National Geospatial-Intelligence Agency

INSTRUCTION

NUMBER 5200.1

26 October 2020

Administrative Update 1, 19 August 2021

SI

SUBJECT: Information Security

References: See Enclosure 1.

1. PURPOSE. This Instruction:

a. Establishes policy, assigns responsibilities, and provides procedures for the protection of classified national security information (CNSI) and unclassified information, including controlled unclassified information (CUI), at NGA in accordance with (IAW) References (b), (c), (g), (p), and (r) through (u).

b. Addresses specific components of information security that comprise the NGA Information Security Program (ISP).

c. Rescinds NGA Instruction 5200.1, "Information Security," 30 May 2017.

2. APPLICABILITY. This Instruction applies to all NGA civilian employees, military service members, other Government agency personnel assigned to NGA, and contractors, hereinafter referred to as *personnel*.

3. DEFINITIONS. See Glossary.

4. POLICY. It is NGA policy to:

a. Identify and protect CNSI, CUI, and unclassified information IAW References (g), (p), and (s) through (u).

b. Promote information sharing, facilitate judicious use of resources, and simplify management through implementation of uniform and standardized processes.

c. Classify and declassify CNSI IAW References (b), (d), and (r).

(1) Not classify, continue to maintain as classified, or fail to declassify information in order to:

(a) Conceal violations of law, inefficiency, or administrative error.

UNCLASSIFIED

(b) Prevent embarrassment to a person, organization, or agency.

(c) Restrain competition.

(d) Prevent or delay the release of information that does not require protection in the interest of national security.

(2) Classify basic scientific research and its results when related to national security.

d. Prescribe protection for, proper use and handling of, and enforce standards for marking all CNSI, CUI, and unclassified information IAW References (b), (d), (j), (p), (s), and (t).

e. Facilitate information sharing and restriction by applying dissemination markings when warranted.

f. Employ, maintain, and enforce standards for safeguarding, storing, destroying, transmitting, and transporting classified information.

g. Promote and implement information security education and training.

h. Investigate reports of security incidents (infractions or violations), potential compromises, actual compromises, or unauthorized disclosures (UDs) of CNSI, CUI, or unclassified information not approved for public release IAW References (f), (p), and (t).

i. Protect CUI from UD by marking, safeguarding, disseminating, and destroying information appropriately.

j. Disclose and/or release classified or unclassified information after appropriate review and approval granted by authorized disclosure and release officials IAW References (e) and (~~ap~~ ao).

k. Subject NGA personnel to administrative sanctions as well as criminal penalties under applicable Federal Statutes, if they knowingly, willfully, or negligently violate the provisions of this Instruction IAW References (f), (r), and (~~am~~ al).

l. Hold personnel accountable for safeguarding CNSI, CUI, and unclassified information IAW References (p) and (~~am~~ al).

5. RESPONSIBILITIES. See Enclosure 2.

6. PROCEDURES. See Enclosures 3 through 15.

7. EFFECTIVE DATE. This Instruction is effective on the date of signature.

ENCLOSURE 2

RESPONSIBILITIES

1. Director, NGA (D/NGA).

a. Oversees the overall management, functioning, and effectiveness of the ISP at NGA IAW Reference (r).

b. Identifies, programs, and commits necessary resources to effectively implement the requirements for the protection of CNSI, and unclassified information, including CUI, as part of the NGA ISP IAW References (p) and (r).

c. Designates the Director, Security and Installations (D/SI), as the Senior Agency Official (SAO) responsible for overseeing, directing, and administering NGA's ISP IAW References (o) and (r).

2. D/SI.

a. Oversees, directs, and administers the NGA ISP as the SAO IAW References (p), and (r) through (t).

b. Designates the Director, Office of Security (D/SIS), responsible for overall management, functioning, and effectiveness of the ISP IAW Reference (t).

c. Designates Director, Counter Insider Threat Office (D/SII), as the NGA point of contact responsible for conducting investigations on serious CNSI security incidents and referring and reporting those incidents and actual or suspected UDIs likely to damage national security and NGA interests IAW References (r) and (~~af~~ ae).

3. D/SIS.

a. Is responsible for overall management, functioning, and effectiveness of the ISP IAW Reference (t).

b. Develops and implements the ISP areas of self-inspection, declassification, training (original and derivative classification), the Original Classification Authority (OCA) program, Fundamental Classification Guidance Reviews, classification challenges, and CUI IAW References (b), (p), and (r) through (t).

c. Ensures foreign, industry, and interagency arrangements involving classified information comply with classification guidance that is current and sufficiently detailed to protect the information IAW References (b), (e), and (~~x~~ ap).

d. Provides ISP guidance to Directorates, Agency Elements, and subordinate offices.

e. Manages the day-to-day execution of the ISP and ensures effective ISP implementation by means of a self-inspection program as required by References (r) and (t).

f. Reports UDIs and serious security incidents to SII as appropriate.

g. Provides security education and awareness products, guidance, and content for information security training IAW References (r) and (t).

h. Administers the NGA OCA Program including managing OCA delegations and tracking training.

i. Ensures OCA development of security classification guides (SCGs), including the Consolidated NGA (CoNGA) SCG, for each NGA production and development system, program, or project that uses, exploits, or creates classified information in its processes IAW References (r), (u), and Enclosure 10 of this Instruction, and ensures final, approved SCGs are widely disseminated and available to NGA personnel.

j. Implements an effective Classification Management Program focused on the protection of NGA CNSI by overseeing the development, coordination, and dissemination of approved SCGs, including the CoNGA SCG.

k. Provides training during the New Employee Orientation Seminar (NEOS) and annual refresher training to enhance the prevention, identification, and reporting of UDIs and serious security incidents, as required by References (f), (l), and (r).

l. Implements NGA's declassification programs IAW References (r) and (t).

m. Verifies that requirements for the protection of CNSI are incorporated into contract specifications IAW References (r) and (x ap).

n. Manages the Workforce Support Centers (NGA Campus East and West) which provide initial information security education and training for contractors.

o. Chairs the Classification Management Working Group (CMWG).

4. Chief, Information Security Branch (SISGC).

a. Initiates the initial or annual training requirement for each OCA.

b. Manages the classification challenge process.

c. Manages the self-inspection program.

d. Manages the Agency security classification program and cost-gathering procedures.

- e. Delivers security training to the NGA workforce.
- f. Implements, manages, and oversees the CUI program.

5. D/SII.

a. Oversees the detection and investigation of security incidents involving NGA information systems (ISs) and protects NGA information technology (IT) resources in collaboration with the Director, Chief Information Officer and IT Services (D/CIO-T).

b. Ensures protection of CNSI by directing a security inquiry and/or a security investigation for incidents involving classified information as follows:

(1) Investigating all spills of classified information and violations of NGA IT and cybersecurity policy on NGA ISs IAW References (t) and (~~ad~~ ac).

(2) Assisting with classified messaging incident clean up on affected ISs.

(3) Investigating reports of misuse and UDs involving NGA network resources.

(4) Providing support to the Inspector General (IG) by initiating a security inquiry into cyber- or IS-related fraud, waste, and abuse cases.

(5) Coordinating with the IG on findings of an ongoing inquiry or investigation for their potential investigative consideration.

(6) Investigating all matters involving the mishandling of classified information, including hardcopy documents or materials.

