

Introduction

Battelle Memorial Institute, Pacific Northwest Division (Battelle), Management and Operations Contractor of the U.S. Department of Energy's (DOE) Pacific Northwest National Laboratory (PNNL) in Richland, Washington, requests information to begin planning for a warehouse provider to provide the following services:

- Warehousing/Storage Facility
- Equipment receipt and storage
- Procurement of Equipment and Materials
- Pre-shipment preparation

This Request for Information (RFI) is part of a market research effort to best address Battelle's needs. This RFI is issued for informational and planning purposes only and does not constitute a solicitation. ***Battelle does not intend to award a contract based on this RFI or otherwise pay for information received in response to this RFI.***

Description

Warehousing/Storage Facility

The Contractor shall provide an acceptable location for operations which requires a warehouse facility approximately 20,000 SqFt with 2-high warehouse racking, and a utilization rate ranging from 60 to 75%. Additionally, the warehouse facility shall offer adequate space to accommodate the staging of equipment while the property waits to be shipped upon instruction to ship or for handling and preparing of equipment for modification and/or other maintenance requirements. A minimum of one loading dock with locking doors or gates is required. A minimum of two (2) forklifts with extended forks and a calibrated weight scale is required.

The warehouse shall be located in the United States. The warehouse facility shall be secure with controlled access, alarmed, and climate and pest controlled.

The Contractor shall be capable (including any required licensing) of storing and maintaining Battelle provided radiation check sources. Applicable radiation check sources may include any or all of the following: cesium-137 with ~300 kBq activity and californium-252 with ~150 kBq activity.

Equipment Receipt and Storage

The Contractor shall receive, inspect, verify quantities, and store Battelle-provided equipment and equipment provided by other Battelle approved contractors.

The Contractor shall perform a function test within five (5) business days of receipt and report any issues within three (3) business days of identifying them. Equipment function test procedures and checklists will be provided by Battelle. Battelle will also provide equipment specific training for the performance of function testing. An example of a function test procedure is provided as an attachment to this RFI.

Battelle estimates approximately twenty (20) pieces of equipment will be delivered twice a month.

The Contractor shall provide a real-time inventory verifying receipt, inspection, quantities of all equipment, and maintenance status to Battelle and authorized third parties.

Procurement of Equipment and Materials

The Contractor shall procure equipment for NSDD radiation detection systems upon direction and shall procure adequate shipping and packaging materials to prepare equipment for shipment via truck, air, or

multi-modal transport.

The Contractor shall provide the following requirements as noted below.

Specific commodity requirements will be defined and provided to the Contractor.

Equipment and Material Procurements: The Contractor shall procure NSDD program equipment and material for radiation detection systems. Equipment purchases may include hand-held devices such as radioisotope identifiers (RIIDs), radiation pagers, survey meters, desktop and laptop computers, and other equipment necessary for the host government to operate the radiation detection systems. Material purchases may include vinyl bags and straps for shipping, lead kits for collimation, shipping crates, and shipping boxes. The Contractor shall be responsible for obtaining warranty, hazardous material safety sheets, export control information, and a completed NSDD High Risk Property Review Certification from the supplier, and international shipping documentation for all procurements.

Batteries: When directed, the Contractor shall procure non-hazardous, non-spillable lead acid batteries and ensure all batteries in stock are charged prior to shipment. The Contractor shall procure battery testing and charging equipment to provide this service. The Contractor shall advise Battelle of defective batteries.

Modification Support: The Contractor shall be responsible for minor modifications to program equipment as identified by Battelle and authorized parties. These modifications may be performed by the Contractor or subcontracted by Contractor to the original equipment manufacturer or other qualified vendors within the schedule directed by Battelle or other authorized parties. The Contractor shall provide adequate space to perform the equipment modifications. The Contractor shall coordinate with, and as necessary, support the original equipment manufacturer, other qualified vendors, and/or other contractors in the performance of any modification projects.

Pre-shipment Preparation

The Contractor shall coordinate the transfer with Battelle and authorized third parties for export to foreign locations or within the continental US. Battelle expects about fifty (50) shipments per year, with each shipment containing one (1) to five (5) pallets, holding between one (1) and eighty (80) pieces of equipment.

The Contractor shall ensure equipment is properly packed to prevent damage during transport. Additionally, the Contractor shall ensure DOT compliant handling, packing, and labeling of hazardous and fully regulated shipments. The Contractor shall have a minimum of one employee trained in the identification, receipt, handling and storage Hazardous Material categories Class 2.2 (non-flammable, non-toxic, compressed gas), Class 3 (flammable gas), Class 7 (radioactive material as sealed calibration sources in excepted or limited quantities), and Class 9 (consumables, specifically Lithium-Ion batteries) in compliance with OSHA Hazard Communication Standard (29 CFR 1910.1200) and DOT (49 CFR 172.704) Hazardous Material training regulations.

In some instances, the Contractor shall be required to prepare shipments expeditiously (72 hours or less) to support rapid response deployment.

Additional Requirements/Preferences

- Contractor shall have a minimum of two (2) years' experience in warehouse management

and equipment testing.

- Project Manager and Warehouse Supervisor shall have a minimum of three (3) years experience. The Project Manager and Warehouse Manager shall be the main personnel conducting this work.
- Prefer contractor has U.S. Government contracting experience (If applicable, please identify in your response).
- Prefer contractor has previous experience providing logistical support (If applicable, please identify in your response).

Response Requirements to this RFI

Questions are due by March 23, 2026

Battelle requests those interested in any resultant RFP to inform the POC identified below, by email, as soon as possible. Complete responses to this RFI are due no later than April 10, 2026

If your company has the potential to provide the services listed above, please provide the information requested below including amplifying narratives as applicable. This information will aid Battelle in determining qualified potential suppliers for this scope of work.

1) Identifying Information:

- Company Name/Division
- Business/Administrative point-of-contact name, title, telephone, and email address
- Technical point-of-contact name, title, telephone, and email address
- Small business qualification status (if any)
- Country where business is owned and operated.
- Warehouse Location(s), Is the facility leased or owned?

2) Improvements/Clarifications:

Considering the proposed requirements:

- Provide comments on any of the proposed requirements that you think should be improved or clarified in a future RFP.

Responses are limited to **five (5) pages**; font size shall be no less than 12 points (10 points for figures and tables). Attachments (product brochures, publications, company info) may be submitted and will not be included in the page limit. Please provide any other information you believe to be important and germane to the purposes of this Request for Information.

Proprietary information submitted as part of the response to the RFI must be clearly identified and marked as PROPRIETARY.

Please provide contact information for the person responsible for the information in the response, or the person we should contact for questions.

Battelle will not respond to individual submissions; however, Battelle may publish a technical report of RFI responses that does not contain personally identifiable information or confidential, proprietary, or privileged information.
