

Department of the Air Force: Justification for Other Than Full and Open Competition**Dollar Value of this Acquisition:** [REDACTED]

CERTIFICATIONS: CO certification serves as J&A approval $\leq$ \$10M, See [J&A Template Guidance](https://usaf.dps.mil/sites/AFCC/AQCP/KnowledgeCenter/SitePages/DAF-Contracting-Compass/Part-6---Competition-Requirements.aspx#exceptions-to-full-and-open-competition-mandatory) at <https://usaf.dps.mil/sites/AFCC/AQCP/KnowledgeCenter/SitePages/DAF-Contracting-Compass/Part-6---Competition-Requirements.aspx#exceptions-to-full-and-open-competition-mandatory> J&A Template Guidance tab

Date	Contracting Officer (RFO 6.104-1(12))	Signature
31 March 2026	[REDACTED] I certify that this justification is accurate and complete to the best of my knowledge and belief.	[REDACTED]
Date	Technical and Requirements Personnel (RFO 6.104(b))	Signature
31 March 2026	[REDACTED] I certify that the supporting data herein, which is my responsibility, is accurate and complete.	[REDACTED]

COORDINATION**APPROVALS (RFO 6.104-2(a) Table 6-1 & R-DFARS 206.104-72 Table 206.1)**

See [J&A Template Guidance](https://usaf.dps.mil/sites/AFCC/AQCP/KnowledgeCenter/SitePages/DAF-Contracting-Compass/Part-6---Competition-Requirements.aspx#exceptions-to-full-and-open-competition-mandatory) (<https://usaf.dps.mil/sites/AFCC/AQCP/KnowledgeCenter/SitePages/DAF-Contracting-Compass/Part-6---Competition-Requirements.aspx#exceptions-to-full-and-open-competition-mandatory>) - Justification Approvals tab

NOTE 1: A signature block will appear here (replacing these notes) based on the "Dollar Value of this Acquisition" selected above. Since most digital signatures that include date/time-stamps are redacted before they are made publicly available, always insert the date in the "Date" cell when affixing a digital signature to this document.

Department of the Air Force: Justification for Other Than Full and Open Competition

I. Agency and Contracting Activity (RFO 6.104-1(a)(1)):

The Contracting organization that is responsible for the proposed contract action is the Air Force Test Center (AFTC), Directorate of Contracting, Installation Contracting Division, AFTC/PZZG, 5 South Wolfe Avenue, Edwards AFB, CA 93524-1185

II. Nature and/or description of the action being approved (RFO 6.104-1(a)(2)):

The action being processed is the procurement of proprietary F-35 simulator hardware components, specifically the Pilot Control Display (PCD) and Standby Flight Display (SFD), required to support the operation and sustainment of the F-35 simulator system. These components must match the exact form, fit, and functional characteristics of the existing simulator architecture to ensure full compatibility with Government-owned training systems.

III. Description of supplies/services required to meet agency needs (RFO 6.104-1(a)(3)):

The supplies consist of two critical cockpit display units required for the operational readiness of the F-35 aircraft simulator. These units will be held as spares to ensure rapid replacement in case of failure or damage to the primary units.

F-35 Panoramic Center Display (PCD): This is the pilot's primary large-screen interface for managing flight controls, sensor data, and mission systems.

F-35 Standby Flight Display (SFD): This is a mandatory backup unit that provides essential flight data if the primary display system fails.

These components must be fully compatible and interchangeable with the units currently installed in the F-35 simulator, which are integrated into a proprietary avionics architecture.

IV. Statutory Authority Permitting Other Than Full and Open Competition (RFO 6.104-1(a)(4)):

10 U.S.C. 3204(a)(1), Only one responsible source and no other supplies or services will satisfy agency requirements.

V. Rationale for Use of Authority (RFO 6.104-1(a)(5)):

RFO 6.103-1, Only one responsible source and no other supplies or services will satisfy agency requirements.

Driven Technologies is the only source capable of providing these specific F-35 components for this requirement as it will be directly replacing the displays currently in place.

The F-35's avionics, including the Panoramic Center Display and Standby Flight Display, are designed to exacting proprietary specifications established by the simulator's prime contractor. These components are part of a highly secure and integrated system. To ensure system interoperability, any replacement part must be identical to the original equipment and come from a certified source that can guarantee a secure and traceable supply chain.

VI. Integrated Market Analysis and Efforts to Solicit Competition (RFO 6.104-1(a)(6), (8), and (10)):

In accordance with RFO 6.104-1(a)(6) A Sources Sought Notice was posted on SAM.gov for seven calendar days to solicit interest from industry and identify vendors capable of providing the required simulator-specific display units. Three large businesses submitted capability statements; however, all three responses pertained to actual F-35 aircraft display units rather than the simulator hardware required. After clarification, each vendor confirmed they were unable to meet the

Department of the Air Force: Justification for Other Than Full and Open Competition

requirement due to the lack of access to the proprietary Interface Control Documents (ICDs) necessary to produce or integrate the simulator PCD and SFD. The ICDs are owned by Driven Technologies and cannot be disclosed without their authorization, preventing other vendors from offering technically compatible solutions. In addition, a synopsis will be posted for this requirement prior to solicitation and award to the sole vendor.

IAW RFO 6.104-1(8) General internet searches and reviews of publicly available technical information were conducted to identify any commercially available avionics-grade display units with similar form, fit, and functional characteristics. No commercial products were identified that match the proprietary specifications required for the F-35 simulator. The analysis confirmed that the simulator PCD and SFD incorporate unique mechanical, electrical, firmware, and interface characteristics that are not replicated by any other manufacturer.

IAW RFO 6.104-1(10) Three large vendors expressed interest initially. The companies were [REDACTED] and [REDACTED]. However, each company ultimately confirmed that their capabilities pertained to the actual F 35 aircraft Pilot Control Display (PCD) and Standby Flight Display (SFD), not the simulator-specific components required for this procurement. Once the Government clarified that the requirement was for F-35 simulator hardware, all three vendors stated they were unable to support the effort for various reasons. One was due to the vendor not possessing the proprietary Interface Control Documents (ICDs) necessary to produce or integrate the simulator PCD and SFD. While another reason was that the F-35 PCD were not compatible with simulators and demanded different software and electrical systems.

VII. Determination of Fair and Reasonable Cost (RFO 6.104-1(a)(7)):

The Contracting Officer is responsible for evaluating, determining, and documenting the anticipated contract cost/price is fair and reasonable in accordance with RFO Subpart 15.4, Contract Pricing.

VIII. Any Other Facts Supporting the Justification (RFO 6.104-1(a)(9)):

The Interface Control Documents (ICDs), mechanical drawings, firmware specifications, and electrical interface data necessary to produce or integrate these components are proprietary to Driven Technologies. Without access to this data, no other vendor can manufacture or modify hardware that is form-fit-function compatible with the simulator. The proprietary nature of these technical data rights legally and practically restricts the ability of any other source to compete.

IX. Actions to Overcome Barriers to Competition (RFO 6.104-1(a)(11)):

The primary barrier to competition for this requirement is the proprietary ownership of the technical data—specifically the Interface Control Documents (ICDs), mechanical drawings, firmware specifications, and electrical interface information—necessary to produce or integrate the F-35 simulator Pilot Control Display (PCD) and Standby Flight Display (SFD). These data rights are held exclusively by Driven Technologies, preventing other vendors from manufacturing form-fit-function compatible hardware. The Government will continue to monitor future opportunities for competition, including potential changes in data rights, licensing arrangements, or vendor authorization. However, at this time, no additional actions are reasonably available that would enable full and open competition for this requirement.
