

Salient Characteristics

Blood Parameter Monitoring System must:

Provide real time monitoring of oxygen delivery (DO₂) as one of the 12 key blood parameters (pH, pCO₂, pO₂, Temp, HCO₃, BE, SO₂, Hct, Hgb, K⁺, DO₂, VO₂, blood flow)

Must have an FDA-approved protocol

Be FDA and TAA compliant

Must have a high visibility display

Must have a self-diagnostic system

Must have an integrated battery backup operation mode for patient safety during electrical power surge or power failure

Must have an integral monitor printer to provide documentation of system's self-diagnostics

Must be transportable