(7) Managing investigations, reporting, and mitigation of security incidents, violations, and infractions IAW Reference (f) and (t).

(8) Conducting investigations into security violations and infractions, as appropriate IAW Reference (f) and (t).

(9) Conducting security inquiries and investigations into the unauthorized introduction or inappropriate removal of items or equipment from NGA-accredited SCI Facilities (SCIFs) as authorized by law, policy, or regulation.

(10) Providing investigative support to Department of Justice (DOJ) and law enforcement agencies as required.

(11) Distributing reports of findings and investigative results within NGA. Liaises and provides reports of findings to DOJ and law enforcement agencies or other entities concerning the outcome of inquiries and investigative issues in coordination with the IG.

(12) Serving as the NGA representative to the Intelligence Community Security Coordination Center.

c. Manages the UD program and serious security incidents through the following:

(1) Establishing a process for responding to and reporting UDs to the Office of the Under Secretary of Defense for Intelligence and Security (OUSD(I&S)) and Office of the Director of National Intelligence (ODNI) IAW References (f), (l), (r) and (t).

(2) Ensuring the opening and conducting of an inquiry for a reported potential UD or serious security incident and conducting a CNSI damage assessment.

(3) Maintaining a Case Management email address to receive reports of UDs and serious security incidents.

(4) Conducting security inquiries into UDs of CUI, including incidents involving personally identifiable information (PII).

(5) Reporting each actual or suspected UD of CNSI to OUSD(I&S) IAW Enclosure 6 of Reference (t) via the Joint Worldwide Intelligence Communications System (JWICS) and to the ODNI IAW Reference (f).

(6) Ensuring that all UDs are reported and managed IAW with References (f) and (t).

(7) Referring matters to OUSD(I&S) when the responsibility for investigation of a UD or serious security incident is unclear or is shared with another DoD Component IAW Reference (l).

(8) Coordinating reporting of serious security incidents involving an intelligence activity or intelligence personnel with the General Counsel IAW Reference (~~ak~~ aj).

(9) Taking measures to prevent the recurrence of UDs and serious security incidents.

(10) Establishing internal NGA communications with appropriate Directorates and Agency Elements to ensure awareness and enable reporting of potential UDs.

(11) Keeping the IG apprised of findings of an ongoing inquiry or investigation supported by SII personnel.

d. Oversees the identification, reporting, investigation, and referral of UDs and serious security incidents referred to SII by the OIG or SIS.

e. Coordinates with the Director, Mission Oversight and Compliance (D/MOC), when inquiry or investigation reveals compromise, loss, or UD of protected information including PII.

6. Director, Office of Counterintelligence (D/SIC), coordinates with SII as appropriate to review NGA CNSI that is suspected of being a UD to ensure it was not previously authorized for release.

7. Director, Human Development, ensures that NGA personnel assigned to an external assignment that do not have access to NGA's mandatory training courses are granted appropriate reciprocal training credit if they complete the host agency training and provide the training certificate.

8. Director, NGA Operations Center, communicates notifications of UD information from Directorates/Agency Elements or SII, to the D/NGA, as appropriate.

9. Director, Office of Corporate Communications, addresses all inquiries from the news media related to UDs and communicates information to D/NGA and the workforce.

10. D/CIO-T oversees the detection of security incidents involving NGA ISs and protects NGA IT resources in collaboration with D/SII.

11. General Counsel coordinates with the D/SII on the reporting of serious security incidents involving an intelligence activity or intelligence personnel.

12. Inspector General investigates any UDs that are criminal in nature when the Federal Bureau of Investigation and defense criminal investigative organizations have declined to investigate. The Inspector General then forwards results of all investigations to the DOJ or other law enforcement agencies as appropriate- IAW (Reference (~~an~~ am)). Refers UDs and serious security incidents to D/SII as appropriate.

13. D/MOC.

a. Reports security incidents that involve Questionable Intelligence Activities (QIAs) or Significant or Highly Sensitive Matters (S/HSM) to the Defense Senior Intelligence Oversight Official IAW Reference (~~ak~~ aj).

b. Reports security incidents that involve the compromise, loss or UD of PII to the Defense Privacy, Civil Liberties and Transparency Division IAW Reference (~~ag~~ af).

14. Chief, NGA Disclosure and Release Office (C/NDRO), coordinates with D/SII and Chief, Analysis Security Branch (C/APXA) as appropriate to review NGA CNSI that is suspected of being a UD to ensure it was not previously authorized for release.

15. C/APXA coordinates with D/SII and C/NDRO as appropriate to review NGA CNSI that is suspected of being a UD to ensure it was not previously authorized for release.

16. Directorate Heads and Agency Element Leads.

- a. Support the SAO in the management and functioning of the ISP.
- b. Provide respective expertise to assess UD and serious security incidents.
- c. Ensure UD reviews are added to applicable standard operating procedures and duty descriptions for positions that review open-source material.
- d. Initiate a disciplinary or adverse action against personnel who disclose CNSI, CUI, and unclassified information that has not been approved for release IAW References (p) and (~~am~~ al).
- e. Comply with D/SIS tasking to provide information in support of Standard Form-311, "Agency Information Security Program Data," data collection IAW Enclosure 13.
- f. Ensure that their assigned personnel complete and/or receive security education and training IAW Reference (t).

17. OCAs.

- a. Complete annual training in original classification IAW References (b) and (t).
- b. Certify authorities, in writing, through a signed OCA agreement indicating that they are aware of limitations of their authority, sanctions that may be imposed, and their duties and responsibilities IAW Reference (b) and Enclosure 5 of Reference (t).
- c. Ensure proper security classification, avoidance of over/under-classification, and review of classified information for declassification.
- d. Classify information up to the TOP SECRET level and identifies specific classification category(ies) and reason(s) for classifying the information IAW References (r), (t), and (u).
- e. Make original classification determination and considers whether the UD of that information reasonably could be expected to cause identifiable or describable damage to national security IAW References (b), (r), and (t).
- f. Issue new or updates to an existing SCG, including the CoNGA SCG for each IS, plan, program, or project involving classified information and ensure it is declared current at least once every five years IAW References (r) and (u).
- g. Adjudicate classification challenges, whether formal or informal.
- h. Serve as a Declassification Authority (DA) IAW References (b) and (r).

18. Chair, CMWG (C/CMWG).

a. Leads the CMWG as a networking organization made up of OCAs or their designees for the purpose of standardizing SCGs, including the CoNGA SCG, and discussing other related topics of interest.

b. Coordinates with CMWG members to ensure their respective Directorate or Agency Element complies with information security requirements IAW Reference (r).

19. CMWG Members support the C/CMWG by standardizing SCGs, including the CoNGA SCG, and discussing other related topics of interest.

20. DAs carry out declassification responsibilities for NGA equity information up to TOP SECRET IAW References (b) and (r).

21. Personnel.

a. Properly protect CNSI, CUI, and unclassified information under their custody and control IAW this Instruction and References (p), and (r) through (t). All NGA officials who hold command, management, or supervisory positions have specific, non-delegable responsibility for the quality and effectiveness of implementing and managing the ISP within their areas of responsibility.

b. Complete all mandatory training requirements IAW Enclosure 14 of this Instruction.

c. Report all IS incidents, known or suspected classified data spill incidents, as well as classified material mishandled in any other ways, such as physical classified material leaving a SCIF without appropriate approval, immediately to SII.

d. Report to SII, the appearance of any CNSI, CUI, or unclassified information not approved for public release in the public media (e.g., Internet sites, newspapers, television, radio, magazines, etc.) or any questioning by a media representative regarding UD.

e. Ensure proper classification of CNSI, CUI, and unclassified information and, as appropriate, challenge information believed to be improperly classified.

f. Observe and respect original classification decisions and the requirements for derivative classification as a Derivative Classification Authority (DCA), IAW References (b), (i), and (r), and Enclosure 8 of this Instruction.

