

Sources Sought Notice

THIS IS A SOURCES SOUGHT NOTICE issued in accordance with FAR Part 10, Market Research. This notice is **not** a solicitation, and **no contract will be awarded** from this announcement.

This notice is for planning purposes only to determine (1) the availability and capability of qualified sources, (2) the level of interest among small business socioeconomic categories (8(a), SDVOSB, WOSB, HUBZone, etc.), and (3) the most appropriate acquisition strategy for the potential requirement.

If a solicitation is issued, it will be posted to SAM.gov, and it is the responsibility of potential offerors to monitor that site.

DESCRIPTION

The Bureau of Reclamation has a requirement for contractor services to repair Dewatering Well #1 located near the Leadville Mine Drainage Tunnel (LMDT) Water Treatment Plant, Leadville, Colorado.

The project consists of removal of existing pump equipment, installation of a new internal casing and well screen, and restoration of pumping capability as detailed in the Performance Work Statement. Key elements include:

- Removal of existing 100 HP motor and vertical turbine pump assembly
- Installation of 16-inch casing and 316 stainless steel well screen (approx. 10 ft) inside existing 20-inch casing
- Installation of dielectric coupler and required welds
- Post-installation video inspection
- Reinstallation of pump and motor

Tasks and specifications will be outlined fully in the Performance Work Statement, which will be provided at time of Solicitation.

Period of Performance: Unless otherwise noted by the Contracting Officer, performance must occur between July 1 and September 30, 2026, coordinated with the Leadville Plant.

Place of Performance: Dewatering Well #1 at Station 10+25 near 749 Hwy 91, Leadville, CO.

NAICS CODE

NAICS: 237110 – Water and Sewer Line and Related Structures Construction

INFORMATION REQUESTED
