

TASK ORDER 001 PERFORMANCE WORK STATEMENT

RDT&E ENGINEERING AND TECHNICAL SUPPORT (RETS)

**OFFICE OF THE UNDERSECRETARY OF WAR FOR RESEARCH AND ENGINEERING
(OUSW(R&E))
DEPUTY CHIEF TECHNOLOGY OFFICER (CTO) FOR MISSION CAPABILITIES (MC) (DCTO(MC))**

PROTOTYPING AND EXPERIMENTS (P&E) TECHNICAL AND ENGINEERING SUPPORT

April 03, 2026

PART 1: GENERAL INFORMATION

1 INTRODUCTION

This is a non-personal services contract to provide Prototyping and Experiments (P&E) Technical and Engineering support to the Office of the Under Secretary of War for Research and Engineering (OUSW(R&E)) Assistant Secretary of War for Mission Capabilities (ASW(MC)). This support is defined in FAR 37.1 Advisory and Assistance Services. The Government shall not exercise any supervision or control over the contract service providers performing the services herein. Such contractor service providers shall be accountable solely to the Contractor who, in turn, is responsible to the Government.

1.1 BACKGROUND

The Assistant Secretary of War for Mission Capabilities (ASW(MC)) recognizes, identifies, explores, and ensures the development, integration, and funding of new technology and capabilities to maintain U.S. technological superiority. It takes a unified, missions-level view across the entire Department of War (DoW) enterprise to analyze joint missions and identify cross-cutting technology gaps critical to military readiness. It maintains a focus on the innovative application of technology and works with a robust network of transition partners within and external to the DoW to mitigate gaps through accelerated prototyping, demonstration, and fielding, with the goal of operational sustainment.

OUSW(R&E)/ASW(MC) Prototype and Experiments (P&E) mission is to identify, develop, and demonstrate forward looking concepts encompassing multi-domain technologies to satisfy Multi-Service and Combatant Commands (CCMDs) priorities for the DoW. The focus areas include, but are not limited to, seeking to explore opportunities using rigorous prototyping and experimentation, engaging the Interagency, International, and non-governmental partners to expand the DoW's access to innovation spawning from Government, academia and industry, all essential for warfighting success, and providing engineering expertise to support OUSW(R&E) modernization priorities. The contractor shall provide technical and engineering support for OUSW(R&E) through P&E.

P&E will address Joint Operational Problems (JOPs) by means of prototype development that accelerates innovation and modernization efforts to compete with a peer/near-peer adversary through the development of combined capabilities that support the Joint Warfighting Concepts (JWC). Future capabilities areas and enablers require development and experimentation efforts push innovative technologies across the "valley of death," providing fieldable end-to-end mission capabilities for Services and joint application more quickly than traditional acquisition.

Prototyping and Experimentation facilitates rapid modernization of the force by supporting and encouraging multicomponent assessments and experimentation through a campaign of learning and collecting a body of evidence. Services, Agencies, and other participating organizations identify "best of breed" capabilities developed among the DoW prototyping programs and execute approved projects through large-scale experiments to refine and/or validate the JWC. P&E ensures that capabilities and prioritized JOPs resulting experimentation efforts are threat-informed, aligned to the JWC, and executed using mission integration management best practices. All work is performed at fully informed classification levels.

1.2 DESCRIPTION OF SERVICES

The contractor shall provide all properly cleared personnel, equipment, supplies, facilities, transportation, tools, materials, supervision, and other items and non-personal services necessary to perform P&E Technical and Engineering Support as defined in this Performance Work Statement (PWS) except for those items specified as government furnished property and services. The Contractor shall perform to the standards in this contract.

1.3 OBJECTIVES

The goal and focus of P&E are facilitating multi-component / multiclassification level Joint experimentation designed to accelerate innovation and modernization efforts to compete with peer and near-peer adversaries. Efforts and experiments are designed to validate and accelerate required capabilities enabling the JWC; facilitate rapid modernization of the force; inform budget decisions that effect changes throughout the Department; and foster collaboration among Government laboratories, academia, commercial research, and innovation institutions. P&E capabilities will execute threat informed system-of-systems experiments to fully address Joint capability gaps and serve as an integrating effort for DoW and Service prototyping capabilities.

1.4 SCOPE

The Contractor shall provide highly technical support to the OUSW(R&E) mission to ensure U.S. military technological superiority by synchronizing science and technology efforts, rapidly developing and fielding advanced warfighting capabilities through innovation and mission engineering in support of U.S. security and national priorities. The Contractor shall provide the following support services:

- Mission Engineering, Systems Engineering, Software Engineering, and Developmental Test and Evaluation
- Prototyping, Experimentation, Demonstration, and Scaling
- Modeling and Simulation
- Strategic Operational Analysis and Technology Assessment
- S&T Research and Assessment
- Data Management & Analysis
- Technology Protection
- Ad Hoc Surge Support

This Task Order (TO) provides professional technical and engineering services, including expertise for all Congressional reporting, that enables OUSW(R&E) P&E to accomplish its mission. The P&E mission is to identify, develop, and demonstrate forward looking concepts and Joint Operational Problems (JOPs) encompassing Offensive / Defensive Cyber, Command, Control, Communications, Computing, Cyber (C5), Intelligence, Surveillance, Reconnaissance, and Targeting (C5ISR) and Counter C5ISR; Artificial Intelligence (AI) / Machine Learning (ML), and multi-domain collaborative autonomy to satisfy Multi-Service and Combatant Command (CCMD) priorities for the DoW.

The focus areas include, but are not limited to, seeking to explore opportunities using rigorous prototyping and experimentation, engaging the Interagency, International, and non-governmental partners to expand the DoW's access to innovation spawning from Government, academia and industry, all essential for warfighting success, and providing engineering expertise to support OUSW(R&E) modernization priorities. The contractor shall provide technical and engineering support for OUSW(R&E) through P&E. This Performance Work Statement (PWS) supports the requirements to complement and support OUSW(R&E)'s mission.

1.5 PERIOD OF PERFORMANCE

The period of performance shall be for one (1) Base Period of 12-months and four (4) 12-month option periods.

1.6 CONTRACT TYPE

The Government will award a hybrid contract that include Labor Hours (LH) CLINs for labor support and Time and Materials (T&M) CLINs for Travel and Other Direct Costs (ODCs).

1.7 PLACE OF PERFORMANCE

The work to be performed will be performed at both the Contractor's facility and Government facilities, including: the Pentagon, Washington D.C., other locations within the National Capital Region (NCR) (as defined in 10 USC § 2674), other and Continental United States (CONUS) and international (i.e., outside the CONUS) locations. The contractor shall supply the contractor facility to accomplish the task independent of Government facilities. Reference Section 1.13 for details on security requirements. See Section PWS Section 3.2 for additional details on facility clearance requirements.

1.8 TELEWORK

Telework privileges are subject to advance scheduling based on need and required deliverables, with written approval from the COR. Contractor employees covered under this TO are authorized to Telework upon receipt of COR approval. The Contractor must submit a telework plan identifying the need for telework and the deliverables to be accomplished (e.g. plan of the day), along with a formal agreement, or another form of agreement as requested by the COR. Contractor employees must comply with criteria and guidelines established by the DoW Chief Information Office and its respective Components for using both GFP and non-GFP and for access to DoW information systems and networks to perform telework. Telework arrangements may be terminated at the Government's discretion.

1.9 HOURS OF OPERATION

The contractor is responsible for conducting business during regular Government core hours 0800 -1600 Monday through Friday except Federal holidays or when the Government facility is closed due to local or national emergencies, administrative closings, or similar Government directed facility closings. Ref Section 1.10.3 of the IDIQ PWS. The contractor must always maintain an adequate workforce for the uninterrupted performance of all tasks defined within this PWS when the Government facility is not closed for the above reasons. When hiring personnel, the contractor shall consider its impact to the stability and continuity of the workforce.

1.10 RECOGNIZED HOLIDAYS

The contractor may be required or authorized to work when their assigned facility is on holiday or closed. Government facilities are closed and unavailable to Contractor personnel. Government personnel observe the following holidays, in accordance with 5 U.S.C. § 6103:

New Year's Day	January 1
Birthday of Martin Luther King	Third Monday in January
Inauguration Day	Limited Applicability. See 5 U.S.C. §6103(c)
Washington's Birthday	Third Monday in February
Memorial Day	Final Monday in May
Juneteenth	June 19
Independence Day	July 4
Labor Day	First Monday in September
Columbus Day	Second Monday in October
Veterans Day	November 11
Thanksgiving Day	Fourth Thursday in November
Christmas Day	December 25

*If the date falls on a Saturday, the Government holiday is the preceding Friday. If the date falls on a Sunday, the Government holiday is the following Monday.

In addition to the days designated as holidays, the Government observes the following days:

- Any other day designated by Federal Statute
- Any other day designated by Executive Order
- Any other day designated by the President's Proclamation

1.11 QUALITY CONTROL/ASSURANCE

1.11.1 Quality Assurance Surveillance Plan (QASP)

The Government will use a quality assurance surveillance process to monitor the contractor's performance under this TO. The use of a LH and T&M contract type will be utilized and will leverage the Quality Control (QC), QASP, and COR surveillance. All order performance, including those not evaluated under the QASP (such as general requirements, Integrated Schedule, Integrated Status Report and the Monthly Reports) will be considered in the requisite annual evaluation of this contractor's performance.

1.12.2 Quality Control (QC)

The contractor shall institute a complete QC Program to ensure that the requirements of this TO are fulfilled as specified. At a minimum, the contractor shall include the following elements in the program:

- A comprehensive inspection system of all scheduled and unscheduled services required in this document.
- Name and contact information of designated QC Inspector and backup performing inspections.
- A proactive methodology to identify and correct problems before the Government identifies these problems. Contractor shall notify the Government of any problems.
- An organized, current file of all contractor conducted inspections, corrective actions taken, and follow-up inspections.
- How projects will be managed to minimize layers of management and oversight, while still providing for accountability.
- How orders will be managed to provide clear communications between the contractor, Government program office, and Ordering Contracting Office.