ENCLOSURE 3**PROPER MARKING OF INFORMATION PROCEDURES**

1. Purpose. This Enclosure provides the main responsibilities for NGA personnel with regard to marking CNSI and CUI. Appropriate marking of CNSI and CUI is key to preventing UDs and protecting national security.
2. Requirement. It is the responsibility of all NGA personnel to ensure they are knowledgeable of the security requirements for marking CNSI and CUI IAW References (i), (k), and (s).
3. General Guidelines.
 - a. The proper marking of classified information is the specific responsibility of all personnel. DCAs refer to the source document(s), SCG(s), or other guidance issued by an OCA when determining the markings to apply. The highest level of classified information contained in a document appears in a way that distinguishes it clearly from the informational text and is conspicuous enough to alert anyone handling the document that it is classified.
 - b. The holder of an improperly marked document contacts the document originator to obtain correct markings and applies those markings as required.
 - c. No classification or other security markings may be applied to any article or portion of an article that has appeared in a newspaper, magazine, or other public medium. If an article is evaluated to see whether it contains classified information, the results of the review are to be recorded separately. The article and the results of the review may be filed together IAW Reference (s).
 - d. To facilitate information sharing and declassification processes, when practicable, a classified attachment, addendum, annex, enclosure, or similar section is used when classified information constitutes only a small portion of an otherwise unclassified document. Alternately, a separate product that permits dissemination at the lowest level of classification possible or in unclassified form may be prepared.
 - e. If a classified document has components likely to be removed and used or maintained separately, mark each component as a separate document. Examples are annexes or appendices to plans, major parts of reports, or reference charts in a program directive. If an entire major component is unclassified, it may be marked on its face, top, and bottom "UNCLASSIFIED," and a statement added: "All portions of this (annex, appendix, etc.) are UNCLASSIFIED." No further markings are required on such a component.
 - f. Particular attention must be given to information intended for display on websites to ensure that the information carries all appropriate markings. Since web technologies

permit data access without viewing the initial and/or cover pages, page and portion markings are especially important to ensure users are alerted to the presence of classified information and the level of protection it requires.

g. Metadata and/or other tags are applied to electronic data. Metadata and tags are used to the greatest extent possible to facilitate electronic handling and dissemination of classified and CUI information. (Reference (q))

(1) Security metadata for classified and CUI electronic information, to the extent possible, identifies the classification level and any control and dissemination caveats required.

(2) Documents released in electronic format have their metadata and other electronic tags and labels reviewed for classified information prior to release. Metadata and other electronic tags and labels associated with information in electronic format is updated or deleted, as necessary, to reflect the actual classification and other attributes of declassified or downgraded information. Care must be taken to ensure the metadata accurately reflects the information it describes and that classified attributes are not released with unclassified data.

h. Dissemination control and handling markings identify limitations on releasability of, or distribution of the information IAW References (e) and (ap ao). These markings are in addition to and separate from the level of classification.

(1) Only those intelligence dissemination control and handling markings approved by the Information Security Oversight Office (ISOO) or, with respect to the IC by the Director of National Intelligence for intelligence and intelligence-related information, may be used by NGA to indicate dissemination controls of classified information IAW References (b), (i), and (s). Personnel can refer to the marking guidance on the SBU at <https://www.intranet.nga.mil/org/SI/SitePages/CoNGA.aspx> and on NGANet at https://www.intranet.nga.ic.gov/org/si/Sitepages/GEOINT_Protection_Doc_Viewer.aspx.

(2) When used, intelligence dissemination controls and handling markings appear at the top and bottom of each page after the level of classification, and within portion markings for classified information.

ENCLOSURE 4SAFEGUARDING PROCEDURES

1. Purpose. Appropriate safeguarding of CNSI, CUI, and unclassified information is key to preventing UDIs and protecting national security.

2. Requirement. Personnel are responsible for the proper safeguarding of CNSI, CUI, and unclassified information in their possession. In general, personnel must ensure:

a. Classified and CUI information is only shared with individuals who have the appropriate clearance and accesses, a signed Non-Disclosure Agreement, and a need-to-know for a specific and official US Government purpose. Sharing of information poses a dual responsibility not only on the individual disclosing the information, but on the recipient as well.

b. All unclassified information is reviewed and approved for release through the NGA public release process before it is provided to the public IAW References (p) and (ah ag).

c. CNSI, CUI, and unclassified information is only introduced into and processed on ISs accredited for such use.

d. TOP SECRET/Sensitive Compartmented Information (SCI) is only processed on a network that resides on JWICS or other properly accredited IS. The NGANet is an example of a properly accredited IS. Controlled Access Programs (CAPs) and Special Access Programs (SAPs) may require processing on separate physical or logical networks.

e. Collateral SECRET-level information is processed on a network that resides on the Secure Internet Protocol Router Network (SIPRNet) or JWICS. SECNet resides on the SIPRNet. NOTE: Secret-level SCI information may NOT be processed on either SIPRNet or NGA SECNet.

f. All unclassified information and CUI is processed on the Non-classified Internet Protocol Router Network (NIPRNet), SIPRNet, and JWICS. The Sensitive but Unclassified (SBU) network resides on NIPRNet.

g. All CNSI, CUI, and unclassified information that does not comprise permanent records is destroyed when no longer needed IAW Reference (aj ai). If the physical media is classified, it should be destroyed following the guidance provided by the National Security Agency at:

<https://www.nsa.gov/resources/everyone/media-destruction>

<https://www.nsa.gov/Resources/Media-Destruction-Guidance/> (link available via SBU).

See the SI Webpage for local NGA procedures at:

<https://ngaonline/sites/si/Pages/Classified%20Materials%20Handling.aspx>.
https://www.intranet.nga.mil/org/SI/SitePages/Classified_Material_Handling.aspx.

h. Storage of CNSI, CUI, and unclassified information is IAW References (p) and (t). Storage of SCI must be IAW References (g), (h), (o), and (t).

i. Transporting and/or mailing of classified collateral information and CUI is done IAW References (p) and (t). Transport and/or mail of SCI must be IAW References (g) and (t) and follow the guidance provided on the SI Webpage at:

<https://ngaonline/sites/SI/Pages/Classified%20Materials%20Handling.aspx>
https://www.intranet.nga.mil/org/SI/SitePages/Classified_Material_Handling.aspx,

Classified Material Handling.

j. Procedures for establishment, oversight, and safeguarding requirements of SAP information are followed as described in References (v) and (w).

3. Creation, Handling, and Safeguarding of Working Papers. Working papers are defined as documents or materials, regardless of the media, which are expected to be revised prior to the preparation of a finished product for dissemination or retention.

a. Working papers containing classified information are dated when created, marked with the highest classification of any information contained in them, protected at that level, and if otherwise appropriate, destroyed when no longer needed.

b. When any of the following conditions applies, working papers are controlled and marked in the same manner prescribed for a finished document at the same classification level:

- (1) Released by the originator outside the originating activity;
- (2) Retained more than 180 days from the date of origin; or
- (3) Filed permanently.

