

Single Source Justification (Simplified Acquisition)

Section A: General Contract Information

Is this a Bridge Action as defined in the [AF Bridge Action Reduction Plan](#)? ☐ Yes ☒ No

Contracting Activity: AFMC/AFSC OL_H/PZIEB

Project/Program Name: Alexsys 15394 Servo Motors

Purchase Request / Local ID Number: PRI 24427

Estimated Contract Cost (including Options): [REDACTED]

Section B: Description of the Supplies/Services Required

The 520th Software Engineering Squadron (SWES), as part of its telemetry antenna control (TAC) program, requires the purchase of new antenna servo motors. This acquisition is a critical component of a larger project to upgrade the 50-foot telemetry tracking antennas used for rocket launches in Florida. The current antenna control systems, specifically the Microcomputer Buffer System (MBS), Telemetry Radar Input Output (TRIO), and Telemetry Radar Acquisition Computer (TRAC), are obsolete and have been identified as sustainment worst actors. To ensure the Long Range Telemetry System (LTRS) can continue providing telemetry support to users such as Navy T&E, this project will address the control and drive systems of the four TAA-50 assets at Jonathan Dickinson Missile Tracking Annex (JDMTA). These upgrades, including the new servo motors, will sustain their functionality and ensure the antenna systems can continue interfacing with existing systems for serial pointing data and the transport of Range User and/or Range Safety data.

Motor, 400/480 VAC

PN: 303661-31

Qty: 4 Ea

Price: [REDACTED]

Total Estimated Cost: [REDACTED]

Delivery is not to exceed 90 days ARO

Section C: Justification for Soliciting from a Single Source or Brand Name

FAR 13.106-1(B) (1) "Soliciting from a single source. (1)For purchases not exceeding the simplified acquisition threshold.

(i)Contracting officers may solicit from one source if the contracting officer determines that the circumstances of the contract action deem only one source reasonably available (e.g., urgency, exclusive licensing agreements, brand-name or industrial mobilization)".

The 520th Software Engineering Squadron (SWES) requires the immediate, single-source procurement of new antenna servo motors for its telemetry antenna control (TAC) program. [REDACTED]

[REDACTED] To use any other brand is not possible; it would force a complete system redesign, nullifying the government's existing investment in 16 identical motors and costing an estimated \$1 million in redesign and re-procurement costs. Therefore, this specific motor is the only viable path forward to prevent project failure and ensure mission sustainment.

Single Source Justification (Simplified Acquisition)

Section D: Efforts to Obtain Competition

Conducted a search of NASA SEWP and GSA 2GIT of all part numbers and no other vendors were found to offer this product. An OEM provided an Email stating that TCS Inc is the only authorized vendor of the Kollmorgen servo motors. The government intends to award a sole source award to TCS Inc.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

It is anticipated that Sole Source justification will be required in the future. However the government will continue to monitor the market for alternatives. Should a new product come to market that is compatible, the team will evaluate that product as well.

Section F: Contracting Officer's Determination

I have determined, in accordance with [FAR 13.106-1\(b\)\(1\)](#), that the circumstances of this contract action deem only a single source is reasonably available.
