rob.mueller@nasa.gov

Lunabotics 2026 University Challenge

Extension to NASA Contract 80NSSC25PC012 to UCF / FSI

1. Period of Performance

The period of performance is hereby extended to **September 30, 2026**.

2. Purpose of the Funding Increase

The additional funding supports continued Lunabotics Competition management services and expanded FY26 requirements, including:

- Additional Project Management support
- Implement Astronaut Memorial Foundation (AMF) facility rental for the Lunabotics Competition Final (top ten teams) located at the Kennedy Space Center Visitor's Center
 - The AMF shall coordinate with the Kennedy Space Center Visitor's Center NASA and contractor representatives to ensure that all security and visitor access protocols are followed (i.e. security metal detector scanning and other security measures as recommended by NASA and the KSC Visitor's Center)
 - A separate statement of work in Appendix 1 has details of the AMF scope of work.
- Personal protective equipment and competition supplies per provided NASA safety requirements (work with NASA team to do an inventory of existing PPE remaining form the 2025 Lunabotics competition)
- Lunabotics student prize scholarships
(See attached revised Statement of Work.)
- Coordinate with NASA, NASA Laboratory Support Services and Operations (LASSO) II contractor, AMF and KSC Visitor's center organizations to help implement the Lunabotics final competition at KSC

2. Additional Statement of Work (SOW) Section (Add-On for FY26 Extension)

SOW ADDENDUM – LUNABOTICS EXTENSION (April 30 – September 30, 2026)

This addendum supplements the existing SOW. All previously defined responsibilities continue unless superseded herein.

3. Additional Scope Items (Funded by the \$100,000 Increment)

A. Additional Program Management (PM) Support – \$19,000

The contractor shall:

- Provide additional PM labor to support extended 2026 Lunabotics operations through the end of FY26 (September 30, 2026)
- Support a 2026 Lunabotics Final Challenge from May 19-21, 2026 at the at the AMF Center for Space Education, NASA Kennedy Space Center Visitor’s Center.
 - Organize an opening ceremony in coordination with NASA and the AMF
 - Organize a closing ceremony in coordination with NASA and the AMF
- Conduct weekly coordination meetings with NASA management and judges.
- Manage post-competition data, archive deliverables, and prepare a final PM summary report which includes 2026 lessons learned.
- Support evolving autonomy, safety, and communications requirements informed by the 2026 Guidebook.
- Provide administrative closure of all deliverables across the extended period.

Deliverable:

Extended Project Management Summary Report (Due: September 30, 2026)

B. AMF Facility Rental (Astronaut Memorial Foundation) – \$40,000

The contractor shall:

- Secure facility access at the Kennedy Space Center AMF **Center for Space Education (Building M6-306)** for Lunabotics activities, including:
 - Artemis Arena Room with regolith bin (NASA leased)
 - Robo-pits central area for Lunabotics Teams robot assembly and preparation
 - Audio Visual presentation area with seating and projection screen
 - Large projection screens (2x) for live coverage of the Artemis Arena Lunabotics competition runs in the RoboPits
 - Streaming video media support including an audio system for a commentator in the RoboPits
 - Judges Room

- Informational Seminars room
- Lunabotics teams presentation room
- Coordinate all AMF contracting, and scheduling requirements.
- More details are included in a Statement of Work in Appendix A.

Deliverable:

AMF Facility Rental Contract (Due: March 31, 2026)

C. PPE and Supplies – \$16,000

The contractor shall procure:

- PPE required by the 2026 Guidebook (N-95 masks, Tyvek suits, goggles, gloves, footwear covers)
- Safety supplies for simulant-handling operations (BP-1 safety requirements)
- Replacement consumables for RoboPits, HEPA stations, and regolith-handling areas
- Communications and safety signage.

Deliverable:

PPE and Consumables Inventory & Expenditure Summary (Due: April 30, 2026)

D. Student Lunabotics Scholarships – \$25,000

To support NASA’s STEM and workforce development goals, the contractor shall:

- Administer and award **\$25,000 in prize scholarships** (per the 2026 Lunabotics Guide Book) to qualified Lunabotics student competitors at the 2026 Lunabotics Final Challenge Closing Ceremony on May 21, 2026 at the at the AMF Center for Space Education, NASA Kennedy Space Center Visitor’s Center.
- Coordinate with NASA to finalize award categories and prize money amounts.
- Ensure compliance with UCF Research Foundation policies and NASA guidelines.
- Provide documentation of distribution to awarded teams.