4. Bulky material, equipment, and facilities, etc., are clearly identified in a manner that leave no doubt about the classification status of the material, the level of protection required, and the duration of classification.

ENCLOSURE 5

STORAGE AND DESTRUCTION PROCEDURES

1. Purpose. This Enclosure describes procedures for appropriate storage and secure destruction of CNSI, CUI, and unclassified information by authorized means to prevent UDs and protect national security.

2. Requirement. It is the responsibility of all personnel to ensure they are knowledgeable of the security requirements for the storage and destruction of CNSI, CUI, and unclassified information IAW References (b), (g), (p) and (t).

3. General Guidelines.

a. Classified information is secured under conditions adequate to deter and detect access by unauthorized persons IAW Reference (t). The requirements specified in Reference (t) represent acceptable security standards. Holdings of classified material should be reduced to the minimum required to accomplish the mission. (Reference (t))

b. The General Services Administration establishes and publishes minimum standards, specifications, and supply schedules for containers, vault doors, modular vaults, alarm systems, and associated security devices suitable for storing and protecting classified information. Reference (m) describes requirements for acquiring physical security equipment for use within DoD. (Reference (t))

c. ODNI establishes security requirements for SCIFs (Reference (h)), which are expanded upon for NGA within Reference (~~ae~~ ad).

d. Reference (p) specifies storage and destruction requirements for CUI.

ENCLOSURE 6UNAUTHORIZED DISCLOSURES

1. Purpose. This Enclosure describes procedures for responding to UD.
2. A UD is a communication or physical transfer of CNSI, CUI, or unclassified information to an unauthorized recipient, such as uncleared individuals or the media.
3. Personnel finding classified information in the public media (e.g., newspapers, magazines, and books) and on public internet sites report it to the UD mailbox at NGASIII@coe.ic.gov. Examples of other types of disclosures may include, but are not limited to:
 - a. UDs to an international organization, foreign power, agent of foreign power, or terrorist organization.
 - b. Loss or compromise of classified information storage media or equipment.
 - c. Loss or compromise of classified information revealing NGA intelligence sources or methods or US intelligence requirements, capabilities, and relationships with the US Government.
4. Personnel notify SII of a UD via secure email to NGASIII@coe.ic.gov. SII provides a copy of the NGA CNSI suspected of being leaked in the UD to the D/SIC, C/NDRO, and C/APXA who reviews the information to ensure it was not previously authorized for release. SII also provides a copy to the Deputy Director/NGA and D/SI for situational awareness. SII refers UDs to D/MOC, as appropriate, to ensure reportable incidents are communicated to the Defense Senior Intelligence Oversight Official IAW References (~~ag~~ ~~af~~) and (~~ak~~ ~~aj~~). Any incidents rising to the level of a QIA or S/HSM are reported to the MOC Intelligence Oversight Division by the most expeditious means IAW Reference (~~ak~~ ~~aj~~).
5. Any UD of classified information regardless of the cause requires immediate reporting, investigation, and submission of a damage assessment describing the impact on national security.
6. If the subject of a UD investigation is a member of another intelligence agency, the case is referred to the appropriate investigative entity.
7. All SAP and CAP UDs will be handled IAW Reference (~~ae~~ ~~ab~~).

ENCLOSURE 7SECURITY INCIDENT PROCEDURES

1. Purpose. This Enclosure describes procedures for responding to security incidents.

2. Personnel.

a. Personnel must properly handle and protect CNSI, CUI, and unclassified information in their possession or control, prevent security incidents, and report all instances of compromise or potential compromise of CNSI and CUI IAW References (l), (p), (r), and (t).

b. Report all IS incidents, known or suspected CNSI and CUI data spill incidents, as well as CNSI and CUI material mishandled in any other ways, such as physical classified material leaving a SCIF without appropriate approval, immediately to SII.

c. Report incidents via secure email to NGASIII@coe.ic.gov; secure phone at 578-9009; or unclassified email at NGASIII@nga.mil or unclassified phone at 571-557-9009; after hours telephone number is 571-557-1000 (SIP).

d. Fully cooperate during the investigative process and provide complete, prompt, accurate, and truthful responses for testimony and related documents.

3. Security Incident Terminology. A security incident is an act that constitutes a threat to a security program or is a deviation from existing governing security regulations. Security incidents may be portrayed as security infractions or security violations. (Reference (j))

4. All security incidents are thoroughly investigated by SII.

5. Any loss of CNSI regardless of the cause requires immediate reporting, investigation, and submission of a damage assessment describing the impact on national security. An incident rising to the level of a QIA or S/HSM is reported to the MOC Intelligence Oversight Division by the most expeditious means IAW Reference (~~ak~~ aj). Reportable incidents are communicated to the Defense Senior Intelligence Oversight Official IAW Reference (~~ae~~ aj).

6. All SAP and CAP security incidents will be handled IAW Reference (~~ae~~ ab).

ENCLOSURE 8ORIGINAL AND DERIVATIVE CLASSIFICATION AUTHORITIES

1. Purpose. This Enclosure describes the OCAs within NGA and the responsibility of each with respect to the ISP.

2. An OCA is a specific position authorized by the Secretary of Defense with the responsibility and authorization to determine the original classification of information collected, processed, or analyzed by NGA. An OCA makes the initial classification determination of NGA information that, in the interest of national security, requires protection against UD. (Reference (r))

a. OCAs make classification determinations within their respective areas of responsibility, up to TOP SECRET, IAW References (b) and (r); these classification determinations must be communicated to the workforce via a memorandum or in a SCG, including the CoNGA SCG, assembled and organized IAW References (r) and (u). The responsibilities of the OCA cannot be redesignated or delegated further. Additional OCAs may be requested or cancelled by the Secretary of Defense IAW Reference (r).

b. Prior to exercising their authority, and annually thereafter, each OCA must receive training in original classification unless a waiver has been granted IAW Reference (t).

(1) OCAs certify, by signing the OCA agreement that they have received training in the fundamentals of proper security classification (including the avoidance of over-classification) and declassification, the limitations of their authority, the sanctions that may be imposed, and OCA duties and responsibilities IAW Enclosure 5 of Reference (t).

(2) OCAs who do not complete the mandatory annual training will have their classification authority suspended by D/NGA IAW References (r) and (t). The suspension will be lifted when the OCA completes the training.

c. When making an original classification determination, the OCA considers whether the UD of the information could result in damage to national security, and the OCA is able to identify or describe the potential damage IAW References (b), (r), and (t).

3. D/SIS ensures that delegation letters and OCA training certifications are maintained and can be retrieved by the office assigned that responsibility when requested by appropriate authorities IAW References (r), (t), and (aj ai).

4. D/SIS is responsible for tracking the training status of NGA OCAs. At the appropriate time, SISGC initiates the initial or annual training requirement for each OCA.

