

Advanced Propulsion Acquisition Contract (APAC)

**Multiple Award Contract (MAC)
Indefinite Delivery Indefinite Quantity (IDIQ)**

**Contract Data Requirements List (CDRL)
General Instructions**

SOLICITATION FA8626-25-R-B008

8 January 2026

Propulsions Directorate, Advanced Propulsion Development (APD) Division (AFLCMC/LPA)

CONTRACT DATA REQUIREMENTS LIST (CDRL) MODIFICATION MATRIX

This matrix identifies the Contract Data Requirements List (CDRL) changes as implemented by contract modification.

CHANGE AUTHORITY (ECP No.; MOD No.; etc.)	CDRL REVISION NUMBER	DATE	CRDL/PAGES REVISED

***Note:** The purpose of the Contract Data Requirements List (CDRL) is to provide a standardized method of clear and unambiguously delineating Government's minimum essential data needs. The CDRL groups all of the data requirements in a single place rather than have them scattered throughout the solicitation or contract. The list of Data Item Description's (DIDs) listed below contains tailorable CDRLs you may include for individual Delivery/Task orders (DO/TOs); this list is not all inclusive.

TABLE OF CONTENTS

1. SCOPE

13. LIST OF POSSIBLE CDRLs (not all encompassing)

CDRL GENERAL NOTES/INSTRUCTIONS

1. **SCOPE:** This Contract Data Requirements List (CDRL) establishes the data to be delivered by the contractor, and the submittal, approval, and distribution requirements of all the CDRL data items contained herein. The contractor shall utilize best commercial practices and the guidance referenced in paragraph 10 of these general notes/instructions in meeting the requirements of the CDRL.
2. **GENERAL:** The requirements for the CDRLs are identified in DoD 5010.12 Procedures for the Acquisition and Management of Technical Data. The Data Item Descriptions (DIDs) specified in the CDRLs are in the Acquisition Streamlining & Standardization Information System (ASSIST) Database (<https://assist.dla.mil/online/start/index.cfm>).

3. DATA PREPARATION:

- a. Data submitted by the contractor shall conform to the quality requirements specified on the CDRL for each data item.
- b. Data submittals shall be handled in accordance with the DD Form 254 security guidelines. The contractor shall provide data in basic volumes at an unclassified level whenever possible. Where data is classified in nature, the maximum classification level of a basic document shall not exceed the Secret Special Access Required (SAR) level. All classified data beyond that level shall be provided as a separate annex to the document.
- c. Data shall be delivered by one of the following methods:
 - 1) Electronic Delivery/Availability – includes delivery/availability of data files via a government approved server or via attachment of electronic files to email messages, as mutually agreed to between the Government and the contractor. Electronic data delivery and access is subject to Government protection/security requirements. Notification of electronic delivery/availability of deliverables shall be sent to Government CO and Program Manager.
 - 2) Other Electronic Formats – data may be provided in appropriate format using media such as CD-ROM or DVD ROM. A document may consist of multiple files, but files should not be compressed or

UNCLASSIFIED

archived to save space. Exceptions must be arranged with CO. The contractor shall contact the CO for Block 14 DD Form 1423-1 distribution requirements 10 days prior to first delivery for each DD Form 1423-1 delivered by these means. Disc labels shall contain the following information:

CDRL Item No.

Document Title

Submission Date

Author, Company, Phone

File Name(s) and Formats

Distribution Statement

Export-Control Warning Statement

Destruction Notice

Security Markings

3) Text files to the maximum extent possible, shall be submitted as MS-Word file documents with copy and paste capability. Each text file shall have a filename in accordance with the mutually agreed filename conventions. Each MS-Word document and alternate format text document (to the maximum extent possible) shall have populated metadata in accordance with mutually agreed metadata conventions.

