

GLOBAL FINISHING SOLUTIONS

PAINT BOOTHS

For Refinishing Military Aircraft

Global Finishing Solutions (GFS) is the industry leading provider of state-of-the-art paint booths and finishing systems for the critical corrosion control maintenance of U.S. military (and its allies) aircraft, ranging from low observable fighters to large scale C-17 transports. GFS has manufactured and installed aircraft paint booths for domestic and foreign military bases.

Today's high-performance aircraft coatings require complete environmental control during the finishing process. GFS' team of experts is capable of providing a solution that meets the specific requirements of each individual aircraft and location.

GFS aircraft booths have been/are being installed at:

U.S. AIR FORCE BASES

- Andrews
- Area 51
- Barksdale
- Bergstrom
- Cannon
- Creech
- Davis-Monthan
- Dyess
- Edwards
- Eglin
- Elmendorf
- Hill
- Homestead
- Kadena
- Kelly
- Kunsan
- Langley
- Little Rock
- Luke
- March
- McChord
- Moody
- Mountain Home
- Nellis
- Peterson
- Robins
- Seymour Johnson
- Shaw
- Tinker
- Tyndall
- Vandenberg

U.S. ARMY LOCATIONS

- Bluegrass Army Depot
- Corpus Christi Army Depot
- Fort Campbell
- Fort Hood

- NAVFAC
- USS George Washington

FOREIGN MILITARY LOCATIONS

- Chilean Air Force
- Indian Air Force – Hindon
- Pakistan Air Force - Shahbaz
- Royal Air Force – Lossiemouth & Syerston
- Royal Bahrain Air Force
- Royal Canadian Air Force - Trenton
- Saudi Arabian Armed Forces
- United Arab Emirates Air Force

Your Full-Service Solution

A full-service manufacturer, Global Finishing Solutions will assist you with all stages of integrating a paint booth at your facility. We provide superior engineering and design expertise, as well as dedicated project management, installation, commissioning, startup and preventative maintenance services.

We will work side-by-side with the U.S. Army Corps of Engineers and Design/Build Firms to design a paint booth that fits within your existing hanger structure or is completely integrated into your new building design. By working collaboratively with these organizations, we are often able to save you time and money.

PROJECT MANAGEMENT

We will assign a dedicated project manager to follow your project through from start to finish, keeping the project on budget and on time. The project manager is responsible for developing the project schedule and monitoring the budget, equipment quality and project billings.

INSTALLATION & STARTUP

We offer complete, professional installation and startup services across the U.S. and globally. Our experienced staff has completed installations of some of the most advanced finishing environments in the world. Expert installers will make sure that your booth is constructed in a timely fashion and according to the proper specs and regulations. Once the booth is built, our startup technicians will get your booth up and running.

ENERGY EFFICIENCY

Our aircraft paint booth designs incorporate the best available mechanical and control technologies, offering significant operational cost savings throughout the life of the equipment. In some cases, operational savings can be as high as 75-80%, when compared to traditional paint booth designs.
