous learning (CL) annually.

The baseline qualifications for each specialty area/proficiency level are identified in Appendix 4 of SECNAV M-5239.2\*. If privileged access to Operating Systems is required, the Contractor shall complete a privileged access agreement, SECNAV 5239/1, and **submit it to the COR (Reference Section J - Attachments)**. Contractor personnel shall obtain the appropriate DON approved baseline job qualification standard prior to being engaged. Contractors have up to 6 months to obtain any additional qualifications required for their position to include, but not be limited to applicable operating system/computing environment training if required. A copy of the certificate of completion shall be provided to the COR.

Per SECNAV M-5239.2, unless expressly provided for in the Task Order, all responsibility for training that is required for the Contractor to maintain a specific expertise, commercial certification, or continuous learning is the sole responsibility of the contractor employee and or the Contractor's employer. Only Government specific CSWF training may be directly charged to the Task Order and only if authorized by the TA/TI.

\*Contractor shall use SECNAV M-5239.2 until DFARS 252.239-7001 is updated, specifically with regards to vendor certifications. At that time education and military training may be used in regards to Contractor qualifications.

### 3.2.1.2

#### Cyber Security Workforce Reporting

The Contractor shall provide a list of all personnel assigned to TA/TI(s) with personnel performing Cyber IT/Cybersecurity functions as part of the monthly Contractor's Progress, Status, and Management Report (A001). The report shall include employee name, TA/TI#, list of applicable Cyber IT/Cybersecurity function category/level (see TA/TI), required certifications and fulfillment status and CL status **(See sample format, Section J - Attachments)**.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

New hire information for tasking requiring Cyber IT/Cybersecurity functions shall be submitted to the COR at least 7 days prior to employee beginning performance of any Cyber IT/Cybersecurity functions. New hire information shall include name, TA/TI#, list of applicable Cyber IT/Cybersecurity functions category/level, required certifications and fulfillment status to include a copy of the certification documentation. Contractors are encouraged to provide new hire information to ensure Government concurrence with qualification to perform Cyber IT/Cybersecurity functions. Per DFARS 252.239-7001(c), "Contractor personnel who do not have proper and current certifications shall be denied access to DoD information systems for the purpose of performing information assurance functions" and therefore may not be allowed to charge to the Task Order.

### **3.3 Security Requirements**

The Contractor shall establish appropriate administrative, technical, and physical safeguards to protect all Government systems and data, to ensure confidentiality, integrity, authentication, and non-repudiation of Government data.

All security requirements shall flow down to subcontractors. However, some security requirements, like OPSEC, require Government Contracting Activity (GCA) approval. Additionally, other security programs and accesses to classified (e.g., Communications Security (COMSEC Information), Restricted Data (RD), Formerly Restricted Data (FRD), Critical Nuclear Weapons Design Information (CNWDI), North Atlantic Treaty Organization (NATO) Information, Sensitive Compartmented Information (SCI), Special Access Program (SAP) Information) may not be flowed down without specific approvals from the applicable program office, government security manager, or special security officer.

#### **3.3.1 Security Program**

The Contractor shall provide a security program for employees that will result in no security violations or incidents regarding protection of facilities, access control, information assurance, computer networks, computer environments, loss or compromise of classified or sensitive information, Controlled Unclassified Information (CUI), and Operations Security (OPSEC) information. Performance under this contract requires the Contractor to adhere to OPSEC requirements. The Contractor shall assign an OPSEC point of contact for this contract at no additional cost to the U.S. Government. The Contractor shall comply with DoD Instruction 8510.01 and the DoD Information Assurance Certification and Accreditation Processes (DIACAP).

The Contractor shall implement a security protocol to meet the requirements of the attached DD-254 as well as the following security requirements regarding personnel, facilities, networks, and data/information:

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

1. The Contractor is required to maintain a TOP SECRET/SCI (TS/) Facility Security Clearance level. There is no safeguarding requirement for classified information/material at the Contractor facility in accordance with the DD-254.
2. The Contractor requires COMSEC to accommodate the use of secure communications utilizing the Sectera vIPer universal secure telephone, secure telephone equipment (STE) telephone, simple key loader (SKL), and radio communication devices. Personnel working under this agreement require access to SIPRNet and/or SIPRNet backbone equipment must receive a NATO security briefing and derivative classification training prior to access from the FSO. COMSEC will be government-furnished equipment (GFE).
3. Some Contractor employees may also require access to Critical Nuclear Weapon Design Information (CNWDI), Restricted Data (RD), and Formerly Restricted Data (FRD) during the performance of the tasking. Employees that support the tasking described in paragraphs 3.1.2 are those most likely to need this access. The Security Classification Guide(s) (SCG(s)) that cover the material to be accessed will be listed in item 13 of the contract's DD-254.
4. The Contractor requires access to sensitive compartmented information (SCI) in support of this effort. The Contractor may be required to perform work at the Top Secret (TS) / Sensitive Compartmented Information (SCI) level. Electronic security system administrators will be required to be SCI cleared and indoctrinated. The Security Classification Guide(s) (SCG(s)) that cover the material to be accessed will be listed in item 13 of the contract's DD-254.
5. As directed by the Government, the Contractor shall use of the Defense Courier Service for the transfer of classified material.