All non-text documents (spreadsheet, graphics, database, etc.) shall be accompanied by an MS-Word document as described above. Each non-text document shall have a filename in accordance with mutually agreed filename conventions. Each PowerPoint or Excel document and alternate native format file (to the maximum extent possible) shall have populated metadata in accordance with mutually agreed metadata conventions. Non-text documents, to the maximum extent possible, shall be submitted as PowerPoint or Excel files. Government recognizes that in some cases (e.g., raw data used for Stress Analysis, Engineering Models, etc.) native format is permissible. Contractor shall ensure Government has required training and access to software programs required to view native formats when such formats are used to satisfy requirements of this contract.

4) Shared data items are those items that are developed utilizing the IPT process and are available electronically. Shared data items are not subject to government requirements regarding format, delivery schedule or approval. When shared data items are not or cannot be maintained utilizing the IPT process, the government may decide to convert the previously shared data item to a deliverable data item.

d. All data shall be submitted in the English language.

4. METHOD OF TRANSMITTAL:

UNCLASSIFIED

a. All data submittals shall be accompanied by a letter of transmittal, and the Government shall acknowledge receipt and acceptance, where Government approval is required. Copies of all letters of transmittal shall be provided to the CO and CMDM Team. The letter of transmittal shall include as a minimum: **(See Attachment 1)**

Contractor Point of Contact (POC)

Contractor address

Date

Contract number and program name

Letter control number

Document control number

Document revision level

Document date

CDRL sequence number

DID Number

Data Title/Subtitle

Reason or frequency of submittal (monthly, draft, final, update, etc.)

List of distribution addressees as identified in Block 14 of the CDRL

List all document enclosures

b. If a paper copy of the LT is prepared, a complete list of addressees shall be placed at the end of the LT, annotating the recipients (as identified on the DD Forms 1423-1, Block 14) including the transmittal-letter-only recipients. If submittal is made via e-mail, the list of addressees in the “TO” line shall include the complete list of addressees and shall be considered sufficient.

c. Unless otherwise specified in Block 16 of the DD Form 1423-1, data submittal date is interpreted as the date the Government receives the data. An annual submittal is defined as one submittal within each Calendar Year (January 1st to December 31st). Electronic data available after 1700 Eastern Standard Time shall be considered delivered the next business day. Submittal days are considered workdays unless it's a Saturday delivery, then it would be a Friday submittal, if a Sunday delivery, then it would be Monday. For submittal days which fall on Government holidays (as defined by OPM); When the holiday falls on a Monday, then submittal is due the next workday. When the holiday falls on Tuesday through Friday, the submittal is due the day prior.

The six (6) shared holidays (New Years Day, Memorial Day, 4th of July, Labor Day, Thanksgiving Day and Christmas) are not considered workdays and shall not be used when determining submittal due dates. The non-share holidays (Martin Luther King Day, Presidents Day, Juneteenth, Columbus Day and Veterans Day) are considered workdays when determining submittal due dates.

d. For each data item in the CDRL, the Contractor shall clearly state in the final transmittal letter that this is the last submittal being made and that all contractual requirements concerning that data item have been fulfilled.

e. For each data item the Configuration/Data Manager shall receive a notification of delivery of the data regardless of data type.

5. DATA SUBMITTAL AND APPROVALS:

UNCLASSIFIED

The following definitions apply to Block 8 of the DD Form 1423-1:

- a. The use of an “A” in Block 8 indicates that Government approval of the identified document is required to assure that the contractor is sufficiently prepared to proceed to the next phase of the contract in addition to verifying compliance with the DID and CDRL requirements. Unless otherwise specified in the DD Form 1423-1 as calculated by working or business days, data item due dates to the Government are calculated by calendar days. Working days are defined as Monday -Friday. Except for the Government Holidays that are called out by OPM. Unless otherwise specified in an individual CDRL, all submittals of a CDRL with an “A” in Block 8 require approval. Any change to an already approved final data submission also requires Government Approval. Unless otherwise specified on the DD Form 1423-1, the technical office noted in Block 6 will review the data submitted for approval and the CO will notify the contractor of approval, disapproval, or corrective action required within 30 calendar days after receipt of data submittal. If the program office cannot respond within the 30 calendar days, the contractor will be notified, and a new suspense date will be mutually established. If the program office has not provided approval/disapproval/intent to extend due date within the 30 calendar days, the data will be considered automatically approved. However, the contractor shall notify the program office via telecom or email prior to assuming approval.
- b. If Block 8 has an “N” or is left “blank” these data items are considered non-approval, however, this does not relieve the Contractor of the responsibility of compliance with applicable regulations, standards, procedures, etc. All data submissions are subject to review by the procuring agency for departure of said compliance. The presence or absence of an “A” in Block 8 does not relieve the contractor of the responsibility of full contractual compliance and all data will be subject to review and acceptance by the Government.
- c. Data submittal requirements shall not be considered to have been met until the procuring agency has determined that all contractual requirements have been met regarding the identified data.