After acceptance of the quality control plan, the Contractor shall receive the Contracting Officer's acceptance in writing of any proposed change to its quality control program.

1.12 PERSONNEL MATTERS

The contractor shall provide highly qualified, team oriented, cost conscious, innovative professionals dedicated to the development and implementation of OUSW (R&E) Programs and services. The contractor shall function as a coordinated support team in grasping complex concepts and technologies, applying critical and innovative thinking, communicating effectively, and working seamlessly across the breadth of functional areas as identified in the IDIQ PWS. All contractor personnel proposed shall meet the qualifications set forth as identified for this task order PWS. The contractor shall provide personnel for both on-site support and off-site support, as needed, during normal operations and during surges, special situations, and unforeseen events and requirements. The contractor shall be able to provide the entire PWS portfolio of services across the task order. The contractor shall have the capability and resources to provide for the surge support as identified by this PWS, as defined by the mutually agreed to schedule in the task order.

1.12.1 Key Personnel

Before replacing any Contractor employee designated as key personnel, the Contractor shall notify the COR and KO in writing at least 30 calendar days in advance. The Contractor's request shall include a written justification along with the resume of the proposed key personnel substitution. All proposed personnel substitutions shall possess qualifications that are equal to or exceed the minimum requirements of the PWS. The Contractor shall not unilaterally change its key personnel without written approval from the KO.

1.12.2 The contractor is expected to attract, hire and retain a quality work force, with minimal turnover in contractor personnel. The Task Order Program Manager (TO PM) shall serve as the single point of contact for the COR with overall responsibility for this task order to manage all programmatic matters and is responsible for managing the day-to-day operation. The TO PM duties include but are not limited to, technical progress, problems, program performance, schedule, cost, resources, other program-related matters, ensures the contractor team is comprised of highly skilled Subject Matter Experts (SMEs) to fulfill tasks and complete deliverables during the performance period, assures team's performance and support is of high quality and providing on-time delivery of products to the Government and

recognizes areas for internal improvement and develops plans for implementing the improvements. The TO PM shall possess a Final TOP SECRET (TS)/Sensitive Compartmental Information (SCI) security clearance.

1.12.3 The following personnel are considered key personnel by the Government

<u>PWS Task Section</u>	<u>Labor Category</u>	<u>Minimum Education & Experience</u>
5.1, Subtask 5.1.1 - 5.1.7	Task Order Program Manager (Government Site)	Security Requirements: Final TS/SCI (Special Access Program (SAP) eligible) Skill/Experience: Ten (10) years' experience managing, planning, developing, and executing major research, engineering, and development efforts for defense organizations. <u>Executive Program Leadership:</u> Ten (10) years' experience as a lead or deputy Program Manager for major technology programs (or a portfolio of programs) exceeding \$100M in value. Demonstrated expertise in managing the entire lifecycle of technology design, manufacturing, integration and testing. Proven leadership in managing portfolios of diverse technology development programs. <u>Special Access & Classified Program Expertise:</u> Five (5) years' experience leading and operating within highly classified environments, including SAP and SCI. <u>Defense Acquisition & Organizational Knowledge:</u> Five (5) years' experience with the DoW's Defense Acquisition System DoD 5000 series. Demonstrated knowledge of DoW organizational structure and experience collaborating with R&E program managers. <u>Leadership & Communication:</u> Ten (10) years' demonstrated experience related to written and oral communication skills, essential for leading cross-functional teams and briefing senior stakeholders. Education: Bachelor's Degree from an accredited college or university in one of the following areas: • System Engineering • Aerospace Engineering • Electrical Engineering • Physical Sciences • Software Engineering • Cyber Engineering • AI /ML Engineering

		Preferred Skills and Experience: <u>Contract and Program Management:</u> Ten (10) years' experience managing support services contracts of comparable size, scope, and complexity to this task order. <u>Stakeholder Engagement & Problem Resolution:</u> Ten (10) years' experience establishing and maintaining strong, collaborative working relationships with stakeholders across the DoW. <u>Technical Domain Expertise:</u> Five (5) years' experience and foundational knowledge in the field of Electromagnetics and Radio Frequencies (EM/RF).
5.1, Subtask 5.1.1, 5.1.2, 5.1.3, 5.1.6, 5.1.7	SME II Technology Capabilities (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/ Experience: <u>Leadership and Security:</u> Ten (10) years' experience as a Chief System Engineer (CSE), or a Deputy CSE for a major technology program (or portfolio of programs) valued at over \$100M to include experience providing leadership and oversight of complex technology design, manufacturing, integration, and/or test programs. Eight (8) years' experience in a leadership capacity on classified programs at the SCI level or higher. <u>Alternate Positioning, Navigation and Timing (APNT) Operational and Technical Experience:</u> Eight (8) years' experience in military tactics and technical methods focused on control and protection of Positioning, Navigation and Timing (PNT) data in contested environments, to include role of C5ISR to support military operations. Five (5) years' experience of overseeing technical requirements and assessments for new and emerging capabilities. <u>Development Lifecycle & Process Management:</u> Five (5) years' experience executing activities in support of the DoD 5000 series acquisition lifecycle process. Five (5) years' experience using Agile Development processes. Five (5) years' experience establishing and managing a formal risk management process for a technology development program. Education: Master's degree from an accredited college or university in engineering, scientific, or technical discipline that is related to PNT and/or C5ISR. Preferred Skills and Experience: Military or DoW experience.

		C5ISRT and C-C5ISRT: Eight (8) years' experience with systems that integrate and analyze data from multiple sources and countering these systems.
5.1, Subtask 5.1.1, 5.1.2, 5.1.3,5.1.4	Senior Financial Manager (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: <u>SAP & Financial Systems Expertise:</u> Fifteen (15) years of SAP project management, project liaison, and statistical analysis experience. Eight (8) years' experience on Air Force Special Access Program CORE (AF SAP CORE), Capability Viewpoint 2 (CV2 system) & Specialized Accounting and Finances Enterprise System (SAFES) systems. <u>Major Program Financial Leadership:</u> Ten (10) years' experience managing stakeholder communications financial oversight for large-scale technology programs exceeding \$100M in value, covering design, manufacturing, integration, and testing. Five (5) years' experience applying policies, procedures, and standards from Secretary of the Air Force/Financial Management, Investment and Budget Branch (SAF/FMBIB) or leading a portfolio of technology development programs. Education: Bachelor's Degree from an accredited college or university in any field or study. Preferred Skills and Experience: Military or DoW experience. Master's degree from an accredited college or university in any field or study.
5.1, Subtask 5.1.1, 5.1.2, 5.1.3,5.1.6, 5.1.7	SME III Technology Capabilities (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: <u>Core Experience & Project Management:</u> Fifteen (15) years of technical expertise related to cyber engineering and cyberspace test and evaluation with 10 years' experience in project management. <u>Technical & Operational Focus:</u> Ten (10) years' experience supporting the analysis, assessment, demonstration, testing, and/or experimentation of cyber capabilities. Demonstrated participation in the research, development, integration, and testing of innovative technologies for both offensive and defensive cyber. <u>System Evaluation & Validation:</u> Ten (10) years' experience evaluating and validating sensor system performance, effectiveness, and operational feasibility.

		Demonstrated experience in recommending assessments to determine system performance to risks. <u>Compliance & Certification:</u> Must meet certification requirements per applicable DoD Directives and DoD Instructions. Must have relevant industry credentials such as: • Certified Information Systems Security Professional (CISSP) • Certified Information Security Manager (CISM) • Certified Information Systems Auditor (CISA) • CompTIA Advanced Security Practitioner (CASP+) • Offensive Security Certified Professional (OSCP) • Global Information Assurance Certifications (GIAC) • Certified Cloud Security Professional (CCSP) <u>Education:</u> Bachelor's degree from an accredited college or university in computer science, Information Technology, cybersecurity, or related science or engineering field. <u>Preferred Skills and Experience:</u> Military or DoW experience.
5.1, Subtask 5.1.1, 5.1.2, 5.1.3, 5.1.6, 5.1.7	Senior Analyst (Government Site)	<u>Security Requirements:</u> TS/SCI (SAP eligible) <u>Skills/Experience:</u> <u>Core SAP Project Management:</u> Fifteen (15) years' experience managing SAP projects and five (5) years' experience in the analysis and demonstration of technical capabilities. Demonstrated experience managing technology applications related to SAP projects. <u>Technical Focus:</u> Ten (10) years' experience executing the following: analysis, assessment, demonstration, testing, and/or experimentation of technical capabilities. <u>Technology & Security Integration:</u> Ten (10) years' experience supporting the analysis, assessment, demonstration, testing, and/or experimentation of SAP capabilities and technologies. Eight (8) years' experience researching and integrating technologies that support the SAP security processes. <u>Education:</u> Bachelor's degree from an accredited college or university in engineering or physical sciences. Master of Business Administration (MBA) degree or master's degree in a related field.

		Preferred Skills and Experience: Military or DoW experience.
--	--	--

1.12.4 Non-Key Personnel: Labor category minimum qualifications are required to perform based on the Government's needs outlined in PWS Part 5. Please note: the Government may request resumes to be submitted to ensure the proposed personnel meets the minimum qualifications listed below:

<u>PWS Task Section</u>	<u>Labor Category</u>	<u>Minimum Education & Experience</u>
5.1, Subtask 5.1.8	Senior Analyst (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/ Experience: <u>Advanced Model Development:</u> Ten (10) years' experience designing, constructing, and implementing sophisticated ML and deep learning models to solve complex analytical problems. Eight (8) years' expertise in a wide range of algorithms, including supervised, unsupervised, and reinforcement learning. <u>System Architecture & Optimization:</u> Ten (10) years' experience leading the continuous improvement, re-architecting, and updating of existing AI/ML system to create efficient, scalable, and self-learning applications. Demonstrated experience in model performance tuning, feature engineering, and deploying models into production environments (MLOps). <u>ML Operations (MLOps) & Scalability:</u> Ten (10) years' experience designing and implementing robust MLOps pipelines for automated training, validation, deployment, and monitoring of models at scale. Demonstrated experience with cloud-based AI/ML platforms and containerization technologies. <u>Advanced Data & Statistical Analysis:</u> Ten (10) years' experience in statistical analysis, experimental design, and data storytelling to extract actionable insights from large, complex datasets. Eight (8) years' experience in data governance, data quality, and ensuring the ethical use of data and algorithms. Education: Bachelor's degree from an accredited college or university in computer science, physics or engineering. Preferred Skills and Experience: Military or DoW experience.