### **3.3.2 Access to Government Facilities, Information, and Systems**

The Contractor shall adhere to Government and program regulations, policies, and procedures controlling the access of program facilities information and systems by visitors. All Contractor personnel requiring access to the Government Furnished Facilities (GFF) will complete a Tier 3 Background Investigation in accordance with (IAW) DoDM 5200.02, Procedures for DoD Personnel Security Program (PSP). If an emergency exists, and the Contractor requires access to the Government workspace in advance of completing the Tier 3 investigation, the Contractor may begin work with a waiver from the Contracting Officer Representative (COR). Completion of submission requirement for the NAC is required prior to waiver approval.

### **3.3.3 Personnel Security**

The Contractor shall ensure that all of its personnel are U.S. citizens. All personnel shall maintain the appropriate security clearance per SECNAVINST 5510.30C to perform the tasks

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

associated with their assigned positions. Personnel will require up to a TS/SCI as stated in the Task Order.

Contractors performing at the Government site are required to complete an NSWC Crane onboarding security brief and Computer Based Training (CBT) within 60 days of beginning work at the Government facility. The Contractor's facility security officer (FSO) will coordinate the security brief via the COR with the NSWC Crane Security Office if CBT is not available.

The Contractor shall perform Personnel Security per DoDI 5200.02, Personnel Security Program, DoDM 5200.02, Procedures for the DoD Personnel Security Program, SECNAVINST 5510.30C, DoN Personnel Security Program Instruction, NSWCCRANEINST 5510.1C, Security Policy, Procedures, and Program Manual. The Contractor shall facilitate contractor personnel security clearance, visit request, courier cards, security training, and access control at each site. The Contractor shall immediately notify, by email to the COR any information which may affect the Contractor personnel's ability to hold a non-critical sensitive position.

The Contractor shall designate in writing all contract personnel assigned Facility Security Officers or Facility Security Representatives to the COR and Contracting Officer.

### **3.3.4 Controlled Unclassified Information (CUI)**

Performance of this Task Order includes access to and generation of Controlled Unclassified Information (CUI) and the requirements of NIST Special Publication 800-171. Protecting Unclassified Information in Nonfederal Information Systems and Organizations, DoDM 5100.01, Volume 4, and SECNAVINST 5510.34B. Performance shall be per DFARS 252.204-7008, Compliance with Safeguarding Covered Defense Information Controls, and DFARS 252.204-7012, Safeguarding Covered Defense Information and Cyber Incident Reporting, as identified on the attached DD-254.

The Contractor shall fully implement the CUI Security requirements and associated Relevant Security Controls in NIST Special Publication 800-171 (Rev. 1) (NIST SP 800-171), or establish a SSP(s) and POA&Ms that varies from NIST 800-171 only per DFARS clause 252.204-7012(b)(2), for all covered contractor information systems affecting this contract.

Notwithstanding the allowance for such variation, the Contractor shall identify in an SSP and POA&M their plans to implement the following, at a minimum:

1. Implement Control 3.5.3 (Multi-factor authentication). This means that multi-factor authentication is required for all users, privileged and unprivileged accounts that log into a network. In other words, any system that is not standalone should be required to utilize acceptable multi-factor authentication. For legacy systems and systems that cannot support this requirement, such as CNC equipment, etc., a combination of physical and logical protections acceptable to the Government may be substituted;
2. Implement Control 3.1.5 (least privilege) and associated Controls, and identify practices that the Contractor implements to restrict the unnecessary sharing with, or flow of, covered

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

defense information to its subcontractors, suppliers, or vendors based on need-to-know principles;

3. Implement Control 3.1.12 (monitoring and control access sessions) – Require monitoring and controlling of remote access sessions and include mechanisms to audit the sessions and methods.
4. Audit user privileges on at least an annual basis;
5. Implement:
  - a. Control 3.13.11 (FIPS 140-2 validated cryptology or implementation of NSA or NIST approved algorithms (i.e. FIPS 140-2 Annex A: AES or Triple DES) or compensating controls as documented in a SSP and POAM); and,
  - b. NIST Cryptographic Algorithm Validation Program (CAVP)
6. Implement Control 3.13.16 (Protected the confidentiality of CUI at rest) or provide a POAM for implementation which shall be evaluated by the Navy for risk acceptance.
7. Implement Control 3.1.19 (encrypt CUI on mobile devices) or provide a plan of action for implementation which can be evaluated by the Government Program Manager for risk to the program.
8. Per DoDI 8582.01 of 9 Dec 2019, the Contractor shall conduct a review upon discovery of a cyber incident, involving the compromise of CUI. The review shall include analyzing the contractors information system(s) that were part of the cyber incident, including, but not limited to, identifying compromised computers, servers, specific data, user accounts, and other information systems on the contractor network(s) that may have been accessed as a result of the cyber incident, in order to identify compromised CUI and report cyber incidents to the DoD. (A011)

