U.S. NAVAL AIR STATION SIGONELLA INSTRUCTION 5530.3D

From: Commanding Officer, U.S. Naval Air Station Sigonella, Italy

Subj: INSTALLATION ACCESS CONTROL

Ref: (a) DODM 5200.08
(b) CNIC M-5530.2
(c) NTTP 3-07.2.3
(d) NAVADMIN 105/23
(e) Status of Forces Agreement
(f) CNREURAFSWA ltr 4045 Ser N00/335 of 20 July 2015
(g) OPNAVINST 5530.14E, CH-3
(h) OPNAVINST 3440.17A
(i) CNICINST M-5530.1

Encl: (1) Authorized Access Control
(2) Authorized Access Matrix
(3) Sample Identification Cards
(4) Ship Access Request Form
(5) Unescorted Base Access Request
(6) Memorandum for Escorted Guests Access
(7) List of Countries requiring Visas
(8) Employee/Contractor Station Pass Request
(9) Request for Personal Employee
(10) Sponsor Notice of Violation
(11) Acceptable Forms of Identification Documents
(12) Designated Third Country Nationals List

1. Purpose. To establish procedures governing the admission of personnel and vehicles on board U.S. Naval Air Station Sigonella, Italy (NASSIG). This instruction is a complete revision and should be read in its entirety.

2. Cancellation. NASSIGINST 5530.3C.

3. Scope and Applicability. This instruction is applicable to all departments, tenant commands, visiting commands, and contractors that are assigned or visit within the NASSIG area of responsibility (AOR). Access to the NASSIG AOR is limited for military security and force protection reasons. This instruction governs access to all NASSIG installations, and applies to all personnel, regardless of status, unit, organization, service affiliation, or nationality.

30 Dec 2023

4. Action. Personnel responsible for the preparation and issuance of base entry applications, base passes, and ramp badges must be thoroughly familiar with all aspects of this instruction, including references (a) through (i) and enclosures (1) through (12). All other personnel desiring to gain or request access to NASSIG AOR facilities or restricted flight line area for themselves or visitors should be thoroughly familiar with all pertinent portions of this instruction.

5. Authority

a. Authority to control access to CNIC installations varies based on jurisdiction, property rights and geographic location.

b. For Outside of Continental United States (OCONUS) locations, a Commanding Officer's (CO) right to exercise this authority comes from U.S. law and the Status of Forces Agreement (SOFA), Memorandums of Agreement (MOA), or Memorandums of Understanding (MOU) applicable to the overseas area, and from bilateral and multilateral agreements between the U.S. and the host nation.

c. COs will protect civil liberties, privacy, and Personally Identifiable Information (PII). PII collected, used, maintained, or disseminated in the execution of this manual will be appropriately maintained and safeguarded to prevent its unauthorized access, use, disclosure, or loss. The collection, use, maintenance and dissemination of PII must comply with the requirements in references (c) through (i).

6. Records Management. Records created as a result of this instruction, regardless of media and format, must be managed per Secretary of the Navy Manual 5210.1 of January 2012.

7. Review and Effective Date. Per OPNAVINST 5215.17A, NASSIG (N34) will review this instruction annually on the anniversary of its effective date to ensure applicability, currency, and consistency with Federal, Department of Defense, Secretary of the Navy, and Navy policy and statutory authority using OPNAV 5215/40, Review of Instruction. This instruction will be in effect for 10 years unless revised or cancelled in the interim and will be reissued by the 10-year anniversary date if it still required, unless it meets one of the exceptions in OPNAVINST 5215.17A, paragraph 9. Otherwise, if the instruction is no longer required, it will be processed for cancellation as soon as the need for cancellation is known following the guidance in OPNAV Manual 5215.17A of May 2016.

A. F. SHOEMAKER

Releasability and distribution:

This instruction is cleared for public release and is available electronically only via Command Navy Installations Command Web site,
<https://g2.cnic.navy.mil/tscnreurafswa/NASSIGONELLAIT>

INSTALLATION ACCESS CONTROL

TABLE OF CONTENTS

Chapter 1 NASSIG ACCESS CONTROL PROGRAM MANAGEMENT

Policy	1-1
Responsibilities	1-1

Chapter 2 REQUIREMENT FOR ACCESS TO A NAVY INSTALLATION

Types of access	2-1
Establishing Identity for Unescorted Access	2-1
Establishing Purpose for NATO ISRF requests	2-2
Requirement for Special Events and Emergencies	2-3
Related Measures	2-3
Additional Requirements	2-4

Chapter 3 PROCEDURES FOR GRANTING ACCESS TO A NAVY INSTALLATION

Personnel Control	3-1
Visitor Control Process	3-1

CHAPTER 1
NASSIG ACCESS CONTROL PROGRAM MANAGEMENT

1. Policy

a. The DoD Common Access Card (CAC) is the principal card enabling access to buildings, facilities, installations, ships and controlled spaces. Commander, Navy Installations Command (CNIC) has adopted Defense Biometric Identification System (DBIDS) as a standardized process for granting unescorted access privileges to vendors, contractors, suppliers and service providers. DBIDS is specifically for those vendors and contractors not otherwise entitled to the issuance of a CAC.

b. Vendors, contractors, suppliers and service providers who seek routine, unescorted access to CNIC installations and can provide appropriate justification may obtain reusable credentials under DBIDS; however, they must meet all criteria outlined in Chapter 2 of this instruction.

c. Per the Status of Forces Agreement (SOFA) between NASSIG and Italian Air Force (ITAF) command, vetting and issuance of acceptable access credentials on NAS 2 for local and foreign nationals is coordinated through ITAF forces. U.S. Government contractors and employees who are local and foreign nationals may be issued DBIDS credentials after ITAF has vetted their suitability for access. NASSIG will not issue any credentials to a local or foreign national to NAS 2 unless ITAF has endorsed and approved the request per reference (e).

d. All lost security badges, CACs, and DBIDS Credentials should be reported immediately to the NASSIG Security department so that the DBIDS database can be modified for that particular card per reference (d).

2. Responsibility

a. Installation Commanding Officer (ICO)

(1) Work with local tenant commands and host nation authorities to identity and fitness proof applicants to the greatest extent practical and with legal authority.

(2) Coordinate organic and internal access control systems and components with the installation tenants prior to obligating funds for project execution.

(3) Ensure all persons requesting unescorted access demonstrate a valid purpose for entry, are identity proofed and a fitness determination is completed.

(4) Establish commander's intent and define risk tolerance in relation to installation perimeter access control.

(5) Determine credential requirements for personnel under the age of 18 who require non-recurring access and are not in possession of an authorized identification credential, or identity source document listed in chapter four of this manual.

(6) Issue debarment letters to deny individual access to the installation due to involvement in the commission of a criminal offense, when access is inconsistent with the interests of national security, when personal conduct reflects negativity on the image of the United States overseas, or when access adversely affects the health, safety, or morale of personnel on NASSIG.

(7) Implement procedures for off-base first responder's physical access requirements during emergencies.

