

Attachment 2
Technical Information

1. Building control System Technical Information (2 pages Maximum):

Provide a list of commercially available BACnet compatible programmable buildings field controllers and any associated network components manufactured by your firm which either Distech EC-gfx Programming Line Software or Honeywell's CIPer and Spyder line software has been used to program the field controllers through a Tridium JACE 8000 or 9000.

- a. Model Number, Catalog Number, Code Number, or equivalent model designation.
- b. Product Description
- c. Manufacture's technical data sheet.
- d. Any special/reoccurring licensing requirements

2. Experience (3 pages maximum):

Identify three (3) installed systems where Distech EC-gfx Programming Line Software or Honeywell's CIPer/Spyder line software has been used to program your firms programmable field controllers from a Tridium JACE 8000 or 9000 presented under Item 1 above. For each project, provide the customer point of contact including name, phone number and email and a narrative description of the product/service provided by your organization. Also provide project title, project location (city/state), procurement contract number and contract value if available.