Deliverable:

Scholarship Distribution Report (Due: June 30, 2026)

Appendix A:

Astronaut Memorial Facility (AMF) Statement of Work for Lunabotics 2026

Event Dates:

Day A – 0900 Tue May 11/12, 2026 - Move gear from Warehouse to the CSE, Rooms 9020 & 9030

Day 0 – 0800 Mon May 18, 2026 - KSC Rehearsal Day

Day 1 – 0630 Tues May 19, 2026 - Opening Ceremony and the challenge runs

Day 2 – 0630 Wed May 20, 2026 - Challenge Runs

Day 3 – 0630 Thur May 21, 2026 - Challenge Runs and Closing Ceremony

Day 0 – NA Mon May 25, 2026 - Memorial Day

Day Z – 0900 Thurs May 28, 2026 - Move gear from CSE, Rooms 9020 & 9030 to the Warehouse

Astronauts Memorial Foundation's (AMF), The Center for Space Education (CSE) Bldg. M6-306

1. This statement of work is based on the following:
The NASA Space Act Agreement KCS-4725 Rev Basic Dated 08.31.2023 - 2028
“Article 3. With NASA's consent, AMF may seek to improve the participant experience through arrangements with third parties.”
2. Budgetary planning and restrictions for an event that is less than 12 months away has its challenges. Based on this, the AMF is encouraged start looking for third parties to improve the participant experience. AMF is to report monthly as to the progress of obtaining the parties and what type of support is being provided.
3. Some ways to improve the participant experience, but not limited too are:
 1. Coffee/refreshments/snacks, morning, noon for staff/judges throughout the event (ex: grab and go snacks, noontime snacks).
 2. High visibility apparel shirts (OSHA 1910.145 App A) for the volunteer/staff (ex: NASA logo on the front pocket area, Lunabotics Logo on the back with a list of sponsors who provided the shirts).
 3. Decals, patches, pins, key chains (Lunabotics) to distribute to the participants
 4. Safety goggles (est. qty. 200) that meet the American National Standards.
4. Additional information on the event dates
 1. May 12 -18, 2026 - personnel will need access to the Central Conference Room (RoboPit, PPE DONN), the Arena (9010, 9020, 9030), Mission Control Center (7010), to prep for the competition week. The hours and days are not set but they need to be able to call into the AMF and have the CSE open for access

2. May 18, 2026 - Rehearsal Day - personnel will need access to the CSE from 0630 – 1900.
 3. May 19, 2026 - Tuesday - Day 1. Based on 2025, plan on 11 teams and a minimum of 200 students and faculty checking-in on-site. An additional 200 students and faculty members may attend this event and will be checking in during normal KSCVC complex hours.
 4. May 20, 2026 - Wednesday - Day 2. Seminars, run robots, award ceremony at lunchtime in the RoboPits.
 5. May 21, 2026 - Thursday - Day 3. Seminars, run robots, award ceremony at lunchtime and at the end of the day in the RoboPits.
5. The AMF cost quote shall provide the following:
1. Reserve and label two (2) parking slots at the front of the building. One for the KSC Center Director, one for a Lunabotics VIP
 2. KSC Medical and Environmental Services is responsible for collecting Industrial Waste generated by the students. Waste will be placed in marked containers and collected by KSC Medical and Environmental Services remediation. P.O.C. is Al Gibson (NASA). 321.795.5224.
 3. Restrooms – Provide the support required to maintain the restrooms clean and stocked with supplies.
 4. Room 1005 – Check-in / staff and volunteers.
 5. Room 1000 – Judges Prep Room.
 6. Room 7010 – Mission Control Room. Provide a curtain or divider to separate the students from the rest of the room. Place the divider on the second row behind the students and have an angle that shields them from the opening / closing doors to minimize distractions.
 7. Room 7030 – Seats 70. Set up lecture style for speakers and presenters. Provide links to send to the public and stream live on You Tube and record for future viewing opportunities.
 8. Room 9010 – Artemis Arena.
 9. Room 9020 – Arena Operations Room.
 10. The Arena Chief will make the final determination as to who, how many and what will or will not be allowed onto the Artemis Arena Rooms during the event week.
 11. Remove all chairs (stacks) and place the chairs in Room 9030 and cover with a plastic type of bag to keep the chairs clean.
 12. Provide four tables, 2 chairs each.
 13. For the HEPA-Vac Shop, provide a 10' x 10' temporary facility located on the exit side of the Artemis Arena.