5. A DCA is any individual with the authority to make derivative classification decisions for information they are producing for an official government purpose. All NGA

personnel who possess a security clearance, need-to-know, have executed a Classified Information Non-Disclosure Agreement (SF-312), have completed derivative classification training, and have authorized access to NGA classified ISs are DCAs. (References (r) and (t))

a. Derivative classification is the process of incorporating, paraphrasing, restating, or generating in new form information that is already classified, and marking the newly developed material consistent with the classification markings that apply to the source information. This includes the classification of information based on classification guidance. The duplication or reproduction of existing classified information is not derivative classification. (Reference (r))

b. It is the responsibility of all DCAs to follow the requirements for derivative classification when generating classified information. Failure to comply with these requirements may result in security incidents.

c. DCA initial training requirements are met for government employees and military personnel during NEOS scheduled for completion within 30 days of arrival to NGA.

d. DCA initial training requirements are met for contractor personnel through completion of Annual Security Awareness Training online within 30 days of hiring.

e. DCA recurring training requirements are met when NGA employees, military personnel, and contractors complete the Annual Security Awareness Training online.

f. DCAs will complete mandatory security awareness training requirements in order to maintain accesses to classified information and ISs IAW References (~~y~~ x), (~~z~~ y), and (~~aa~~ ~~z~~).

ENCLOSURE 9DECLASSIFICATION PROCEDURES

1. Purpose. This Enclosure describes the declassification procedures for DAs.
2. Classified NGA equities may be declassified by the D/NGA or the cognizant OCA. The D/NGA and D/SI, as the SAO for the NGA ISP, may designate DAs for NGA equities.
 - a. DAs are required to carry out declassification procedures IAW References (b), (i), and (r), as well as NGA's latest Interagency Security Classification Appeals Panel (ISCAP)-approved Declassification Exemption Guide.
 - b. NGA DAs declassify NGA information up to TOP SECRET.
3. The SIS Declassification Team, IAW Reference (r), conducts an automatic, systematic, or mandatory declassification review (described below) of permanent records containing NGA predecessor information, including referral of non-NGA equity classified information to other departments and agencies, and identification and exclusion from declassification of restricted data and formerly restricted data in the event of its discovery IAW Reference (b).
 - a. Automatic declassification is the declassification of information based solely upon the occurrence of a specific date or event as determined by the OCA unless an exemption is issued by the D/NGA or OCA IAW Reference (b). See Reference (~~ai~~ ah) for additional information.
 - b. A systematic declassification review is a review of permanent historical classified records that were previously deemed exempt from automatic declassification. After a thorough review, the records are accessioned and transferred to the National Archives and Records Administration. Before NGA records that were exempted from automatic declassification are declassified, they must be reviewed by a DA. (References (b) and (d))
 - c. Mandatory declassification review is the review of records requested by the general public, presidential libraries, and IC partner agencies for classified information originating within NGA. DAs conduct line-by-line reviews and determine whether the records can be declassified in full or in part, or must be withheld in their entirety; DAs provide their response to the requestor IAW References (b), (d), and (r). See Reference (~~ai~~ ah) for detailed procedures.
 - d. The OCA, IAW procedures provided in Reference (~~ae~~ an), may direct discretionary declassification actions.

4. Declassification guides are updated every five years and submitted to the ISOO for File Series Exemption every 10 years IAW Reference (r).
5. Any information that is inadvertently subject to declassification without proper authority, as determined by an OCA with jurisdiction over the information, remains classified and administrative action must be taken to restore banner and portion markings and any dissemination controls, as appropriate.
6. Any determination that information has been declassified without proper authority must be promptly reported in writing to the ISOO.

ENCLOSURE 10FUNDAMENTAL CLASSIFICATION GUIDANCE REVIEW PROCEDURES

1. Purpose. This Enclosure describes procedures for the responsible OCA to maintain timely and precise classification guidance--a prerequisite IAW References (b) and (r) to effectively and efficiently secure information and ensure that security resources are expended to protect only that information warranting protection in the interests of national security. The OCA issues an SCG, including the CoNGA SCG for each IS, plan, program, or project involving classified information and ensures it is reviewed and updated at least once every five years, or as needed, IAW Reference (r).

2. The tasking to complete the Fundamental Classification Guidance Review is generated by D/SIS no later than four years after the last classification review (or as warranted by changes in the guidance or the evolution of the information).

a. SIS initiates the review and solicits input from NGA Directorates and Agency Elements, and external organizations that have an interest in the subject matter of the SCG, including the CoNGA SCG.

b. Input provided by subject matter expert updates the contents of the SCG, including the CoNGA SCG. The updated SCG is routed through the appropriate NGA Directorates and Agency Elements, and external organizations for coordination/concurrence.

c. The final SCG, including the CoNGA SCG is signed by the appropriate OCA who has authority over the SCG subject matter.

d. Signed SCGs, including the CoNGA SCG are submitted to the OUSD(I&S), ODNI, and the Defense Technical Information Center for posting/record keeping based on the classification of the guide. The updated SCG, including the CoNGA SCG, is also posted to NGA's Classification Management web page and the CoNGA SCG is posted to the NGA's Security Management and Resource Tool available here:

<https://intelshare.intelink.ic.gov/sites/smrt/SitePages/SMRT%20Home.aspx>.

ENCLOSURE 11CLASSIFICATION CHALLENGE PROCEDURES

1. Purpose. This Enclosure provides the procedures to follow when information is suspected to be misclassified (over-classified or under-classified). Figure 1 illustrates the classification challenge process. It is the responsibility of all personnel to challenge information they suspect to be misclassified. The purpose of a classification challenge is to ensure the appropriate protection of CNSI in the interest of national security while allowing information sharing with the broadest possible audience IAW References (b), (i), (r), and (w).

2. Classification Challenge Procedures.

a. Informal Internal Challenge. The recipient of the information in question contacts the originator of the document and discusses the classification of the information IAW Reference (r).

b. Informal Challenge to SISGC, Classification Management Team. If a resolution is not reached between the challenger and the originator of the information, contact SISGC. The Classification Manager assigned to review the information in question provides their determination regarding the information within 10 business days of the request. This may be expedited if sufficient justification is provided. This process is conducted IAW References (b) and (r).

c. CMWG. The CMWG provides a forum for the NGA community to exchange information on security classification topics; coordinate input from subject matter experts and stakeholders from the DoD and IC; identify issues and concerns relative to classification management policies, procedures, and other measures; and develop recommendations and solutions to address classification clarification, interpretation, and challenges. The CMWG evaluates existing classification policies and directives to ensure they support National System for Geospatial Intelligence, the Allied System for Geospatial Intelligence, and NGA's vision, goals, and policy directives. The CMWG provides recommendations, solutions, and changes to the appropriate OCA for consideration and implementation. The CMWG members are responsible for notifying their respective organizations of issues that impact their security programs, facilities, or personnel.

d. Formal Challenge to SISGC, Classification Management Team. If the decision made by the Classification Manager through the informal challenge process is not acceptable to the challenger, the challenger may also make a formal challenge by following the procedures below IAW References (b) and (r).

(1) Complete the "Inquiry Form For CoNGA SCG" located on <https://intelshare.intelink.ic.gov/sites/smrt/SitePages/SMRT%20Home.aspx>. The challenger includes a description of the information being challenged to permit

identification of the information and its classifier with reasonable effort. Challenges to classification also include the reason the challenger believes the information is improperly classified and the recommended change.

(2) The completed form is submitted to: #NGA GEOINT Protection (GEOINTProtection@coe.ic.gov).

