

Sources Sought: Installation and Management of Fully Automated Parking Management Services at the Department of Labor's Frances Perkins Building

1. Purpose

The U.S. Department of Labor (DOL) is issuing this Request for Information (RFI) in accordance with Federal Acquisition Regulation (FAR) Part 10, Market Research, to obtain input from industry regarding a potential automation project for three parking garages at the Francis Perkins Building (FPB) located at 200 Constitution Avenue, NW Washington, DC 20210. The information received will assist the Government in understanding industry capabilities, refining requirements, assessing risks, and developing an appropriate acquisition strategy consistent with applicable procurement laws and regulations.

This RFI is for planning and market research purposes only and does not constitute a solicitation, request for proposal, request for quote, or an obligation on the part of the Government to acquire any supplies or services.

2. Project Overview

The Department of Labor (DOL) is interested in working with qualified vendors to modernize and conduct parking management services at the Frances Perkins Building (FPB) located at 200 Constitution Avenue, NW, Washington, DC 20210. The FPB has three (3) independent parking garages containing a total of 898 parking spaces. The anticipated scope may include, but is not limited to:

- The contractor shall provide services for parking management at the FPB. Services include parking management and oversight of the three garages in the FPB. They also includes, but are not limited to, access control, and assessments.
- The contractor shall provide a full service modernized parking management system. This shall include completely automating controlled entry and exit using license plate identification, PIV, contractor-provided cards, or similar technology.
- There is no expectation that contractor personnel will be on site, except to maintain and repair contractor-owned equipment as required. The contractor shall provide 24 hour/7 days a week customer service via voice, text, web, web messaging, e-mail, etc. to allow for around the clock customer service availability. The contractor shall also provide fully online web and mobile-enabled parking application and payment process accepting all major credit and debit cards, with capability to establish automatic payments. Additionally, the contractor shall offer an android/apple app where parkers can make payments from their smart phones. The contractor shall also manage the parking application process including quality control of applicants' input and then routing to the appropriate government approving officials for daily and monthly parking.

- The contractor shall provide an online dashboard where government officials can track garage usage in real time, view trend data, and generate reports.
- The contractor shall accept parking applications for individuals wanting to park at the FPB. The contractor shall include a parking registration form on their website/app to allow folks to provide information necessary to park at FPB. Required information will include the employee's Service Computation Date (SCD), which is their federal service employment start date, as well as their supervisor (to include their supervisor's e-mail). Once the application is submitted to the contractor, it will be forwarded to the supervisor for their review/approval.

The Government anticipates that the project may be executed in phases to minimize operational disruption.

The North American Industry Classification System (NAICS) code for this requirement is 812930 – Parking Lots and Garages.

3. Industry Day

DOL intends to host a non-mandatory Industry Day to provide additional project information and allow for dialogue with interested vendors.

Tentative Date: March 12, 2026

Location: Francis Perkins Building located at 200 Constitution Avenue, NW Washington, DC 20210.

Format: Parking Garage Walk-thru

The Industry Day will consist of an in-person building tour of our 3 parking garages (North, South & East) requiring automation.

Attendance at Industry Day is highly recommended but is not required to submit an RFI response.

Registration Information: Attendance is by prior registration only. Given space constraints, attendance will be limited to two (2) representatives per company. Interested parties can register by emailing with the subject line: **RSVP Site Visit– Installation and Management of Fully Automated Parking Management Services at the Department of Labor's Frances Perkins Building (XYZ company's name),**

Karla Salmon (salmon.karla@dol.gov) and Jeremy B. Keator (Keator.Jeremy.B@dol.gov) and Helen A. Williams (williams.helen.a@dol.gov) no later than March 4, 2026. Confirmation of registration will be sent out by March 6, 2026.

