

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: ACC-PKJ, AMIC

Project/Program Name: AFSIM FY26 Training

Purchase Request / Local ID Number: TBD

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

(U) This acquisition is for the provision of specialized, tailored AFSIM training services, which will be awarded on a sole-source basis to Radiance Technologies. The action is to procure a 4-day User course and a 3-day Developer course for up to 24 DoD personnel, aimed at enhancing their proficiency in using AFSIM for modeling and simulation in military operations. The training will be delivered off-site at a location convenient for DoD personnel.

(U) The required services consist of a 4-day AFSIM User course and a 3-day AFSIM Developer course tailored for DoD personnel. The training will cover:

- (U) AFSIM User Course: Basic training on the AFSIM platform, designed to familiarize participants with the tool's applications and features for system modeling and simulation, as applied to JWAC analysis.
- (U) AFSIM Developer Course: Advanced training for experienced programmers, focusing on customizing and developing AFSIM models for complex defense simulations.

(U) These training services are essential to ensuring that DoD personnel can effectively utilize AFSIM for operations analysis and simulation-based decision-making.

(U) There is the potential that multiple years of this training will be needed to meet long term Government needs related to AFSIM.

Section C: Justification for Soliciting from a Single Source or Brand Name

(U) Market research was conducted to identify potential vendors capable of delivering the required AFSIM training. The following resources were reviewed:

1. SAM.gov: Reviewed for registered vendors and capabilities.
2. Vendor Websites (Radiance Technologies, DCS Corporation, Infinity Labs): Analyzed their past performance and training capabilities related to AFSIM.
3. DoD Resources: Assessed historical contracts and procurement patterns related to AFSIM training.
4. Industry Knowledge: Sought feedback from DoD personnel familiar with AFSIM training.

(U) Results from this market research confirmed that while other vendors such as DCS Corporation and Infinity Labs provide related training services, only Radiance Technologies offers the unique ability to customize the training content to the DoD's exact needs. Their track record in delivering flexible, tailored training was a key factor in the decision for a sole-source acquisition.

(U) The statutory authority for this sole-source acquisition is FAR 6.302-1 - "Only One Responsible Source and No Other Supplies or Services Will Satisfy Agency Requirements." This authority is invoked due to Radiance Technologies' unique qualifications to provide the highly specialized, customized AFSIM training required for DoD personnel. Radiance is the only vendor with the ability to deliver the training in the specific format and depth required by the government.

Single Source Justification (Simplified Acquisition)

(U) Radiance Technologies' unique qualifications in providing tailored AFSIM training courses are a key factor in the decision to use sole-source authority. Their ability to customize the training content for DoD-specific scenarios, combined with their certified instructors who specialize in AFSIM, makes them uniquely qualified for this requirement. No other vendor in the market has demonstrated the same level of flexibility or expertise in providing the customized, high-quality training required by the DoD.

Section D: Efforts to Obtain Competition

(U) The agency reached out to known vendors in the defense training space, including DCS Corporation, Radiance Technologies, and Infinity Labs, to assess their capabilities. However, based on their specialized ability to tailor training to the DoD's specific needs, Radiance Technologies was determined to be the most qualified vendor for this acquisition. Despite outreach, no other vendors were found to offer the same level of customization and proven performance for AFSIM training.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

(U) In order to promote competition in future acquisitions, the agency plans to conduct a comprehensive review of potential training vendors and training capabilities after the completion of this sole-source award. The agency will evaluate the effectiveness of the current training approach, identify other vendors capable of providing similar training, and ensure that future acquisitions allow for broader competition. Any barriers to competition, such as lack of qualified vendors or overly restrictive training requirements, will be addressed by exploring alternative training methodologies or issuing more detailed statements of work that better align with industry capabilities.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