14. Provide a plastic or equal floor covering for the exit area of the arena and the HEPA-Vac Shop. Place over the plastic floor covering a “sticky mats” (used in clean rooms) to help contain particulates from the arena, replace at the end of each day.
15. DOFFING Personal Protective Equipment (PPE)- Place two (2) large, lined, trash bins / cans to contain used, discarded PPE, remove and replace liner when the container is 3/4 full.
16. Outside the backdoor (westside), provide one table, two chairs, and a water hose with a hands activated (pistol grip) nozzle.
17. After the event vacuum and mitigate dust in the facility. Remove dust from the front outside wall of the Artemis Arena.
18. Room 9020 / 9030 – Close the wall to separate Room 9020 from Room 9030.
19. Room 9030 – This room will be converted to support KSC’s Prototype Development Laboratory’s “Bot Shop”. Provide three 6’ banquet tables, with 4 folding chairs per table, plus 6 chairs for staff. Supply twelve, 120-volt AC, single phase outlets. Each 120-volt AC outlet shall be on its own 20 Amp or higher circuit.
20. The Central Conference Rooms - (Team RoboPits, Safety Inspection, Communications Inspection, PPE Donning, Sponsor / Partner / Recruiter Area etc.).
21. The double doors for entry and exit will be located in the southeast side of the facility, across from the AMF CSE Lobby. The doors located in the northwest side of the facility, across from Room 9010 – this door is for robot entry and exit only.
22. All other doors in the Conference Room are exit only.
23. Place the broadcast facilities into the RoboPits area.
24. Place the stage for the opening and closing ceremony to the South East side of the room and broadcast across all screens.
25. Place sponsors as able in the Central Conference Center / RoboPits.
26. Provide pipe and drapes (royal blue or black in color, shall be one color throughout) for each pit / pit area.
27. Provide (11) team pits, each will measure 10’x10’, be equipped with one 6’x3’ table, two chairs and two (2) electric outlets.
28. Provide (4) pits, each will measure 16’x10’, be equipped with two 6’x3’ table, two chairs and two (2) electric outlets. The pits are for the Robot Safety Inspection and weight scale and the Robot Communications Inspection.
29. Provide a Personal Protective Equipment (PPE) Donning Area - located towards the northwest side of the facility. Be equipped with two 6’x3’ tables, four (4) chairs at each table. PPE gear will be placed along the wall behind the PPE donning area.

30. Provide a(n) Pit Boss Station - provide a single 20' x 10' bay, similarly draped, and with two (2) 6' x 3' banquet tables and three folding chairs for each table. Provide a computer with local displays and the capability to share the computer screens from the Artemis Arena, Mission Control Room and the RoboPits (including audio and video) to the room displays throughout the RoboPits.
31. Provide staff to coordinate A/V feeds.
32. North end of the RoboPits will be for large, partner displays.

4. Advisory

BLACK POINT-1 (LUNAR REGOLITH SIMULANT) ADVISORY

If you are allergic to talcum powder or similar substances this is a good indicator that you may be allergic to the Black Point-1 (BP-1) Lunar regolith simulant. The robots will be operating in the Artemis Arena [filled with Black Point-1 (BP-1) Lunar regolith simulant] and every effort will be made to HEPA-Vac the robots after each run. However, there will be trace amounts of BP-1 remaining on the robots after they have been HEPA-Vac, these trace amounts may make their way to the RoboPits and the rest of the AMF CSE facility.

RESPIRABLE CRYSTALLINE SILICA ADVISORY

“May cause cancer. Causes damage to lungs. Wear respiratory protection in this area. Authorized only” (posted on the Artemis Arena entrance points in Room 9010)

End of SOW

AMF, Center for Space Education Bldg., M6-306

Room Assignments

1000 - Judge's Room

1000 - Autonomy Seminars

1001 - Supplies & Staging

1005 - Staff, Volunteer Check-In, Lunabotics Operations

2000 - The RoboPits

7010 - Mission Control Center

7030 - Seminars & Presentations

9010 - Artemis Construction Arena

9020 - Arena Operations

9030 - KSC Prototype Development Lab Bot Shop

The Center for Space Education
Building M6-306
Kennedy Space Center
