

Notice of Intent to Sole Source: Milli-Q IQ 7005 Water Purification System

(75N98026Q00181)

The National Institutes of Health intends to award a Firm-Fixed-Price Purchase Order to EMD Millipore Corp.

In accordance with FAR Part 6.302-1, EMD Millipore Corp is the only known responsible source who can provide the products/services that meet our standards. No other source has been identified who can provide the requirements listed below.

The National Institute of Diabetes and Digestive and Kidney Diseases Clinical Mass Spectrometry Core requires the acquisition of one Milli-Q IQ 7005 ultrapure water purification system. The system will produce laboratory-grade Type 1 ultrapure water required for preparation of solvents, calibration standards, blanks, and biological samples used in liquid chromatography mass spectrometry analysis. The purchase includes one Milli-Q IQ 7005 ultrapure water purification system, one 25-liter storage tank with frame and top assembly, one Q-POD remote dispensing unit, one E-POD remote dispensing unit, installation kit with initial filtration components, and contractor installation and startup services.

The requested Milli-Q IQ 7005 system provides integrated polishing, monitoring, and dispensing modules specifically designed for high-sensitivity analytical instrumentation. Substitution with a different brand would require:

Revalidation of analytical methods
Potential modification of SOPs
Compatibility assessment with current plumbing and dispensing configuration
Risk of introducing variability into ongoing research workflows

Given the critical role of ultrapure water in mass spectrometry, system performance consistency is essential.

MilliporeSigma (EMD Millipore) is the original manufacturer and exclusive provider of the Milli-Q IQ 7005 system.

The system, proprietary components, consumables, and authorized installation services are only available directly from the manufacturer. No third-party vendor is authorized to supply or install this specific system.

Maintaining the same manufacturer ensures:

- Continuity of validated laboratory protocols
- Compatibility with existing consumables
- Availability of OEM technical support
- Reduced transition risk

Accordingly, only EMD Millipore Corporation can provide the required system and associated services.

This notice is not a request for competitive quotes. EMD Millipore Corp is the manufacturer. However, any available small businesses (e.g., 8(a), service-disabled veteran owned small business, HUBZone small business, small disadvantaged business, veteran-owned small business, and women-owned small business) as stated herein may submit a written capability statement that clearly supports and demonstrates their ability to perform the requirement. A

determination by the Government to compete this proposed award based upon responses to this notice is solely within the discretion of the Government.

It is anticipated that an award will be issued approximately five (5) days after the date of this notice unless the Government determines that another vendor has the capability to meet this requirement.

Please email responses to david.shen@nih.gov no later than 7:00 a.m. EST on April 16, 2026.
