

ABERDEEN PROVING GROUND ADVANCED PLANNING BRIEFING TO INDUSTRY (APBI)

**U.S. Army Combat Capabilities Development Command
(DEVCOM) C5ISR Center**

**MS. BETH FERRY
DIRECTOR**

21 April 2026

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

WHO WE ARE

C5ISR Center Director
BETH FERRY

Executive Director
DONALD REAGO

Principal Deputy Director
RICHARD NABORS

Senior Research Scientists (STs):
JEFFREY BOKSINER **JASON ZEIBEL**

**Research and Technology
Integration (RTI) Directorate**

**Soldier & Platform
Mission Equipment**

Assistant Director
JAMI DAVIS

Air and Ground Imaging Sensors
Counter Explosive and
Obstacle Payloads
Positioning, Navigation and
Timing

**Spectrum Dominance,
Intelligence and Survivability**

Assistant Director
GIORGIO BERTOLI

Cyber Electromagnetic Activity
Electronic Warfare Survivability
Intel
Radar

**EOIR Sensors, Modeling,
Processing and Power**

Assistant Director
MICHAEL GROENERT

Electro-Optic Components
Power
Sensor Evaluation and Digital
Prototyping
Image Processing Technology

**Engineering and Systems
Integration (ESI) Directorate**

Executive Director
MIKE DICKERSON (A)

Principal Deputy Director
AL VISCONTI

Senior Research Scientist (ST):
ROBERT KIMBALL

**C-UAS, Integration and
Experimentation**

Assistant Director
ADRIENNE HUGHES

C5ISR Experimentation
Air Integration and Engineering
C5ISR Prototype Integration and
Fabrication
C-UAS and Threat Exploitation

**Networking and
Communications**

Assistant Director
DAN DUVAK

Tactical Networking
Satellite Communications
Terrestrial Communications
Cyber Security
Command and Control

**Readiness and Rapid
Capabilities**

Assistant Director
RICK SULLIVAN (A)

Readiness Enablers & Technology
Tactical Intelligence Sensors
C3N Acquisition and Readiness
Soldier, Avionics & Strategic Sys.
SIGINT / QRC

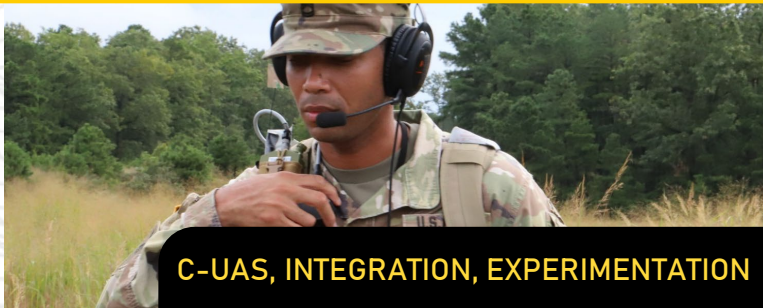

ESI TECHNOLOGY INTERESTS

ENGINEERING & SYSTEMS INTEGRATION (ESI) DIRECTORATE

LAB AND FIELD-BASED EXPERIMENTATION AND LIFECYCLE ENGINEERING

- Brings together the full lifecycle of efforts within a related portfolio area.
- This synergy, which runs from basic research through technology maturation and post-production support, provides an improved systems engineering perspective earlier in the research phase of capability development.

C-UAS, INTEGRATION, EXPERIMENTATION

LAB AND FIELD-BASED RISK REDUCTION & PROTOTYPING AND PLATFORM INTEGRATION

- C-UAS & Emerging Threat Solutions
- Platform Integration (Air & Ground)
- Experimentation (Lab & Field-Based)
- Project Engineering
- Network Architectures
- Modeling & Simulation/Data Collection
- Environmental Testing

NETWORK AND COMMUNICATIONS

COMMUNICATES DATA AND INFORMATION ACROSS A ROBUST TACTICAL NETWORK TO THE TACTICAL EDGE

- Enhanced Automated PACE
- Robust and Resilient Communications
- Defensive Cyber Technologies for Identity Management and Zero Trust
- Cyber and Transport Systems Ready for Quantum-Enabled Future
- Data Centric Analytics, Intelligence, & Decision Making
- Cloud and DevSecOps Technologies for Tactical
- Systems Architecture and Infrastructure