### 3.3.5 Operations Security (OPSEC)

The NSWCC Crane OPSEC program is issued in NSWCCCRANEINST 3070.1B. Contractor personnel must follow OPSEC concepts and principles in the conduct of this requirement to protect critical information, personnel, facilities, equipment, and operations from compromise. All Contractors (including Subcontractors) shall supplement their current security practices by requiring any personnel involved in executing this contract to complete Government-sponsored and administered Operations Security (OPSEC) training. In addition, all Contractors must be aware of the Critical Information and Indicators List (CIIL). These OPSEC requirements will be in effect throughout the life of the procurement from award through the conclusion of services at the end of the period of performance (PoP) or other procurement termination. The Government

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

will provide additional OPSEC guidance as necessary. The Contractor may contact [cran\\_opsec@us.navy.mil](mailto:cran_opsec@us.navy.mil) for further information.

Public Release of Information: DoD policy that a security and policy review will be performed on all official DoD information intended for public release that pertains to military matters, national security issues, or subjects of significant concern to the DoD. Proposed public releases shall be submitted for review and approval prior to release to the appropriate Government approval authority.

Contractor personnel should be aware at all times of any unusual persons or packages in their work area and immediately report those to the Naval Weapons Station emergency at 911 via landline or (812) 854-5316 via cellular telephone. If Contractor personnel become aware of any person seeking unauthorized access to information or program materials, they should immediately report this to the COR. (A011)

### 3.4 Licenses, Certifications, and Training

The Government may require Security Professional Education Development (SPeD) training and certification for Contractor personnel performing security functions under this task order. Information regarding and access to SPeD training and certification can be found at [www.cdse.edu/certification](http://www.cdse.edu/certification). SPeD training and certification for Contractor personnel at no additional cost to the Government is authorized.

The Government may require Security Engineering Planning Assistance Training (SEPAT) for Contractor personnel performing security functions under this task order. SEPAT training for Contractor personnel at no additional cost to the Government is authorized.

The Government may require GSA certification for Contractor personnel performing lock technician functions under this task order. GSA training for Contractor personnel at no additional cost to the Government is authorized.

Contractor personnel assigned to perform OPSEC-related duties within the Security Division must satisfy specialized training requirements to participate as an OPSEC subject matter expert (SME) for the review of official information considered for public release. Requisite preparatory OPSEC SME training is exclusively offered by the Naval OPSEC Support Team at various U.S. Navy locations and may require travel to attend.

All requests for Contractor training that will incur costs to the Government require prior COR and Contracting Officer approval.

#### 3.4.1 Occupational Safety, Health and Environmental Requirements

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

The Contractor shall be responsible for ensuring the safety of all company employees, other working personnel, and Government property. The contractor is solely responsible for compliance with the Occupational Safety and Health Act (OSHA) (Public Law 91-596) and the resulting applicable standards, OSHA Standard 29 CFR 1910 (general), 1915 (shipboards/submarine) and 1926 (shore), and for the protection, safety and health of their employees and any subcontractors assigned to the respective task orders under this contract. These regulations apply to all related work, as defined in the regulations. Nothing contained in this contract shall be construed as relieving the Contractor from any obligations which it may have for compliance with the aforesaid regulations.

The contractor must have on record a corporate safety plan in accordance with the Occupational Safety and Health Act. The Corporate Safety Plan shall be made available to the NSWC Crane Safety Office to review upon request by the COR (A013). Prior to starting work on base the contractor shall ensure all employees have appropriate personnel annual mandatory safety training in the following areas to perform tasking on a Government facility:

\*HERO

Without government assistance, the contractor shall make certain that all safety requirements are met, safety equipment is provided, and safety procedures are documented as part of its safety plan.

### **3.4.2 Inspections**

The Contractor shall cooperate fully with health, safety, or environmental inspectors from local, State, or Federal agencies. The Contractor shall coordinate response to inspection requests or requests for data made by all external agencies with the COR.

### **3.4.3 Accident/Incident Reporting**

The Contractor shall report all mishaps involving damage to property or injury. (A011) The Contractor shall provide written documentation to the COR of the circumstances surrounding any potentially dangerous situation through the most prudent means available based on the situation.

