REVERSE AUCTION

The solicitation will contain provision 52.215-9023, Reverse Auction, which allows for the use of a reverse auction as a pricing technique. After the solicitation closes, the contracting officer will determine if a reverse auction will be held. If a reverse auction is held, contractors must be registered in the reverse auction system in order to participate in the auction. Additionally, the contractor representative participating in the auction must have taken the on-line reverse auction training prior to the auction. Registration, on-line training, and other information regarding the reverse auction can be found at <https://dla.procurexinc.com>. Any questions related to the reverse auction system or process can be directed to the Contract Specialist.
