

Department of the Air Force: Justification for Other Than Full and Open Competition

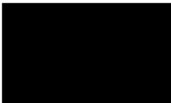

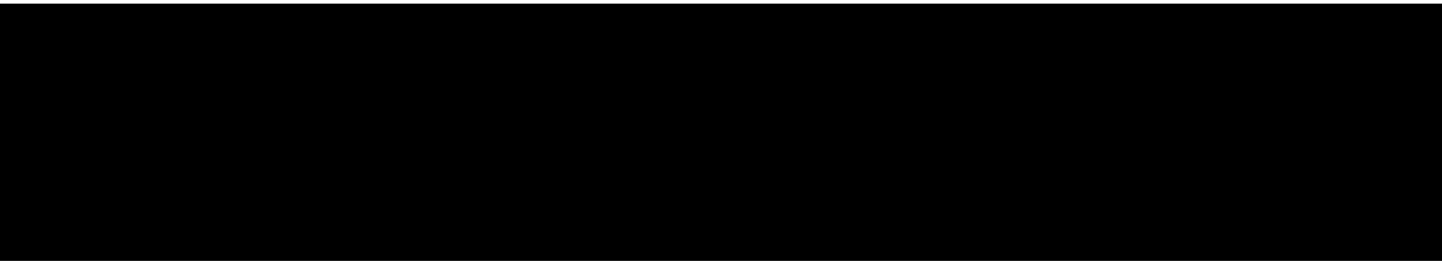

Dollar Value of this Acquisition: ☒ ≤ \$10M ☐ > \$10M and ≤ \$100M ☐ > \$100M and ≤ \$500M ☐ > \$500M

CERTIFICATIONS: CO certification serves as J&A approval < \$10M. See [J&A Template Guidance](#) at [redacted] for completing the J&A sections and J&A Approval Guidance

Date	Contracting Officer (RFO 6.104-1(12))	Signature
23 April 2026	I certify that this justification is accurate and complete to the best of my knowledge and belief.	
Date	Technical and Requirements Personnel (RFO 6.104(b))	Signature
23 April 2026	I certify that the supporting data herein, which is my responsibility, is accurate and complete.	

COORDINATION

APPROVALS (RFO 6.104-2(a) Table 6-1 & R-DFARS 206.104-72 Table 206.1)

Department of the Air Force: Justification for Other Than Full and Open Competition

I. Agency and Contracting Activity (RFO 6.104-1(a)(1)):

AETC/PZZF

II. Nature and/or description of the action being approved (RFO 6.104-1(a)(2)):

The [REDACTED] requires a vibration control and excitation system to support calibration and functional testing of accelerometers and other dynamic sensors. The system will replace our broken and obsolete test set, and expand existing vibration test capability, and must be fully compatible with current laboratory calibration processes and software. The system must support primary accelerometer calibration and verification workflows, provide closed-loop vibration control for sine, random, and shock maintain compatibility with existing Vibration Research software, test profiles, and data formats, allow direct comparison with existing laboratory reference standards without extensive modifications, provide frequency range and force levels required for the labs calibration and vibration testing scope [REDACTED] and be fully supported and calibrated by the original manufacturer.

III. Description of supplies/services required to meet agency needs (RFO 6.104-1(a)(3)):

1. P/N 9704 Vibration Test System

*P/N VR9700P - VR9700 Hardware Unit 1 Signal Processing Hardware Unit with 4 Analog Inputs available per unit (combine units up to 128 inputs) and 2 Analog Outputs (Drive) available. Inputs and outputs purchased separately.

*P/N VR9704 - 4 analog inputs

*P/N VR10UT - One analog output

*P/N VR9100 - SINE I VibrationVIEW I Includes notching, multi-channel extremal control, and COLA I Standard frequency up to 4,9001-iz

*P/N VR9103 - HIGH-FREQUENCY SINE I VibrationVIEW I Extends frequency from 4,900Hz to 50,000Hz I Requires VR9100

*P/N VR9106 - ACCELEROMETER CALIBRATION VERIFICATION I VibrationVIEW I VR9103 recommended for accelerometers rated over 4,900Hz I Requires VR9100, a minimum of 2 input channels, and a reference accelerometer.