(3) The SISGC reviews the challenge with the CMWG. A formal response that includes the individuals on the CMWG is provided to the requestor within 60 days of receipt of the challenge. If a decision has not been reached by this time, a notice of acknowledgement is provided with an expected date of response. This acknowledgment includes a statement noting that if no response is received within 120 days, the challenger has the right to forward the challenge to the ISCAP for decision. The challenger may also forward the challenge to the ISCAP if NGA has not responded to an appeal within 90 days of receipt of the request. (Reference (r))

e. Formal Challenge to the ISCAP. The final option for a classification challenge, after all other options have been exhausted, is with the ISCAP IAW Reference (b). In order to make a classification challenge with the ISCAP, follow the directions provided at the following SBUNet link:

<https://www.archives.gov/declassification/iscap/classification-challenges.html>

f. All NGA personnel are encouraged to challenge the classification of information in their possession as a means for promoting proper and thoughtful classification actions. NGA managers and supervisors ensure that no retribution is taken against any person lodging or bringing forward a classification challenge. (References (b), (i), and (r))

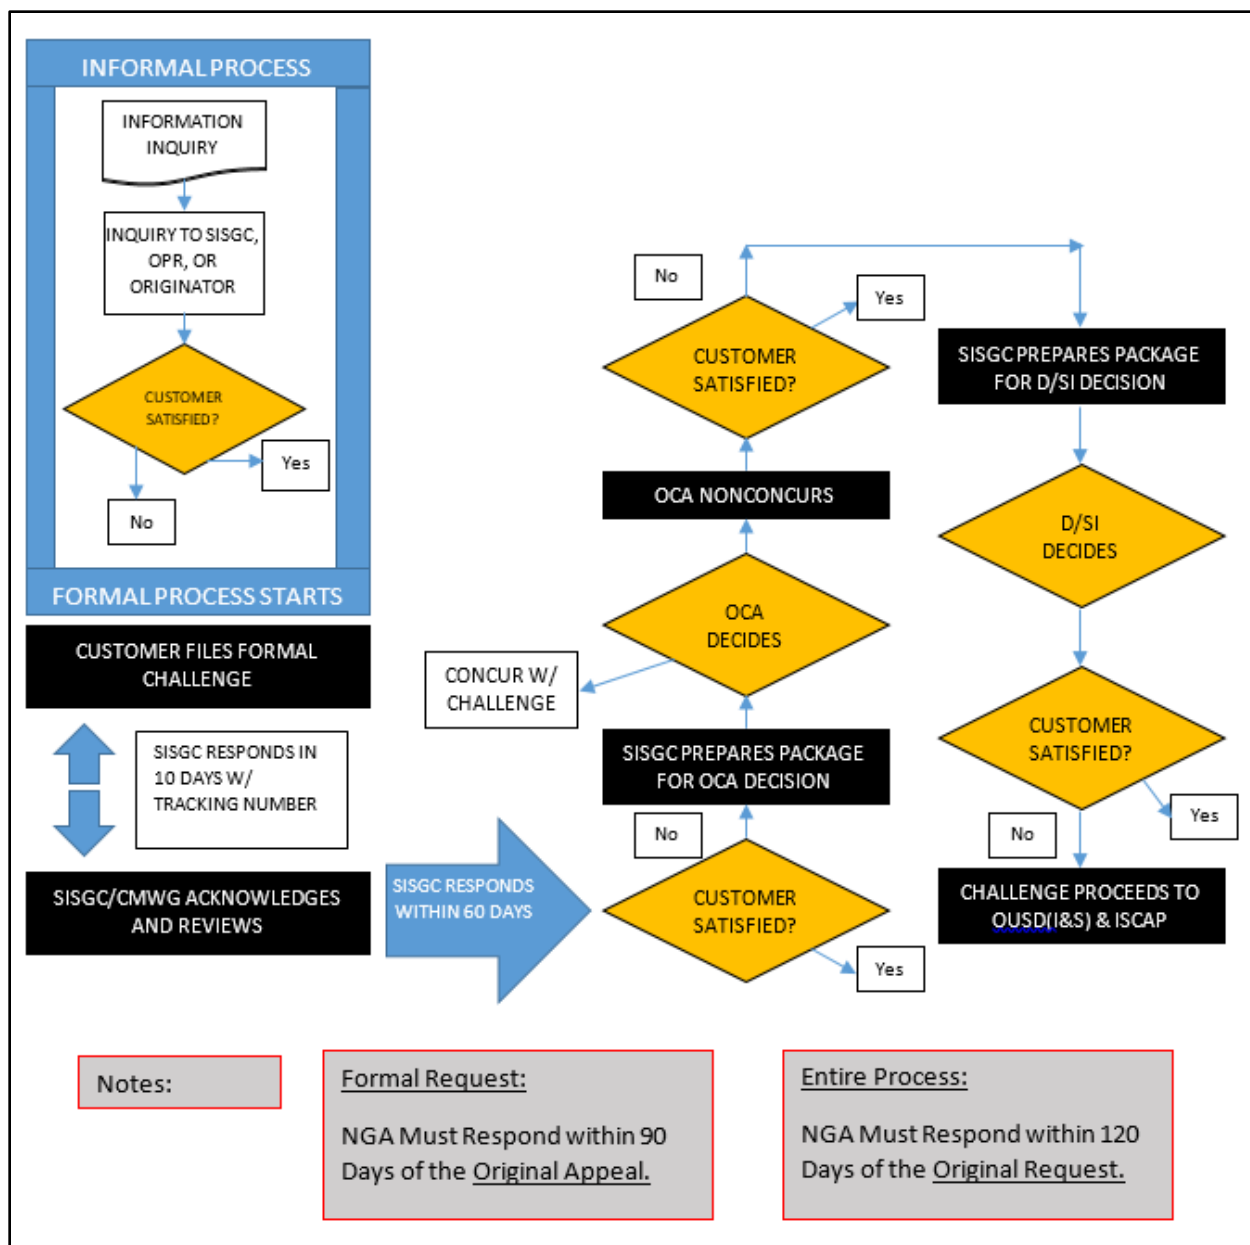

Figure 1. Classification Challenge Process

ENCLOSURE 12

SELF-INSPECTION PROGRAM PROCEDURES

1. Purpose. This Enclosure describes procedures to establish and maintain an ongoing self-inspection program to assess the effectiveness of the management of CNSI as required by Reference (r). The ISOO has a checklist that addresses required areas for consideration when completing these inspections. The checklist may change as deemed appropriate by the ISOO, the OUSD(I&S), and SIS. This Enclosure provides implementation guidance for this requirement.

2. Requirement. At a minimum, self-inspections must be completed annually IAW Reference (r). Annual Self-Inspections and Quarterly Self-Inspections are used to meet this requirement.

a. Annual Self-Inspection. Completed annually by SISGC personnel. The responses from these inspections are consolidated into one report by D/SIS, signed by the SAO for information security, and provided to OUSD(I&S) for submission to the ISOO.

b. Quarterly Self-Inspections. Quarterly Self-Inspections are security assessments of a specific program, function, or mission area.

