

Statement of Work For 821 CRS

Description:

This requirement is for the acquisition of three complete landing zone lighting kits. These kits are essential for establishing and marking temporary or semi-permanent landing zones for aircraft in a variety of operational environments and conditions. The specified equipment is required to ensure safe and effective airfield operations in accordance with unit type code, as governed by AFI 10-406. The equipment must meet USAF landing zone and drop zone lighting requirements as established in AFI 13-217.

POC: SSgt Wesley Shepherd

The contractor shall provide the following:

1. Equipment

The contractor shall provide three (3) complete kits. Each kit must include:

- 1.1 Twenty (20) AZL15 landing zone lights.
- 1.2 Two (2) transmitters.
- 1.3 One (1) Pelican case, appropriately sized to house all kit components (20 lights and 2 transmitters).
- 1.4 The lights should be powered by AA batteries

2. Light Specifications

- 2.1 All lights must be the AZL15 model as specified by unit type code regulated by AFI 10-406.
- 2.2 Each light must have an output of at least 15 candelas.
- 2.3 Each light must be capable of switching between blue, white, and Infrared (IR) lighting modes.
- 2.4 Each light must have user-selectable steady-on and flashing functions.

3. Transmitter Specifications

- 3.1 The transmitters must have a minimum effective transmission range of 4000 feet.

4. Warranty

- 4.1 A minimum 12-month warranty for all equipment must be included.

5. Delivery

5.1 All freight, handling, and labor charges must be included.