*P/N VR9200 - RANDOM I VibrationVIEW I Includes notching and multi-channel extremal control I Standard frequency up to 4,900Hz

*P/N VR9300 - SHOCK I VibrationVIEW I Standard frequency up to 4,900Hz

*P/N VR700-FCI- Calibration Certificate with initial system purchase for one (1) Primary VR9700 Signal Processing Control Unit: Calibration traceable to 10 NIST standards but is not accredited. (Accredited calibration is available for an additional cost).

*P/N VR9700-HW - Three (3) Year Hardware Warranty for VR9700 controller hardware

*P/N VR95USA-Prem-I - One (1) Year Premium Upgrades & Support Agreement (U&SA) for controller Includes one (1) year or Automated Calibration Verification software, iDOF, Web & Email, Analyzer Functions, Math Traces and Calculator, and unlimited technical support. Only Available in US and Canada.

*P/N VR9500-TC - Two attendees at a scheduled 2-day VibrationVIEW user training seminar. Valid for up to one year after purchase date.

2. P/NVR4044 - 44 lb-I Shaker System rated at 44 lb-f pk Sine, 31 lb-f rms Random. Includes Shaker (0.51 Inch peak-to-peak displacement, armature weight 0.51 lbs, diameter 2.36", frequency range 2-7,000 Hz, (5) #10-32 mfg holes), Direct coupled linear Power Amplifier. Interconnect Cables and Hoses. Cooling blower (included) required for operation above 40 lb-f.

3. P/N VR5200HF - 13 lb-f High Frequency Shaker System. Includes Shaker (rated at 13 lb-I pk Sine, 8 lb-f rms Random. 21 lb-I pk Shock. 0.50 Inch peak-to-peak displacement, armature weight 0.35 lbs, diameter 2.125". frequency range DC- 14,000 Hz, (?) KS-32 threaded holes around perimeter, (1) dual thread 110-32x.30, 6-32 thru hole in center), Direct coupled linear Power Amplifier system. and Interconnect Cables & Hoses.

Department of the Air Force: Justification for Other Than Full and Open Competition

IV. Statutory Authority Permitting Other Than Full and Open Competition (RFO 6.104-1(a)(4)):

10 U.S.C. 3204(a)(1), Only one responsible source and no other supplies or services will satisfy agency requirements.

V. Rationale for Use of Authority (RFO 6.104-1(a)(5)):

The physical measurement and calibration section of  currently utilizes a Vibration Research exciter, controller, and amplifier. Multiple manufacturers produce vibration exciters and control systems; however, these systems use proprietary control hardware and software that is not compatible with the laboratory's existing Vibration Research infrastructure and would require development of new test profiles, data formats, and new calibration procedures. It would also require retraining of personnel and revision of all current SOP's, and would necessitate the complete re-evaluation of the laboratory's measurement uncertainty. Vibration Research  also confirmed that they do not have any authorized resellers.

VI. Integrated Market Analysis and Efforts to Solicit Competition (RFO 6.104-1(a)(6), (8), and (10)):

Based on market research conducted, Vibration Research and The Modal Shop are the only two manufacturers producing laboratory reference standard vibration testers. Of those two, only Vibration Research makes a system that meets  requirements.

VII. Determination of Fair and Reasonable Cost (RFO 6.104-1(a)(7)):

The Contracting Officer is responsible for evaluating, determining, and documenting the anticipated contract cost/price is fair and reasonable in accordance with RFO Subpart 15.4, Contract Pricing.

VIII. Any Other Facts Supporting the Justification (RFO 6.104-1(a)(9)):

N/A

IX. Actions to Overcome Barriers to Competition (RFO 6.104-1(a)(11)):

Should subsequent acquisitions be required in the future, we will remain diligent in our efforts to find testing solutions that meet compatibility requirements with our existing infrastructure, and ensure fair competition between vendors.
