

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: AFMC AFSC OL:H/PZIEB

Project/Program Name: F-35 Joint Program Office

Purchase Request / Local ID Number: Alexsys 15205 PRI 24649

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

This is a single source requirement for commercial off the shelf (COTS) hardware, manufactured by Xtreme Engineering Solutions Inc. (X-ES) in support of 521 Software Squadron (521SWES). The hardware will provide the F-35 Joint Program Office (JPO) with the card imaging capability required for developing and testing operational functions.

The contractor shall provide the following items:

CLIN 0001

Description: XPand1203, Chassis, 3U, VPX, Dev Platform for Cond. cooled Modules, Pass through Backplane, w/RT3.

PN: 90072665-2

QTY: 1 Each

Estimate Value [REDACTED]

CLIN 0002

Description: XPand1007, Chassis, 3U, VPX, 2 slot Cond. Cooled, Pass Through Backplane, RT3, XPm1520

PN: 90075300-4

QTY: 4 each

Estimate Value [REDACTED]

Total Estimated Value [REDACTED]

Delivery: 60 Days After Receipt of Order (ARO)

This is a commercial off the shelf item, and the same terms and conditions apply.

Manufacturer warranty only, no extended warranty required.

Section C: Justification for Soliciting from a Single Source or Brand Name

In accordance with FAR 6.103-1 "Only one responsible source and no other supplies of services will satisfy agency requirements." This is a single source justification of X-ES 8-slot and 2-slot 3U chassis. This equipment is essential for imaging VPX cards during the development phase and for testing operational capabilities for the F-35 program. The selection of X-ES products resulted from a technical evaluation of other brands with similar products, which determined X-ES to be superior by confirming their chassis met all essential program requirements. These critical specifications include a SOSA aligned backplane, support for Vita 61, a 3U VPX size, and being conduction cooled or accepting inserts to convert to conduction cooled. Additionally, the chassis must provide wafer access to the rear of the unit, not just RTM access, and utilize standard cables. The units must also function as development chassis suitable for desktop use, rather than being exclusively server-mounted. Another key factor in this decision is that X-ES chassis is already the common hardware standard across affiliated private and government sister locations, including laboratories at Hill AFB. Restricting this procurement to the X-ES brand is necessary because this specific program already utilizes X-ES chassis. This standardization allows for the full interchangeability of parts, which is crucial for simplifying logistics and enhancing operational readiness. The direct advantages include facilitating on site repairs, decreasing equipment downtime, increasing the total usable lifespan of assets, and reducing the complexity of sustainment services.

Single Source Justification (Simplified Acquisition)

Section D: Efforts to Obtain Competition

Market research was conducted to identify sources for the required X-ES chassis. Similar products for the following alternate sources were evaluated for technical acceptance: Abaco, Annapolis Micro systems, Wakefield Thermal, Elma, Vadatech, Aitech, and Amphenol. Most chassis do not support the correct Vita standard with several being the older standard(Vita 42) or too new (Vita 67 & 68). Searches were performed across all mandatory government -wide acquisition contracts, including Quarterly Enterprise Buy catalog, 2GIT, GSA Advantage, and NASA SEWP. None of these searches yielded positive results. Subsequently, the program manager contacted the Original Equipment Manufacturer (OEM), who confirmed that their products are sold exclusively through a direct single source channel and are not available via resellers. No Request For information were posted, due to lack of authorized resellers available. Based on this research, it is determined that a single source procurement is the only viable method to acquire this product.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

For reasons stated above, it is not anticipated that future acquisitions supporting the F-35 JPO equipment currently in use by the Air Force could allow for competitive acquisition. However, the government continuously monitors advances in technology. If changes in the marketplace reveal alternative products capable of satisfying the government's requirements, the government will write future requirement description suitable for full and open competition.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
