

RFI – HQ AFRC Architect-Engineer Facilities Support and Environmental Services

Q & A – Set 1

1. Question: The SAM information indicates there are 16 questions, but I was only able to see 13 questions prior to the Submission button. I wanted to confirm that there are only 13 questions to be answered?

Answer: The total number of questions is 13.

2. Question: Is the HQ AFRC Architect-Engineer Facilities Support and Environmental Services--FA664326_0003 in addition to, or replacement for the HQ AFRC A-E MATOC, W912QR25R0029, which is in source selection?

Answer: The US Army Corps of Engineers (USACE) Louisville District is currently soliciting an A-E IDIQ for HQ AFRC programs at this time (W912QR25R0029). This USACE IDIQ will include design of MILCON projects and large, more complex FSRM projects. However, the HQ AFRC A-E IDIQ related to RFI FA664326_0003 will not include the capability to design MILCON projects and more complex projects.
