Description of Supply/Service

This item describes the requirement to provide the services of High Voltage certified / qualified field service technicians with experience performing maintenance and repair on the High Voltage 6.6 KV Main Switch Board circuit breakers and circuitry for troubleshooting and replacement of Circuit Breaker Earthing Solenoid Coils and Switch's. This requirement is for the [REDACTED] The place of performance is [REDACTED].

Competition Will be Restricted to the Following Source

Name of Manufacture: Point Eight Power

Basis For Decision That Only One Source Is Available

This is a Brand Name requirement for Original Equipment Manufacturer (OEM) Point Eight Power qualified service technicians to complete troubleshooting and repair in accordance with (IAW) the Statement of Work.

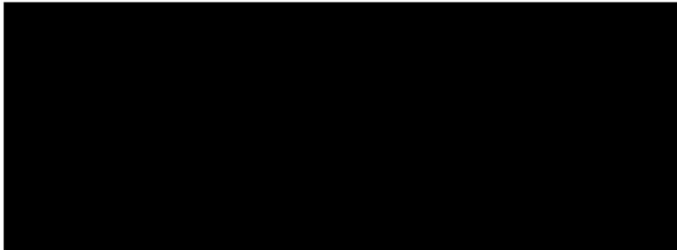

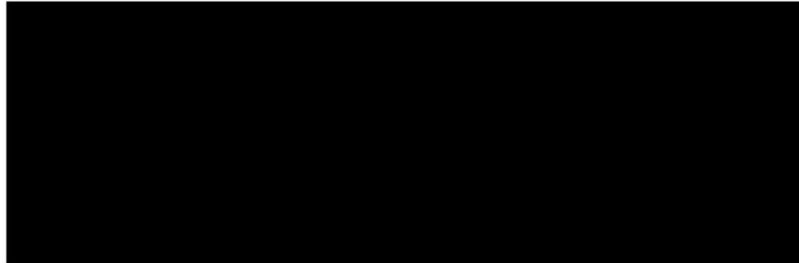

The 6.6 KV High Voltage Switchboards are critical equipment and are crucial to the reliability of all ship's equipment and primary mission. The use of unauthorized or unqualified repair facilities could result in electric shock hazard, fire hazard, and could render the ship dead in the water with no ability to maneuver. This is a safety of life at sea requirement. Additionally, the service technicians are required to be certified to work on High Voltage Power Distribution Systems and adhere to all High Voltage Safety Precautions to prevent catastrophic equipment damage. Personnel not properly trained are susceptible to severe injury or death resulting from arc flash.

American Bureau of Shipping (ABS) and United States Coast Guard require qualified OEM certified personnel perform maintenance and repair actions on ships critical equipment. The work required on the High Voltage Switchboard requires competent OEM repair technicians. The use of other companies that are not qualified or unfamiliar with working
