

Sources Sought Notification/Pre-Solicitation Notice

Title: Synar AML Reclamation

Announcement Number: 140S0326B0002

Bureau: Office of Surface Mining Reclamation and Enforcement (OSMRE)

Response Date: 04/06/2026

I. DISCLAIMER

This is a combined **Pre-Solicitation/Sources Sought Notification (SSN)** notice issued in accordance with FAR 10 & FAR 36 to conduct market research. This Notice is issued solely for information and planning purposes – it does not constitute an Invitation for Bid (IFB) or Request for Proposal (RFP) or a promise to issue an RFB/RFP in the future.

The Government will not pay any costs incurred in the preparation of information for responding to this market survey or the Government's use of the information. Any information submitted by respondents to this Notice is strictly voluntary. All submissions become Government property and will not be returned. This request for information does not commit the Government to contract for any supply or service whatsoever.

The Office of Surface Mining Reclamation and Enforcement (OSMRE) is not, at the time, seeking proposals or quotes and will not accept unsolicited proposals or quotes. No drawings, specifications, or solicitation documents are available at this time. Not responding to this Notice does not preclude participation in any future procurements.

II. PURPOSE

The OSMRE is seeking a construction vendor to complete the Synar AML Reclamation. The purpose of this Notice is to identify potential vendors capable of providing AML Reclamation construction services that can accomplish the full reclamation of an emergency AML site in Rogers County, OK. This action is critical for the protection of public health, safety, and property from extreme danger of adverse effects of coal mining practices, including when an emergency exists constituting a danger to the public health, safety, or general welfare. If not awarded, the residents of Oklahoma are at risk of imminent harm. Pursuant to the Supreme Court decision in *McGirt v. Oklahoma*, OSMRE is charged with enforcing SMCRA on Tribal lands within Oklahoma.

In support of this effort, OSMRE is conducting market research to further refine requirements and establish the best acquisition approach. Please note that requirements defined to date may change before issuance of a final IFB/RFP.

III. REQUIREMENTS

The site is approximately 89 acres of spoils on site to grade and shape the site to conform to the adjacent topography maintaining the current overall flow of stormwater. The project will include eliminating the dangerous highwall and the hazardous water body.

IV. TENTATIVE SCHEDULE

Solicitation Issue: on or before 04/06/2026

Pre Proposal/Bid Site Visit: 04/09/2026 @ 10am (location will provided with solicitation)
