4a. Name of Requirement

Repair Snow Barn Doors

b. Description of Requirement

This requirement is for the complete refurbishment of four existing Mega Door brand overhead doors at Building 158, Pease Air National Guard Base. The work includes replacing the door fabric, lifting belts, brake assemblies, and other worn components to restore the doors to a like-new, fully operational condition.

c. Demonstrate, in Detail, Why This Specific Item or Service, is the Only One That Meets Your Requirements

To ensure the operational integrity and safety of this specialized equipment, it is a mandatory requirement that all work is performed by technicians specifically qualified and certified by MegaDoor. Furthermore, to maintain system compatibility, only authentic, manufacturer-certified MegaDoor parts and materials may be used for all repairs and replacements to guarantee the quality of the work.

The requirement to use only MegaDoor-certified technicians and authentic MegaDoor components is based on the fact that the pre-existing overhead door systems at our facility are proprietary MegaDoor products. The use of third-party components is not feasible, as they are not designed to be compatible with the intricate and specific engineering of the existing MegaDoor structures, posing significant risks to system integrity and operational reliability. Furthermore, employing technicians who are not certified by MegaDoor poses a risk of faulty installation and transfers the full liability for any system failures to the Government.

The only viable alternative to this approach would be the complete replacement of the four door systems in their entirety. This would impose a substantial and prohibitive capital expense on the Government, an amount that would far outweigh and would not be recouped by any potential savings achieved through a competitive process for the maintenance services. Therefore, adhering to the use of proprietary parts and certified labor is the most responsible and cost-effective method to ensure the continued performance and longevity of this critical infrastructure.

5a. HAS THIS BEEN PREVIOUSLY PROCURED?

☐ Yes, details are below. ☒ No.

6a. AUTHORITY CITED

10 U.S.C. 2304(a)(1) or 41 U.S.C. 3304(a)(1) as implemented in FAR 6.302-1 Only one responsible source and no other supplies or services will satisfy agency requirements.

b. Reason for Authority Cited

The Government is pursuing a brand-specific requirement in accordance with FAR 6.302-1 (RFO 6.103-1), as doing so is in the best interest of the Government. This action is necessary because the structures to be serviced are preexisting, proprietary MegaDoor systems. Utilizing third-party components or unauthorized technicians presents a significant risk, as non MegaDoor parts may not be compatible with the equipment currently in place. However, the Government recognizes the possibility that MegaDoor may have authorized third-party vendors who are qualified to service these systems and are approved to supply authentic MegaDoor-specific components. For this reason, the acquisition is being pursued on a brand-specific basis rather than as a more restrictive sole-source requirement. This approach ensures that the integrity of the equipment is maintained while still allowing for competition among any vendors that meet the necessary qualifications set by the original manufacturer.

7. POSTING REQUIREMENTS

None.

8. CONTRACTING REQUIREMENTS

a. Efforts to Obtain Competition

Describe the efforts to solicit offers from as many potential sources as is practicable. Also, state that the notices required by FAR 5.201 shall be or have been published, and that any bids or proposals received shall be considered. If a notice is not posted, state which

exception in FAR 5.202 applies.

- a. Effective competition. Describe the extent of effective competition anticipated for this acquisition.
- b. Subcontracting competition. In single source situations, address efforts by the Government to assure that the prime contractor obtains as much competition as possible in its subcontracting.

To promote competition, the requirement will be restricted to a brand-specific basis only. This approach allows any potential authorized resellers to participate in the solicitation and submit offers.

b. Actions to Increase Competition :

The Government will source this requirement competitively through the Government Point of Entry (GPE) with the brand justification posted. Any vendor who can meet requirement is authorized to submit a quote.

c. Market Research :

The Government will post this competitive requirement on the Government Point of Entry (GPE), including the brand name justification, and invites quotes from all vendors who can satisfy the stated requirements.

d. Interested Sources :

TBD

e. Other Facts :

N/A

9. REQUIRING ACTIVITY CERTIFICATION

Technical and Requirements

I certify that the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.