		Eight years' (8) experience communicating complex technical concepts to non-technical stakeholders, to drive adoption and demonstrate value.
5.1, Subtask 5.1.8	SME I Force Operations (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: Eight (8) years' experience as a supervisor or team or project lead, and a two (2) years' experience working in the DoW. <u>Strategic Planning & Analysis:</u> Eight (8) years' experience developing, implementing, and managing strategic planning that supports leadership priorities. Eight (8) years' experience conducting research, wargaming, and analysis to provide pre-decisional advice and policy recommendations. Eight (8) years' experience identifying, prioritizing, and leading high-interest projects across cross-functional teams. <u>Executive Communication & Coordination:</u> Eight (8) years' experience serving as a key advisor to senior leadership and decision-makers. Eight (8) years' of demonstrated written and oral communication skills. Education: Bachelor's degree from an accredited college or university with eight (8) or more years of experience or a master's degree from an accredited college or university with six (6) or more years of experience. Command and General Staff College (or equivalent) education may be substituted for degree requirements. Preferred Skills and Experience: Multi-disciplinary intelligence experience (broad understanding of the entire intelligence ecosystem) and counterintelligence experience desired. Senior Service School in residence a plus.
5.1, Subtask 5.1.8	Junior Engineer (Contractor Site)	Security Requirements: Top Secret Skills/Experience: Five (5) years' experience in modeling and simulation (M&S) visualization. <u>Simulation & Visualization:</u> Five (5) years' experience in the following areas: creating models for simulation and visualization; managing and organizing content using SharePoint; and implementation of front-end web technologies such as HyperText Markup Language (HTML), Cascading Styles Sheets (CSS) and Extensible Markup Language (XML).

		Education: Bachelor's degree from an accredited college or university in web design, computer science, mathematics, or engineering. Preferred Skills and Experience: Demonstrated experience with WordPress and Content Management Systems (CMS); Demonstrated expertise with common MS Office software, e.g., PowerPoint, Word, Excel, etc.
5.1, Subtask 5.1.8	Senior Engineer (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: <u>Large-Scale Program Leadership:</u> Fifteen (15) years' experience in Program Management, with demonstrated experience within the last 5 years serving as the Program Manager for a technology program valued at \$50M or greater, encompassing design, manufacturing, integration, and testing. May substitute experience leading a significant portfolio of concurrent technology development programs. <u>Security Clearance & Environment:</u> Ten (10) years' experience leading classified programs at the required SCI level or higher. <u>Acquisition Knowledge:</u> Functional knowledge of the DoW Defense Acquisition System, including familiarity with the DoD 5000 series regulations and milestones. Education: Master's Degree from an accredited college or university in any discipline or field. Preferred Skills and Experience: Military or DoW experience. Twenty (20) years' experience as a program manager providing support to contracts of a similar size, scope and complexity to this task order. Additional technical background in one or more of the technical areas outlined in Section 5.5.1.
5.1, Subtask 5.1.8	SME II Technology Capabilities (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: <u>SAP experience:</u> Fifteen (15) years of direct, hands-on technical experience working within and providing technical support to SAP projects. <u>Program Lifecycle Expertise:</u> Ten (10) years' experience providing SME across the full lifecycle of a technology program, including design, manufacturing, integration, and test phases.

		<u>Security Domain Knowledge:</u> Ten (10) years' experience working within classified programs at the SCI level or higher, with an applied understanding of SAP security policies, procedures, and standards. <u>Acquisition Acumen:</u> Ten (10) years' experience with the DoW Acquisition System (DoD 5000 Series) and its specific application to classified and SAP-level procurements. <u>Portfolio Insight:</u> Ten (10) years' experience providing strategic guidance across a portfolio of complex technology development programs. Education: Master's degree from an accredited college or university in business administration, engineering, scientific or technical discipline. Preferred Skills and Experience: Military or DoW experience. Additional technical background in one or more of the technical areas outlined in PWS Section 5.1.1.6.
5.1, Subtask 5.1.8	Mid-level Engineer (Contractor Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: Ten (10) years of engineering experience. <u>Broad Technical Acumen:</u> Ten (10) years' experience working across a wide range of emerging technology domains such as: AI/ML, Quantum Computing, Biotechnology, Advanced Materials, Autonomous Systems (UAVs/USVs), Hypersonics, and Cyber. <u>Technology Scouting & Assessment:</u> Eight (8) years' experience identifying and evaluating nascent technologies from academia, startups, and international sources. <u>Red Teaming & Wargaming Experience:</u> Eight (8) years' experience planning and executing red team events, tabletop exercises (TTX), or wargames. <u>CONOPS Development:</u> Five (5) years' experience developing Concept of Operations (CONOPS). Demonstrated ability to articulate how a new technology would be integrated into military operations—how it would be deployed, used, maintained, and supported from a practical standpoint Education: Bachelor's Degree from an accredited college or university in engineering, mathematics, scientific, or technical discipline

		Preferred Skills and Experience: Military or DoW experience. Five (5) years' experience interfacing with Joint Staff, Military Services, and warfighters to coordinate engineering and analysis needs and analytic results. Demonstrated experience with military or intelligence community red teaming. Additional technical background in one or more of the technical areas outlined in PWS Section 5.1.1
5.1, Subtask, 5.1.8	Mid-level Engineer (Contractor Site)	Security Requirements: TS/SCI Skills/Experience: Ten (10) years of engineering experience, with five (5) years' experience working in operations analysis. <u>Operations Analysis:</u> Five (5) years' experience working in Operations Analysis, Systems Engineering, or a related analytical field within a defense context. <u>Simulation Framework Proficiency:</u> Five (5) years' hands-on experience with the Advanced Framework for Simulation, Integration and Modeling (AFSIM). <u>Visualization Software Expertise:</u> Five (5) years' experience developing with real-time 3D visualization platforms, such as the Unity game engine or an equivalent tool (e.g., Unreal Engine). <u>Analytical Acumen:</u> Five (5) years' designing and executing structured experiments, analyzing the resulting data, and drawing actionable conclusions. <u>Project Leadership:</u> Five (5) years' experience leading technical tasks, managing analytical study plans, and guiding the development of software tools. Education: Bachelor's degree from an accredited college or university in an engineering or physical science discipline (e.g., engineering, chemistry, physics, biology, computer science, Information Technology, data science, robotics, computer architecture and machine learning) Preferred Skills and Experience: <u>Programming Language:</u> Experience with C++. <u>Architecture Frameworks:</u> Experience with the Unified Architecture Framework (UAF), Department of Defense Architecture Framework (DoDAF), and Tactical Open Government Architecture Framework (TOGAF).

		<u>Modeling Languages:</u> Experience with the Unified Modeling Language (UML) and System Modeling Language (SysML). <u>Modeling & Engineering Tools:</u> Experience with MagicDraw, IBM Rational Rhapsody, Sparx Enterprise Architecture (EA), Cameo EA Suite, CORE, Cameo. Systems Modeler, and MapleMBSE. <u>Domain Experience:</u> Five (5) years' experience with DoW programs.
5.1, Subtask, 5.1.8	SME II Technology Capabilities (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: <u>Technical Experience:</u> Fifteen (15) years' technical experience in a field related to developmental/operational testing, systems engineering, or operations analysis. <u>Test & Evaluation (T&E) Expertise:</u> Ten (10) years' experience planning and conducting analytical studies and experimentation to validate system design, specifications, and performance. <u>Modeling & Simulation:</u> Ten (10) years' experience utilizing high-fidelity modeling environments to support verification, validation, and analysis of complex systems. <u>Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, Facilities, and Policy (DOTMLPF-P) Framework:</u> Functional and practical knowledge of the DOTMLPF-P integration framework and ten (10) years' experience developing analysis and recommendations within it. <u>Analytical Acumen:</u> Ten (10) years' applying quantitative and qualitative analytical methods to solve complex problems and inform high-stakes decisions. Education: An advanced degree (Master's or Doctor of Philosophy (PhD) degree) from an accredited college or university in engineering or physical science discipline (e.g., Engineering, Chemistry, Physics, Biology, Computer Science, Information Technology, Data Science, Robotics, Computer Architecture and Machine Learning, etc.) Preferred Skills and Experience: Military or DoW experience. Five (5) years' experience supporting SAP projects.
5.1, Subtask 5.1.8	Mid-level Analyst (Government Site)	Security Requirements: TS/SCI (SAP eligible)