READINESS & RAPID CAPABILITIES

ADDRESSES THE OPERATIONAL READINESS NEEDS OF ARMY C5ISR SYSTEMS

- Military System Prototyping
- Technology Characterization & Replication
- Vulnerability & Threat Assessments
- Sustainment Engineering
- Advanced/Additive Manufacturing
- Predictive Logistics
- Configuration Management
- Industrial Base / Supply Chain
- Software Sustainment

RTI TECHNOLOGY INTERESTS

RESEARCH & TECHNOLOGY INTEGRATION (RTI) DIRECTORATE

PORTFOLIOS ENABLING WARFIGHTERS TO ENGAGE, DECIDE AND ACT WITH IMPROVED SITUATIONAL AWARENESS, SURVIVABILITY AND EFFECTS VIA TECHNOLOGY INNOVATIONS IN:

- Superior Sensing
- Information Processing
- Offensive Cyber
- Power
- Electronic Warfare
- Assured Position Navigation & Timing (APNT)

SOLDIER & PLATFORM MISSION EQUIPMENT

TECHNOLOGY RESEARCH, DEVELOPMENT, AND MATURATION OF SENSOR SYSTEMS AND SUBSYSTEMS FOR INNOVATIVE CAPABILITY ENHANCEMENTS IN LETHALITY AND MOBILITY

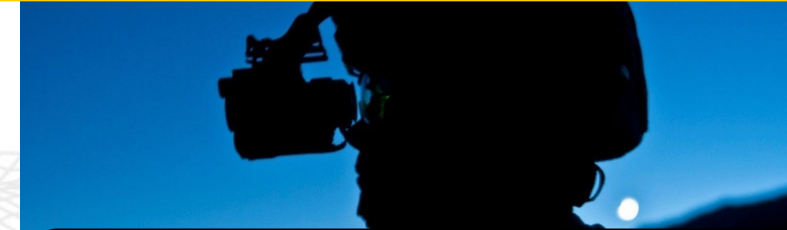

- Target Acquisition
- Air/Launched Effects (ALE) Payloads
- Situational Awareness (SA) Enhancements
- Integrated Systems
- Spectral Sensors
- Positioning, Navigation and Timing (PNT)
- NAVWAR
- Countermine Technologies

SPECTRUM DOMINANCE, INTELLIGENCE & SURVIVABILITY

HELPS WARFIGHTERS BETTER COMPREHEND THEIR SPACE AND DETECT THREATS ACROSS THE CYBER AND ELECTROMAGNETIC ACTIVITIES (CEMA) SPECTRUM

- Waveforms
- Electronic Warfare
- Hardware and Software Modeling and Simulation
- Cyber
- Radio frequency (RF) Receivers
- CMOS
- Electronically Steered Arrays

EOIR SENSORS, MODELING, PROCESSING & POWER

FOCUSES S&T INVESTMENTS TO ACHIEVE THE GREATEST BENEFIT FOR THE ARMY

- Advanced Uncooled Longwave Infrared (LWIR)
- Virtual Prototyping
- Advanced Aided Target Recognition (AiTR)
- Enhanced Soldier Power Storage
- Operational Power Management
- 4th GEN Sensing
- Advanced Power Generation & Management

SAVE THE DATE

C5ISR CENTER INDUSTRY EXPO 25

August 25-26, APG

Day 1: “Big Problems” Presentations (Myer Auditorium)
Perceived gaps, technology roadmaps, and investment areas

Day 2: C5ISR “Expo Booths” (APG Rec Center)
Symposium style format to facilitate dialogue, with booths representing each technology area across the C5ISR Center.

Check out SAM.gov and C5ISR Center social media for additional information and registration instructions.

ENGINEERING AND SYSTEMS INTEGRATION (ESI) DIRECTORATE

LAB AND FIELD-BASED EXPERIMENTATION AND LIFECYCLE ENGINEERING

- Brings together the full lifecycle of efforts within a related portfolio area.
- This synergy, which runs from basic research through technology maturation and post-production support, provides an improved systems engineering perspective earlier in the research phase of capability development.