(8) Delegate, in writing, the authority to perform identity proofing, vetting and determination of fitness, and access authorizations and privileges.

(9) Designate an installation Single Source Coordinator (SSC).

(10) Provide monthly DBIDS aggregate transactions and aggregate credential issuance report to Commander, Navy Region Europe, Africa, Central (EURAFCENT).

(11) Ensure tenant commands and unit commanders understand and follow installation access control guidance and procedures.

(12) Coordinate with tenant commands and unit commanders to identify their key mission essential personnel and associated resources essential to comply with this manual, and coordinate and integrate associated unit processes into the installation antiterrorism (AT) plan.

b. Installation Security Officer (SECO)

(1) Act as the primary advisor to the installation CO for AT, Law Enforcement (LE) and Physical Security (PS), to include installation access control.

(2) Conduct access control assessments and planning.

(3) Develop and publish installation specific access control policies and procedures.

(4) Establish a Visitor Control Center (VCC) for registration and issuance of installation access credentials and passes.

c. Pass and Identification (ID) Office technicians. Responsible for issuing installation visitor passes. Responsible for processing and issuing temporary access requests and passes not exceeding 90 days in length. The SECO is delegated "by direction" authority for access requests of this nature. Questions concerning base access will be directed to the NASSIG VCC, Physical Security Officer or the SECO.

d. Naval Security Forces. Trained Naval Security Forces (NSF) should issue visitor passes at the Marinai and NAS I Pass and ID offices using the DBIDS access control workstation to eligible personnel when the VCC is closed. All requirements are outlined in chapter two must be met prior to issuing a pass and allowing installation access.

e. Visitor Control Center Technicians. Per reference (b), Visitor Control Center Technicians are responsible for:

(a) Conducting background checks of all visitors to ensure they meet the minimum fitness requirements per appendix (a).

(b) Maintain on record the SECNAV Form 5512/1 for visitors, which will be maintained for three years per reference (b).

(c) Conducting background checks when required for a positive finding from DBIDS scanners.

(d) Conduct all local area background checks.

f. Staff Judge Advocate (SJA). Responsible for providing legal advice to the CO, SECO, and VCC supervisors regarding access inquiries, especially those not explicitly identified in this instruction. Additionally, the SJA will provide the SECO and Physical Security Office with copies of all letters issued to personnel who are barred from entering or whose access is restricted within NASSIG facilities. Current debarment lists provided from the SJA will be placed in the appropriate authoritative Consolidated Law Enforcement Operation Center (CLEOC), and DBIDS database.

g. Background Checks. Background checks will be completed in the order requested, and within 30 days of receipt, prioritizing mission related background checks. Historical background checks will be conducted through Openfox, utilizing Defense Central Index of Investigations (DCII), National Crime Information Center (NCIC), and Interstate Identification Index (III). Current background checks will be conducted using DBIDS scanners or DBIDS computers through Identity Matching Engine for Security Analysis (IMESA) for U.S. citizens only. Non U.S. Citizens will provide a penale. Background checks will be conducted by designated VCC technicians, Command Investigators Division (CID), Naval Criminal Investigative Service (NCIS) or other capable internal agencies within the NAVEURAFCENT AOR. Background checks with positive findings will have a command letterhead generated and routed to SJA. SJA may direct the member on a redress and appeals process. All appeals will be sent to the SECO for a recommendation and forwarded to the ICO for determination. Historical and current fitness must be determined before issuance of unescorted access credentials. The SECNAV 5512/1 should be the sole form used for background checks on all visitors, contractors, and vendors requesting access.

h. Single Source Coordinators (SSC). The sole installation sponsor for transportation service provider must be a member of the Physical Security Division designated as the Installation SSC. This includes transportation services and delivery services without a specific contract on base.

(a) Independent contractors and delivery services may be issued a 90 day DBIDS paper pass at the discretion of the SSC. Requests must be made at the VCC and forwarded to the SSC for approval.

(b) Oversee registration and clearance for vendors, contractors and drivers providing transportation services.

(c) Verify transportation service vehicle operators have completed appropriate vetting and met fitness standards for installation access.

(d) Conduct quarterly reviews with transportation service companies to verify drivers continued employment with the company.

(e) Coordinate issues between the installation security department and contractors.

i. The DBIDS Base Security Officer (BSO) will:

(a) Appoint DBIDS Site Security Managers (SSMs), DBIDS Law Enforcement Officers (LEOs), DBIDS Registrars, DBIDS Visitor Registrars, and DBIDS Control Point Operators (CPOs) from among NASSIG personnel.

(1) DBIDS SSMs have the ability to assign roles and perform reports and audits. Security Leadership, the VCC supervisor, and at least one N6 representative will be assigned as SSMs.

(2) DBIDS LEOs have the ability to look up individuals and vehicles in the DBIDS Web Portal and assign statuses to personnel. Security Leadership, Watch Commanders, Patrol Supervisors, and VCC personnel will be assigned as LEOs.

(3) DBIDS Registrars may enroll and issue DBIDS cards, Personal Identity Verifications (PIV), Transportation Worker Identification Credentials (TWIC), and Veteran Health ID Card (VHIC). VCC personnel must be assigned as Registrars.

(4) DBIDS Visitor Registrars may issue DBIDS Visitor Passes. VCC Personnel and all NASSIG NSF personnel will be assigned as Visitor Registrars.

(5) DBIDS CPOs may electronically verify credentials at the ECP with a handheld DBIDS scanner. All Security Department personnel and Security watch standers must be designated as CPOs.

(b) Be responsible for general DBIDS equipment maintenance.

(1) Security Operations must assist the DBIDS BSO with maintenance of handheld scanners or any other DBIDS equipment located in the ECPs. Security Operations will notify the DBIDS BSO of any issues with DBIDS equipment.

a. The sentry must be responsible for the DBIDS equipment on their post and at a minimum, will ensure all equipment is operational during hourly condition checks. If issues arise, sentries will perform basic troubleshooting at the direction of the BSO or Watch Commander. If basic troubleshooting fails:

1. During normal business hours, the DBIDS BSO will be responsible for advanced troubleshooting and contacting the DMDC Support Center, if required.

2. Outside of normal business hours, the Watch Commander or other LEO qualified personnel will be responsible for contacting the DMDC Support Center.

b. The VCC supervisor is responsible for general maintenance of the DBIDS equipment in the VCC and maintaining a supply of DBIDS consumables. If basic troubleshooting fails, VCC personnel will contact the DMDC Support Center for assistance. The VCC Supervisor will inform the DBIDS BSO of any issues with DBIDS equipment.

c. The N6 SSM will assist the DBIDS BSO with troubleshooting connectivity issues with switches, routers, Wireless Access Points (WAPs), in concert with PSNet.