### **3.4.4 Safety Reports**

The Contractor shall not release any safety related reports to any state, local, or other federal agency or local base authority without written approval of the COR. Stipulations of the release may include copies or other actions required by the COR.

### **3.4.5 Protection Equipment (PPE)**

PPE is provided by the Contractor company to its employees unless otherwise agreed upon by the Contracting Officer in writing.

# Crane Security Support Services (CRSS)

## Statement of Work

03/27/2026

### 3.4.6 Environmental Compliance

The Contractor shall comply with all requirements listed in **Attachment X Annex X, Applicable Documents.**

### 3.4.7 Mandatory Training

Contractor personnel performing work under this contract shall complete all mandatory Government training as identified by the Contracting Officer's Representative (COR). This training may include, but is not limited to, courses assigned and accessed through the Total Workforce Management Services (TWMS) system or other training platforms as specified by the COR. The Contractor shall ensure that all applicable personnel complete assigned training within the timeframe stipulated by the COR or in the applicable training system. The Contractor shall provide a training roster, detailing training completed, for all contractor personnel working under this contract, within its monthly status report CDRL A001. Failure to complete required training or submit the required training roster may result in the Contractor personnel being unable to perform assigned tasks under this contract.

### 3.5 Other Direct Costs (ODCs)

#### 3.4.8 Purchase Approval

The Contractor shall obtain COR and Contracting Officer approval for purchases greater than \$10,000.00. All contract purchases regardless of cost shall provide justification with genuine reason or explanation for the purchase to include a description of materials, identification of the requiring site location, identification of system and/or contract position, identification of the proposed supplier, and the basis of award.

#### 3.4.9 Materials Incidental to the Service

Miscellaneous incidental materials are considered ODCs. In the execution of day-to-day tasks, the Contractor may need to procure miscellaneous materials incidental to the service that will be consumed during the performance of the service. The Contractor shall only purchase and bill the Government for material required to perform service/tasks. The Contractor runs the risk of non-payment for the materials if it is determined that the material is not incidental to the service being performed.

#### 3.4.10 Information Technology (IT) Purchase Approvals

IT is defined as the hardware, firmware, and software used as part of the Information System (IS), enclaves or networks performing DOD information functions. This definition includes computers, telecommunications, automated ISs, and automatic data

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

processing equipment. IT includes any assembly of computer hardware, software, and/or firmware configured to collect, create, communicate, disseminate, process, store, and/or control data or information. All IT purchases must be submitted for review and approval to the Contracting Officer. No IT purchases shall be made without appropriate approval.

### **3.4.11 Administrative Network Services Approvals**

For Navy on-site performance, where contractor personnel are permanently located, the Contractor shall utilize Navy Marine Corps Internet (NMCI) through the Direct Funded Support (DFS) for Contractors for administrative network support, see Section H. All NMCI move, add, changes shall be approved by the COR.

### **3.4.12 Travel Requirements**

The Contractor may be required to travel CONUS. All travel requests for Contractor's travel will be authorized by a COR approved Travel Authorization. The Contractor shall submit a trip report to the technical points of contact for all travel performed no later than two weeks after completion of the trip.

#### **3.4.12.1 Travel Reimbursement**

Travel reimbursement shall be in accordance with the Federal Travel Regulations (FTR) for travel in the contiguous United States and in accordance with the Joint Travel Regulations (JTR) for travel in Alaska, Hawaii, and outlying areas of the United States, as well as the Federal Acquisition Regulations (FAR) 31.205.46. In the event of any travel to areas not covered by the FTR or JTR, it shall be in accordance with the Standardized Regulations under FAR 31.205-46. The Contractor may be required to attend local meetings in support of this effort. This type of travel is considered 'local travel', and per diem and lodging will not be authorized or reimbursed. Mileage may be reimbursed as appropriate, as it relates to the distance of the travel site from the normal place of business/support (>50 miles). Mileage between Contractor and Government facility is not authorized for reimbursement unless proposed separately by the Offeror.

The estimated ODCs do not include travel for employees between NSWCC Crane and the Contractor's facility or work site unless the task area requires a specific work site location outside a 150 miles radius. For example, if a Contractor chooses to employ personnel living in a location remote from NSWCC Crane and the tasking in the SOW or TI requires the Contractor to have access to

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

equipment, systems, networks and/or facilities at NSWC Crane, the Government will not reimburse travel expenses for the Contractor to travel to NSWC Crane to perform work if the SOW/TI specified the requirement for access to any of the aforementioned items.

### **3.4.12.2 Travel Approvals**

The Contractor shall obtain prior written approval from the COR for any travel in support of this contract unless definitively identified in the SOW or TI. The submittal shall include purpose, justification, travel dates, destination, best estimates for airfare / rentals, lodging, and per diem.