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

ESI STRATEGIC INITIATIVES

READINESS & RAPID CAPABILITIES

Initiatives:

- Advance Systems Sustainment Supportability Engineering and Systems Engineering
- Enhance Design and Manufacturing Engineering for improved system performance and reliability
- Improve Production/Manufacturing Readiness Assessment and Quality Assurance efforts
- Develop innovative solutions for Systems Modifications and Counterfeit Component Mitigation
- Enhance Maintenance and Sustainment Engineering capabilities for extended System life
- Advance Test Engineering and Evaluation methodologies for more effective system testing
- Develop Long-Range Sensing Capabilities leveraging high sensitivity receivers

Challenges:

- Ensuring the readiness and resilience of the Industrial Base and Development/Review of Industrial Base Standards and addressing the complexities of DMSMS/Obsolescence.
- Managing the risks associated with Counterfeit Supply Chain Components and Systems' Components and Spares Parts Redesign & Reverse Engineering

We are seeking technical/support professionals to drive sustainment by directing resources within DoD, academia and small businesses within the Defense Industrial Base, while procuring consumables for applied RDT&E.

ESI STRATEGIC INITIATIVES

C-UAS, INTEGRATION, & EXPERIMENTATION

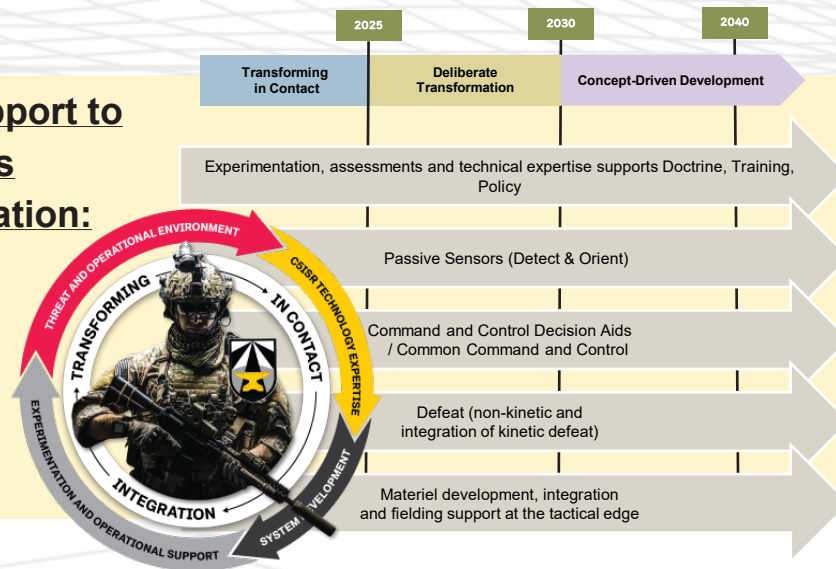

Ground Integration:

- **Primary business area** remains C5ISR terrestrial platform integration in support of the local PEOs/PMs.
- **Forecasted growth area** is similar Prototype Integration Facility (PIF) work but focused on Foreign Military Sales customers.
 - ✓ Through Test Service Agreements (TSA) the PIF can offer environmental testing and engineering services to ensure that systems and components survive the harsh tactical environment by evaluating and ruggedizing these items to meet their intended operating and storage environments.

Air Integration:

- **Traditional focus area** remains integration onto fixed/rotary winged platforms.
- **New addition** of a first-of-its-kind for C5ISR Center C-20E/Gulfstream G-III aircraft for payload integration, capable of achieving altitudes of up to 45,000 feet.
 - ✓ This capability can be offered to Industry through Other Transaction Authority (OTA), Test Service Agreement (TSA) or a Cooperative Research and Development Agreement (CRADA). Airborne C5ISR experimentation can be accomplished via C5ISR Center's Government Owned Government Operated (GOGO) aircraft with U.S. Army Airworthiness Release (AWR) authority available to/for your unique payload

C-UXS Support to Continuous Transformation:

Desired LVC Capabilities:

- Experiment Orchestration and Monitoring Tools
- Hardware Network Emulation Capabilities
- Lower-cost Digital RF Matrix Technology
- Threat-Informed Simulation / RF Simulation
- Realtime Data Collection, Reduction and Analysis Tools
- Experimentation Backhaul Capabilities

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

ESI STRATEGIC INITIATIVES

NETWORK AND COMMUNICATIONS (N&C)

C5 Unified Cloud (C5UC):

- Containerized micro-service architecture
 - ✓ *Example Use Case: Next Generation Command and Control (NGC2)*

Resilient Communication:

- Spectrally agile broadband multi-waveform radios
 - ✓ *Example Use Case: Next increment Human Machine Integrated Formation (HMIF)*

Tactical Zero Trust:

- Data in-use encryption; Safe – Security Orchestration, Automation, and Response (Safe – SOAR); Non-person entity access control
 - ✓ *Example Use Case: Innovative zero trust solutions for the tactical environment*