CHAPTER 2
REQUIREMENTS FOR ACCESS TO A NAVY INSTALLATION

1. Types of Access. There are two types of access to a military installation, escorted and unescorted. Each type of access has a specific set of requirements which must be implemented consistently, uniformly and predictably to facilitate entry by authorized personnel.

a. Unescorted Access. Unescorted access requires individuals to establish their identity, be determined fit for access, and establish an acceptable purpose for presence on the installation. Unescorted access may also be granted per applicable laws and Navy policies. Exception to these requirements include:

- (1) Special events, circumstances and activities.
- (2) Installations which require open, unimpeded access to the public, per chapter four and chapter five of this manual.
- (3) A minor under the age of 18 who does not have an acceptable credential and is accompanied by another individual over the age of 18.

b. Escorted Access. Individuals unable to meet the requirements for unescorted access may be granted escorted access, per installation-level policy. If an individual is granted escorted access, the assigned escort must remain within visual contact of the escorted individual at all times.

2. Establishing Identity for Unescorted Access. Identity is established either by presenting one “acceptable credential” or by presenting an acceptable combination of “source identity documents.” Acceptable credentials and source identity documents are listed in chapter four of this manual.

a. Acceptable credentials and source identity documents must:

- (1) Be original and current (unexpired).
- (2) Not contain the markings “Not Valid for Federal Purposes,” “Not For Use as Federal Identification,” “Federal Limits May Apply”, or any other similar phrase.
- (3) In the case of a driver’s license or no-driver’s identification card issued by a state, territory, possession, or the District of Columbia, be compliant with the REAL ID Act of 2005. EU identity cards that meet the criteria listed in Para. 2, A,1 may be accepted in lieu of passport for EU citizens.

b. Individuals holding more than one acceptable credential must use the credential most accurately depicting the capacity in which the individual is acting for the specific visit to the installation, per reference (b).

c. All types of credentials listed in chapter four of this manual are acceptable for access to NASSIG. Due to unique mission requirements, local services at NRTF Niscemi may refuse to accept one or more of the credentials listed in chapter four as acceptable of this manual, consistent with applicable laws.

d. ICO may grant unescorted access to individuals without U.S. citizenship based on the installation's characteristics or mission. In situations where access requires U.S. citizenship for unescorted access due to mission, acceptable proof of citizenship can be demonstrated with any one of the following:

- (1) An unexpired U.S. passport or passport card.
- (2) An original or certified true copy of birth certificate issued by a state, territory, possession, or the District of Columbia bearing a raised seal.
- (3) A certificate of naturalization (Form N-550 or N-570).
- (4) A consular record of birth abroad.
- (5) Other documents established by Navy policy.

e. An individual with dual U.S. citizenship will be treated the same as an individual with only U.S. Citizenship. Presentation of any one of the documents listed in the paragraph above is sufficient to prove U.S. citizenship.

3. NATO Intelligence, Surveillance and Reconnaissance Force (ISRF). NATO ISRF personnel are sponsored by the Italian Air Force and are assigned to NASSIG. Credentials issued by NATO ISRF authorize unescorted access to NAS I, NAS II, and Maranai, see enclosure (2) for an example. NATO ISRF credentials issued by the command do not authorize escort privileges. The following guidance applies to NATO ISRF personnel. NATO ISRF personnel who are issued DBIDS credentials should utilize DBIDS as their primary identification for base access.

a. NATO ISRF personnel are authorized Morale, Welfare and Recreation (MWR), commissary, and housing accommodations.

b. Active duty NATO ISRF members and dependents who hold residence in Maranai base housing will apply for DBIDS credentials in order to verify residence and extend privileges to have family members and friends under accompanied access to Maranai and NAS I only. The following criteria must be met for DBIDS and sponsor credentialing.

c. Active duty NATO ISRF members must provide a copy of their NATO orders and fill out the station pass request, enclosure (8) for approval.

d. Dependents who reside in Marinai must complete a 5512/1 and a station pass request for approval.

e. Personnel living in Marinai housing may accompany family members and guests on Marinai and NAS I only. For any visit over 24 hours, a 5512/1 and escorted access request must be submitted seven days in advance. Upon arrival, a visitor pass will be issued, and a DBIDS credentialed member must accompany them at all times.

f. Personnel not assigned to Marinai housing, may request a DBIDS credential for access to NAS I and Marinai only in which NATO orders and a station pass request must be submitted. DBIDS credentials will authorize them to have a visitor accompany them on Marinai and during normal hours of operation on NAS I only.

g. Access for any non U.S. guests onboard NAS II must be vetted through Italian Air Force personnel only.

4. Requirements for Special Events and Emergencies. After performing a risk assessment, the Region Commanders may grant a temporary waiver to one or more of the requirements outlined in paragraph 2 and 3 of this manual for special events or in case of an emergency on the installation. Temporary waivers issued under this paragraph are not considered deviations.

a. The requirements must be met to the extent feasible.

b. Measures must be taken to ensure that individuals who have been granted access to the installation for the special event do not have access to other parts of the installation not associated with the event. The special event itself constitutes the acceptable purpose required by this manual.

c. Coordinate with local first responder organizations, including law enforcement and fire and medical response organizations, to develop procedures for facilitating access during emergency response events.

5. Related Measures. With authorization from ICO, all vehicles, parcels and belongings of an individual seeking installation access are subject to inspection.

6. Restrictions on sponsoring Designated Third Country Nationals (DTCN):

a. Persons wishing to sponsor individuals who are citizens of countries identified in enclosure (12) aboard US Navy installations within EURAFCENT AOR must comply with the following procedures

b. The visit request must be submitted in writing.

c. The request should be provided to the SECO at least two weeks in advance of the desired access date.

d. The request must be routed to the ICO, with an information copy to NCIS office for the installation.

e. The ICO is the final approval authority for base access for DTCNs.

(1) Escorts are required to present the ICO-written authorization upon request when accessing base with the DTCN.

(2) The DTCN list is not all inclusive and additional countries may be added based on local intelligence or information provided by the covering NCIS office.

f. DTCNs may not receive unescorted access and must remain with their sponsor at all times.

7. Additional Requirements. Any additional requirements will be viewed on a case by case basis and the determination will be made per the ICO's discretion.

CHAPTER 3
PROCEDURES FOR GRANTING ACCESS TO A NAVY INSTALLATION

1. Personnel Control. All persons on board NASSIG installations must have proper identification on their person at all times and must surrender such identification at the request of NSF or other security and law enforcement personnel.

a. Tenant Command Cos and OICs may establish further personal identification requirements for their respective commands. Tenants will forward their directive guidance and copies of their locally required identification media to the NASSIG Security Department Physical Security Division for file and dissemination to NSF personnel for general awareness.

b. Visiting personnel to a classified space (e.g., tenant activities, non-assigned personnel, contractors) requiring access to a Secure Room on NASSIG will submit a visit request via JPAS to SMO Code N62995 or provide a clearance letter from their security manager. All secure rooms will have a visitor's log. All personnel not listed on the access list located on the outside of the exterior door should be signed in as a visitor and escorted at all times while inside the secure room.