### **3.4.12.3 Travel Notification**

The COR shall be notified of any travel undertaken by the Contractor for performance of TO whether prior approval is required or not.

## **3.5 CONTRACT TRANSITION SUPPORT**

### **3.5.1 Transition Support**

The transition support is specifically intended to ensure smooth contract transition that minimized impact to Crane Security support provided to the warfighter.

### **3.5.2 Phase-in Support**

In the event contract award is to other than the incumbent contractor, a phase-in shall begin at award for 60 calendar days. The successor contractor shall meet with the incumbent contractor and cooperate to formulate and effect, orderly, and efficient phase-in transition of all work in progress and operations such that it minimized the impact on military training operations.

### **3.5.3 Phase-out Support**

In the event a successor contract is awarded, prior to expiration of this contract, to other than the incumbent contractor, the incumbent contractor shall provide for phase-out support to exercise reasonable best efforts and cooperation to effect an orderly and efficient transition that minimizes impact on military training operations.

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

Due to the nature of the work being performed under this contract, there are always projects or tasks in various stages of completion at the conclusion of any contract period. Due to the criticality of not interrupting the progress of testing or development of these projects, it is essential that provisions be made to provide for a smooth transition of work in progress from the incumbent to the successor contractor.

### **4.0 GOVERNMENT FURNISHED PROPERTY**

Government Furnished Property (GFP) may be required for completion of tasks under this SOW.

#### **4.1 Procurement Integrated Enterprise Environment (PIEE) GFP Module Reporting and Accountability**

All GFP is property of the U.S. Government and shall not be transferred to any individual or agency, public or private, without the express written approval of the originating Contracting Officer except as required for the specific performance of tasks under this contract/order. Accountability for Government Property under this contract/order shall be managed in accordance with FAR Part 45, DFARS Part 245, and DFARS PGI Part 245 as well as the Government Property clauses in the contract/order whether acquired by the prime or subcontractors (Contractor Acquired Property), provided by the Government, or received directly from another commercial source as a deliverable from a Government issued contract. Additional Government Property accountability requirements are outlined in the following Directives and Instructions and shall be adhered to as applicable:

- DoDI 4161.02, Accountability & management of Government Contract Property
- DoDM 4140.01, DoD Supply Chain Material Management Procedures: Material Returns, Retention and Disposition
- DoDI 5000.64, Accountability & Management of DoD Equipment and Other Accountable Property
- OPNAVINST 4440.26C, Operating Materials & Supplies and Government Furnished Material Management
- SECNAVINST 5200.43A, Government Furnished Property, Accountability and Management
- NAVSEAINST 5200.15, General Equipment Accountability

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

### **4.1.1 Receipt Reporting**

FAR 52.245-1(f)(1)(ii) requires the Contractor to report receipt of all GFP. Reporting of Government Furnished Property (DFARS 252.245-7005) and DoDI 4161.02, Accountability and Management of Government Contract Property Instruction requires that contractors, as part of the required receipt of any Government property, report to the DoD IUID Registry using WAWF, DLMS transactions, or direct update of the registry. Contractors shall ensure appropriate accountable property records are maintained utilizing the data reported in the DoD IUID Registry and its integral GFP Module in the Procurement Integrated Enterprise Environment (PIEE). At the time of reporting receipt of GFP in the GFP Module, the Contractor will add the email address of the Technical Point of Contact for notification of receipt.

### **4.1.2 Shipping Notification**

DoDI 4161.02 requires use of electronic transactions when transferring Government property to a Contractor and upon return of property to DoD. The Contractor shall use the GFP Module in PIEE when returning GFP back to the Government. At the time of creating the shipping document to return GFP using the GFP Module, the Contractor will add the email address of the Technical Point of Contact for notification of shipment.

### **4.1.3 Contractor-Acquired Property (CAP)**

FAR 52.245-1 defines CAP as property acquired, fabricated, or otherwise provided by the Contractor for performing a contract, and to which the government has title. To request CAP conversion to GFP or contractor to buy back, the contractor must utilize the CAP Pre-screening capability within the PIEE GFP Module.

### **4.1.4 Lost, Damaged, or Stolen GFP Reporting**

FAR clause 52.245-1 requires the Contractor to investigate and report to the Government all incidents of property loss as soon as the facts become known. DFARS 252.245-7005 further requires the Contractor to report lost, damaged or stolen Government property using the Property Loss functionality within the PIEE GFP Module.