		Skills/ Experience: Ten (10) years' experience performing classified operations effectiveness and acquisition systems analysis. <u>Professional Experience:</u> Ten (10) years of experience working in a technical capacity as an engineer, analyst, or a similar role. <u>Performance Metrics Expertise:</u> Five (5) years' experience supporting defense acquisition system's performance measures, including System Requirements Definition, Key Performance Parameters (KPPs), Measures of Performance (MOPs), and Measures of Effectiveness (MOEs). <u>System Capability Knowledge:</u> Five (5) years' experience defining and reporting against minimum threshold requirements versus objective (desired) system capabilities. <u>Technical Documentation:</u> Five (5) years' experience producing high-quality technical documentation for complex systems, with an ability to synthesize data into clear and impactful summaries. Education: Bachelor's degree from an accredited college or university in any discipline or field. Preferred Skills and Experience: Five (5) years' experience synthesizing large volumes of information into concise, well-formed written products. Demonstrated experience writing for an DoW audience.
5.1, Subtask 5.1.8	SME III Technology Capabilities (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: Fifteen (15) years' experience as a data scientist. <u>Programming & Databases:</u> Fifteen (15) years' experience with expert-level proficiency in data science programming languages such as Python and/or R/Strong experience with data querying languages (e.g., Structured Query Language (SQL)) and working with large-scale datasets. <u>Machine Learning & AI:</u> Fifteen (15) years' experience with extensive theoretical knowledge and practical experience in developing and deploying machine learning models. Demonstrated specific, hands-on experience with Large Language Models (LLMs) is required. <u>Statistical Analysis:</u> Fifteen (15) years' experience with a mastery of statistical methods, including hypothesis

		testing, regression, classification, and clustering techniques. <u>Data Visualization Tools</u>: Ten (10) years' experience using data visualization libraries and platforms (e.g., Matplotlib, Seaborn, Plotly, Tableau) to create impactful reports and dashboards. <u>Full Lifecycle Experience</u>: Ten (10) years' experience managing the entire data science project lifecycle: from problem definition and data collection to model deployment and communication of findings. Education: Master's degree from an accredited college or university in engineering or science discipline relevant to the field of data science. Preferred Skills and Experience: Military or OSW experience.
5.1, Subtask 5.1.8	SME III Technology Capabilities (Contractor Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: <u>Professional Experience</u>: Fifteen (15) years of hands-on technical engineering experience, with ten (10) years as an Autonomous Systems Engineer or in a closely related technical field. <u>Autonomous Systems Design</u>: Ten (10) years' experience in end-to-end design and construct of complex autonomous systems. <u>Command & Control (C2)</u>: Ten (10) years' experience and extensive technical knowledge of C2 principles and experience integrating them into unmanned platforms. <u>Unmanned & Counter-Unmanned Systems</u>: Ten (10) years' demonstrated expertise in both the development of unmanned systems (air, ground, or sea) and the domain of Counter-Uncrewed Systems (C-UXS). <u>First-Person View (FPV) Operations</u>: Ten (10) years of expertise in the principles and application of FPV for controlling and operating unmanned systems. <u>Modeling & Simulation</u>: Eight (8) years' experience with demonstrated proficiency in using modeling and simulation environments to advance and validate system designs and operational concepts. Education: Master's degree from an accredited college or university in engineering or science discipline relevant to the field of autonomous systems engineering. Preferred Skills and Experience: Military or OSW experience.

		Demonstrated in-depth understanding of systems command and control (C2) and experience analyzing and developing counter C2 systems.
5.1, Subtask 5.1.8	SME I Force Operations (Government Site)	Security Requirements: TS/SCI (SAP eligible) Skills/Experience: Eight (8) years of experience as a supervisor or team or project lead, and a minimum of two (2) years' experience working in the DoW. <u>Strategic Planning & Analysis:</u> Eight (8) years' experience developing, implementing, and managing strategic planning that supports leadership priorities. Eight (8) years' experience conducting research, wargaming, and analysis to provide pre-decisional advice and policy recommendations. Eight (8) years' experience identifying, prioritizing, and leading high-interest projects across cross-functional teams. <u>Executive Communication & Coordination:</u> Eight (8) years' experience serving as a key advisor to senior leadership and decision-makers. Eight (8) years' demonstrated experience in written and oral communication skills. <u>Technical Foundation & Domain Expertise:</u> Ten (10) years' experience in the core principles of designing and constructing autonomous systems. Ten (10) years' experience in at least two or more of the following areas: Command and Control (C2) for complex systems, Unmanned Systems (air, ground, or sea), Counter / Uncrewed Systems (C/UXS), and Operational employment concepts, including First-Person View (FPV) operations. Education: Bachelor's degree from an accredited college or university with eight (8) or more years of experience or a master's degree from an accredited college or university with six (6) or more years of experience. Command and General Staff College (or equivalent) education may be substituted for degree requirements. Preferred Skills and Experience: Military or OSW experience. Five (5) years' experience supporting SAP projects. <u>Analytical Modeling:</u> Demonstrated strong understanding of how modeling and simulation is used

		to advance designs, test concepts, and validate strategic applications.
--	--	---

1.12.5 Conduct: Contractor personnel shall always present a professional appearance consistent with the usual and customary workforce attire of the assigned Government on-site locations, and their conduct shall not discredit the United States Government. The Government, at its sole discretion, may request the contractor to remove any contractor employee from Government facilities for misconduct, failure to perform, security reasons, or other appropriate reasons that may jeopardize the success of the mission. The Contracting Officer may provide the contractor with a written explanation to support any request to remove an employee. Removal of contractor personnel does not relieve the contractor of the responsibility to continue providing the services required under this task order.

1.12.6 Identification of Contractor Employees: All contract personnel attending meetings, answering Government telephones, and working in other situations where their contractor status is not obvious to third parties are required to identify themselves as such to avoid creating an impression in the minds of members of the public that they are Government officials. They must also ensure that all documents or reports produced by Contractors are suitably marked as Contractor products or that Contractor participation is appropriately disclosed.

1.12.7. Special Qualifications: Key Personnel are desired to have military or OSW backgrounds. These personnel will be communicating verbally and in writing to Senior Pentagon staff and Congressional liaisons and must have communication skills commensurate with the task.

1.12.8 Non-disclosure Agreements (NDAs): **The** Contractor may be required to access Confidential, Proprietary and/or Sensitive Information held by the Government related to the tasks to be performed under this task order. In consideration of the Government granting the contractor access to this information, non-disclosure agreements (NDA) shall be required between the contractor and the Government. The terms and conditions are described in detail within the NDA Form document (Attachment 01). This form shall be signed by all contractor personnel working under this contract and submitted prior to the first day of performance and sent to the CO and COR. The Contractor shall ensure that all contractor personnel (including subcontractors) use said information only to meet the requirements of this task order. The Contractor (to include subcontractors) shall not disseminate proprietary information or place said information at risk of disclosure unless required and authorized by this task order. If Contractors are replaced during the performance of this TO, then new contractor employees shall sign the NDA Form upon beginning work.

1.12.9 Training: The contractor shall participate in organizational training as required. The contractor shall also complete OSW mandatory training to include but not limited to Information Assurance and Security training, Privacy Act training, and Combating Trafficking in Persons training. The Contractor shall submit certificates of completion for each affected Contractor employee and Subcontractor employee, to the COR or to the Contracting Officer. This training shall be completed and reported to the COR within 30 calendar days of contract award and annual refresher training for the remaining contract duration.

1.13 SECURITY

1.13.1 For the performance of this PWS, both the facility and personnel will require access to classified information up to the level of TOP Secret (TS), including Sensitive Compartmented Information (SCI) (Special Intelligence (SI)/Talent Keyhole (TK)/ Gamma (G) / HUMINT Control System (HCS)), KLAMATH Reporting (KLM-R), Special Access Program/Special Access Required (SAP/SAR), and Alternative Compensatory Control Measures (ACCM).

Contractor personnel performing work under this contract shall have a TS/SCI and shall maintain the level of security required for the life of the contract. The security requirements are in accordance with the attached DD254. The contractor shall comply with all security requirements contained in the DD Form 254, "Department of Defense Contract Security Classification Specification," of the task order, and the terms and conditions set forth in FAR clause 52.204-2, "Security Requirements," incorporated by reference. Individual task orders may specify that a comprehensive security plan is required. In addition, the contractor may be required to assist with the assessment, and/or acquisition, of facility clearances granted by DoW. The contractor should have the capability to transport classified information to and from their corporate offices and store classified materials up to TS level at their off-site office spaces. Security procedures will be in accordance with DoW policies.

1.13.2 Physical Security: The Contractor shall be responsible for safeguarding all Government equipment, information and property provided for Contractor use. This applies to work performed at both US Government and contractor work locations. At the close of each work period, Government facilities, equipment, and materials shall be secured.

1.13.3 Key Control: The Contractor shall establish and implement methods of making sure all keys/key cards issued to the Contractor by the Government are not lost or misplaced and are not used by unauthorized persons. NOTE: All references to keys include key cards. No keys issued to the Contractor by the Government shall be duplicated. The Contractor shall develop procedures covering key control that shall be included in the Quality Control Plan. Such procedures shall include turn-in of any issued keys by personnel who no longer require access to locked areas. The Contractor shall immediately report any occurrences of lost or duplicate keys/key cards to the Contracting Officer.

1.13.4 In the event keys, other than master keys, are lost or duplicated, the Contractor shall, upon direction of the Contracting Officer, re-key or replace the affected lock or locks; however, the Government, at its option, may replace the affected lock or locks or perform re-keying. When the replacement of locks or re-keying is performed by the Government, the total cost of re-keying or the replacement of the lock or locks shall be deducted from the monthly payment due the Contractor. In the event a master key is lost or duplicated, all locks and keys for that system shall be replaced by the Government and the total cost deducted from the monthly payment due the Contractor.

1.13.5 The Contractor shall prohibit the use of Government issued keys/key cards by any persons other than the Contractor's employees. The Contractor shall prohibit the opening of locked areas by Contractor employees to permit entrance of persons other than Contractor employees engaged in the performance of assigned work in those areas, or personnel authorized entrance by the Contracting Officer.

1.13.6 Lock Combinations: The Contractor shall establish and implement methods of ensuring that all lock combinations are not revealed to unauthorized persons. The Contractor shall ensure that lock combinations are changed when personnel having access to the combinations no longer have a need to know such combinations. These procedures shall be included in the Contractor's Quality Control Plan.