6. REVISION TO DATA SUBMITTALS AND RESUBMITTALS OF DATA:

- a. Unless otherwise specified, data submittals that are disapproved by the Government shall be revised and resubmitted by the contractor within 30 calendar days after receipt of CO letter. If the contractor cannot resubmit within 30 calendar days, the CO shall be notified withing 15 calendar days after receipt of CO letter and a new mutually agreed upon suspense date will be established.
- b. Data submittals that require corrective action shall be revised and distributed within 30 calendar days after receipt of CO letter, or as specified in the delivery requirements of the applicable DD Form 1423-1. If the contractor cannot resubmit within the required time, the CO shall be notified within 15 calendar days after receipt of CO letter and a new mutually agreed upon suspense date will be established. The CO will notify the contractor of approval, or further corrective action required for the previously submitted corrective actions, within 30 calendar days after receipt of resubmittal.

7. DOCUMENT REVISIONS:

UNCLASSIFIED

The Contractor shall comply with the following requirements in the revision of the documents provided in response to the data requirements specified in the CDRL.

- a. When resubmission of data is requested, complete documents shall be submitted unless otherwise specified.
- b. A “revisions” page shall be provided in the front of each revision and shall contain, as a minimum:
 - 1) A brief description of the reason for revision, including the applicable authority, e.g., ECP, Change order, supplemental agreement.
 - 2) Revision identification letter or number and revision date.
 - 3) Appropriate administrative instructions, e.g., security information, revision instructions, etc.
- c. Each revised page shall have the specific changes identified by a dark vertical line in the margin and include appropriate identification to the applicable revision by either date, revision number, or letter.
- d. Each revised page shall contain the revision number or letter in the upper right corner of the page.
- e. Anytime a revision is submitted, the title page of the document shall indicate the number or letter and date of that revision. Latest revision symbol and date shall be visible on the front surface of the document.
- f. The letter of transmittal for each revision shall reference all previous/pertinent correspondence relating to the documentation being submitted.

8. DOCUMENTATION MARKING:

DoD instruction 5230.24, Distribution Statements on Technical Documents, provides policy and guidance on marking documents. Air Force Instruction (AFI) 61-204, Disseminating Scientific and Technical Information, specifies certain distribution statements to be used on data to control distribution by Government agencies such as the Defense Technical Information Center (DTIC).

- a. Block 9 of the DD Form 1423-1 annotates the relevant distribution statement applicable to the data to be submitted. This distribution statement shall have precedence over other technical documentation on this Contract, unless otherwise specified. As annotated in Block 9 of the DD Form 1423-1, one of the following distribution statement(s) shall apply to all data on this contract:

DISTRIBUTION STATEMENTS:

- (1) Distribution Statement A. Approved for public release.
 - (a) This statement may be used only on unclassified technical documents that have been cleared for public release by competent authority in accordance with DoD Directive 5230.09 and DoD Instruction 5230.29. Technical documents resulting from contracted fundamental research efforts will normally be assigned Distribution Statement A, except for those rare and exceptional circumstances where there is a high likelihood of disclosing performance characteristics of military systems, or of manufacturing technologies that are unique and critical to Defense, and agreement on this situation has been recorded in the contract or grant.
 - (b) Technical documents with this statement may be made available or sold to the public and foreign nationals, companies, and Governments, including adversary Governments, and may be exported.

