

Statement of Work

Background

The USDA, APHIS, PPQ, NIS National Specialists provide support for identifications of insect specimens intercepted as part of domestic and AQI (Agriculture Quarantine Inspection) programs at ports of entry and emergency program activities. The QIAxcel Connect System for the NIS Molecular Mycology Lab (MML) replaces traditional, labor-intensive gel analysis of DNA via a fully automated, high-throughput system that reduces working time and human error and increases quality of results.

Specification Requirements

Part Number	Item	Quantity
9003111	QIAxcel Connect SYS-DFUL-1	1
929004	QIAxcel DNA Screening Kit (2400)	1
929524	QX Alignment Marker 15 bp/5 kb (1.5 ml)	1
929559	QX Size Marker 100 bp - 2.5 kb (50 µl)	1
929705	QX Nitrogen Cylinder (6)	1
9003206	QIASphere Package B for QIAxcel	1
