

Technical Specification
for
License and Support
of
Financial Capability Assessments

1. Background

The Defense Contract Management Agency (DCMA) is an agency in the United States with headquarters located in Ft. Lee, Virginia.

2. Statement of Work

The Defense Contract Management Agency (DCMA) provides comprehensive financial capability assessments in order to:

- (a) support the Department of Defense (DoD) in the development and sustainment of Government contract administration services, and
- (b) support of industrial capability studies on major DoD contractors' supply chain.

DCMA performs financial capability assessments by analyzing companies' financial performance using company-provided financial statements, publicly available financial information, industry comparison studies, credit history information, and market analysis information.

DCMA's financial capability assessment reports and presentations, include:

- (a) comprehensive review of a company's financial capability to support its current and future workload, and
- (b) an assessment of the probability of a company encountering liquidity or solvency problems.

The major, principal purpose of this Technical Specification is to obtain from the Contractor the authorized, licensed access by DCMA employees to the Contractor's Web-based search platform with access to the Contractor's database of financial capability assessments (off-premises) with maintenance and support of Contractor's software.

3. Requirements

- 3.1.1 License. The DCMA requires the Contractor to grant and authorize to the DCMA for: a fixed, short term (subscription) license of one (1) base year plus four (4) option years of the Web-based access to financial capability assessments.

Software License:	Databases of business credit and financial historical information
Software Grantee:	DCMA users

Quantity of Users:	24 concurrent users
Hosting Location:	on the Contractor's site (off-DCMA premises)

3.1.2 Requirements.

3.1.2.1. As the minimum requirements, DCMA currently requires industry comparison, historical financial information, and financial market analysis information. At a minimum, the contractor is required to provide a web-based search platform with access to the Contractor's database that provides analysis on publicly traded companies, international companies, and private companies with public debt. In summary, the DCMA requires the capability from the financial database for the reports, presentations, or any other discussion document contribute by DCMA's analysis and to a quick turnaround time for DoD customers of DCMA. See paragraph 3.1.3 for a detailed list of requirements.

3.1.2.2. Contractor's database functionality shall allow for easy access, "click-through" features that drill down to obtain multiyear historical financial data, affiliated company information, key financial metrics, merger and acquisition information, and comparative analysis to related companies. This software functionality has the capability to convert international company's financial currency to U.S. currency.

3.1.3. Features and benefits

In order to create reports, presentations or any other discussion document, DCMA requires financial market information from the compiled data embedded in a Contractor's Web-based search platform with access to the Contractor's financial capability assessment. (off-premises).

Contractor grants the DCMA the limited right to access and utilize the Contractor's platform and to search and retrieve the information derived from the Contractor's platform.