1.13.7 Facility Clearance.

The contractor shall always possess and maintain a TOP SECRET facility clearance from the Defense Counterintelligence and Security Agency during the performance of the task order, unless otherwise noted within the PWS. Reference the RETS IDIQ DD254 for details.

1.13.8 Security Clearances.

All contractor personnel (unless otherwise noted in the job description), to include part-time personnel, subcontractors and independent consultants, shall possess a current in scope Single Scope Background Investigation (SSBI) (preferably within 7 years, or alternatively being a current participant in the DoW Continuous Evaluation/Vetting Program) and a Final DoW TS showing in Defense Information System for Security (DISS) or other comparable systems (i.e., Scattered Castles). Contract personnel performing support functions such as, but not limited to accounts receivable, accounts payable, accounting, invoicing, administrative functions, etc. who do not handle classified information as a routine part of their job are not required to have security clearances.

The contractor will maintain a dedicated video teleconference capability up to TS with minimum of Secret level across contractor facilities under this TO. The contractor shall be capable of hosting conferences and meetings to support at minimum twenty personnel to include four breakout rooms to support pertinent working groups.

1.13.9 Physical Access Security.

Physical access to federally controlled facilities will be required and identity verification will be in compliance with FAR 52.204-9 "Personal Identity Verification of contractor Personnel." As required, the Government will provide facility access, required building identification, and required systems access in order for personnel to perform their duties, which is in accordance with existing Office of the Secretary of War (OSW) facility access security procedures. The contractor shall complete OSD mandatory Information Assurance and Security training and comply with all

Washington Headquarters Services (WHS) and OSD Operational Security guidelines and directives. Reference Section 6.7.2 for additional details.

1.13.10 Keys, Badge and Common Access Card (CACs) Control.

The contractor shall establish and implement methods of making sure all keys, badges and CACs issued to the contractor by the Government are not lost or misplaced and are not used by unauthorized persons. The contractor shall prohibit the use of Government issued keys/key cards by any persons other than the authorized contractor's employees. The contractor shall prohibit the opening of locked areas by contractor employees to permit entrance of persons other than authorized contractor employees engaged in the performance of assigned work in those areas, or personnel authorized entrance by the Contracting Officer.

NOTE: No keys issued to the contractor by the Government shall be duplicated. The contractor shall develop procedures covering key, badge and CAC control that shall be included in an established Quality Control Plan within the Quality Control Program. See Section 7.3 for details. Such procedures shall include turn-in of any issued keys, badges, and CACs by personnel who no longer require access. The contractor shall immediately report any occurrences of loss or other issues to the Contracting Officer.

1.14 CONTRACT ADMINISTRATION

1.14.1 Post Award Conference/Periodic Progress Meetings.

The contractor agrees to attend any post award conference/meeting convened by the contracting activity or contract administration office in accordance with Federal Acquisition Regulation Subpart 42.5. The CO, COR, and other Government personnel, as appropriate, may meet periodically with the contractor to review the contractor's performance. At these meetings, the CO or the COR will apprise the contractor of how the Government views the contractor's performance and the contractor will apprise the Government of problems, if any, being experienced. Appropriate action shall be taken to resolve outstanding issues. These meetings shall be at no additional cost to the Government.

1.14.2 Contractor Project Management Plan (CPMP).

The CPMP documents the contractor's approach, timeline, and tools to be used in execution of the contract. The CPMP should take the form of both a narrative and graphic format that displays the schedule, milestones, risks, and resource support. The CPMP shall also include how the contractor shall coordinate and execute planned, routine, and ad hoc data requests as identified within the PWS. The contractor shall develop and maintain an effective quality control program to ensure services are performed in accordance with this PWS. The contractor shall develop and implement procedures to identify, prevent, and ensure non-recurrence of defective services. The contractor's quality control program is how it assures itself that the work complies with the requirement of the TO. The initial baseline CPMP shall be concurred upon and finalized within 20 business days after contract award, and updated as needed thereafter, but no less than annually.

1.14.3 Phase in.

To minimize any decreases in productivity and to prevent possible negative impacts on additional services, the contractor shall have personnel on board, during the required phase in period. During the phase in period, the contractor shall become familiar with performance requirements to commence full performance of services on the contract start date. The contractor shall be allotted no more than thirty (30) calendar days to complete the phase in period. The COR shall define the phase in/out details at the post-award conference. This period shall be identified with its own Phase in Period LH CLIN.

1.14.4 Non-Personal Service Statement.

Contractor employees performing on task orders under this PWS will be controlled, directed, and always supervised by management personnel of the contractor. Contractor management will ensure that employees properly comply with the performance work standards outlined in this PWS, and within the individual task orders. Contractor employees will perform their duties independent of, and without the supervision of, any Government official. The tasks, duties, and responsibilities set forth in specific task orders may not be interpreted or implemented in any manner that results in any contractor employee creating or modifying Federal policy, obligating the appropriated funds of the U.S. Government, overseeing work of Federal employees, providing direct personal services to any Federal employee, or

otherwise violating the prohibitions set forth in FAR Part 7.5 and 37.1. The Government will perform the inspection and acceptance of the deliverables provided.

1.14.5 Subcontracting

The contractor is encouraged to subcontract with other contractors, or subject matter experts, or otherwise obtain consultant services for the efforts defined within the PWS or to provide the expert talent needed to perform identified requirements within the task order. When providing subcontractors and/or consultants, the contractor is fully responsible for their performance and cost reporting. The contractor shall provide the manpower required to manage all subcontracts and consultant efforts and to monitor subcontractor activities to the appropriate level of detail required to assure timely deliverables. A report on the performance of subcontractors shall be included as part of the required Monthly Progress Report deliverable.

1.14.5.1. If the contractor determines to subcontract portion of the work in this PWS, the contractor shall comply with FAR 52.219-14, Limitation of Subcontracting that's listed in the contract, and submit yearly report at the end of each period of performance, as identified in Technical Exhibit 2- Deliverables Schedule

1.15 TRAVEL

1.15.1 Contractor Travel Contractor may be required to travel during the performance of this contract to attend meetings, conferences, and training. The Contractor will be authorized travel expenses consistent with the substantive provisions of the Joint Travel Regulation (JTR) and the limitation of funds specified in this contract. All travel requires prior approval/authorization by the COR and KO.. The Contractor shall be reimbursed for actual allowable, allocable, and reasonable travel costs incurred during performance of this effort in accordance with the FAR 31.205-46 "Travel Costs." Requests for approval of costs more than maximum per diem rates in accordance with the procedures contained in FAR 31.205-46(a)(3) must be submitted to the COR for final approval prior to commencement of travel.

1.15.2 Trip Reports:

1.15.2.1 Trip Requests: Contractors shall project necessary travel requirements for COR review and approval. At a minimum, the below information shall be submitted for consideration:

- Traveler Name
- Location of Travel
- Dates of Travels
- Purpose/Requirement for Travel
- Government Sponsor Concurrence
- Cost Estimate identified by subject (i.e. meals, rental car, or airfare)

1.15.2.1.1 Trip reports for all travel shall be submitted to the COR within 10 business days of trip end dates. At a minimum, reports shall include:

- Traveler Name
- Location
- Dates of Travels
- Purpose/Requirement for Travel
- Information Received/Discussed
- Follow-up Actions Required
- Actual Costs and Receipts (Should match invoice submissions)

1.15.2 All local travel in support of this contract (i.e., any travel within a 45-mile driving distance of the NCR) is included in the price of this contract and is not reimbursable. All local travel costs shall be borne by the Contractor, nor will the Government reimburse Contractor personnel commuting costs (i.e., parking expenses, public transportation fares such as Metro, Virginia Rail Express, vanpool or bus, and/or highway tolls, etc.).

1.15.3 Synchronized Pre-deployment Operational Tracker (SPOT): NOT APPLICABLE.

1.16 OTHER DIRECT COSTS

All ODCs associated with this TO shall be approved in writing by the COR prior to incurring costs. The Contractor may be required to procure software licenses to perform the tasking of the PWS. The contractor may be required to incur the cost of incidental items, including the following: meeting and training supplies, CDs and books, copying and mailing. Before procuring any items, the contractor shall submit three quotes to the COR/KO to ensure we're procuring items that are fair and reasonable to the Government.

The contractor shall invoice MONTHLY with description to include, invoice performance period, short description of services completed, and any other information required by the COR after email submittal of Monthly Status Report to the CO and COR. Other ODC items, such as software or licenses, should be itemized to include Title, whether it's a License, Duration/Frequency of the item (yearly, monthly, one-time cost, etc.), Maintenance, Quantity, and any other pertinent information to include identifying the task the ODC supports.

1.17 DATA RIGHTS

Data Rights are as prescribed in the IDIQ contract FAR/DFARs clauses.

The Government owns all data rights to all work, drafts, products, deliverables, communications, and other output created under this Task Order.

1.18 CONFLICT OF INTEREST

1.18.1 Organizational Conflict of Interest/Personal Conflict of Interest: Contractor and Subcontractor personnel performing work under this contract may receive, have access to or participate in the development of proprietary or source selection information (e.g., cost or pricing information, budget information or analyses, specifications or work statements, etc.) or perform evaluation services which may create a current or subsequent Organizational Conflict of Interest (OCI) as defined in FAR Subpart 9.5 as well as personal conflicts of interest. Using the Contractor OCI/ COI Disclosure Form, the Contractor shall notify the Contracting Officer immediately whenever it becomes aware that such access or participation may result in any actual or potential conflict and shall promptly submit the conflict-of-interest disclosure form to the Contracting Officer to avoid or mitigate any such conflict.

1.18.2 The Contractor's mitigation plan will be reviewed and accepted/rejected solely at the discretion of the Government, and in the event the Government unilaterally determines that any such conflict cannot be satisfactorily avoided or mitigated, the Contracting Officer may affect other remedies as he or she deems necessary, including prohibiting the Contractor from participation in subsequent contracted requirements which may be affected by the conflict.

