Contractor support is required to address component obsolescence avoidance issues of the Solid-State Relay Module, keycode UR6, CCAs as well as to assemble and deliver forty (40) circuit card assemblies.

The Government's minimum needs have been verified by the certifying technical and requirements personnel. This memo does not authorize acquisition for other requirements. This acquisition will be conducted using simplified acquisition procedures with a total dollar value above micro-purchase levels, but not exceeding the simplified acquisition threshold of \$350,000.00.

4. Identification of the justification rationale and, if applicable, a demonstration of the proposed contractor's unique qualifications to provide the required supply or service. 10 U.S.C. 2304(c)(1), 10 U.S.C. 2304(d)(1)(B). Pursuant to 10 U.S.C. 2304(c)(1), IPS Incorporated personnel developed the procedures and techniques for production, upgrading, and testing the AN/SQQ-32 (V) UR6 Circuit Cards. IPS personnel were trained to repair and test the legacy Circuit Cards by the Original Equipment Manufacturer. IPS is the only company with the in-house resident knowledge to address component obsolescence avoidance issues of the Solid-State Relay Module, Key Code UR6, CCAs as well as to assemble and deliver forty (40) circuit card assemblies. These assemblies are a vital component of the AN/SQQ-32(V) Towed Body Sonar aboard Avenger Class combat ships.

In summary, no other contractor will be able to duplicate the knowledge and processes. Therefore, it is in the Governments' best interest to award on a sole source basis to IPS Incorporated.
