

SOURCES SOUGHT SYNOPSIS:

Module Text Fixture (MTF) Test, Teardown and Evaluate (TT&E) and To-Be-Negotiated (TBN) Repair

Solicitation Number:

TBD

Notice Type:

Sources Sought Synopsis

Synopsis:

1. NOTICE: This is not a solicitation but rather a Sources Sought Synopsis to determine potential sources for information and planning purposes only.
 - 1.1 The purpose of this Sources Sought is to conduct market research to assist in determining if this effort can be competitive and/or a total Small Business Set-Aside. THIS IS NOT A REQUEST FOR PROPOSAL (RFP). I The North American Industry Classification System (NAICS) Code is 334111, a corresponding category for manufacturing Computer Terminal and Peripheral Equipment (i.e. keyboards). The Government will use this information to determine the best acquisition strategy for this procurement. The Government is particularly interested in all small businesses to include 8(a), Service-Disabled Veteran-Owned, HUBZone, and Women-Owned small business concerns. The Government requests that interested parties respond to this notice if applicable and identify your small business status to the identified NAICS code. Additionally, please provide any anticipated integrators along with a description of similar manufactured items offered to the Government and to commercial customers for the past three years. Any responses involving teaming arrangements should delineate between the work that will be accomplished by any integrators and work accomplished by any/all teaming partners.
2. PROGRAM DETAILS: The requirement is for the inspection, repair, and testing of the Module Test Fixture (MTF), NSN: 6625-01-441-1608AH (Part number C007326-01). The MTF is part of the Nuclear Certification Test Station (NCTS). Nuclear Certification Test Station: which is the support equipment used for WSCC Weapon System Processor (WSP) certification/verification, and programming tasks at the missile wings. It performs three primary functions: Circuit Card Assembly (CCA) certification / verification, Programmable Read-Only Memory (PROM) programming and Weapon System Processor (WSP) drawer certification. The NCTS is used to certify and verify components of the Minuteman command and control system. The weapon system components that are capable of being certified or verified by the NCTS include the weapon system digital computer CP-2076(V)6/GSW, otherwise known as the Weapon System Processor (WSP), and three of its Circuit Card Assemblies (CCAs): the Single Module Computer 810 (SMC-810), the Extended Memory Array Dynamic (EMAD), and the asynchronous / synchronous serial interface (RMB32). The NCTS is also capable of programming the Programmable Read-Only Memories (PROMs) mounted on the Single Module Computer (SMC)-810.

The NCTS consists of the following items: the computer processor assembly, consisting

of a Personal Computer (PC) and the necessary PC operator peripherals; a dot matrix printer; the circuit card Module Test Fixture (MTF); the WSP Test Fixture (WTF); two system circuit cards, an SMC-810 and a RMB32; the cable kit; two portable Maintenance Work Platforms (MWP); and the Nuclear Certification Test Program (NCTP).

The NCTS is used to certify and verify components of the Minuteman command and control system. The weapon system components that are capable of being certified or verified by the NCTS include the WSP, and three of its Circuit Card Assemblies (CCA): the Single Module Computer 810 (SMC-810), the Extended Memory Array Dynamic (EMAD), and the asynchronous/synchronous serial interface (RMB32). The NCTS is also capable of programming the Programmable Read-Only Memories (PROM) mounted on the SMC-810.

The NCTS consists of the following items: the computer processor assembly, consisting of a Personal Computer (PC) and the necessary PC operator peripherals; a dot matrix printer; the circuit card Module Test Fixture (MTF); the WSP Test Fixture (WTF); two system circuit cards, an SMC-810 and a RMB32; the cable kit; two portable Maintenance Work Platforms (MWP); and uses the Nuclear Certification Test Program (NCTP) software. After power application and initialization of the NCTS, the operator selects the function(s) to be performed. Then the NCTS, under direction of the NCTP, initiates function(s), returns status indications, requests inputs, and returns pass/fail responses to the operator. The S-133-32102 Part II Acceptance Test Requirements define specific functional requirements of the WSP and its individual components. The NCTS T.O. 33D9-54-100-1 is an operational set of instructions on how to set up and operate the NCTS testing equipment and test procedures. The NCTS T.O. does not go into depth on the tests being performed by the NCTP software and cannot be compared to the acceptance testing requirements of the S-133-32102 Part II document.