1.18.3 In addition, Contractors shall conduct internal reviews as necessary to identify financial interests and determine if any personal conflicts of interest exist or may arise. The Contractor shall ensure that the organization has analyzed each financial disclosure to determine whether actual or potential conflicts exist. Information should be gathered and analyzed for all governing body members (e.g., board of directors, trustees, etc.) and principals of the organization as defined by FAR 52.203-13 and for each manager and key personnel who would be or are involved with the performance of the contract.

1.18.4 All Contractor and Subcontractor employees supporting this contract shall sign the WHS AD non-disclosure agreements prior to the start of performance.

DRAFT

PART 2 DEFINITIONS & ACRONYMS

2. DEFINITIONS AND ACRONYMS:

2.1. DEFINITIONS:

2.1.1. **CONTRACTOR.** A supplier or vendor awarded a contract to provide specific supplies or service to the government. The term used in this contract refers to the prime.

2.1.2. **CONTRACTING OFFICER.** A person with authority to enter, administer, and or terminate contracts, and make related determinations and findings on behalf of the government. Note: The only individual who can legally bind the government.

2.1.3. **CONTRACTING OFFICER'S REPRESENTATIVE (COR).** An employee of the U.S. Government appointed by the Contracting Officer to assist in administering the contract. Such appointment shall be in writing and shall state the scope of authority and limitations. This individual has authority to provide technical direction to

the Contractor as long as that direction is within the scope of the contract, does not constitute a change, and has no funding implications. This individual does NOT have authority to change the terms and conditions of the contract.

2.1.4. DEFECTIVE SERVICE. A service output that does not meet the standard of performance associated with the Performance Work Statement.

2.1.5. DELIVERABLE. Anything that can be physically delivered but may include non-manufactured things such as meeting minutes or reports.

2.1.6. KEY PERSONNEL. Contractor personnel required to be used in the performance of the contract as indicated in the Key Personnel section listed in the PWS.

2.1.7. NATIONAL CAPITAL REGION. The term "National Capital Region" means cities and other units of Government within the boundaries of the District of Columbia; Montgomery and Prince George's Counties in the State of Maryland; Arlington, Fairfax, Loudoun, and Prince William Counties and the City of Alexandria in the Commonwealth of Virginia

2.1.8. PHYSICAL SECURITY. Actions that prevent the loss or damage of Government property.

2.1.9. QUALITY ASSURANCE. The Government procedures to verify that services being performed by the Contractor are performed according to acceptable standards.

2.1.10. QUALITY ASSURANCE Surveillance Plan (QASP). An organized written document specifying the surveillance methodology to be used for surveillance of Contractor performance.

2.1.11. QUALITY CONTROL. All necessary measures taken by the Contractor to assure that the quality of a product or service shall meet contract requirements.

2.1.12. SUBCONTRACTOR. One that enters a contract with a prime Contractor. The Government does not have privity of contract with the Subcontractor.

2.1.13. WORK WEEK. Monday through Friday, unless specified otherwise.

2.2. ACRONYMS:

AI	Artificial Intelligence
AF SAP CORE	Air Force Special Access Program CORE
APNT	Alternate Positioning, Navigation, and Timing

DRAFT

PART 3
GOVERNMENT FURNISHED PROPERTY, EQUIPMENT, AND SERVICES

3. GOVERNMENT FURNISHED ITEMS AND SERVICES:

The Government shall provide access to Government facilities, equipment, materials, and/or services, as required to complete work effort. At the request of the Government, or on completion of the TO, the contractor will immediately return any property provided by the Government.

3.1. Services: The Government will provide as required, IT support to maintain Government furnished IT equipment which may include laptops and smart phones.

3.2. Facilities: The Government will provide the necessary workspace for the contractor staff to provide the support outlined in the PWS to include desk space, telephones, computers, and other items necessary to maintain an office environment for on-site personnel. Government anticipates approximately 50% of personnel will be onsite and 50% will be off site. Facilities include the Pentagon, the Mark Center, the Suffolk Building and any other Government location as defined in the DD-254, Block 8.

3.3. Utilities: The Government will provide all utilities in the USG facility. All utilities will be available for the contractor's use in performance of tasks outlined in this PWS. The Contractor shall instruct employees in utilities conservation practices. The Contractor shall be responsible for operating under conditions that preclude the waste of utilities, which include turning off the water faucets or valves after using the required amount to accomplish cleaning vehicles and equipment.

3.4. Equipment: Government furnished equipment (GFE) provided in support of this TO that will be removed from the Government facilities is considered Government Furnished Property (GFP). GFP will be processed by and maintained by the COR in accordance with the GFP procedures. GFE may include laptops, cell phones, and ancillary devices required to perform work under this Task Order. See IDIQ contract Government Property clauses.

3.5. Materials The Government will provide materials as required and approved by the COR. Performance on the TO may also require the contractor to access and use material and information such as studies, reports, and key data considered proprietary to a government agency or contractor, which is of such a nature that its dissemination or use, other than in performance of this effort, would be adverse to the interests of the Government and/or others. If this is determined to be necessary, the contractor will be required to sign an OSW R&E non-disclosure agreement (NDA) for Program Material prior to commencement of performance.

3.6. Property: Government Furnished Property (GFP) will be processed by and maintained by the COR in accordance with the GFP procedures. GFE may include laptops, cell phones, and ancillary devices required to perform work under this Task Order. See IDIQ contract Government Property clauses.

3.7. Information The Government will provide information on a need-to-know basis. Government Furnished Information (GFI) may include, but is not limited to, product documents, descriptions, requirements, test plans, budgets, schedules, briefings, video presentations, and other forms of media. The contractor shall protect confidentiality and proprietary of all GFI provided.

PART 4
CONTRACTOR FURNISHED ITEMS AND SERVICES
4. CONTRACTOR FURNISHED ITEMS AND RESPONSIBILITIES:

4.1. General: The Contractor shall furnish all supplies, equipment, facilities, Software and/or Software Licenses if applicable and services required to perform work under this contract that are not listed under Section 3 of this PWS. Contractor will charge offsite rates for work performed at Contractor facilities.

4.2. Clearance: The Contractor shall possess and maintain a TOP SECRET facility clearance from the Washington Headquarters Services, as stated in the attached DD 254. The Contractor's employees, performing work in support of this contract shall have been granted a TOP SECRET/SCI security clearance from the Defense Industrial Security Clearance Office at time of award. The DD 254 will be completed within the National Industrial Security Program (NISP) Contracts Classification System (NCCS) at contract award and attached by modification, if timing dictates. The DD 254 will be housed within the NCCS through the life of the contract. The Contractor can register within NCCS at time of award to gain electronic access to the DD 254 to submit Subcontractor DD 254s.

DRAFT

PART 5 SPECIFIC TASKS

5.0 Specific Task Areas

The contractor shall provide P&E Technical and Engineering Support Services in the areas of Mission Engineering, Systems Engineering, Software Engineering; Developmental Test and Evaluation; Prototyping, Experimentation, and Demonstration, and Scaling; Modeling and Simulation; Strategic Operational Analysis and Technology Assessment; Science and Technology (S&T) Research and Assessments; Data Management and Analysis, and Ad Hoc Surge Support.

Services in TO 0001 may include the following technology areas: Offensive / Defensive Cyber, C5ISRT and Counter C5ISRT; AI / ML; and Multidomain Collaborative Autonomy. As an inherent part of OSW/R&E Security, Contractor will support Program Protection requirements as identified in the IDIQ PWS Section 5.8 Task 7: Technology Protection. The contractor shall be directly responsible for ensuring the accuracy, timeliness, and completion of all requirements under this PWS.

The contractor will provide P&E technical and engineering support for the overall management, development, engineering, and analysis, prototypes and experimentation, to deliver modernized capabilities that enable an all-domain joint force aligned with future JWCs.

5.1 Task 1: Prototyping and Experimentation (ref: IDIQ PWS 5.3 Prototyping, Experimentation, Demonstration, and Scaling): The contractor shall provide engineering and scientific expertise to rapidly develop and demonstrate mission base capabilities to fill persistent gaps within the National Defense Strategy (NDS). The functional task incorporates scientific and engineering assistance in administrative and financial management functions to facilitate the execution of the advance capabilities mission priorities.

5.1.1 Subtask 1.1 Technical Analysis and Assessment (ref: IDIQ PWS Sections 5.2 Mission Engineering, Systems Engineering, Software Engineering, and Developmental Test and Evaluation (DT&E), 5.3 Prototyping, Experimentation, Demonstration, and Scaling, 5.4 Modeling & Simulation, and 5.5 Strategic Operational Analysis and Technology Assessment)

5.1.1.1 The contractor shall provide scientific and engineering technical assessment of proposed prototypes and experimentations.

5.1.1.2 The contractor shall provide a quantitative/qualitative analysis of technologies from the technological industry base, services, and Government laboratories.

5.1.1.3 The contractor shall validate prototypes and experimentations utilizing proven scientific analytical methods and high-fidelity modeling to confirm key performance parameters design specifications of prototypes.

5.1.1.4 The contractor shall provide technical recommendation and reports on the rapid acquisition deployment of prototypes.

5.1.1.5 The contractor shall review prototypes and experimentation proposals with recommendations but deliver findings in the form of technical reports, briefings, and executive summaries.

5.1.1.6 The contractor shall provide the subject matter expertise with experience in the following technical areas:

- Artificial Intelligence (AI)/Machine Learning (ML): The Contractor will assess the performance of software which shall enable autonomous vehicle and control elements, perception, cognition, and action of system controls within an existing prototype. The Contractor shall assess the multi-data fusion of sensor data for Processing, Exploitation and Dissemination (PED).

