

HRM II Attachment 3- Government RFI Response Q&A

1. *Industry Question:* Will the Government please confirm that the Comment Matrix does not count towards the 10-page response limit?

Government Response: To ensure clarity and facilitate evaluation, respondents shall structure their submission by responding to the questions in the Matrix, Attachment 2, by typing the question number, immediately followed by their response to that question. (The Matrix table does not need to be included in the response. If the contractor does include the Matrix, it will count towards the page number limit).

Example: Matrix Question 1- (contractor response)

Please see the attached **RFI Revision 1, Section 8.0**, highlighted in yellow.

Per the **original RFI** posting, **Section 4.2** White paper shall be in Microsoft Word for Office or compatible format and shall not exceed **20 pages**.

2. *Industry Question:* Will the Government please confirm that font sizes less than 12pt can be utilized for graphics and tables?

Government Response: 12 pt font shall be utilized for graphics and tables. Please see the **RFI Revision 1, Section 4.2**, highlighted in yellow.

3. *Industry Question:* Would NGA consider allowing more time for small businesses to prepare our response? A thoughtful 20-page white pager is a substantial effort for market research, and small businesses have limited resources to handle such requests. Often the same one or two individuals are responding to all RFIs and all RFPs. Many businesses in your target population of bidders - - cleared small businesses who have human capital/HR expertise - - are participating in the Vertex 4 recompetes happening right now. Bidders have the Phase 2 submission due to NGA on Monday, March 30th.

Government Response: Responses containing the white paper are due no later than **5:00 pm ET on Thursday 26 March 2026**. Please see the **RFI Revision 1, Section 4.3** highlighted in yellow reflecting RFI submission date change.

4. *Industry Question:* I'm reaching out regarding the upcoming opportunity associated with solicitation number NGAHM0476HRMIIRFI. Based on the forecast, it appears the release may occur around April 28, 2026, and I wanted to check if that timeline is still accurate or if there have been any updates to the schedule. Additionally, could you please

confirm the anticipated contract **vehicle** and whether the competition type has been determined?

Government Response: The Government is currently conducting market research to finalize its acquisition strategy and appreciates industry's interest.

Any previously stated RFP release date is no longer accurate. The Government anticipates releasing the final Request for Proposal (RFP) **in or around August 2026**. Interested parties should continue to monitor SAM.gov for the official announcement.

The competition type (e.g., small business set-aside, full and open competition) and contract type has not yet been determined. The results of this market research will be a factor in making that final determination. The competition type will be specified at the time of the RFP release.

Industry Questions to RFI are now closed.