2. Visitor Control Process (VCP). The following access control measures will be followed by VCC and Security Operations personnel performing the VCP procedures:

a. A full NCIC background check will be run on all personnel requesting unescorted access. The only means of initiating a background check will be a completed SECNAV 5512/1 DoN Local Population ID Card/Base Access Pass Registration Form (referred to as a SECNAV 5512/1).

(1) All sections of the SECNAV 5512/1 must be filled out by the person requesting access. Incomplete forms will not be accepted.

(a) All personnel must provide at least two Identity Source Documents/numbers. In most cases, this will be a Passport and State ID/Driver's License number.

(b) Any person who has ever been issued a Social Security Number must provide it.

(c) Personnel requesting driving privileges must provide a valid Driver's License.

(d) US citizens born outside of the United States must verify US citizenship upon their first visit to the installation under this instruction. This can be accomplished through Identity Source Documents.

1. Naturalized US citizens may provide a valid US Passport or their Certification Number and Petition Number.

2. Derived US Citizens must provide a valid US Passport or their parent's Certification Number.

(e) The term "and/or" on the SECNAV 5512/1 is not meant to preclude the VCC or Security Operations personnel from requiring additional documents necessary to perform the vetting process.

(2) The SECNAV 5512/1 Authorization and Release and Certification section must be signed and dated by the requester. This is what authorizes VCC or Security Operations personnel to begin the vetting procedure.

(3) The requirement to provide a complete SECNAV 5512/1 prior to access may be waived in writing by the ISO during emergency situations only.

(a) If this requirement is waived, personnel must complete a SECNAV 5512/1 as soon as possible. Personnel will not depart the installation until the form has been completed and verified.

(b) Failure of the sponsor or visitor to plan for access control requirements does not constitute an emergency under this provision.

b. VCC or Security Operations personnel must conduct a hands-on check of the original version of all Identity Source Documents used in the vetting process. This provision may be suspended by the ICO or a higher authority in cases where the handling of identification would result in an undue risk to Security personnel.

(1) If a hands-on check has been waived by the ICO or a higher authority, a visual inspection will be conducted on the original version of all documents and credentials used in the vetting process.

(2) If the DBIDS enrollment workstation is equipped with a photo scanner, VCC or Security Operations personnel will scan Identity Source Documents into DBIDS. In the absence of a photo scanner, the Identity Source Documents used will be entered into the DBIDS profile remarks.

c. VCC or Security Operations personnel must perform all vetting through the Naval Criminal Investigative Service (NCIS) OpenFox system. OpenFox is the primary means for interacting with the NCIC and the National Law Enforcement Teletype Service (NLETS).

(1) An NCIC "QWI" Person Files Query will be run for all personnel requesting unescorted access for both official and unofficial purposes.

(2) An NCIC "QR" Records Request will be completed whenever an Interstate Identification Index (III) Hit (a positive result) is generated by the "QWI" Query.

d. VCC or Security Operations personnel will check all personnel through CLEOC (or its successor system) and DBIDS for local debarment orders or restrictions.

e. All Naval Security Force (NSF) and VCC personnel may verify identity documents for vetting. Individuals authorized to perform vetting through OpenFox will be qualified Pass and ID Technicians and be designated in writing by the ICO. Individuals authorized to view confidential law enforcement information ascertained during the vetting process must be designated in writing by the ICO.

f. SECNAV 5512/1's will be maintained for a minimum of three years or until audited by the U.S. Department of Justice, whichever occurs later.

g. All personnel subject to the VCP who will drive on base will be required to register their vehicles with Motor Vehicle Registration Office (MVRO).

3. Minimum Fitness Determination Standards. Personnel applying for base access will be held to the following minimum fitness determination standards:

a. Permanently Disqualifying Fitness Determination Standards. Listed below are specific conditions or offenses considered prejudicial to good order, discipline, and morale of the installation that may not be waived by the ICO or designated representative.

(1) Wanted Persons (Outstanding Warrants).

(2) Identified in the Foreign Fugitive File.

(3) Identified in the Immigration Violator File.

(4) Known or Appropriately Suspected Terrorist (KST) File.

(5) Felony convictions for rape, child molestation, trafficking in humans, espionage, sabotage, treason, or terrorism.

b. Other Felony Convictions. Other than the felony convictions listed above, any felony convictions or dispositions tantamount to a conviction (such as a "no contest" plea) within the past ten years is grounds for denying installation access.

(1) The ICO may waive this requirement with the exception of those registered in the National Sex Offender Registry (NSOR) Databases.

(2) Felony convictions more than ten years old, except for those identified above, do not require a waiver, with the exception of those registered in the NSOR Database.

(3) Persons released from prison or on probation within five years after a felony conviction may apply for a waiver.

c. Identified in the Violent Persons File. The Violent Persons File lists individuals with a violent criminal history and persons who have previously threatened law enforcement.

d. Debarred at another DoD installation. Individuals denied from another installation will not be granted access to NASSIG until their debarment at another installation can be reviewed by the ISO and Staff Judge Advocate (SJA). The ISO and SJA will ensure that the behavior causing the debarment at another installation would not result in a debarment at NASSIG.

4. NASSIG authorized credentials. In general, the following valid credentials types allow access to NASSIG installations:

a. Common Access Card (CAC) – DoD Active Duty, DoD Reserves, Contractor, and Civil Service personnel.

b. Retired Armed Services ID Card (DD Form 214 (Retired)).

c. Contractor Passes (long and short term, U.S. and Italian contractors and DODDS employees/interns).

d. Italian Air Force/Italian Military/Ministry of Defense Identification (NAS II only).

e. Other U.S. Government (USG) issued ID credentials such as FBI, CIA, DIA, NCIS credentials, NOAA, NSA, DHS, DOS, PIV or any other Law Enforcement credentials. Normally only NCIS credentials are granted immediate access. Other USG identification media will be honored but access only granted after verification of the purpose of the visit and contact with the sponsoring activity. PIV identification cards must be enrolled in DBIDS.

f. Italian law enforcement credentials if person(s) requesting access are in uniform and in a marked law enforcement vehicle (Carabinieri, Polizia (di Stato and Stradale), Guardia di Finanza, Polizia Municipale, and other Federal, Provincial or local units in an official capacity).

g. Guest passes (short or long term, escorted or unescorted).

5. Employee/Contractor Access Pass Procedures. Personnel not possessing a CAC or other U.S. Government issued identification media and employed on a permanent basis by NASSIG or tenant commands may have long-term installation access to NAS I and Marinai Housing via DBIDS. Personnel requesting access to NAS II must have their requests processed through the Italian Air Force Security Office (41st Stormo) via the NAS II Pass and ID office.

a. All employee and contractor base passes will be requested utilizing an Employee or Contractor Application and processed via the Pass and ID office, regardless of classification.

b. Passes will be issued not to exceed two years.

c. Valid Employee and Contractor passes as detailed above permit access to NASSIG installations and will reflect if authorization for sponsor privileges is permitted. Sponsor privileges will be clearly identified on the pass with a “Yes” underneath the “Sponsor” section, indicating sponsor privileges are authorized. Sponsorship privileges will only be granted with a signed memo from employee’s Department Head or activity Commander requesting sponsorship

privileges. Once granted, the employee may sponsor guests and their vehicles for official business only. In the case of a sponsorship violation, sponsorship privileges will be revoked.

d. Employee or Contractor access passes will also be issued for the following personnel:

(1) DoDDS or Navy Campus Federal Aid students.

