

Statement of Work
for
SpatialAnalyzer Software Maintenance
at the
704th Test Group/846th Test Squadron

27 January 2026

1.0 PURPOSE

The 846 TS's primary test capability is the Holloman High Speed Test Track (HHSTT) where they utilize rocket powered sled trains to simulate flight like environments and scenarios with the control and recovery of a ground based system. SpatialAnalyzer (SA) software is required to operate all API/Leica measuring instruments at the 846 TS to ensure the high speed test rails and rocket sleds are within required tolerances for the mission. SA software is designed to interface with all metrology instruments used at the 846 TS.

2.0 SCOPE

The contractor shall provide the 846 TS with software maintenance licenses for three keys of SpatialAnalyzer Professional and one key of SpatialAnalyzer Ultimate. Software maintenance shall be the manufacturer's standard commercial Software Maintenance Agreement (SMA), which includes software updates, bug fixes, and technical support for one year, with options for four (4) additional years.