Attendees should provide the following information with their email to Karla Salmon and Jeremy Keator:

- Company Name and Business Size (Include applicable socio-economic status)
- Name of Attendee(s)

- Attendee(s) Contact Information (Email and Phone Number)
- Company Website
- Capability Statement

4. Requested Information After Industry Day

Respondents are requested to provide concise, relevant information addressing the areas below:

A. Company Information

- Company name, address, and point of contact
- Business size and socioeconomic status (e.g., small business, 8(a), HUBZone, SDVOSB, WOSB)
- Relevant NAICS codes

B. Relevant Experience

- Description of experience performing parking garage automation and parking management services oversight.
- Experience with occupied federal facilities
- Examples of parking garages automated/managed within the last 5–7 years

C. Technical Capabilities and Anticipated Approach

- Capabilities related to installation of parking automation technologies
- Recommended clear and actionable automated parking garage proposals
- Offer insights into what is required from the government for implementation
- Approaches to minimizing disruptions for DOL employees
- Safety and quality control practices

D. Schedule and Cost Considerations

- Anticipated timeline to complete automation requirements

E. Rough Order of Magnitude and Schedule Input

- Your proposed monthly and daily parking rates upon automation completion

F. Industry Day Feedback

- Topics or questions you recommend the Government address after Industry Day
- Information that would be helpful to industry prior to a future solicitation

Please provide any general comments, thoughts, and feedback your firm would like to share regarding this RFI.

5. RFI Response Instructions due by April 2, 2026-4:00 PM (ET)

Responses should be limited to no more than **15 pages**, excluding cover page.
Submit responses in PDF format.

Email responses to Karla Salmon at salmon.karla@dol.gov and Jeremy Keator at Keator.Jeremy.B@dol.gov with the subject line: **RFI – Installation and Management of Fully Automated Parking Management Services at the Department of Labor’s Frances Perkins Building – (XYZ company’s name).**

All proprietary information should be clearly marked.

6. Government Disclaimer

This RFI is issued solely for informational and planning purposes in accordance with FAR Part 10 and does not obligate the Government to issue a solicitation, award a contract, or otherwise commit funds. The Government will not reimburse respondents for any costs associated with responding to this RFI, participating in Industry Day, or providing follow-up information. Information submitted may be used to develop or refine acquisition strategies, requirements, and procurement documentation.

Evaluation Disclaimer – ROM Costs and Schedules:

Any ROM cost ranges, conceptual schedules, phasing concepts, sequencing approaches, or other planning-level information submitted in response to this RFI are non-binding, budgetary in nature, and provided for market research purposes only. Such information will not be used to rank, score, evaluate, or otherwise compare respondents.

The Government recognizes that ROMs and schedules are based on preliminary assumptions and limited information and are subject to material change as requirements are further defined. Submission or non-submission of ROM cost or schedule information will not result in a competitive advantage or disadvantage in any future acquisition.

The Government will not rely on ROM pricing or schedule data as the sole basis for establishing an Independent Government Cost Estimate (IGCE) or project baseline without additional analysis, validation, and refinement.

No Commitment to Scope or Phasing:

Any references within this RFI to anticipated scope elements, sequencing, occupancy assumptions, or execution approaches are preliminary and subject to change. The Government makes no commitment to the scope, phasing plan, schedule, or project structure described herein. Final requirements, scope definition, phasing strategy, and acquisition approach will be determined at the Government’s discretion and may differ materially from the concepts described in this RFI.

7. QUESTIONS:

To ensure fairness and consistency, oral questions during the industry day will not be answered. Interested parties may submit written questions following the event in accordance with instructions that will be provided at the industry day. Questions must be submitted in writing by the deadline identified at the event and responses will be consolidated and posted to SAM.gov.

All RFI Questions must be submitted in writing by e-mail to Contract Specialist Jeremy Keator at keator.jeremy.b@dol.gov and Karla Salamon at salmon.karla@dol.gov no later than 3:00 pm (Eastern) on **March 20, 2026**. Questions over the telephone will **NOT** be addressed.