(2) U.S. civilian employees working for agencies not affiliated with NASSIG or tenant commands (Navy Federal Credit Union, SATO, and Navy Marine Corps Relief Society). Italian citizens must apply with the 41st Stormo as identified in paragraph three above.

(3) Insurance/Car dealer representatives (Exchange New Car Sales).

(4) U.S. civilian or North Atlantic Treaty Organization (NATO) contractor employees on Temporary Additional Duty (TAD) orders to NASSIG for periods greater than 30 days.

(5) Individuals who are serving as an Intern, or completing their student teaching in Sigonella, are issued a DBIDS pass, which allows them access to all NASSIG facilities, including the NEX and Commissary. The pass will be valid as long as indicated on the person's orders.

(6) Prospective Local National employees are required to have a background check conducted by Carabinieri via 41st Stormo. Security Department will be provided with the results (qualified or not). Local National employees who are awaiting the completion of background check will be given temporary escorted access only.

6. Italian Contractor Access. All Italian contractor pass requests must be accompanied by a "Certificato Penale" and/or "Carichi Pendenti." Both documents must be presented prior to the pass request being processed. The certificates may not be dated more than 90 days prior to the pass request date. Temporary passes will not be issued if the certificates contain adverse information.

7. Pass Requests. Requests for passes should be submitted to the VCC ten days prior to the required date of access. Issued passes will be carried on person at all times.

8. Contractor Short-term Access. Contractors requiring 30-days or less access for work purposes will submit an access request. The access request will include a spreadsheet containing the following information: First name, last name, Patente number, vehicle make, plate number, dates requested, days of the week requested, and hours. The request must be turned into the Pass and I.D. Office.

9. Ship Access Requests. Foreign ships that are seeking crew access to NAS I must submit the ship access request form to the Physical Security Email Distro (W-SI-NASSIG-Security_Phys_Sec-US@eu.navy.mil) along with a copy of NATO Travel Orders that specify that the ship is operating in support of a NATO exercise. DBIDS credentials will be issued at the SECO's discretion, or an access list will be generated and posted on the NAS I ECP.

30 Dec 2023

10. Replacement Passes. Expired base access passes may be replaced if the contract is still valid. A validated pass request, along with the expired pass, must be turned in to the VCC prior to issuing a new pass. Lost base access passes must be reported to the NASSIG Security Department and to the employer immediately. Prior to receiving another replacement pass, the contractor must file a Denuncia with the Carabinieri and present a copy of the Denuncia, along with a new pass request to VCC personnel.

11. Guest Passes

a. DoD affiliated, NATO ISRF personnel with DBIDS are authorized to escort personnel aboard NASSIG installations, and contractors may be granted escort privileges if designated by the ICO for work purposes. Escorted Guest Passes are issued through DBIDS. Guests sponsored should not exceed five regardless of age. Passes are valid for up to the duration of visit, not to exceed 90 days. Guests must be escorted at all times while on NASSIG installations (NAS I and Marinai). Due to NAS II's operational status, circumstances requiring escorted access will be considered on a case-by-case basis. Escorts must be with their guests at all times. Passes issued for members living in unaccompanied housing will only be issued during approved visiting hours. Passes for Foreign Nationals and Local Nationals will go through ITAF for NAS II access.

b. Unescorted Guest Passes are issued to family members and guests through DBIDS. This pass can only be issued from the VCC office, unless coordinated in advance with VCC. This pass allows guests unescorted access to the bases specified on the unescorted access pass. The requestor must submit a SECNAV 5512/1 for their guests. Unescorted Guest Passes are typically utilized for circumstances in which a sponsor would not be available to be with their guests, for example the birth of a child, in which family members are travelling to support the family.

c. In the event the DBIDS system is in a non-operation status, NAS I guest passes enable visitors to enter NAS I when escorted by their sponsor. Guests must surrender a valid photo ID (passports are not accepted), which will be returned upon turning in the guest pass. The pass is only valid during facility hours of operations onboard NAS I and must not exceed 24 hours. Guest Vehicles will not be authorized on the installation.

d. The NAS I and Marinai temporary 24-hour vehicle passes may be issued outside of hours of operations of the VCC which is Monday through Friday 0800-1200, 1300-1600 and closed on federal holidays. Passes may also be issued for foreign national commercial vehicles or contractors not assigned to the installation. Any exception to this must be provided by the VCC and approved by the SECO.

e. Vehicle passes for personnel stationed at NASSIG must go through MVRO; however, in certain circumstances personnel who have recently purchased a vehicle may receive a temporary base pass not to exceed 14 days or until their appointment date with MVRO. Guests who received authorization for unescorted access may require a vehicle pass. All requests for guests vehicle passes will be processed through the VCC,

and require proof of insurance, rental agreement, and both sponsor and guest to be present.

12. Personal Employee Pass Request (Housekeeper/Baby Sitter). Unescorted temporary access may be requested for individuals employed by U.S. military personnel and NATO ISRF personnel occupying government quarters.

a. The military sponsor must accompany the prospective employee to NASSIG Security Pass and ID with the following documents:

(1) Pass application enclosure (8).

(2) Photocopy of Carta d'identita.

(3) Certificato Generale.

(4) Carichi Pendenti (Penale).

b. DBIDS credentials will be issued with a yellow stripe. All photos, full face, will be taken without hats/headgear or sunglasses. This pass authorizes employees to transit from the gate to the work residence and return only.

c. A Domestic Employee DBIDS pass is valid for maximum of one year specified during working hours only. A vehicle pass will issued only with proof of valid insurance and registration of the car. Requests for renewal will be processed in the same manner as the original request if employment is still required.

13. Appeals

a. Any person being denied initial participation in DBIDS or who has their DBIDS privileges suspended or revoked for any reason, may appeal the denial, suspension or revocation.

b. Vendor or contractor employees may initiate the adjudication process when a background screening failure results in disqualification from participation in DBIDS and the vendor or contractor employees do not agree with the reason for disqualification. The adjudication process must be initiated within 30 days of receiving written notice of disqualification.

c. Vendor or contractor employees may apply for a waiver when a background screening failure results in disqualification from participation in DBIDS. The waiver process must be initiated within 60 days of receiving written notice of disqualification. Members on the sexual offenders register will not be waived.

d. All waiver requests will be initiated with the SECO. The CO will be the final waiver determination authority.

e. The ICO will consult with installation SJA when determining suitability per reference (b).

14. Periodic Screening Requirements. Once an access credential is issued, fitness is not normally determined again until the credential expires and a new credential is issued. For local nationals, if the Penale is still valid, credentials will be re-issued until the Penale expires.