ENCLOSURE 13**AGENCY SECURITY CLASSIFICATION PROGRAM AND COST-GATHERING PROCEDURES**

1. Purpose. This Enclosure describes procedures for gathering and reporting data on original and derivative classification actions. The SF-311, "Agency Information Security Program Data," is a form used to report data from all Executive Branch Departments and Agencies that create and/or handle CNSI. This form collects information on the volume of original and derivative classification actions made by the agencies and is completed IAW References (b), (d), and (r). The ISOO initiates the action to complete the form, and NGA receives the tasking to complete this action through OUSD(I&S).
2. Requirement. NGA Directorates and Agency Elements are requested to provide information in support of SF-311 data collection must comply with D/SIS tasking. In general, data collection will occur as follows:
 - a. SISGC representatives are responsible for ensuring the tasker is disseminated to the Directorates or Agency Elements and that the recipients of the tasking follow the directions provided by D/SIS.
 - b. SIS consolidates the input for the Agency and reports the results of the data collection to OUSD(I&S) for reporting to ISOO IAW Reference (r). ISOO prepares a final report representing the Executive Branch agencies for the President IAW Reference (d).
3. The ISOO requires NGA report cost estimates for security classification using SF-716, "Agency Security Classification Costs Estimates," to the ISOO activities IAW References (a) and (b).

ENCLOSURE 14SECURITY EDUCATION AND TRAINING

1. Purpose. This Enclosure describes procedures for security education and training.
2. Directorates and Agency Elements ensure that their assigned personnel complete and/or receive security education and training that IAW Reference (t):
 - a. Provides necessary knowledge and information to enable quality performance of security functions.
 - b. Promotes understanding of DoD and NGA ISP policies and requirements and their importance to national security and national interests.
 - c. Instills and maintains continuing awareness of security requirements.
 - d. Assists in promoting a high degree of motivation to support program goals.
3. Security education and training is continuous, rather than periodic, and is provided via desk-side or Web-based means. Periodic briefings, training sessions, and other formal presentations are supplemented with other information and promotional efforts to maintain continuous awareness and performance quality.
4. Personnel, on or off NGA sites, with access to NGANet complete their mandatory training courses via PeopleSoft. This is the preferred method for personnel to complete their mandatory training requirements as it automatically updates the personnel system of record. Those without access to NGANet can also complete the training on GEOINT Blackboard.
5. NGA personnel assigned to another agency who do not have access to NGA mandatory training may complete the host agency training and provide the NGA Human Development Directorate representative with a valid completion to get credit.
6. Consequences for failure to complete mandatory security training are described in References (z y), (aa z), and (am al).
7. Security education and training may be accomplished by establishing programs within NGA, using external resources such as the Center for Development of Security Excellence, or applicable DoD training.
8. The Workforce Support Center provides contactors with security onboarding orientation training regarding NGA policies and principles.

9. All personnel authorized access to classified ISs receive initial cybersecurity training as a condition of access to that IS. Personnel must then complete annual Web-based refresher training. (Reference (y x))

10. Training for newly appointed OCAs is provided to the OCA via a desk-side briefing by SISG and via Web-based training annually thereafter. Each OCA must receive mandatory initial training prior to exercising the authority IAW Reference (t).

a. Only the D/NGA; Deputy Director, NGA; or D/SI (acting in their capacity as the SAO) may grant a waiver of this requirement if an individual who is nominated to serve as an OCA is unable to receive this training due to unavoidable circumstances IAW Reference (t). All such waivers are documented.

b. Whenever such a waiver is granted, the individual receives the required training as soon as practicable.

11. DCAs receive training in derivative classification with an emphasis on avoiding over-classification initially and on an annual basis IAW Enclosure 8 of this Instruction. (Reference (z y))

12. Personnel with access to classified information receive annual Web-based refresher training that reinforces the policies, principles, and procedures covered in their initial and specialized training IAW References (f), (t), and (z y). Refresher training also addresses the threat and the techniques foreign intelligence entities use while attempting to obtain classified information, and advise personnel of penalties for engaging in espionage activities and other UD. In addition, refresher training addresses relevant changes in information security policy or procedures and issues or concerns identified during self-inspections. IS users additionally complete an annual information assurance awareness refresher.

13. SISGC delivers the following instructor-led presentations:

<u>Presentation</u>	<u>Frequency</u>
NEOS Initial Security Training	Monthly and Semi-Monthly ¹
NEOS OPSEC	Monthly and Semi-Monthly ²
DCA Training	Monthly and Semi-Monthly ²
Introduction to Security – Security 101	Monthly
Classification Management	Monthly

¹Required for personnel (Civilian, Military, and Contractor (space permitting)) who are newly cleared or entering on duty at NGA.

²Required for personnel (Civilian, Military, and on-site Contractors) and personnel who are newly cleared or entering on duty at NGA

ENCLOSURE 15CONTROLLED UNCLASSIFIED INFORMATION PROCEDURES

1. Purpose. This Enclosure describes procedures for protection of CUI.
2. Requirement. NGA employees are to ensure CUI is protected IAW Reference (p) and the guidance provided in this Instruction.
3. SISGC implements, manages, and oversees the CUI program IAW this Instruction, Reference (p), and additional IC or DoD CUI policies and guidance.
4. CUI. CUI is unclassified information that requires safeguarding or dissemination controls pursuant to and consistent with law, regulations, and Government-wide policies. (Reference (c)) The primary categories of CUI created by NGA are FOR OFFICIAL USE ONLY (FOUO) and LIMITED DISTRIBUTION (LIMDIS).

a. FOUO. NGA uses FOUO to designate CUI that falls under one of the Freedom of Information Act Exemptions, 2 through 9 that can be found in Enclosure 3, Appendix 1 of NGA Instruction 5750.1 (Reference (~~ai~~ ah)), for information that is on the NGA OPSEC Program Critical Information List that can be found in Enclosure 8 of NGA Instruction 5200.4, (Reference (~~ab~~ aa)), or as prescribed in Reference (p).

(1) Information that is determined to be FOUO, regardless of medium, is indicated by the appropriate markings as provided. In general, markings on an FOUO document indicate the originating agency/office, banner line markings, and portion markings. NGA will continue to utilize the FOUO marking IAW Reference (k) until the Office of the Director of National Intelligence (ODNI) provides further marking guidance to the Intelligence Community for CUI to comply with the DoD CUI requirements in Reference (p).

(2) Markings are applied to electronic messages and attachments, electronic media, and any other materials that contain FOUO such as blueprints, engineering drawings, charts, maps, photographic media, imagery, etc.

b. LIMDIS. A handling caveat and marking to indicate that distribution of certain unclassified GEOINT is limited to the DoD and authorized DoD contractors IAW 10 US Code § 455 and 48 Code of Federal Regulations, Parts 245.107-70 and 252.245-7000. (Reference (n)) It is used by NGA to identify a select group of sensitive, unclassified imagery or geospatial information and data created or distributed by NGA or information, data, and products derived from such information. (Reference (p))

(1) Information may be designated as LIMDIS if it meets the criteria established in Reference (n).