### **4.1.5 Excess Property Reporting**

SECNAVINST 5200.43A required unused or excess GFP be properly dispositioned as soon as the excess is identified without waiting for formal contract closeout processing. Recovering excess property from the Contractor will be completed by the return of GFP back to the Government via a DD-1149 or utilizing the GFP Module Plant Clearance capability as soon as possible to ensure the property is available to fill other requirements and can potentially reduce the administrative costs of the contract. The

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

Government-appointed Plant Clearance Officer (PLCO) will accept or reject the request to excess GFP using the GFP Module Plant Clearance capability.

### **4.2 Inventory Reporting**

FAR 52.245-1 requires the Contractor to periodically perform, record, and disclose physical inventory results. While the FAR clause does not define “periodically”, frequency of on-hand inventory count are in the Contract Data Requirements List (CDRL) identified in this contract.

#### **4.2.1 GFP Reporting**

The Contractor shall provide data deliverables IAW the listed CDRLs by contract and contract order number (if applicable) to provide accountability for all Government furnished property that has been provided in support of the contract. The report shall include the fields required by the Data Item Description noted in the CDRL, DFARS 252.245-7005 and DFARS PGI 245.103-72 for the purpose of accountability. (CDRL A012)

### **4.3 Property Pass Issuance**

Upon delivery of GFP, including NMCI assets and peripherals, directly for use by Contractor personnel via a Government issued DD-1149, Contractors required to travel to and from a Government installation with GFP must maintain a Contractor issued OF7-20 with their assigned asset at all times. This includes Contractors allowed to telework that will be taking their computer on and off a Government site. Contractors may be required to show proof of issuance at security checkpoints upon entry or departure of the installation.

OF7-20 is available at <https://www.gsa.gov/forms-library/property-pass>

### **4.4 Government Furnished Material (GFM)**

The GFM will be provided when the Contractor has a requirement for special or specific Government material in the performance of specific tasking or a lay-in material for repairs, refurbishment, upgrade of systems. GFM planned to be provided will be identified on a GFP attachment for each contract as applicable. The Contractor shall maintain a complete listing of all serial managed operating materials and supplies where title is vested to the Government.

### **4.5 Government Furnished Equipment (GFE)**

#### **4.5.1 Industrial Operations**

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

Government Furnished Equipment (GFE) will be provided when the Contractor has a requirement for special tooling, special test equipment or specific Government equipment per specific tasking and be identified on the GFP attachment for each contract as applicable. The Contractor shall maintain a complete listing of all general equipment where title is vested to the Government.

### **4.5.2 Office Environment Operations**

#### **4.5.2.1 Computer Equipment**

Contractor personnel supporting NSWCrane SeaPort Task Orders will be provided the required office equipment to be utilized during the performance of tasks stated in this order if required to perform the tasking. An NMCI suite of equipment to include an NMCI computer and standard peripherals such as a monitor, mouse, keyboard, camera, docking station and headset will be provided for performance as needed to complete the required tasking. The appropriate software will also be provided. Printers will be available on-site via the NMCI network as required. The NMCI suite of equipment will be assigned to individual contractor support personnel and issued to the contractor company via DD-1149 and registered in the PIII GFP module for property administration purposes. The NMCI suite of equipment will require reporting IAW SOW paragraph 4.1. It is the responsibility of the contractor to ensure its employees are provided the assigned equipment and proper oversight of the equipment is maintained. Any changes in personnel assigned to the NMCI suite of equipment must be reported to the COR.

The Contractor will be responsible for providing its employees any specialized equipment needed for reasonable accommodation or to fulfill other special needs of its employees not associated with the required tasking.

#### **4.5.2.2 Return of Computer Equipment**

Computer equipment is assigned by name to Contractor personnel, therefore when a Contractor no longer requires the NMCI suite of equipment, it shall be returned to the NSWCrane IT ACTR within 5 business days. If the equipment is being transferred to another contractor employee, the NSWCrane IT ACTR, Code 104X shall be notified of the change via the COR. The notification shall include the current employee's name, asset tag number, serial number and any other identifying information.

The requirements of this SOW paragraph 4.1 apply to all NMCI suite of equipment items provided to the Contractor.

#### **4.5.2.3 Other Office Equipment**

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

For offices located within NSWCR Crane spaces, landline telephones with long distance/voice mail capability for official Government business will be provided. Cell phones, smart phones, iPads or other electronic devices will not be provided by the Government. For tasking performed outside of NSWCR spaces (i.e. telework, contractor facilities, or remote work), the contractor shall be responsible for providing all communication capability in performance of government tasking. In instances when the Contractor needs to provide mobile communications, the contract may only be direct charged when authorized by the Contracting Officer. Authorizations will only be granted when an operational requirement is determined to require the use of a mobile device versus a landline or NMCI computer to perform the tasking assigned.

The Contractor will be responsible for providing its employees any specialized equipment or services necessary to fulfill their job functions, including those required for reasonable accommodations or to address other special needs of its employees. Such costs are the responsibility of the Contractor and are not a direct charge to this task order.