15. Enrollment Validity and Expiration

a. Credentials will remain valid for three years from the date of enrollment in IMESA, until the expiration date on the acceptable credential used to establish identity. The Penale is only valid for two years in which a pass will not be issued that exceeds the Penale two year expiration.

16. Declined Enrollment. An individual who is eligible to enroll but declines or refuses to enroll and subsequently returns to the installation at a later date will be processed as any other unenrolled individual.

17. DBIDS Failure Contingencies. For installation access control in the event of a DBIDS failure, procedures include visual inspection at the ECP of DoD issued credentials, processing through the VCP of holders of other credentials.

CHAPTER 4
ACCEPTABLE FORMS OF IDENTIFICATION

1. Acceptable Credentials. Credentials accepted by NASSIG are outlined in Enclosure (11). Credentials that appear questionable (e.g., damaged laminates, evidence of tampering), expired or altered will not be accepted for any purpose. The questionable or altered credential will be confiscated and turned in to the VCC. The following credentials will be accepted by NASSIG:

a. DoD CAC. The CAC simultaneously establishes identity, historic fitness and purpose and must be the principle card for enabling access to NASSIG.

b. DBIDS issued by NASSIG. DBIDS issued by other installations will require a reason for access and a 5512/1 to verify current and historical fitness.

c. DoD Retiree and Dependent ID. These credentials are issued by personnel service detachments and establish identity, historic fitness and purpose and should be accepted for installation access.

d. U.S. Passport or Passport Card. These credentials establish only identity.

e. Foreign passport bearing an unexpired immigrant or non-immigrant visa or entry stamp. These credentials establish only identity.

2. DoD Civilian Retiree ID Card. Per NAVADMIN 105/23 DoD civilian retiree cards will no longer be issued. Previous credentials will be effective through 31 August 2023. Civilian retirees are required to apply for a DBIDS credential and must present their SF-50, and establish their fitness as described in DODM 5200.08. A Penale is required for Local Nationals.

a. ICO may allow access for limited use of military MWR activities as per DoD MWR policy.

b. ICO will retain the authority to restrict access to MWR facilities for reasons such as local demand, facility capacity and security concerns.

c. When allowed access to MWR activities, DoD civilian retirees in possession of a DBIDS card are authorized escort privileges.

d. Contract background investigators presenting a valid PIV card issued by the Defense Counter Intelligence and Security Agency will be granted unescorted access.

3. The Navy Gold Star Family (NGS) program provides long term casualty assistance and ensures the Gold Star Survivor (GSS) remains connected to the Navy family for as long as they desire. GSS are the families of service members who died on active duty, regardless of the service affiliation or cause of death. Family includes: spouses, parents (biological, adoptive, step, foster), siblings (brother/sister, half-brother, half-sister, adoptive), and children (biological, adoptive, step).

30 Dec 2023

Survivors must be able to access CNIC installations for support (e.g. Fleet and Family Service Center visits), ceremonies, and events in order to continue to be part of the Navy family. However, many do not have a DoD identification card.

a. The GSS card which is issued by the local NGS coordinator, will be accepted as the purpose for requesting access.

b. The GSS will require identity proofing and fitness determination.

c. Once the GSS has met all of the installation access requirements, they will be issued a DBIDS card with an expiration date 364 days from the date of issuance.

d. The GSS will be vetted annually to renew the DBIDS card.

e. If the family members do not meet the criteria for fitness according to this manual, the installation CO may consider a waiver using the guidelines in the manual. The same process for waiver approval or denial will be followed for GSS family members as for any other DVIDS applicant.

f. The ICO will codify access control procedures for GSS family members in applicable access control plans.

4. Service Secretaries, political appointees, members of Congress and diplomatic corps will be granted unescorted access based on possession of the appropriate government issued identification.

5. Any other U.S. federal, state, territory, possession or District of Columbia government issued credential bearing a photograph, including credentials from other paragraphs in this section that are deemed acceptable by the DoD component head and consistent with applicable laws.

6. Source Identity Documents. All source identity documents must be visually inspected for known security features, as applicable, and for signs of alteration or counterfeiting. Electronic verification is not required for source identity documents, but may performed if it is available. Unless otherwise specified in this section, source identity documents establish only identity.

a. Combinations Accepted at All Installations. Installation COs will accept combinations of source identity documents at all types of CNIC installations in the following scenarios:

(1) The TWIC is the credential used to establish identity for the purpose of access control.

(2) Veterans who meet the access requirements and have been issued the veterans' health identification card (VHIC). VHIC must annotate service connected or they are not eligible.

(a) The VHIC may be used to establish identity and purpose.

(b) A SECNAV Form 5512/1 will be completed and a background check will be executed to ensure fitness requirements are met per appendix (a).

(c) When all three requirements have been met, the VHIC will be registered in the DBIDS enrollment workstation.

(d) The VHIC also establishes purpose for individuals accompanying the cardholder. Accompanying persons of VHIC holders and caregivers may be issued a day pass after registering in DBIDS. Identity and fitness must be determined before the pass is issued.

(3) Veterans who meet the access requirements but are not currently authorized to obtain a VHIC will use their REAL ID compliant driver's license for access. These veterans will be issued a temporary letter from the VA indicating ineligibility for a VHIC, but eligibility for access to commissary, exchange and MWR facilities. Once these veterans become eligible for the VHIC, they will be required to register the VHIC for access and will not be authorized to use the VA issued letter.

(a) The veteran's REAL ID compliant driver's license can be used to establish identity.

(b) The VA issued temporary letter will be used to establish purpose.

(c) A SECNAV Form 5512/1 will be completed and a background check will be executed to ensure fitness requirements are met per appendix (a).

(d) When all three requirements have been met, the veteran's REAL ID compliant driver's license will be registered in the DBIDS enrollment workstation and a DBIDS pass will be issued.

(4) A veteran's official caregiver will register their REAL ID compliant driver's license.

(a) The caregiver's REAL ID compliant driver's license can be used to establish identity.

(b) The caregiver must present an official caregiver letter issued by the Veteran Affairs (VA) to establish purpose.

(c) A SECNAV Form 5512/1 will be completed and a background check will be executed to ensure fitness requirements are met per appendix a.

(d) When all four requirements have been met, the REAL ID compliant driver's license will be registered in the DBIDS enrollment workstation, and a DBIDS pass will be issued.

30 Dec 2023

(5) Original or certified true copy of a birth certificate bearing a raised seal, social security card and driver's license issued by a state, territory, possession, or the District of Columbia that is not REAL ID compliant. All three documents must bear the same name or a former name as documented on acceptable name change documentation such as court order, marriage certificate, or divorce decree. The birth certificate and social security card can be used to establish identity for the purpose of access control.

(6) Local law enforcement officers operating in an official capacity presenting their agency credentials will have unescorted access to the installation and escort privileges for personnel and official vehicles in all force protection conditions.