Predictive Intelligent Networking (PIN):

- Predictive decision engine, paired with smart routing
 - ✓ *Example Use Case: All Army networks, including NGC2 and HMIF*

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

ESI FY26 APBI UPDATE SINCE FY25 APBI

TOTAL ACTIONS BRIEFED FY25 APBI: 8

RFPs RELEASED: 7

ACTIONS AWARDED: 7

STRATEGY CHANGES: 'ESI Operations Support 4' was cancelled

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

ESI CONTRACT OPPORTUNITIES

Effort Title	Vehicle	Estimated Value	Estimated RFP Release
Defensive Cyber Operations II	RS3	\$600M - \$620M	3QFY26
Counter-UAS & Emerging Threats Solutions (CETS) Professional Services	RS3	\$175M - \$190M	3QFY26
Modeling and Simulation Systems Engineering (MSSE)	RS3	\$590M - \$600M	2QFY26
Future-Oriented Resilience and Capability Engineering (FORCE)	RS3	\$85M - \$95M	3QFY26
ESI Broad Agency Announcement (BAA)	BAA	N/A	Open thru 01 Nov 2027

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

DEFENSIVE CYBER OPERATIONS II

DESCRIPTION: The objective is to address today's cyber threats by designing and deploying game-changing cyber defense capabilities that allow organizations to defend better, react faster, coordinate rapidly, prioritize efforts, and respond smarter to security events, increased risks, and/or operational directives. This contract will continue to advance and further the cyber research mission by conducting research and developing solutions to enhance the dynamic cyber-defense domain through operational provisioning of 24/7 cyber defense operations and services within the DoD Information Network (DoDIN) environment.

CONTRACT TYPE and CONTRACT VEHICLE: CPFF; RS3 Task Order

ESTIMATED VALUE: \$600M - \$620M

CONTRACTING CONTACT: ACC-APG Division A; KO Nina Bushnell

DRAFT SOLICITATION RELEASE: 2QFY26

SOLICITATION #: TBD

ESTIMATED SOLICITATION RELEASE DATE: 3QFY26

PRIOR/CURRENT CONTRACT INFORMATION:

Contract Number: 47QTCK18D0008/W56KGU20F0017

Incumbent Contractor: Leidos

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

COUNTER-UAS & EMERGING THREATS SOLUTIONS (CETS) PROFESSIONAL SERVICES

DESCRIPTION: C5ISR Center requires engineering support services related to Counter-UAS which includes the areas of administration, technical writing, program analytics, data administration, logistics, procurement, information technology, information assurance, strategy development, and project engineering. Additional services include; information exchanges, training, and program management support services to develop material and non-material solutions to detect, counter, and defeat principally commercial based electronic materials and communications technology associated with Uncrewed Systems (UxS).

CONTRACT TYPE and CONTRACT VEHICLE: CPFF, RS3 Task Order

ESTIMATED VALUE: \$175M - \$190M

CONTRACTING CONTACT: ACC-APG Division A, KO Mr. Nicholas Martin

DRAFT SOLICITATION RELEASE: 2QFY26

SOLICITATION #: TBD

ESTIMATED SOLICITATION RELEASE DATE: 3QFY26

PRIOR/CURRENT CONTRACT INFORMATION:)

Contract Number: N/A

Incumbent Contractor: N/A

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

MODELING AND SIMULATION SYSTEMS ENGINEERING (MSSE)

DESCRIPTION: This effort provides engineering services to support basic research, engineering, and operational systems development. This effort is directed towards supporting systems-of-systems (SoS) systems engineering, live/virtual/constructive (LVC) modeling and simulation (M&S), and multi-domain operations (MDO) analysis. The goal is to develop and utilize M&S to research, develop, and mature C5ISR systems, ensuring warfighter readiness and future capabilities are realized in collaboration with Joint Service agencies, other Government agencies, and industry.