### **4.6 Government Furnished Facilities (GFF)**

Contractor personnel performing tasking within NSWCR Crane facilities will be authorized access to Government owned or leased facilities which are required for use during the performance of tasks stated in this contract/order. Facilities provided will include general and classified labs, production or office spaces, and other spaces as the tasking requires. The spaces will include standard desks, chairs, lab tables and other items associated with the facilities, as needed to perform the tasking. Landlines for phones and network connectivity will be provided as required to accomplish the tasking performed under the contract/order. Facilities the contractor personnel are assigned to at NSWCR Crane may be periodically changed as office areas are moved to accommodate facility upgrades, conform to re-organizations within the NSWCR Crane Division or incorporate continuous improvement process changes to improve efficiency.

### **4.7 Government Owned / Leased / Controlled Non-Tactical Vehicles (NTVs)**

The Government may provide contractor access and authorization to operate Government-owned, -leased, and -controlled non tactical vehicles (NTVs) for the purpose of transporting materials and documents to and from buildings within the NSWCR CRANE confines, as well as to and from designated locations, including:

# Crane Security Support Services (CRSS) Statement of Work

03/27/2026

WestGate@Crane Technology Park, EastGate Business and Technology Center, Lake Glendora, Indiana National Guard (Indianapolis and Terre Haute), TriStar (Bloomington), Purdue University (West Lafayette), Camp Atterbury (Edinburgh), and Indiana University (Bloomington), which are all located in the state of Indiana. Any location outside of the NSWC CRANE confines that is not identified above shall be approved by the Contracting Officer prior to the Contractor utilizing the Government-owned vehicle to travel to that location. Government provided vehicles shall be used solely for the purposes as described in this SOW. All drivers must present proof of valid operator driver's license prior to operating a Government vehicle. The Contractor shall operate motor vehicles in accordance with DODI/DODM 4500.36 or most recent instruction. All Contractor personnel operating Government vehicles, to include materials handling equipment, shall be licensed IAW provision set forth in DODI/DODM 4500.36 . The Contractor shall ensure contractor personnel have in their possession a valid US Government Motor Vehicle Operator's Identification Card (SF46) or valid state driver's license, as applicable, when operating vehicles and equipment. Employees possessing a valid Government license need not be re-licensed. The Contractor shall report any accidents involving motor vehicles or any other equipment IAW Appendix 2 to DODM 4500.36.

## 5.0 TECHNICAL DATA DELIVERABLES

All data deliverables shall be made as specified and in Contractor format unless otherwise directed. All deliverables shall be submitted to the COR referenced in Section G.

| CDRL Number | Data Item Description                               | Data Item Description Number | SOW Paragraph |
|-------------|-----------------------------------------------------|------------------------------|---------------|
| A001        | Contractor's Progress, Status and Management Report | DI-MGMT-80368A               | 3.0           |
| A002        | Contract Invoicing and Payment Report               | DI-MGMT-81651                | 3.0           |
| A003        | Funds and Man-hours Expenditure Report              | DI-FNCL-80331A               | 3.0           |
| A004        | Contract Funds Status Report                        | DI-MGMT-81468B               | 3.0           |
| A005        | Trip/Travel Report                                  | DI-MISC-81943                | 3.0           |

## 6.0 SPECIAL CONDITIONS

### 6.1 Place of Performance

Portions of the tasking require access to Government equipment and systems that are only available at NSWC Crane or other Government locations as identified in the applicable Task Area. Tasking not requiring Government site performance may be provided via remote work or telework from anywhere, however, NSWC Crane will not reimburse for travel to Government sites if on-site performance becomes necessary without written approval by the Contracting Officer. In addition, the contractor is responsible for ensuring all necessary access to Government systems is available to contractor personnel at no additional cost to the Government if remote or telework is authorized by the contractor.

Contractor shall provide personnel to perform services at the Contractor's facility, NSWC Crane, or any other off-site locations required to complete mission goals, which may include, but are not limited to, the following: Lake Glendora.

All personnel are on government site with the exception of the Program Manager. The Program Manager shall be within 50 mile radius of NSWC Crane due to all personnel being located at NSWC Crane. The ratio of on-site to off-site labor may change with additional workload assigned.

#### 6.1.2 Telework

The COR shall be notified of all contractor personnel allowed to telework in performance of this TO. The Contractor shall provide a copy of the company telework policy to the Contracting Officer and COR if telework will be authorized for employees performing under this TO. The Government reserves the right to disallow telework for tasking within the SOW by Task Area if the assigned tasking is not conducive to

03/27/2026

telework. Safeguarding of Controlled Unclassified Information shall be strictly enforced as required in SOW Section 3 above.