- Intelligence, Surveillance, Reconnaissance and Targeting (ISRT) & Electronic Warfare (EW): The Contractor will assess prototype C5ISR architectures abilities to achieve the National Defense Strategy in support of Fully Networked Command and Control (FNC2). The contractor shall also perform strategic assessment of a prototype's ability to systematically observe mission objectives and its ability to acquire, fuse, and disseminate information. The contractor shall assess various ISR payloads to evaluate performance to evaluate radars, wireless communications, and Radio Frequency (RF) propagation. The contractor shall support, technology developmental, operational and integration of the Department's ability to close strategic, operational, and tactical kill chains that are acknowledged as critical weaknesses across the services, combatant commands, and Joint Staff. This includes the ability to support weapon system targeting across all domains. The contractor shall assess the technical performance of Cyber and EW prototypes that will enhance electromagnetic spectrum operations to maintain Spectrum Dominance. The Contractor shall participate in red teaming activities and exercises to identify the range of adversarial responses to capabilities being developed and systems being protected.
- Counter C5ISRT (C/C5ISTR): The Contractor shall provide the expertise to counter and defeat adversary Command and Control architectures and system to assess prototype and simulated adversary capabilities. The contractor shall also perform strategic assessment of a prototype's ability to deny, degrade, defeat or destroy adversary mission objectives and its ability to acquire, fuse, and disseminate information. The contractor shall assess various ISR payloads to evaluate performance to evaluate radars, wireless communications, and Radio Frequency (RF) propagation. The contractor shall support, technology developmental, operational and integration of the Department's ability to close strategic, operational, and tactical kill chains that are acknowledged as critical weaknesses across the services, combatant commands, and Joint Staff. The contractor shall assess the technical performance of Cyber and EW prototypes that will deny, degrade, defeat or destroy adversary mission objectives to ensure US electromagnetic spectrum operations to maintain Spectrum Dominance. The Contractor shall participate in red teaming activities and exercises to identify the range of adversarial responses to capabilities being developed and systems being protected.
- Capabilities: The Contractor will evaluate and assess the design of aircraft, spacecraft, satellites, missiles, and sensor payload prototype functional capabilities according to the proposed design. Area of expertise will include hypersonic flight characteristics and technical performance analysis, Stratospheric High-Altitude Platforms as well as sensors and subsystems required to operate in the space and near space regions. The contractor shall identify technologies to disrupt, detect, deny, degrade, destroy, deceive adversary mission objectives of comparable adversary systems. The Contractor shall participate in red teaming activities and exercises to identify the range of adversarial responses to capabilities being developed and systems being protected.
- Information Operations: The Contractor will assess applicability of information warfare across computers, servers, mobile devices, electronic systems, networks, and data. The contractor shall evaluate the electromagnetic and digital effects of offensive and defensive information warfare to quantify the effectiveness of prototypes for military capabilities for Offensive and Defensive Information Operations. The contractor shall identify technologies to disrupt, detect, deny, degrade, destroy, deceive adversary mission objectives of comparable adversary systems. The Contractor shall participate in red teaming activities and exercises to identify the range of adversarial responses to capabilities being developed and systems being protected.
- Hypersonics: The Contractor shall provide the analysis of the physical phenomena of shock, aerodynamic heating, entropy, real gas, low density, and the independent coefficient of Mach number to technically assess the molecular changes of hypersonic platforms and their operational performance. This initiative shall incorporate the analysis and assessment of platforms and component technologies to include propulsion, motors, sensors, avionics, and seeker technologies. The contractor shall identify technologies to disrupt, detect, deny, degrade, destroy, deceive adversary mission objectives of comparable adversary systems. The Contractor shall participate in red teaming activities and exercises

to identify the range of adversarial responses to capabilities being developed and systems being protected.

- **Prototype, Assessment and Experimentation of Key Prototypes:** The Contractor shall assess the engineering design, risk, specification of a prototype in an operational but relevant environment to facilitate transition of the residual capability. The contractor shall have experience in System Integration, Data Management, System Operability, Performance Evaluation, Cybersecurity, Regression and Safety, and User Evaluation. Experimentation shall incorporate application of employing prototypes in a future multi-domain/Joint Warfighting Concept to explore existing capabilities.
- **Technical Analyses and Assessments:** The Contractor shall provide technical analyses and assessments that demonstrate interdependencies across priority modernization areas, in accordance with the National Defense Strategy (NDS), and highlight key contributions to enhancing Joint lethality, agility, and resilience, including those that support protection against unwanted technology transfer.

5.1.2 Subtask 1.2 Technical Program Management (ref: IDIQ PWS Sections 5.3 Prototyping, Experimentation, Demonstration, and Scaling, and 5.6 S&T Research and Assessment)

5.1.2.1 The contractor shall provide the technical support in engineering prototype development projects that will impose engineering technical rigor and best practices against projects.

5.1.2.2 The contractor shall develop and coordinate roadmaps with key stakeholders. This includes conducting technical reviews, milestones, concepts, requirements and operational objectives for end-to-end prototyping development.

5.1.2.3 The contractor shall support System Requirements Review, System Functional Review, Test Readiness Review, Prototype Design Review, Demonstration Readiness Review and Program Reviews with interagency partners to assist in the cross-pollination across the stakeholders.

5.1.2.4 The contractor shall provide analysis and program management oversight to project execution (deliverables and funding obligation/expenditures) via project tracking tools, periodic (monthly) reports and financial products. Contractor shall provide weekly status updates and monthly status reports.

5.1.3 Subtask 1.3 Prototype Assessments, Demonstrations and Experimentation Support (ref: IDIQ PWS Section 5.3 Prototyping, Experimentation, Demonstration, and Scaling)

5.1.3.1 The contractor shall support the planning, coordinating, and execution of a large-scale multi-year demonstration and experimentation campaign to evaluate the operational utility of prototypes in a multi-domain environment.

5.1.3.2 The contractor shall support the development of a strategy and framework for identifying prototype mission capabilities into demonstration or experimentation venues to evaluate their operational utility.

5.1.3.3 The contractor shall produce concepts of operations, lessons learned, or technical reports to identify operational successes and capability gaps to maximize the campaign's alignment to mitigate gaps.

5.1.3.4 The contractor shall build interest and engagement from Military Service to establish Tactics Techniques and Procedures (TTPs) to facilitate the transition of prototyping capabilities into programs of record for sustainment.

5.1.4 Subtask 1.4 Financial Management (ref: IDIQ PWS Section 5.3 Prototyping, Experimentation, Demonstration, and Scaling)

5.1.4.1 The Contractor shall provide expert support for the entire Planning, Programming, Budgeting, and Execution (PPBE) cycle. This includes applying budget and program principles to develop program and budget submissions (e.g., POM, R-Docs, Issue Papers) and providing strategic advice on resource allocation.

5.1.4.2 The Contractor shall manage and report on the execution of funds throughout the fiscal year. This involves documenting, monitoring, and reconciling the obligation and expenditure of funds, conducting quarterly financial reviews, and providing regular status reports and performance data (e.g., graphs, analytical reports) to senior leadership.

5.1.4.3 The Contractor shall provide technical assistance in acquisition by reviewing and managing resources, offering expert advice on contract administration, and interpreting technical documents such as Statements of Work (SOW), Performance Work Statements (PWS), and specifications.

5.1.4.4 The Contractor must be proficient in using a wide range of governmental financial management and reporting systems. This includes, but is not limited to, Core Financials (CF), Enterprise Business Accountability System (EBAS), Execution Management System (EMS), G-INVOICE, Defense Agencies Initiative (DAI) tools, Cognos, ADVANA, and the Defense Technical Information Center (DTIC) to perform all financial duties.

5.1.4.5 The Contractor shall prepare and process all necessary funding documents, including Military Interdepartmental Purchase Requests (MIPRs), Sub-Allocations, and Inter-Agency Agreements. The contractor is expected to maintain professional and effective communication with government and industry points of contact.

5.1.5 Subtask 1.5 Data Management and Analysis (ref: IDIQ PWS Section 5.3 Prototyping, Experimentation, Demonstration, and Scaling, and 5.7 Data Management and Analysis)

5.1.5.1 The Contractor shall provide staff with skill sets and expertise in the full data management lifecycle, including acquiring, validating, storing, protecting, and processing data to ensure the accessibility, reliability, security, and timeliness of data for users. Contractor personnel shall be proficient in systematically applying statistical and/or logical techniques to describe, illustrate, condense, and analyze or evaluate data.

5.1.5.2 The contractor shall provide visualization support to communicate and manage primary communication channels effort to modernize, introduce new technologies, and streamline capability development. This includes visualization and data management tools and systems.

5.1.5.3 The contractor shall provide support for presentation, briefing, chart, and other office documentation preparation, particularly for graphics and formatting.

5.1.6 Subtask 1.6 Software Management (ref IDIQ PWS Section 5.2 Mission Engineering, Systems Engineering, Software Engineering, and DT&E)

5.1.6.1 The contractor shall assess user and system requirements and make recommendations for system architecture on a project-by-project basis.

5.1.6.2 The contractor shall assist in the design of the system(s) on a project-by-project basis. The contractor shall formulate system specifications in accordance with applicable standards and work with the site software engineering team to ensure that user requirements and specifications are met in the design of software systems.

5.1.6.3 The contractor shall design, code, install, and maintain system(s) on a project-by-project basis. The contractor shall establish test requirements, plans, and execute testing to verify system design and performance; ensure system maintenance and maintain adequate software systems documentation.

5.1.6.4 The contractor shall prepare software system architectures and models to specify in detail operations to be performed by computer software. The contractor shall provide support for presentation, briefing, chart, and other office documentation.

5.1.6.5 The contractor shall continually assess the performance of software engineer teams which consist of both Government and Contractor personnel using an agile approach.

5.1.7 Subtask 1.7 Security and Technology Protection (ref: PWS IDIQ Sections 5.2 Mission Engineering, Systems Engineering, Software Engineering, and DT&E, and 5.8 Technology Protection)

5.1.7.1 The contractor shall conduct technology and program protection risk and vulnerability assessments for acquisition programs, and review and approve Program Protection Plans (PPPs). The Contractor shall support the application of system-level assurance, including software and hardware assurance, and shall provide inputs to policy as appropriate.