CONTRACT TYPE AND CONTRACT VEHICLE: CPFF; RS3 Task Order

ESTIMATED VALUE: \$590M - \$600M

CONTRACTING CONTACT: ACC-APG Division A, KO: Anh Pena

DRAFT SOLICITATION RELEASE: 2QFY26

SOLICITATION #: RS3-26-0006

ESTIMATED SOLICITATION RELEASE DATE: 2QFY26

PRIOR/CURRENT CONTRACT INFORMATION:

Contract Number: W8SFN-22-F-Z005 (SEC) & W31P4Q-21-F-0057 (Collateral)

Incumbent Contractor: SAIC

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

FUTURE-ORIENTED RESILIENCE AND CAPABILITY ENGINEERING (FORCE)

DESCRIPTION: This action procures support services to provide the C5ISR Center with Engineering and Technical Support (ETS) for production/manufacturing and sustainment engineering, testing, and product quality assurance efforts for various Communications-Electronics (C-E), Intelligence Warfare (IW), Sensors, and Intelligence Operations (IO) weapon systems and associated equipment. This contract also procures engineering services for product prototype development and fabrication necessary to support and execute the C5ISR Center's mission and its Federal and non-Federal Government partners through individual tasks.

CONTRACT TYPE and CONTRACT VEHICLE: CPFF; RS3 Task Order

ESTIMATED VALUE: \$85M - \$95M

CONTRACTING CONTACT: ACC-APG Division A; KO Brian McGuire

DRAFT SOLICITATION RELEASE: 2QFY26

SOLICITATION #: TBD

ESTIMATED SOLICITATION RELEASE DATE: 3QFY26

PRIOR/CURRENT CONTRACT INFORMATION:

Contract Number: W15P7T-19-D-0026/W56KGY-21-F-0209

Incumbent Contractor: Envision Innovative Solutions

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

C5ISR CENTER ESI DIRECTORATE BROAD AGENCY ANNOUNCEMENT (BAA)

DESCRIPTION: BAA for solicitation of innovative science and technology (S&T) proposals that address the technical portfolio areas of the ESI directorate to develop and integrate command, control, communications, computers, cyber, intelligence, surveillance and reconnaissance (C5ISR) technologies.

CONTRACT TYPE and CONTRACT VEHICLE: Hybrid BAA combining elements of an open, two-step, and with calls for White Paper (WP). Potential awards may take the form of FAR-based instrument or Non-FAR based instrument (Other Transaction Agreement)

ESTIMATED VALUE: Award value may vary by individual contract or OTA

CONTRACTING CONTACT: ACC-APG, Division A; KO will be assigned to each respective action

SOLICITATION #: W56KGU-23-R-ESID

SOLICITATION DATE: Proposal acceptance through 01 November 2027

CALL FOR WHITE PAPERS – None active or projected currently

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

RESEARCH AND TECHNOLOGY INTEGRATION (RTI) DIRECTORATE

ALL PORTFOLIOS DELIVERING SCIENCE & TECHNOLOGY

Prioritizes S&T programs that are:

- Innovative.
- Relevant to what the customer needs.
- Structured to produce outputs that we can give to Soldiers for experimentation.
- Designed to produce technologies - through industry partners - that our acquisition partners can take into further development.

RTI CORE COMPETENCIES

INFORMATION PROCESSING & ANALYSIS

- Data Collection, Analysis and Processing
- Artificial Intelligence
- Systems Modeling
- Virtual Prototyping

CYBER

- Cyberspace Effects
- Cyber System Engineering

POWER & ENERGY

- Operational Energy
- Power and Energy Sustainment
- Energy Storage
- Power Generation, Management and Distribution
- Thermal Management

RADIO FREQUENCY

- RF Photonics
- Antennas
- Software Defined Radio
- Waveforms
- ATR Algorithm Development

ELECTRO-OPTIC INFRARED

- Lasers
- Photodiode Growth and Characterization
- Focal Plane Array Characterization
- EO/IR System Level Test and Evaluation
- Microelectronics for Imaging Systems

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

RTI FY26 APBI UPDATE SINCE FY25 APBI

TOTAL ACTIONS BRIEFED FY25 APBI: 8

RFPs RELEASED: 7

ACTIONS AWARDED: 6

STRATEGY CHANGES:

– NSTR

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

RTI CONTRACT OPPORTUNITIES

Effort Title	Vehicle	Estimated Value	Estimated RFP Release
Humanitarian Demining (HD)	RS3	\$80M - \$90M	3QFY26
Fort Belvoir Area 300 Compound Partner and Operational Project Support	RS3	\$25M - \$30M	3QFY26
RTI Broad Agency Announcement (BAA)	BAA	N/A	Open thru 01 Nov 2027
Sensors, Communications, and Electronics Consortium (SCEC) OTA	OTA	N/A	N/A

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

HUMANITARIAN DEMINING (HD)

DESCRIPTION: C5ISR Center, Research and Technology Integration (RTI) Directorate has a need for engineering, development, technical testing, and evaluation support to enable new and existing military and humanitarian demining (HD) detection and mechanical technologies in support of worldwide demining operations. This effort focuses on the development and deployment of technologies to detect and clear landmines and unexploded ordnance (UXO), drawing on expertise in industry, academia, foreign countries, the United Nations, non-governmental organizations (NGOs) and other government agencies to determine critical equipment capability gaps for post-conflict landmine and UXO detection and clearance.

