

KC-135 Center Console Refresh (CCR) Industry Day

Title of Event: **KC-135 CCR Industry Day**

Audience: **Members of the DoW and Industry Representatives**

When: **25 March 2026**

Where: **Microsoft Teams**

Abstract:

The KC-135 Center Console Refresh (CCR) Program Office is pleased to announce a virtual Industry Day to engage with our valued Industry partners. The dialogue from this event will be instrumental in developing a comprehensive final Request for Proposal (RFP), targeted for release in May 2026.

Industry is asked to submit a list of high-interest topics or common concerns with the RSVP. This will allow the program team to incorporate this information into the presentation, preserving the time allotted in private sessions for more detailed discussion.

Industry Day Goals:

The key objectives for this event are to:

- Engage Industry on Pricing Matrix and Source Selection Documentation
- Seek feedback from Industry on the Draft Request for Proposal (RFP)
- Discuss In-Person Opportunity for Industry partners to tour a KC-135 at Tinker AFB, to be scheduled in April 2026

Agenda:

Morning Session (All Participants): The morning will be dedicated to a group session where the CCR team will present program information, provide clarifications, and seek feedback on specific questions. This will also serve as an open forum for industry to ask general questions.

Afternoon Sessions (By Appointment): The afternoon will be reserved for private, 45 minute, one-on-one meetings between the CCR team and Prime Contractors with their respective subcontracting partners.

Registration:

We kindly request that all interested parties RSVP by 16 March 26. Please provide the full names and email addresses of each individual who will be attending from your organization, as well as the list of high interest topics/common concerns. A calendar invitation with virtual meeting details will be distributed to the provided email addresses.

We look forward to your participation.