3. THERE IS NO SOLICITATION AT THIS TIME.

This request for capability information does not constitute a request for proposals; submission of any information in response to this market survey is purely voluntary; the government assumes no financial responsibility for any costs incurred.

4. LIMITATIONS: The government does not have the complete technical data package including all drawings, specifications, repair procedures and qualification test

procedures or the associated data rights but has limited data as it pertains to the source-controlled drawing.

Any firm that believes it can meet the specifications above and demonstrate prior experience with MTF and NCTS technical data package procedures, nuclear hardness, nuclear certified items, and performing testing IAW the qualification test procedures or show how they can obtain required qualification approvals.

5. Submission Instructions: Both large and small businesses are encouraged to participate in this Market Research. Your answers will assist in determining the best acquisition strategies for this requirement.

If, after reviewing these documents, you desire to participate in the market research and your organization has the potential capacity to perform these contract requirements, please provide the following information below in the contractor capability survey as well as tailored capability statements addressing the particulars of this effort, with appropriate documentation supporting claims of organizational and staff capability. If significant subcontracting or teaming is anticipated to deliver technical capability, organizations should address the administrative and management structure of such arrangements.

QUESTIONS TO CONTRACTORS

Your answers are intended to be used to refine the RFP, enhancing selection criteria that ensure the correct set-aside (if any) is used to fully promote competition. To ensure that your answers can influence this acquisition, please submit your responses no later than **25 March 2026** end of business day.

Name of Company: _____

Physical Address: _____

Mailing Address: _____

Point of Contact: _____
(Name and Title)

Phone Number: _____

Fax Number: _____

Email Address: _____

Company Website: _____

DUNS Number: _____

CAGE Code: _____

*Socio-Economic Size Status: _____ Large Business
_____ Small Business (check all that apply)
_____ Small Disadvantaged Business
_____ Certified 8A Program Participant
_____ Woman-Owned Small Business
_____ HUBZone Small Business
_____ Veteran-Owned Small Business
_____ Service-Disabled Veteran-Owned
_____ Small Business
_____ Ability One Provider

Feel free to add additional lines for your responses below, if necessary, but please do not exceed 1 page. Typed responses are greatly encouraged.

1. Briefly describe your company's primary business line(s). Also, describe the services your company provides and your company's primary customer base.

2. A statement as to whether your company is domestically or foreign owned (if foreign, please indicate the country of ownership).

3. Are you interested in submitting a proposal to accomplish this work (high, medium, low)? Negative responses are encouraged.

4. If you are not interested, why?

5. Based on the magnitude of this requirement, can you perform 50% of the work with your own employees? (If not, please explain)

6. The NAICS code associated with this acquisition is 334111. Please identify your business' size standard and socioeconomic status under this specific NAICS (i.e. Small Disadvantaged Business, HUBZone, etc).

7. Does your company have experience in working with and overseeing DoD contracts?

8. Describe your company's to-date experience inspecting, repairing, and testing MTFs and any changes you foresee?

SUMMARY/PCO INFORMATION

To recap, interested offers should send a response to the questions listed above to the Buyer, Justin Raleigh. Responses to the above questions must be submitted no later than **25 March 2026**, end of business day.

Buyer: Justin Raleigh

Email: justin.raleigh.1@us.af.mil

Responses to this notice are not offers and cannot be accepted by the Government to form a binding contract. This request for capability information does not constitute a request for proposals; submission of any information in response to this market survey is purely voluntary; the government assumes no financial responsibility for any costs incurred. Offerors are advised that only Contracting Officers are authorized to commit the government to the obligation of funds.