CONTRACT TYPE and CONTRACT VEHICLE: CPFF/ Task Order RS3

ESTIMATED VALUE: \$80M - 90M

CONTRACTING CONTACT: ACC-APG Division A, KO: Ms. Ashley Howard

DRAFT SOLICITATION RELEASE: 3QFY26

SOLICITATION #: RS3-26-0016

ESTIMATED SOLICITATION RELEASE DATE: 3QFY26

PRIOR/CURRENT CONTRACT INFORMATION:

Contract Number: W15P7T-19-D-0038/W909MY22F0086

Incumbent Contractor: Fibertek, Inc.

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

FORT BELVOIR AREA 300 COMPOUND PARTNER AND OPERATIONAL PROJECT SUPPORT

DESCRIPTION: Facilities support to the partners of the C5ISR Research and Technology Integration Directorate managed Fort Belvoir Area 300 Compound partners to include laboratory refurbishment and access protection support

CONTRACT TYPE and CONTRACT VEHICLE: CPFF / RS3

ESTIMATED VALUE: \$25M - \$30M

CONTRACTING CONTACT: ACC-APG Div A, KO: TBD

DRAFT SOLICITATION RELEASE: 3QFY26

SOLICITATION #: TBD

ESTIMATED SOLICITATION RELEASE DATE: 3QFY26

PRIOR/CURRENT CONTRACT INFORMATION:

Contract Number: W15P7T-19-D-0038/W56KGU24F0007

Incumbent Contractor: Fibertek, Inc.

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

C5ISR CENTER RTI DIRECTORATE BROAD AGENCY ANNOUNCEMENT (BAA)

DESCRIPTION: BAA for solicitation of innovative science and technology proposals that support the C5ISR Center, Research and Technology Integration (RTI) Directorate in the research, development and integration of command, control, communications, computers, cyber, intelligence, surveillance and reconnaissance (C5ISR) technologies that improve Warfighter lethality, maneuverability and survivability in all operational environments.

CONTRACT TYPE and CONTRACT VEHICLE: Hybrid BAA combining elements of an open, two-step, and with calls for White Paper (WP). Potential awards may take the form of FAR-based instrument or Non-FAR based instrument (Other Transaction Agreement)

ESTIMATED VALUE: Award value may vary by individual contract or OTA

CONTRACTING CONTACT: ACC-APG, Division A; KO/AO will be assigned to each respective action

SOLICITATION #: W56KGU-23-R-RTID

SOLICITATION DATE: Proposal acceptance through 01 November 2027

WHITE PAPER (WP) CALLS ISSUED: 13 WP Calls issued since BAA release on Nov 2022

WHITE PAPER SUBMISSIONS RECEIVED: 57 WP received, 21 selected for award negotiations

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."

SENSORS, COMMUNICATIONS, AND ELECTRONICS CONSORTIUM (SCEC) OTA

DESCRIPTION: Vehicle enabling C5ISR Center and its partners to reach Non-traditional Defense Contractors and Traditional Defense contractors with capabilities to conduct research, development, and testing in cooperation with the Government leading to technology demonstrations and prototype projects in the sensors, communications and electronics sciences and other related fields to maintain and improve warfighter command, control, communications, computer, intelligence, surveillance and reconnaissance capabilities in complex environments.

CONTRACT TYPE and CONTRACT VEHICLE: Other Transaction Agreement (OTA) with subordinate Prototype Project Agreements (PPAs)

AGREEMENT #: W909MY-18-9-0001

CONTRACTING CONTACT: ACC-APG Division A, AO Assigned for Each Individual Action

PROGRAM MANAGEMENT: C5ISR Center, Research & Technology Integration Directorate, Ms. Stephanie Yohey, stephanie.p.yohey.civ@army.mil

SCEC CONSORTIUM MANAGER: SOSSEC, Inc. Mr. John Nunziato, jnunziato@sossecinc.com; 603-458-5529 (please contact Mr. Nunziato to join SCEC)

"The forecast data is for planning purposes, does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the government to purchase the desired products and services."
