

STATEMENT OF WORK (SERVICES) (SOW)

GENERAL INFORMATION

Title of Project:

Maintenance Contract for Tape Backup and Disk Storage Systems

Statement of Need and Purpose:

A maintenance contract is required to provide the necessary maintenance for a tape backup system that is used to back up the data stored on the disk storage system to tape. This ensures that no data will be lost in case of disk storage failure. The maintenance contract also includes maintenance for the disk storage system that will provide necessary updates to firmware and immediate service in the event of failure of individual disks or other components within the system.

Background Information and Objective:

The NIMH, Human Genetics Branch, Section on Developmental Neurogenomics conducts studies of developmental neuropsychiatric diseases. These studies involve the collection of very large genetic, neuroimaging, and behavioral datasets. The data are stored on large capacity disk storage arrays and backed up onto tape for storage at a remote site in case of a catastrophic event. The objective is to ensure that the data will be available with a minimum of downtime in case of disk or tape drive failure. The maintenance contract also provides support in terms of firmware and software upgrades especially with regards to data security.

Period of Performance:

The period of performance is one 12-month base year from the date of the award.
Proposed Base Year: 4/22/2026 – 4/21/2027

SCOPE OF WORK

General Requirements:

Independently and not as an agent of the Government, the Contractor shall furnish all the necessary services, qualified personnel, material, equipment, and facilities, not otherwise provided by the Government as needed to perform the Statement of Work below:

Specific Requirements:

The maintenance contract requires in-depth knowledge and expertise of the hardware and software components of the disk storage and tape backup systems. Technical assistance will be available on a 24/7 basis in order to minimize downtime for the researchers that depend on these systems.

The Government requirement is to avoid interruptions in research activities causing loss of productivity. Repairs will be performed under the direction of technical experts.

LEVEL OF EFFORT:

The amount of labor hours by the technical experts will vary according to disk storage and tape backup system needs. The systems are known to be robust and reliable so the effort will be a function of unforeseen hardware failure or software upgrades.

GOVERNMENT RESPONSIBILITIES:

The Government will ensure the specific equipment is available for onsite maintenance or repair by the contractor, if needed.

DELIVERY OR DELIVERABLES

The contractor will provide technical phone support on a 24/7 basis and will provide next business day access to upgrades, onsite support and assistance, and repair, maintenance, and replacement of parts.

REPORTING REQUIREMENTS

Not applicable.

OTHER CONSIDERATIONS

Travel:

None.

Key Personnel:

Not applicable.

Information System Security Plan:

Not applicable. No sensitive information is involved.

Data Rights:

No NIH data rights are involved.

Section 508—Electronic and Information Technology Standards:

Not applicable.

Publications and Publicity:

Not applicable.

Confidentiality of Information:

Not applicable. The government will not provide to the contractor any information or data of a personal nature about individual(s) or proprietary information or data pertaining to an institution or organization which is confidential. No confidential information or data will be generated.