### **6.2 Contractor Work Schedules**

NSWC Crane core duty hours for on-site Contractor personnel and the Contractor's liaison facility personnel assigned to this effort are 0900-1430 hours, Monday through Friday, during regular Government workdays. Government personnel are afforded flextime schedules depending on the applicable work schedule. In addition, Government personnel in some work areas may be on a compressed work schedule with every other Friday as a Regular Day Off. Unless otherwise required by the Task Area, Technical Instruction, or SOW, on-site contractors are allowed in Government spaces only when Government personnel are present. Contractor work schedules are to be established by the Contractor Program Manager in such a manner as to ensure the tasking assigned is completed in the most cost effective and efficient manner in accordance with company timekeeping policies. Flex-time and compressed work schedules may not be allowed for employees involved with training, specific testing operations where the workday is established based on range operation schedules and availability or other specific tasking. The TA will indicate if flex-time and/or a compressed work schedule is not authorized and will provide the required hours of coverage.

Additionally, the Contractor may be required to have its personnel work a flexible or fixed schedule, to meet special Government needs or circumstances. Specific work hour requirements will be specified in the SOW or individual TIs if applicable.

The Contractor may be required to respond to an emergency and work outside of regular working hours to perform the work when the need arises. Tasking that might require coverage outside regular working hours includes Alarm Monitoring Personnel, Lock Shop, and Electronic Security Systems. The COR will notify the Contractor if coverage outside of regular working hours is required. If overtime is required and not approved in the task order, the Contractor must obtain Contracting Officer approval to charge overtime to the task order.

The Contractor shall notify the Government if any work schedule changes required by the Government shall have cost or schedule impact IAW FAR 52.243-2, Alt I, Changes – Cost Requirement.

#### **6.2.1 On-Call Support Services**

# **Crane Security Support Services (CRSS)**

## **Statement of Work**

03/27/2026

The Contractor shall provide on-call services to ensure the continuous operation and immediate response to failures of critical systems, some examples may include locking mechanisms, Electronic Security Systems (ESS), access control systems, and related network infrastructure.

### **6.2.1.1 Hours of Coverage**

On-call support shall be available 24 hours a day, 7 days a week, including all Federal holidays.

### **6.2.1.2 On-Call Procedures and Response Times**

The Contractor shall establish and maintain a formal on-call procedure. The Government will initiate contact via a designated on-call phone number provided by the Contractor. The Contractor's response shall adhere to the following timeline:

Level 1 (Initial Acknowledgement): The Contractor's on-call representative shall respond to the initial call or message from the Government POC within 30 minutes to acknowledge the issue.

Level 2 (Remote Response): Within one (1) hour of acknowledgement, the Contractor shall initiate remote troubleshooting or problem resolution.

Level 3 (On-Site Response): In the event the issue cannot be resolved, the Contractor shall have a qualified technician on-site within two (2) hours from the time the determination for on-site support is made.

### **6.2.1.3 On Call Roster and Reporting**

The Contractor shall deliver a detailed on-call roster to the COR and the Government technical POC no later than three (3) days prior to the start of each month. The roster must include names, primary and alternate contract numbers, and assigned on-call dates for all designated personnel. Any changes to the on-call schedule must be submitted to the COR at least 48 hours in advance, except in cases of bona fide personal emergencies.

## **6.3 Performance Standards**

The requirements of this task order are structured around the results to be achieved as opposed to the manner by which the work is to be performed. The effort performed hereunder will be evaluated in accordance with the performance standards/acceptable quality levels summarized in the Quality Assurance Surveillance Plan (QASP) identified in Section J Attachments to the RFP. Performance standards are required to be met for each of the identified Task Requirements.

## **6.4 Information Non-Disclosure**

## **Crane Security Support Services (CRSS) Statement of Work**

03/27/2026

Contractor personnel may be required, from time to time, to sign Non-Disclosure Agreements (NDAs) for specific SOW tasking. The COR will notify the Contractor of the number and type of personnel that will need to sign the Non-Disclosure Agreements. The signed Non-Disclosure Agreements shall be executed prior to accessing data or providing support for information that must be safeguarded. The NDA must be returned to the COR for endorsement and retention. Copies of all executed NDAs shall be provided to the COR. NDAs signed apply only to Government owned information. NDAs with NSWC Crane are not applicable to information marked proprietary to Commercial Organizations and do not authorize contractor personnel access to commercial entity proprietary data. Therefore Contractor personnel may be required to sign NDAs with third party organizations in order to protect proprietary data of those third party organizations. Contractors being granted access to proprietary data of third party organizations shall notify the Contractor Program Manager and ensure proper third party NDAs are in place prior to accessing the data. If tasking cannot be completed without access to third party proprietary data and the proper NDAs are not in place, the Contractor shall immediately notify the COR.
