MEMORANDUM FOR OASIS+ Small Business Awardees – Multiple Domains/NAICs

FROM: AFLCMC/AZS EPASS
20 Schilling Circle, Bldg 1305
Hanscom AFB MA 01730

SUBJECT: EPASS Request for Information on How to Evaluate Past Performance

1. Background: The Engineering, Professional, and Administrative Support Services (EPASS) Branch of the Air Force Life Cycle Management Center (AFLCMC) Strategic Services Division (AZS), in accordance with (IAW) the approved Acquisition Strategy Plan, awards task orders off the General Services Administration One Acquisition Solution for Integrated Services Plus Small Business Multiple Award Indefinite Delivery Indefinite Quantity Contract (OASIS+) generally using the Highest Technically Rated Offeror with a Realistic and Reasonable Price (HTRO-RRP) fair opportunity selection methodology. Under this methodology, offerors self-score under each evaluation criterion listed and provide substantiating documentation via the work samples submitted, which is then validated by the Government. Award is made to the Offeror with the highest validated technical rating that satisfies the Government's expressed requirement for the effort and has a realistic and reasonable price.

For the EPASS Fair Opportunity Proposal Request (FOPR) selections, there are two (2) evaluation factors: Technical/General and Cost/Price. Past performance is addressed in the Technical subfactor - CPAR (Contractor Performance Assessment Report) Ratings. See below:

CPAR category ratings

DEFINITION: Of the work samples submitted, the Offeror shall rate itself based on the total percentage of CPAR categories that were rated "Exceptional", "Very Good", "Satisfactory", "Marginal", or "Unsatisfactory" for the CPAR categories of Quality, Schedule, Cost Control, and Management on all CPARs.

Offerors must provide all relevant fully completed CPARs to substantiate the self-score. A fully completed CPAR means that the Government is able to verify that a government official has closed out the CPAR (e.g. Assessing Official, Reviewing Official, or Ombudsman). If only the Assessing Official closed out the CPAR, Contractor concurrence is also required – without showing this the Government does not consider the CPAR to be closed. For CPARs where the contractor non-concurred, Reviewing Official close out is required. Offerors that fail to provide all relevant CPARs may be disqualified due to intentional withholding of required information.

*Adjectival ratings provided via Prime Past Performance Rating Forms (PPPRFs) or Subcontractor Prime Past Performance Rating Forms (SPPRFs) **shall not** be used for scoring in this subfactor. Team Member CPARs shall be submitted if a Team Member work sample has been used. Team Members may choose to submit their CPAR directly to the Government if there are concerns of proprietary information being exposed; however, all separately submitted information must be received by the FOPR deadline for receipt of proposals to be counted.*

If a work sample is based on a task order awarded under a single award IDIQ, and the associated CPAR is at the single award IDIQ level, the single award IDIQ CPAR may be used for that work sample.

Important: The USG Tech Team must be able to validate each CPAR rating for each performance period of the contract/task order that is submitted as a work sample. For example, if a single work sample is in the fifth year of performance at time of FOPR release, the Government will need to validate all CPARs from that work sample (i.e., the base year and three option years, for a total of four annual CPARs).

Offerors can submit up to five (5) work samples. A completed evaluation in Contractor Performance Assessment Reporting System (CPARS) is required for the work sample to be counted, which is then part of the self-score for the CPAR evaluation subfactor criterion in the proposal. If a completed CPAR is not available, the Offeror must submit a PPPRF/SPPRF. The PPPRF/SPPRF must cover at least six (6) months of performance and contain the adjectival ratings from the CPAR categories (Quality, Schedule, Cost Control, Management). However, it is for information purposes only, is not evaluated, and cannot be used for the CPAR evaluation subfactor criterion.

The CPAR evaluation subfactor criterion states it is relevant because it directly relates to the Offeror's documented past performance on the work samples and adherence to contractual terms and conditions; and it allows the Government to understand the quality of the Offeror's performance on those work samples. This and/or the PPPRF/SPPRF are the only insight the Government has into an Offeror's past performance.

2. Request for Information (RFI): The EPASS office is requesting Industry feedback on the topic of past performance in EPASS FOPR source selections for professional Advisory and Assistance Services (A&AS) support across AFLCMC. Please reply to the following questions, but feel free to provide general feedback related to EPASS FOPRs and past performance not covered by the questions below:

a. Does your company feel the CPAR evaluation subfactor criterion adequately and fairly addresses the topic of past performance?

b. Is there a way to improve the evaluation subfactor criterion above to address past performance more adequately and fairly? If so, please provide details/example language, etc.

c. What ways does your company recommend EPASS change how we evaluate past performance for these professional services?

d. Is other documentation (besides CPARS/PPPRF) available offerors could submit as part of the work sample to address past performance outside of the CPAR criterion?

e. If the government added a Past Performance Evaluation factor, how would that affect Industry's ability/desire to propose? More likely, less likely, not affected. Please explain.

f. If EPASS no longer includes the CPAR evaluation subfactor criterion, what does your company suggest the Government do instead to address the risk of poor performance?

3. This RFI is issued solely for information for the EPASS office and is in no way connected to any current FOPR releases or other FOPR related RFIs/market research. It does not constitute a FOPR or a promise to issue a FOPR in the future. It does not commit the Government to a contract for any supply or service whatsoever. Furthermore, the Air Force is not seeking proposals at this time and will not accept unsolicited proposals. Responders are advised the Government will not pay for any information or administrative costs incurred in response to this RFI. All costs associated with responding to this RFI will be solely at the interested party's expense. Not responding to this RFI does not preclude participation in any future FOPR, if any is issued.

4. If the Government has follow-up questions, please indicate if the EPASS office can contact your company and if so, provide an appropriate POC.

5. Responses due NLT COB Friday 17 April 2026. Please send responses to the undersigned at meredithe.sweeney@us.af.mil and Mr. Joe Abramo at joseph.abramo@us.af.mil.