(2) LIMDIS must be marked IAW Reference (~~al~~ ak). In general, markings on LIMDIS material indicate the originating office, banner lines, portion marks, and the following LIMDIS notice:

Distribution authorized ~~only within to~~ DoD and the Intelligence Community (IC) for official purposes, IAW DoDI 5030.5910 U.S.C. §§130 & 455. Distribution to ~~Release authorized to U.S.~~ DoD and IC contractors requires contract clauses consistent with DoDI 5030.59, Enc. 2, § 6€ and IAW 48 C.F.R. §252.245-7000. ~~Refer other requests to: Headquarters, NGA, ATTN: Disclosure and Release Office, Mail Stop S81-IA, 7500 GEOINT Drive, Springfield, VA 22150 or by email at NDRO@nga.mil.~~ Destroy IAW DoDI 5200.48. Removal of this caveat is prohibited; the caveat must be retained regardless of classification. Sharing LIMDIS material beyond ~~USG-~~ ~~authorized~~ DoD and IC users requires NGA-~~originator~~ approval. Refer all requests and inquiries to: Headquarters, NGA, ATTN: Disclosure and Release Office, Mail Stop S81-IA, 7500 GEOINT Drive, Springfield, VA 22150 or NDRO@nga.mil

(3) LIMDIS is authorized for all ~~active US Military, and~~ DoD and IC personnel at any time for official use. US Government organizations may see or receive LIMDIS materials if they have an existing written agreement or Memorandum of Understanding with NGA that permits use of LIMDIS materials and indicates their agreement to protect LIMDIS materials. Foreign governments may receive LIMDIS materials through international agreements or ~~arrangements~~ on a case-by-case basis with approval from the NGA Disclosure and Release Office, NDRO@coe.ic.gov. (Reference (~~al~~ ak))

GLOSSARY

Classification Challenge	A challenge of the classification status of information IAW agency procedures established under paragraph (b) of Section 1.8 of EO 13526 by authorized holders of information who, in good faith, believe that its classification status is improper. (Definition created by NGA for NGA purposes only.)
Classified National Security Information (CNSI)	Also known as “classified information.” Any information that has been determined pursuant to EOs 12958, as amended, or any successor orders, to require protection against UD and is marked to indicate its classified status. (References (j))
Controlled Unclassified Information (CUI)	Unclassified information that requires safeguarding or dissemination controls pursuant to and consistent with law, regulations, and Government-wide policies. (Reference (c))
Declassification Authority (DA)	The official who authorized the original classification, if that official is still serving in the same position; The originator’s current successor in function, if that individual has OCA; A supervisory official of either the originator or his or her successor in function, if the supervisory official has OCA; or Officials delegated declassification authority in writing by the agency head or the senior agency official. (Reference (r))
Derivative Classification	Process of incorporating, paraphrasing, restating, or generating in new form information that is already classified, and marking the newly developed material consistent with the classification markings that apply to the source information. This includes the classification of information based on classification guidance. The duplication or reproduction of existing classified information is not derivative classification. (Reference (r))
Derivative Classification Authority (DCA)	A DCA is any individual with the authority to make derivative classification decisions for information they are producing for an official government purpose. All NGA personnel who possess a security clearance, need-to-know, have executed a Classified Information Non-Disclosure Agreement (SF-312), have completed derivative classification training, and have authorized access to NGA classified ISs are DCAs. (References (r) and (t))

Discretionary Declassification	The process whereby an OCA applies discretion to declassify their equity information, irrespective of the currently assigned declassification date. (Definition developed by NGA for NGA purposes only.)
For Official Use Only (FOUO)	A protective marking used for unclassified official government information that is withheld from public release until approved for release by the originator. (References (k))
Fundamental Classification Guidance Review	A periodic basis a comprehensive review of the agency's classification guidance, particularly classification guides, to ensure the guidance reflects current circumstances and to identify classified information that no longer requires protection and can be declassified. (Reference (b))
Inquiry	A fact-finding and analysis conducted to determine whether or not there was a loss of classified information or whether or not unauthorized personnel had, or could have had, access to the information. It identifies the facts, characterizes the incident as an infraction or a violation, identifies, if possible, the cause(s) and person(s) responsible, reports corrective actions taken or to be taken, and makes recommendations as to the need for further corrective action or a more in-depth investigation. Inquiries, generally, are initiated and conducted at the lowest echelon possible within the DoD Component. (Reference (t))
Investigation	An investigation is conducted for a security violation when the incident cannot be resolved via inquiry or for incidents where an in-depth and comprehensive examination of the matter is appropriate. (Reference (t))
LIMITED DISTRIBUTION (LIMDIS)	A handling caveat and marking to indicate that distribution of certain unclassified GEOINT is limited to the DoD and authorized DoD contractors IAW 10 US Code § 455 and 48 Code of Federal Regulations, Parts 245.107-70 and 252.245-7000. (Reference (n))
Mandatory Declassification Review	Review for declassification of classified information in response to a request for declassification that meets the requirements under EO 13526. (Reference (b))
Original Classification Authority (OCA)	An OCA is a specific position authorized by the Secretary of Defense with the responsibility and authorization to determine the original classification of information collected, processed, or analyzed by NGA. An OCA makes the initial classification determination of NGA information that, in the interest of national security, requires protection against UD. (Reference (r))

Personally Identifiable Information (PII)	Information that can be used to distinguish or trace an individual's identity, either alone or when combined with other information that is linked or linkable to a specific person. (Reference (ag af))
Questionable Intelligence Activity (QIA)	Any intelligence or intelligence-related activity in which there is reason to believe such activity may be unlawful or contrary to an EO or Presidential Directive, IC Directive, or applicable policy governing that activity. Examples of QIA include but are not limited to the following: (1) tasking intelligence personnel to conduct intelligence activities that are not part of an approved mission, even if they have the technical capability to do so; (2) providing intelligence services and/or products without proper authorization; (3) failure to obtain a Proper Use Memorandum for domestic imagery collection associated with US persons for an foreign intelligence or counterintelligence activity; and (4) collection of information on a US person when it is not part of the organization's mission. (Reference (ak aj)).
Security Incident	An act that constitutes a threat to a security program or is a deviation from existing governing security regulations. Security incidents may be portrayed as security infractions or security violations. (Reference (j))
Security Infraction	Any knowing, willful, or negligent action contrary to the requirements of References (b) and (t) and that does not constitute a "security violation," as defined below. (Reference (t))
Security Violation	Any knowing, willful, or negligent action that could reasonably be expected to result in an UD of classified information; or Any knowing, willful, or negligent action to classify or continue the classification of information contrary to the requirements of Reference (b), its implementing directives, or Reference (t); or Any knowing, willful, or negligent action to create or continue a SAP contrary to the requirements of Reference (b), DoDD 5205.07, or Reference (t). (Reference (t))

Self-Inspection	The internal review and evaluation of individual agency activities and the agency as a whole with respect to the implementation of the program established under Executive Order 12958, as amended; and its implementing directives. (Reference (j))
Serious Security Incident	A violation or incident involving classified information meeting the thresholds for reporting to OUSD(I&S), as specified in Enclosure 6 of Reference (t). (Reference (l))
Significant or Highly Significant Matters (S/HSM)	An intelligence or intelligence-related activity (regardless of whether the intelligence or intelligence-related activity is lawful or contrary to an EO, Presidential Directive, IC Directive, or DoD policy) or serious criminal activity by intelligence personnel that could impugn the reputation or integrity of the IC, or otherwise call into question the propriety of intelligence activities. Such matters might involve actual or potential: (1) Congressional inquiries or investigations; (2) Adverse media coverage; (3) Impact on foreign relations or foreign partners; or (4) Systemic compromise, loss, or UD of protected information. (Reference (ak aj))
Systematic Declassification Review	The review for declassification of classified information contained in records that have been determined by the Archivist to have permanent historical value IAW 44 United States Code. (Reference (b))
Unauthorized Disclosure (UD)	A communication or physical transfer of CNSI or CUI to an unauthorized recipient. (References (j) and (r))