UNCLASSIFIED

(c) This statement shall not be used on classified technical documents or documents containing export-controlled technical data as provided in DoD Directive 5230.25.

(d) This statement shall not be used on technical documents that formerly were classified unless such documents are cleared for public release in accordance with DoD Directive 5230.25.

(2) Distribution Statement “B” – Distribution authorized to U.S. Government agencies only, (fill in reason) (date of determination). Other requests for this document shall be referred to AFLCMC, 2450 D Street, Bldg. 20, WPAFB, OH 45433.

(3) Distribution Statement “C” – Distribution authorized to U.S. Government agencies and their contractors, (fill in reason) (date of determination). Other requests for this document shall be referred to AFLCMC, 2450 D Street, Bldg. 20, WPAFB, OH 45433.

(4) Distribution Statement “D” – Distribution authorized to Department of Defense and U.S. DoD contractors only; (fill in reason) (date of determination). Other requests for this document shall be referred to AFLCMC, 2450 D Street, Bldg. 20, WPAFB, OH 45433.

(5) Distribution Statement “E” – Distribution authorized to DoD components only, (fill in reason) (date of determination). Other requests for this document shall be referred to AFLCMC, 2450 D Street, Bldg. 20, WPAFB, OH 45433.

(6) Distribution Statement “F” – Further dissemination only as directed by AFLCMC, 2450 D Street, Bldg. 20, WPAFB, OH 45433, (date of determination), or higher DoD authority.

(a) Export-Controlled Warning Statement: Besides a distribution statement, the marking system also requires the use of a warning notice on all documents that contain export controlled technical data. That notice may be used in conjunction with any of the five limited distribution statements (“B”, “C”, “D”, “E” and “F”) Statement A: which authorizes public release, cannot be used in conjunction with the export-control warning notice. Procedures for dissemination of this technical data outside of the U.S. Government are contained in the DoD Directive 5230.25.

WARNING _ This document contains technical data whose export is restricted by the Arms Export Control Act (Title 22, U.S.C., Sec. 2751, et seq) or the Export Administration Act of 1979 Title 50, U.S.C., App 2401 et seq.) as amended. Violations of these export laws are subject to severe criminal penalties. Disseminate in accordance with the provisions of DoD Directive 5230.25.

When it is technically infeasible to use the entire statement, an abbreviated marking may be used, and a copy of the full statement added to the “Notice to Accompany Release of Export -Controlled Data” required by DoD Directive 5230.25.

(b) Contractor Imposed Distribution Statements. Part 27, Subpart 27.4 to the DoD Supplement to the Federal Acquisition Regulations (FAR) stipulates control procedures for contractor-controlled technical data to which the Government has limited rights. These procedures shall be followed as described in AFI 61-204.

(c) DESTRUCTION NOTICE – For classified documents, mark documents with the following statement “DESTRUCTION NOTICE” – Follow the procedures in DoD 5220.22-M, National Industry Security Program Operating Manual (NISPOM), section 5-705, or DoDM 5200.01, V3 DoD Information Security Program.” For unclassified, limited documents (i.e., not approved for

public release) mark documents with the following statement “DESTRUCTION NOTICE – Destroy by any method that will prevent disclosure of contents or reconstruction of the document.”

(d) The Contractor is responsible for ensuring adequate marking and security measures are in place to prevent unauthorized access to electronic data. The Contractor is not authorized to provide copies of any data on the CDRL to activities who are not specifically identified in the distribution block of the CDRL without written Government approval from the Program Office.

9. DATA ACCEPTANCE: The contractor shall prepare and submit a final DD Form 250 on a one-time basis collectively accounting for all completed Exhibit Line/Subline Items which call for a submission of the data by letter of transmittal. The DD Form 250 shall include a list and an account of all data submitted by letter of transmittal and approved by the Government during the reporting period. The DD Form 250 is due at the end of the contract.
