

JUSTIFICATION FOR SOLE SOURCE
(Simplified Procedures - MPT to ≤ SAT)

Purchase Request/Document number: 1301353325

The supplies or services described herein are being solicited on a sole source basis and competition is precluded in accordance with FAR 12.102(a) for reasons indicated below. There are no substitutes available for the supplies or services.

Restricted to the following source.

☒ **Service:**

Contractor:	Convergent Federal
Cage Code:	4A8Z7

☐ **Supply:**

Original Manufacturer Name:	
☐ Check here if obtaining product through authorized resellers of the manufacturer.	

Description of the supplies or services required, the estimated price/cost, and required delivery date or period of performance.

The United States Naval Academy (USNA) requires the installation of magnetic locks on four (4) sets of double doors within Mitscher Hall along with the installation of two (2) CAC readers controlling access to Corridor 130 and to the Atrium.

The required Period of Performance (PoP) is 16 June 2026 – 31 July 2026.

This requirement represents the minimum requirements of the Government with an estimated price of

Describe in detail why only this source(s) can furnish the requirements to the exclusion of other sources.

☒ **The supplies or services must be compatible in all aspects (form, fit and function) with existing systems presently installed/performing. Describe the equipment/function you have now and how the new item/service must coordinate, connect, or interface with the existing system.**

All CAC readers and magnetic locks currently installed in Bancroft Hall were provided and installed by Convergent Federal. As part of this implementation, Convergent integrated the readers with the LenelS2 OnGuard enterprise access control system using custom configurations, drivers, and firmware. This integration enables reliable communication among readers, control panels, and door controllers. These are critical components that depend on proprietary protocols and encryption. In addition, the system utilizes HID pivCLASS middleware to process CAC credentials. The building's access control infrastructure, which includes control panels, middleware, and the centralized LenelS2 security management system, has been specifically configured to operate with Convergent's hardware and software. Introducing readers from another vendor could create hardware incompatibilities, compromise security, reduction in system reliability, and require costly modifications to existing integrations. Maintaining a single-vendor solution supports consistent security hardening and centralized monitoring, while mixing hardware would increase maintenance complexity and risk system instability. Therefore, procuring additional readers from Convergent Federal is the only viable option to ensure full compatibility with the existing system.

Other information to support a sole source action:

The USNA building's access control infrastructure, which includes panels, middleware, and a centralized security management system (Lenel S2), has been specifically configured to operate with Convergent's hardware and software. Introducing readers from a different vendor could result in hardware incompatibility, compromised security, unreliable functionality, and costly modifications to existing integrations. Maintaining a single-vendor access control system ensures consistent security hardening and centralized monitoring. Using mixed hardware could increase maintenance complexity and reduce system reliability. Therefore, sourcing additional readers from Convergent Federal is the only option to ensure interoperability with the current system. It is essential that all new access control equipment originates from Convergent Federal, as the existing systems are also from Convergent Federal and this will ensure full compatibility and functionality of the CAC reader systems.

TECHNICAL/REQUIREMENTS CERTIFICATION:

I CERTIFY THAT THE INFORMATION PROVIDED ABOVE IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE. I UNDERSTAND THAT THE PROCESSING OF THIS SOLE SOURCE JUSTIFICATION PRECLUDES THE USE OF FULL AND OPEN COMPETITION.
