

Q#	Question	Response
1	Please provide six weeks for responses to the Request for Proposal (RFP).	The Government will provide at least 30 days for RFP responses.
2	Is there a requirement to submit proposals for projects outside of our primary (geographic) service areas?	RFP Atch 1, Statement of Work (SOW), Section 6 describes on/off ramp procedures, including the expectation for contract holders to participate in TO competitions in good faith. However, there is no requirement in the FARM III SOW mandating a minimum participation rate for proposing on TOs.
3	If shortlisted, is there a minimum number of projects we would be expected to propose on?	Please see response to Q2.
4	Will any of the projects require a Project Labor Agreement (PLA)?	Per FAR 22.5 Project Labor Agreements will be required on projects over \$35M unless an exception applies.
5	Reference Section L-3.1.3.2(b): Would the Government consider reducing the \$50M single / \$100M aggregate bonding requirement to increase competition among small businesses?	The Government determined magnitude thresholds for the FARM III contract based on projected workload that would be solicited through Fair Opportunities. FARM III awardees will have to be capable of executing task orders (TOs) up to the single order maximum amount of \$50M (see RFP Atch A SF1442). This drives the bonding capacity requirement for single bonding of \$50M per project; the aggregate amount of \$100M is intended to ensure that FARM III awardees are not precluded from executing more than one TO at a time due to bonding certification limitations.

Q#	Question	Response
6	Reference Section L-3.1.3.2: While the solicitation states that "stacking" of subcontractor bonds is not accepted, will the Government confirm that a formal Small Business Administration (SBA)-approved Joint Venture (JV) may utilize the combined bonding capacity of its members to meet the \$50M/\$100M requirement?	If an Offeror or group of Offerors form a JV to propose on the FARM III contract, or if an existing JV opts to propose on the FARM III contract, the JV is then considered the Prime contractor and would be required to meet the construction bonding requirements described in Section L-3.1.3.2. The method in which the JV achieves its bonding certification is up to the JV itself.
7	Reference Section L-3.1.3.2(b): If an offeror takes a formal exception to the bonding certification requirements in Table L-3.1.5-1 based on a lower (but sufficient) bonding limit, will that proposal be considered, or will it be deemed "Technically Unacceptable" during the initial gate review?	As stated in Section L-3.1.3.2(b), Offerors who cannot provide the minimum bonding certification qualifications will not be considered for award.
8	Reference Section L-3.2.2.6: If a Contractor Performance Assessment Reporting System (CPARS) rating is not available, can a recent Past Performance Questionnaire (PPQ) using the standard United States Army Corps of Engineers (USACE) PPQ template be used?	Per Section L-3.2.2.6, if an Offeror submits a work sample that has no CPAR data available, the Offeror can submit a CPARS equivalent data using Attachment L-5, Past Performance Rating Form in lieu of a CPAR. Submissions using templates or formats other than Attachment L-5 (including previously completed PPQs) will not be accepted.

Q#	Question	Response
9	Reference Section L-3.2.1.2: We recommend allowing Formal Teaming partner Work Samples to be used for evaluation. Rationale: Very few Prime contractors will have the full-breadth of experience in-house. Primes often rely on specialty subcontractors to perform specialty work such as is envisioned under FARM III. Allowing Teaming Partner experience will provide the Government with more robust competition as well as allow Primes to include local subcontractors on the formal Team. We recommend using the included Atch 6 L-6 to document Formal Teaming partners whose experience is evaluated, requiring the Prime to include the Teaming Agreement in the Proposal, and requiring a Prime to request written approval with justification from the CO for any Task Order that they do not intend to use the original Teaming Partner to perform.	Draft RFP Atch 6, Section L_V1, dated 10 March 2026 was updated to allow Offerors to include subcontractor work samples. Section L-3.2.1.2 now states that "Subcontractor work samples who have formal teaming agreements may be used, provided that (1) they are identified as a teaming partner who will be performing work in one of the construction categories defined in Section L-3.2.2.1 – L.3.2.2.3, and (2) the proposal includes a fully completed Attachment L-6, Teaming Agreement, as required in Section L-3.2.4."
10	Reference Section L Atch L-4, HTRO Scoring Matrix, cell B17 (Mechanical Systems M10): For additional project relevance and qualification, will the Government please consider lowering the minimum qualification for the refrigeration to ≥ 100 refrigeration tons?	RFP Atch 1, SOW, paragraph 1.2 identifies a range of 300-5,000 refrigeration tons for chillers and refrigeration equipment. RFP Atch 6 L-4, HTRO Scoring Matrix, will be updated to reflect the minimum qualification for M10 to ≥ 300 refrigeration tons.

Q#	Question	Response
11	Reference Section L Atch L-4, HTRO Scoring Matrix, Electrical Systems category: For additional project relevance and qualification, will the Government please consider adding an additional category line E9, "High voltage (> 35kV) substations, switches or distribution"?	RFP Atch 6_L-4, HTRO Scoring Matrix, accounts for high voltage ducting/vaults/cables (E4), high voltage transformers (E5), and high voltage oil and gas circuit breakers (E6). The Government does not intend to add an additional item for the Electrical Systems category.
12	Reference Section L Atch L-4, HTRO Scoring Matrix, cell B29 (Facility Renovations): For additional project relevance and qualification, will the Government please consider editing categories to at "least 3 of 7 categories listed below"?	The "Facility Renovations" elements for the HTRO Scoring Matrix were developed based off of the nature of scope included in previous FARM efforts and in anticipation of future requirements. The Government deliberately established the criteria for at least five "Facility Renovations" elements in order to adequately represent more challenging efforts that could be objectively quantified.