CHAPTER 5 IMPLEMENTATION

1. Allowable Deviations. When approved by ICO, deviations may include:

a. Precluding the use of one or more of the credentials listed in chapter 4 as acceptable, due to unique mission requirements.

b. More restrictive access control requirements as per chapter 2 subparagraph 7.

2. Navy Policy and Acceptable Purposes. The following are acceptable purposes for access to installations (this list is not exhaustive and only includes certain circumstances that are to be expressly addressed in installation policy).

a. An employee, contractor, or volunteer of the American Red Cross providing a service on the installation that has been requested by the ICO.

b. An employee, contractor, or volunteer of the United Services Organization, incorporated providing a service on the installation that has been requested by the installation CO.

c. A driver for transportation network company or other personal transportation company picking up or dropping off a passenger from or to a barracks, housing, lodging, hospital, or community area. Both the driver and passenger must be granted unescorted access to the installation, per chapter 2 of this manual. In these situations:

(1) The driver's acceptable purpose is providing transportation to the passenger. The driver's access will be temporary and limited in scope and tie to what is necessary to fulfill this acceptable purpose.

(2) The passenger must have their own acceptable purpose per chapter 2 subparagraph 4 of this manual.

3. NCIC. After fitness determination results are returned on an individual, VCC staff will enter the date the background check was conducted and results in the DBIDS registration workstation under the remarks section.

4. DBIDS, BSO, and SSM. BSOs and SSMs are required to register and maintain access to the DMDC web site. The site can be found at <http://dbids.dmdc.mil/#!/register>, and provides the option to enter the DBIDS web portal or the DBIDS wiki site. The DBIDS web portal is the site utilized for base management services (status changes, BOLO entry, access history, etc.) And running real time reports. The DBIDS wiki is on-stop shop for all DBIDS support. The wiki has the help desk knowledge base (troubleshooting/how-to-articles, training materials and the ability to search for a solution), DBIDS reports allow you to access longer-term transaction reports and the support home provides current production DBIDS versions.

5. DBIDS Credentials. DBIDS credentials support functionality to allow adding of additional DoD installation access permissions. To increase efficiency, the VCCs may add permissions to an existing unexpired DBIDS credential after requirements are met.

6. DBIDS Photographs. The following provides general guidance concerning photographs for DBIDS cards:

a. Individual poses with a frontal, full-face (passport-type) photo. Individual's composure reflects similar to guidelines posted by the U.S. Department of State for passport issuance listed at www.travel.state.gov/passport.

b. Pose and Expression

(1) Have a neutral facial expression or a natural smile, with both eyes open.

(2) Face the camera directly with full face in view.

c. Attire

(1) Glasses may not be worn. If glasses cannot be removed for medical reasons, a signed doctor's will be submitted with the application.

(2) Clothing normally worn on a daily basis.

(3) Unless worn for medical or religious reasons, hats and head coverings are not permitted. If a hat or head covering is worn for religious purposes, a signed statement that verifies that the hat or head covering is part of traditional religious attire worn continuously in public must be submitted. If a hat or head covering is worn for medical purposes, a signed doctor's statement verifying the hat or head covering is used daily for medical purposes is required

(4) The full face must be visible, and hat or head coverings cannot obscure the hairline or cast shadows on the face.

(5) Headphones or wireless hands-free devices are not permitted.

(6) Jewelry and facial piercings are permitted as long as they do not hide or conceal the face.

7. DBIDS Handheld Scanners. Lanyards must be attached to DBIDS handheld scanners and worn by the operator to prevent accidental drops and damage to the scanner. Handheld scanner repair cost and repair coordination is the responsibility of NASSIG.

8. DBIDS Consumables. Replenishment of consumables (printer ink, printer cleaning kits, lamination, card stock, etc.) is the responsibility of the NASSIG.

9. CNIC DBIDS Team Site. CNIC N34 and CNIC N6 created an online DBIDS team site on the CNIC G2 to serve as a “one stop shop” for all things DBIDS. The site has been created to enable communication between the regions and installations and to provide the regions and installations with DBIDS specific information. The following information can be obtained from the DBIDS team site found at:

<https://g2.cnmc.navy.mil/tscnichq/N3/N34/DBIDS/SitePages/Home.aspx>.

a. List of Access Control Workstations (ACWs) that DMDC is reporting in an offline status. ACWs must remain plugged in and powered on at all times.

b. List of DBIDS BSOs and SSMs for the regions and installations.

(1) DBIDS outage notifications.

(2) PSNet outage notifications.

(3) DBIDS software update notifications.

(4) Discussion board for posting issues, questions, lessons learned etc.

(5) A section to report issues and view status updates of trouble tickets. This allows CNIC to view and track the issue through completion.

(6) Automated equipment self-move request form.

c. Electronic version of a “Move/Add/Change” form to make hardware, hardware movement, and new ECP/VCC requests. This form will be initially completed by the installation and automatically submitted to the respective region. Once the region representative approves or denies the request, it will automatically either be returned to the installation, or be forwarded to the CNIC DBIDS representative. Once approved at CNIC, approved requests go directly to DMDC for action.

d. If an installation is planning to open or add a new gate/ECP/VCC and will require DBIDS, planning needs to begin no later than six months prior to estimated completion date, to allow DMDC to meet their contractual requirement to dispatch a site survey team to develop a requirements and deployment plan.

e. Important Links

CHAPTER 6
CONTRACTED TRANSPORTATION SERVICES

1. Contracted Transportation Services Requirements. ICO may restrict access at heightened FPCON and must ensure that registered companies understand that their access may be restricted due to a change in security conditions.

- a. All taxi/transportation companies are permitted to apply for installation access.
- b. The SSC will facilitate the registration requests of transportation service companies to conduct business on an installation.
- c. All transportation service vehicles will be licensed to operate and provide transportation services per host nation law requirements.
- d. All Transportation Service Vehicle Operators will be:
 - (1) Properly licensed to operate a vehicle for hire and possess a current host nation and/or EU issued driver's license.
 - (2) Identity proofed, vetted, and fitness determined prior to allowing access to the installation.
- e. All transportation services operated on the installation will be by an authorized driver possessing an installation issued DBIDS credential.
- f. ICO will restrict transportation service contractor/companies from areas that include high-value assets and restricted areas. Service providers should be limited to movement to and from fare pickup and drop off destination.
- g. Any violation of federal law, base regulation, or other disruptive activity will result in the termination of that transportation service company's access under this program.
- h. If the SSC has not registered a transportation service or the following conditions apply:
 - (1) The transportation service vehicle operator will meet all requirements in chapter 2 prior to being issued a DBIDS pass.
 - (2) The transportation service driver and vehicle will be properly registered and licensed by the host nation, state, country, city or other regulating government entity that regulates transportation services or rideshare programs.
 - (3) All occupants of the transportation service or rideshare program vehicle will present valid credentials prior to installation access. If occupants are unable to produce a valid credential, they are required to meet the requirements as outlined in chapter 2.