5.1.7.2 The Contractor shall plan, develop, update, implement, and recommend best practices for technology and program protection. The Contractor shall draft inputs for security classification guides as appropriate.

5.1.7.3 The Contractor shall assist the organization and conduct of industry and Department facing meetings, workshops, and fora including meeting planning, implementation, coordination, participation, actions items and action item tracking; maintaining the website and its content; and maintaining distributions.

5.1.7.4 The Contractor shall participate in red teaming activities and exercises to identify the range of adversarial responses to capabilities being developed and systems being protected.

5.1.8 Subtask 1.8 Ad-Hoc Surge Support (ref: IDIQ PWS Section 5.9 Ad-Hoc Surge Support)

The Contractor shall have and maintain the capability and resources to provide rapid, short duration augmentation across Subtask Areas 5.1.1-5.1.7.

5.1.8.1 The Contractor shall provide technical and engineering expertise in support of ongoing programs to include contributions at reviews, site visits, demonstrations, tests, and exercises. The Contractor shall provide independent assessments of laboratory or experimental/prototype tests conducted by contractor personnel and/or the Government. Provide SME support in scientific reviews to include in-depth expert feedback as to the strengths and weakness of research and development programs/proposals. The Contractor shall provide technical expertise to research, analyze, and summarize findings of emerging technologies and advanced capabilities.

5.1.8.2 The Contractor shall conduct quantitative analyses of technology/mission engineering/system engineering requirements as they pertain to the development, prototyping, and insertion of advanced capabilities; evaluate alternatives and trade-offs; evaluate costs and benefits; investigate compatibility, interoperability, and integration; assess and provide recommendations/strategies to mitigate technical and engineering risks.

5.1.8.3 The Contractor shall plan, coordinate, and assist with the testing and engineering evaluation of demonstrations, experiments, and/or prototypes. This effort will include working with contractor personnel, Government collaborators, and test ranges to develop test configurations, detailed test plans, and test readiness reviews.

5.1.8.4 The Contractor shall provide conference room capabilities which shall be within 45 miles of the Pentagon and shall hold up to 75 attendees. The Contractor's conference room shall provide adequate security at a minimum SECRET level for classified discussions. The conference room area shall be equipped, at a minimum, with (1) writing boards, electronic projection screens; (2) phone lines available for conference calls; (3) data lines suitable for high-speed computer data transmission; and (4) presentation computers with removable hard drives capable of unclassified and classified presentations.

PART 6
APPLICABLE PUBLICATIONS

6 APPLICABLE PUBLICATIONS (CURRENT EDITIONS)

6.0 The Contractor must abide by all applicable regulations, publications, manuals, and local policies and procedures.

7.2 Attachment 2 / Technical Exhibit 2 – Deliverables Schedule

7.3 Attachment 3 / Technical Exhibit 3 – Estimated Workload Data

DRAFT

TECHNICAL EXHIBIT 1

PERFORMANCE REQUIREMENTS SUMMARY

The Contractor service requirements are summarized into performance objectives that relate directly to mission essential items. The performance threshold briefly describes the minimum acceptable levels of service required for each requirement. These thresholds are critical to mission success.

Performance Objective	Standard	PERFORMANCE THRESHOLD	Method of Surveillance
PRS # 1 The contractor workforce performs immediately with minimal disturbances and necessary security clearance (or security clearance process started) to support OUSW(R&E) P&E in accordance with PWS task listed in PWS 1.13	Contractor provides required workforce with adequate security clearance and minimal turbulence during Phase In, and on and off ramping.	Contractor begins within 30 calendar days after TO award with appropriate security clearances as defined in the Task Order. Subsequent vacancies are filled as necessary with minimal disturbance.	Validated by COR/Customer observations.
PRS # 2 Contractor workforce consistently generates quality and timely products to support OUSW(R&E) P&E requirements in accordance with the all the task listed under Part 5 of the PWS.	Deliverables reflect thorough research in and knowledge of the topic; articulate clear conclusions and/or recommendations, as appropriate; all material is written and formatted as directed; reflects Government guidance on draft; final material is comprehensive, coherent, accurate, timely, and complete.	Accuracy, Appearance, Clarity, Timeliness. Reports are generated on time and at least (1) week prior to decision meeting. Reports are accurate. No more than one (1) customer complaint per report.	Validated by COR/Customer observations.
PRS # 3 Contractor workforce generates quality and timely assessment of technology, policy, and warfighter initiatives to support OUSW(R&E) P&E modernization priorities in accordance with all the task listed under Part 5 of the PWS	Analysis of workforce and policy initiatives reflect thorough research in and knowledge of the topic; articulate clear conclusions and/or recommendations, as appropriate; all material is written and formatted as directed; reflects Government guidance on draft, and final material is comprehensive, coherent, accurate, timely, and complete.	Accuracy, Appearance, Clarity, Timeliness. Analysis is complete and report is generated on time at least (1) week prior to suspense. Documents are accurate. No more than one (1) customer complaint per report.	Validated by COR/Customer observations.

TECHNICAL EXHIBIT 2

DELIVERABLES SCHEDULE

All deliverables must meet professional standards and satisfy the requirements set forth in contractual documentation. The contractor will be responsible for delivering all items specified. All deliverables developed under this task order will become the property of the US Government. The dates by which specific deliverables must be submitted will be as mutually agreed upon between the Government and the contractor.

Unless otherwise specified, the Government will have a maximum of ten (10) business days from the day the draft deliverable is received to review the document, provide comments back to the contractor, approve or disapprove the deliverable(s). The contractor will have a maximum of ten (10) business days from the day comments are received to incorporate all changes and submit the final deliverable to the Government. All days identified below are intended to be business days unless otherwise specified.

In fulfillment of this effort, the contractor shall provide specific deliverables as identified by the Task Order. All deliverables shall be submitted to the COR and any selected representatives, unless otherwise agreed upon. In addition to the reports listed below, additional reports/products may be requested as deemed necessary:

Prototyping and Experimentation:

PWS	DELIVERABLE	FREQUENCY	# OF COPIES	MEDIUM/FORMAT	SUBMIT VIA EMAIL To
1.14.2	Contractor Project Management Plan (CPMP)	20 days after award	1	Electronic. MSWord	COR and Cognizant Deputy Director
1.12.2	QC Plan	90 days after award	1	Electronic. MSWord	COR and Cognizant Deputy Director
1.18.4	WHS-AD NDA	Prior to first day of performance for personnel	1	Electronic. PDF	KO, COR and Cognizant Deputy Director
3.5	OSW R&E NDA for Program Materials	Prior to first day of performance for personnel	1	Electronic. PDF	COR and Cognizant Deputy Director
1.18	OCI	20 days after award	1	Electronic. MS Word	KO, COR and Cognizant Deputy Director
1.14.5.1	Limitation on Subcontracting FAR Clause 52.219-14	Annually, the last month of the period of performance for the base and option periods.	1	Electronic. MS Word	KO and COR
5.1.8.4, 5.1.2.5	Presentations	As required	1	Electronic. PowerPoint	COR and Cognizant Deputy Director
5.1.2.5	Weekly staff meetings and weekly activity reports	Weekly	1	Electronic. MSWord	COR and Cognizant Deputy Director
5.1.2.5	Monthly Status Report	Monthly	1	Electronic. MSWord	COR and CO
5.1.1.6, 5.1.3, 5.1.8.1	Analysis and Assessments	As required	1	Electronic. MSWord	COR and Cognizant Deputy Director
5.1.4.1	Financial Review	Quarterly	1	PowerPoint	COR and Cognizant Deputy Director

<u>PWS</u>	<u>DELIVERABLE</u>	<u>FREQUENCY</u>	<u># OF COPIES</u>	<u>MEDIUM/FORMAT</u>	<u>SUBMIT VIA EMAIL TO</u>
5.1.2.4	Demonstration Readiness Review	As required	1	PowerPoint	COR and Cognizant Deputy Director
5.1.2.4	Prototype Design Review	As required	1	PowerPoint	COR and Cognizant Deputy Director
5.1.2.4	Prototype Test Readiness Review	As required	1	PowerPoint	COR and Cognizant Deputy Director
5.1.3, 5.1.5	Technical and Scientific reports	As required	1	PowerPoint	COR and Cognizant Deputy Director

The contractor shall maintain the required capability over the period of performance. Within the period of performance, the contractor shall complete all tasks within the allotted schedule. The COR shall provide the authorization to proceed and determine the task initiations via email, as necessary, to the contractor Task Order Program Manager (TO PM). At the COR's discretion, the delivery dates may be adjusted.

The format for individual deliverables will be determined through consultation between the COR and the contractor at the Post Award Conference (Section 1.14114.1) and identified in writing then provided to the contracting office, COR, and the contractor. Products that reflect the contractor's analysis and opinion (e.g., studies or analyses) may be in contractor format. Products that are to be used by the Government in the execution of its responsibilities (e.g., Reports, Briefings) will be in a specified Government format. All documents will be provided in either hard copy or electronic format, as requested by the COR. Electronic documents will be provided in the appropriate Microsoft Office format (e.g., Word or PowerPoint); if appropriate, the contractor may be asked to provide in compressed or Portable Document Format.

TECHNICAL EXHIBIT 3

ESTIMATED WORKLOAD DATA

The data provided below identifies the labor hours which the offeror is required to use when proposing LH FTEs, labor hours and labor categories necessary to perform the requirements listed in this PWS. Any variations to the number of FTEs, labor categories and labor hours under the LH CLINs will be viewed as a change to the requirement, and the offeror may be determined to be nonresponsive and ineligible for award. One Full Time Equivalent (FTE) for the LH CLIN is equivalent to 1,872 hours.

Phase in (30 Days)

CLIN #	Labor Category	Location	Key or Non-Key Personnel	PWS Task reference(s)	Estimated Quantity (Hours)	FTEs