CHAPTER 7
ENTRY CONTROL POINT PROCEDURES

1. Entry Control Point (ECP) Procedures. On every ingress through a perimeter ECP, all individuals will present their credential. ECP sentries will scan the credential, which will result in the verification of the credential, and grant general access privileges and specific access profiles (time of day, day of week) for that installation. ECP personnel may biometrically authenticate using a fingerprint scan the person presenting the credential to ensure that this is the same person who registered in DBIDS. The following provides the procedures, roles and responsibilities to successfully implement proper access control:

a. NASSIG will conduct 100 percent scan of driver and pedestrian credentials entering NASSIG installations.

b. Personnel will present their approved credentials at the perimeter ECP to the sentry, who will scan the credential utilizing the handheld device provided with the system.

c. The handheld device will display a digital picture, the name of the DBIDS participant, and the company name with whom the participant is associated. This information will be checked against the local access control workstation to determine if the DBIDS participant has current access privileges and meets the specific access profile (day of the week and time of the day).

d. If the system responds in the affirmative, and if in the opinion of the sentry the data matches the individual requesting access, and no other mitigating safety and security factors are present, access to the installation may be granted.

e. Generally, DBIDS participants will have access to all perimeter ECPs during all hours they are open, excluding vehicle size limitations and other physical ECP constraints. However, at credentialing, the Security Department can limit access based on a variety of factors.

f. Other than for a RAM or in the case of an elevated FPCON, no vehicle inspection is required.

g. If the identity of the individual requesting entry is in question, or in the case of a RAM or elevated FPCON, a biometric (fingerprint) authentication will be made to confirm the individual is a DBIDS participant.

h. If the biometric check authenticates the individual and access privileges are current, and no other mitigating safety and security factors are present, access to NASSIG may be granted.

i. RAMs and biometric validation of the DBIDS participants and their vehicles may also be conducted as deemed appropriate by the ICO.

j. Unescorted visitors are not permitted access to restricted areas unless they have their approved credential and are authorized access for the restricted area. Unescorted visitors may

also be required to present a commercial bill of lading or a government bill of lading when access to restricted areas is required.

APPENDIX A
MINIMUM FITNESS DETERMINATION STANDARDS

1. ICO will establish base access standards and designate a trained, competent official to evaluate adverse information identified during the vetting process.
2. Permanently Disqualifying Fitness Determination Standards. Listed below are specific conditions or offenses considered prejudicial to the good order, discipline and morale of the installation that may not be waived by the ICO:
 - a. Identified in the foreign fugitive file.
 - b. Identified in the immigration violator file.
 - c. Known or appropriately suspected terrorist (KST) file.
 - d. Felony convictions for rape, child molestation, trafficking in humans, espionage, sabotage, treason or terrorism.
3. Other Felony Convictions. Other than the disqualifiers listed in subparagraphs 2a through 2d of this appendix, any felony conviction within the past ten years is grounds for denying installation access. ICO may waive this requirement with the exception of those registered in the NSOR database. Felony convictions more than ten years old, except for those identified above, do not require a waiver, with the exception of those registered in the NSOR database, but may be flagged/found unfavorable based on an individual's entire criminal history. See subparagraph 7 of this appendix for requirements related to individuals registered in NSOR.
4. Persons released from prison or on probation within five years after a felony conviction may apply for a waiver.
5. Arrests for a disqualifying event without disposition (conviction, dismissal, not guilty or acquittal) more than ten years old are not grounds for denying access.
6. A waiver from the ICO is required for persons identified in the violent person crime file. The violent persons file lists individuals with a violent criminal history and persons who have previously threatened law enforcement.
7. Registered in the NSOR Database. To the maximum extent permitted by law, unless waived by competent authority, sex offenders are to be identified and prohibited from accessing Navy facilities.
8. ICO may deny access or access credentials based on information obtained during identity vetting such as wanted persons (active wants/warrants) which indicates the individual may present a threat to the good order, discipline and morale of NASSIG.

AUTHORIZED ACCESS MATRIX

PERSONNEL CATEGORY	NASSIG INSTALLATIONS		
	NASSIG ONE	NASSIG TWO	MARINAI
U.S. PERSONNEL	U.S. Active Duty Military Reserves and Dependents	With Valid CAC or DD Form 2 (Reserved)	With Valid CAC or DD Form 2 (Reserved)

Ship Access Request Form

Ship/Group Name:

Start Date:

End Date:

NAS 1 Policy for visiting units:

1. No public drinking or drunkenness. No drinking on base with the exception of inside establishments that sell alcohol (Bowling Alley and Connections or the gazebos outside of NGIS).
2. No littering or dropping trash, especially cigarette butts.
3. No smoking in front of the Commissary/NEX or in the park adjacent to the Commissary.
4. Shopping carts will be returned to the Commissary/NEX and not left on any other part of the base.
5. The entrance area of the pedestrian gate where you wait for your bus will be kept orderly and free of trash to include cigarette butts.

Approved by: LT D.E. FLAKE

Crew List (Alphabetical Order):

Last Name	First Name	ID #

UNESCORTED BASE ACCESS REQUEST

From: I. M. Requestor
To: Security Officer, U.S Naval Air Station Sigonella

Subj: UNESCORTED BASE ACCESS REQUEST

1. It is requested that a DBIDS unescorted visitor pass be issued to the following person (All request should be submitted 7 days in advance).

Name: _____
Position/Rank: _____
Organization: _____
Height, in inches: _____
Weight, in pounds: _____
Eye color: _____
Hair color: _____
Date of Birth: _____
Place of Birth: _____
Nationality: _____
Residence: _____

Locations authorized: NAS I, NAS II (U.S. Citizens only), Marinai

Reason for unescorted access request:

2. All unescorted access requests require a SECNAV 5512/1 for U.S. citizens or a background check from country of origin (I.E Penale).

Requestor Signature

NASSIG Security Officer

30 Dec 2023

MEMORANDUM FOR ESCORTED GUEST ACCESS

Date: _____

From: I. M. Requestor

Subj: REQUEST FOR ESCORTED GUEST ACCESS TO U.S. NAVAL AIR STATION
SIGONELLA

Ref: (a) NASSIGINST 5530.3D

1. Per reference (a), I request the issuance of guest pass(es) for these dates:

From: _____ To: _____

2. I will be sponsoring the following guest(s) (include guests first and last name, passport type and passport number, guests date of birth).

	<u>Name</u>	<u>Passport Origin/Number</u>	<u>Date of Birth</u>
Guest 1	_____	_____	_____
Guest 2	_____	_____	_____
Guest 3	_____	_____	_____
Guest 4	_____	_____	_____
Guest 5	_____	_____	_____

4. Bases Requested: (Circle requested) NAS I/MARINAI/NAS II (U.S. PASSPORT ONLY)

5. Sponsors Information. Name/Work Center/Rate/Rank/DSN/Email

6. As sponsor, I understand I bear full responsibility for my guest(s) at all times when on board any U.S. Naval Air Station Sigonella, Italy installation. Failure to comply with the instructions of this policy may lead to suspension of my privileges and/other administrative actions.
